CALL FOR PHOTOS

Dear Delegate,

CMS is eager to enhance its outreach by means of high quality photos showing the species we help to conserve. Buying these photos from professional photographers or agencies is beyond the means of the Convention. But many organisations, departments and individuals busy in conservation have excellent and touching photos of migratory animals and their habitats.

Do you have high-resolution photos of species listed on Appendix I or II of CMS, for example of one of the many migratory birds?

Do you have full rights to these photos and would you authorize CMS to use them for any printed information materials and the CMS website?

Are you willing and able to send photos of our species? It would be a much-appreciated contribution to the work of the Convention on Migratory Species! CMS will of course respect the photo credits.

If you have photos you would like to pass on to CMS, please give them (either by email or on CD) with the name of the species and the copyright information to:
