Statements of Non-Parties .......................................................................................... 533
Statements of Observer Organizations ........................................................................ 539

**Part III**

National Reports of Parties on the Implementation of the Convention ............. available on CMS Website
INTRODUCTION

1. At the invitation of the Government of Ecuador, the 11th Meeting of the Conference of the Parties to the Convention on the Conservation of Migratory Species of Wild Animals (CMS COP11) was held in Quito, Ecuador, from 4 to 9 November 2014. “Time for Action” was the driving theme of COP11. The Conference was immediately preceded by a High Level Ministerial Panel.

2. High Level Ministerial Panel: For the first time before a COP, a High Level Ministerial Panel was held on Monday, 3 November 2014 (1300 to 1600 hrs.) and was presided over by H.E. Ms. Lorena Tapia, the Environment Minister of Ecuador. The concept for this ministerial dialogue was “Green Economy” and the “Rights of Nature”. The concept note for the event is annexed to this Report. This event, facilitated by leading experts, was open to all COP participants. The Statement of the Chair of the High Level Ministerial Panel is annexed to this report.

3. The Conference was attended by representatives of the following 63 Parties and 5 non-Parties.

Parties: Argentina, Armenia, Australia, Austria, Belarus, Belgium, Benin, Bolivia (Plurinational State of), Bulgaria, Cabo Verde, Chile, Costa Rica, Croatia, Czech Republic, Ecuador, Egypt, Estonia, Ethiopia, European Union, Fiji, Finland, France, Gabon, Georgia, Germany, Ghana, Honduras, Israel, Italy, Kenya, Kyrgyzstan, Latvia, Luxembourg, Mauritius, Monaco, Mongolia, Morocco, Mozambique, Netherlands, New Zealand, Norway, Pakistan, Panama, Paraguay, Peru, Philippines, Poland, Portugal, Republic of Moldova, Senegal, South Africa, Spain, Sweden, Switzerland, Tajikistan, Togo, Tunisia, Uganda, Ukraine, United Kingdom, United Republic of Tanzania, Uruguay, Zimbabwe

Non-Parties: Brazil, Canada, Iraq, United Arab Emirates, United States of America
4. Observers from governmental and non-governmental bodies or agencies were also represented. The complete list of participants appears in ANNEX IX to the present report.

I. OPENING OF THE MEETING AND ORGANIZATIONAL MATTERS

OPENING OF THE MEETING (ITEM 1)

5. The Opening Ceremony was held on Tuesday, 4 November. The Ceremony was divided into informal and formal segments.

Informal Opening Ceremony

6. The Informal Opening Ceremony was held between 1000 and 1130 hrs. and commenced with a short video welcoming participants to Ecuador, followed by inspiring and motivational presentations by three speakers. Ms. Ashlan Gorse Cousteau acted as Master of Ceremonies.

7. Presentations were made by:
   - Mr. Achmat Hassiem (South Africa) - a shark attack survivor and Paralympian Bronze Medallist, who was now a shark conservationist and advocate
   - Mr. Boyan Slat (Netherlands) - a campaigner and coordinator of an ambitious marine debris reduction programme
   - Mr. Philippe Cousteau (United States of America) - a leader in the environmental movement, and award-winning communicator and philanthropist

Formal High-level Opening Ceremony

8. The High-Level Opening Ceremony was held from 1130 to 1200 hrs. and was presided over by Mr. Alfred Oteng-Yeboah, Chair of the CMS Standing Committee.

WELCOMING ADDRESSES (ITEM 2)

KEYNOTE ADDRESS (ITEM 3)

9. Addresses were delivered by:
   - H.E. Ms. Lorena Tapia, Minister of the Environment, Ecuador
   - H.E. Ms. Tine Sundoft, Minister of Climate and Environment, Norway (by video)
   - H.E. Mr. Noël Nelson Messone, Minister of the Environment, Gabon
   - Ms. Elizabeth Mrema, Director of the UNEP Division of Environmental Law and Conventions
   - Mr. Achim Steiner, Executive Director of UNEP (by video)
   - Mr. John E. Scanlon, Secretary-General of CITES
   - Mr. Bradnee Chambers, Executive Secretary of CMS

RULES OF PROCEDURE (ITEM 4)

10. Items 4 and 5 of the Agenda were chaired by the Chair of the Standing Committee, Mr. Alfred Oteng-Yeboah (Ghana). He introduced the Rules of Procedure for the 11th
Meeting of the Conference of the Parties (UNEP/CMS/COP11/Doc.4: Rules of Procedure) and invited the Meeting to adopt them.

11. The representative of Uganda noted that there appeared to be a conflict between Rule 16 of the Rules of Procedure and Article 7.7 of the Convention text.

12. This observation was supported by the representatives of Israel, Egypt and Panama.

13. The representative of Uganda proposed that Rule 16 of the Rules of Procedure be amended to read: “Except where otherwise provided for under the provisions of the Convention, these Rules or the Terms of Reference for the Administration of the Trust Fund, all votes shall be decided by a two-thirds majority of votes cast.”

14. The Rules of Procedure for COP11, contained in Annex 1 to Doc.4, were adopted, subject to inclusion of the amendment proposed by Uganda and reproduced as ANNEX I to the present report. ANNEX II contains the Rules of Procedure for future meetings of the Conference of the Parties, endorsed for adoption at COP12.

15. Mr. Chris Wold (Secretariat) made further reference to document UNEP/CMS/COP11/Doc.4: Rules of Procedure, and explained in detail the consequences of proposed amendments contained in Annexes 2 and 3. If adopted, these amendments would be applied at future COPs.

16. The Chair confirmed that these proposed amendments would be further discussed in the Drafting Group (see Agenda Item 7: Establishment of Credentials Committee and Other Sessional Committees) but opened the floor for preliminary comments.

17. The representative of the EU and its Member States supported dealing with this Agenda Item in the Drafting Group. For consistency the EU would welcome an amendment to the Rules of Procedure stating that the credentials for EU delegates to CMS meetings could be signed by the European Commissioner for Environment.

18. The representative of New Zealand recalled that New Zealand had chaired the Standing Committee Working Group that had considered this issue. Thanks were due to all Parties that contributed, as well as to the Secretariat for its support and careful review. Many of the Secretariat’s proposals in Annex 3 to the document were minor ‘tidying-up’ amendments that were consistent with the Working Group’s intentions and New Zealand supported those. Others were more substantive and New Zealand therefore supported the proposal to take this Agenda Item forward in the Drafting Group and looked forward to being an active participant.

19. The Chair invited all those Parties and observers who wished to bring forward further comments or proposed amendments to participate in the Drafting Group discussion of this Agenda Item.

**ELECTION OF OFFICERS (ITEM 5)**

20. The Chair recalled that Rule 5 of the Rules of Procedure provided for the election of the Chair of the COP, the Chair of the Conference of the Whole (COW) who would also serve as Vice-Chair of the COP, and the Vice-Chair of the COW.
21. The Conference elected the following officers by acclamation:

Conference of the Parties (COP)
Chair: H.E. Ms. Lorena Tapia, Minister of Environment (Ecuador)
Vice-Chair: Mr. Øystein Størkersen (Norway)

Committee of the Whole (COW)
Chair: Mr. Øystein Størkersen (Norway)
Vice-Chair: Ms. Ndeye Sene Epouse Thiam (Senegal)

22. Taking her place on the podium, the Chair of the COP pledged to do her utmost to guide the Meeting in the best way possible in the pursuit of a successful outcome.

ADOPTION OF THE AGENDA AND MEETING SCHEDULE (ITEM 6)

Agenda and Documents (Item 6.1)
Annotated Agenda and Meeting Schedule (Item 6.2)

23. The Chair referred the Meeting to documents:

UNEP/CMS/COP11/Doc.6.1/Rev.2: Provisional Agenda and Documents
UNEP/CMS/COP11/Doc.6.2: Provisional Annotated Agenda and Meeting Schedule

24. There being no proposals for amendments, both documents were adopted by consensus.

25. The Agenda is attached as ANNEX III and the List of Documents as ANNEX IV to the present report.

ESTABLISHMENT OF CREDENTIALS COMMITTEE AND OTHER SESSIONAL COMMITTEES (ITEM 7)

(a) Credentials Committee, Bureau and Budget Committee

26. The Chair recalled that Rule 3 of the Rules of Procedure provided for the establishment of a Credentials Committee of five members. It had been common practice at CMS COPs for those five members to be drawn from each of the five regional groupings. She invited nominations accordingly.

27. The following Parties were elected to serve on the Credentials Committee:

Africa: Uganda
Asia: Pakistan
Europe: Italy
Latin America & Caribbean: Ecuador
Oceania: Philippines

28. The Chair recalled that the Chair and Vice Chair of the Committee of the Whole had been elected under Agenda Item 5.
29. The COP approved establishment of a six-member Bureau, in conformity with Rule 7 of the Rules of Procedure.

30. At the invitation of the Chair, the COP appointed South Africa to chair the COP Budget Committee. She noted that participation in the Budget Committee was open to all Parties.

(b) Sub-groups of the Committee of the Whole

31. During the first session of the Committee of the Whole (COW), the Chair suggested that a number of Working Groups would be necessary but that the number of groups and the topics to be covered would be up to delegates to decide.

32. Nevertheless, a number of aquatic and avian issues would be considered by the COW. The Chair asked whether delegates preferred to establish Working Groups immediately, stressing that he was not precluding debate in the COW, but that he wished to maximize opportunities for timely discussion.

33. In addition to possible thematic Working Groups, a Drafting Group, to be chaired by Mr. Oteng-Yeboah, would be open-ended; all delegates would be eligible to participate in this group.

34. The representative of Brazil proposed the establishment of Working Groups to discuss two resolutions that Brazil considered required amendment: Agenda Item 21.3 on relations between CMS and Civil Society, and Agenda Item 23.4.7 concerning Fighting Wildlife Crime Within and Beyond Borders.

35. The representative of Argentina, on behalf of the Latin America & Caribbean region, requested clarification concerning the scope of the Drafting Group (DG).

36. The Executive Secretary stated that the DG would work in parallel to the COW. The documents envisaged for consideration by the DG all relate to governance issues, notably those concerning Rules of Procedure; Synergies between CMS instruments and other MEAs; Restructuring of the Scientific Council; Arrangements for Meetings of the COP; Repeal of Resolutions and the Review Process (i.e. COP11 document numbers 4, 16.2, 17.1, 18.1, 18.2 and 18.3 respectively). Relations between Civil Society and the CMS could also be included to address the proposal of Brazil. The DG would take forward discussions only after they had first been raised in the COW, and would then report back to the COW, prior to final decision by the Plenary. The Budget Committee and other Working/Contact Groups would meet outside of the COW sessions (not in parallel with the COW).

37. The representative of Brazil responded that the only concern was that dealing with Draft Resolutions, only after they had been considered in the COW, would not allow much time for some issues.

38. The Chair instructed the Secretariat to bring forward COW consideration of Agenda Item 21.3 on Relations between CMS and Civil Society, and to inform the COW accordingly when this had been done.

39. The representative of Chile supported the proposal of the Chair to establish Working Groups on specific issues.
40. The Chair concluded that there was support from the COW to establish two Working Groups covering Aquatic Issues and Avian Issues respectively.

41. During the COP, regular updates were presented to the Committee of the Whole on the progress made by the Drafting Group and the two thematic Working Groups.

**ADMISSION OF OBSERVERS (ITEM 8)**

42. The Chair referred the Meeting to document UNEP/CMS/COP11/Doc.8: Admission of Observers.

43. The COP approved admission to the Meeting of all those observers listed in COP11/Doc.8.

**II. REPORTS**

**REPORT OF UNEP (ITEM 9)**

44. Expressing regret that this Agenda item was addressed towards the end of the Meeting, following the finalization of Draft Resolutions and other decisions, the representative of UNEP presented highlights of the UNEP’s report contained in document UNEP/CMS/COP11/Doc. 9: UNEP Report to the Conference of the Parties to the Convention on the Conservation of Migratory Species of Wild Animals at its 11th Meeting.

45. The Chair asked the representative of UNEP to pass on the Parties’ thanks to the Executive Director of UNEP.

**REPORTS AND RECOMMENDATIONS OF THE SUBSIDIARY BODIES OF THE CONVENTION (ITEM 10)**

**Standing Committee (Item 10.1)**

46. The Chair of the Standing Committee, Mr. Oteng-Yeboah (Ghana) recalled that the present Standing Committee had met for the first time in Bergen, Norway, on 25 November 2011, immediately following the close of COP10. This Meeting had dealt with a limited agenda, confined to election of officers and agreement of the date and venue for the first full intersessional meeting. Ghana had been honoured to be elected to succeed Saudi Arabia as Chair of the Standing Committee. Mr. Oteng-Yeboah wished to place on record his appreciation of the work accomplished by his predecessor, Mr. Mohammad Sulayem (Saudi Arabia), during the 2009-2011 triennium.

47. Three further meetings of the Standing Committee had taken place intersessionally:
   - 40th Meeting – November 2012, Bonn
   - 41st Meeting – November 2013, Bonn
   - 42nd Meeting – November 2014, Quito

48. The Committee had received regular reports from the Secretariat and Depository. Building on the Future Shape process led by Mr. Olivier Biber, the Standing Committee had
devoted significant attention to preparation of the draft Strategic Plan for Migratory Species to be considered by COP11. Particular thanks were due to Ms. Ines Verleye, Ms. Wendy Jackson and Mr. Dave Pritchard for all their work on the draft Strategic Plan. Among other activities, the Chair of the Scientific Council, Mr. Fernando Spina, had actively represented the interests of CMS in IPBES. The Saker Falcon Task Force had tackled a very difficult issue under the skilful leadership of Mr. Colin Galbraith. The Standing Committee had also dealt with a broad range of implementation issues such as bird poisoning, illegal trapping, marine debris, illegal elephant hunting and management of flyways; much of this work carried out through the CMS Agreements, MoUs and Special Species Initiatives.

49. Mr. Oteng-Yeboah noted that Mr. Bradnee Chambers had kept him apprised of a wide range of issues since being appointed to succeed Ms. Elizabeth Mrema as CMS Executive Secretary. He wished to pay tribute to Ms. Mrema for the tremendous support she had continued to give to the Standing Committee since she had left the CMS Secretariat. He also thanked the Standing Committee Vice-Chair, Mr. Øystein Størkersen (Norway), as well as the other members of the Committee for their unstinting support. He wished his successor as Standing Committee Chair all the very best as he or she took up the important task of leading CMS on its mission to conserve the world’s migratory species. We live in changing times; the road ahead would be long and hard, but with determination and mutual support, success was within reach. Mr. Oteng-Yeboah concluded by saying: “Roll up your sleeves, redouble your efforts, because it’s time for action!”

50. Reports of the 42nd and 43rd Meetings of the Standing Committee are attached as ANNEX V and ANNEX VI respectively to the present Report.

Scientific Council (Item 10.2)

51. The Chair of the CMS Scientific Council, Mr. Fernando Spina (Italy) made a presentation summarizing the activities of the Scientific Council between 2011 and 2014.

52. A number of Working Groups had been very active during the triennium and their work had been facilitated by promotion of the new online Scientific Council workspace. Much work had been done on development of the modus operandi of the Scientific Council. Mr. Spina drew attention to the work of the Saker Falcon Task Force, the Landbirds Working Group, the Working Group on Minimizing Poisoning, and work on the conservation implications of cetacean culture. Contacts with other MEAs had been maintained and he, in his role as Chair of the Scientific Council, had represented CMS at meetings of IPBES and the Bern Convention. Mr. Spina had secured funding from the Po Delta Regional Park for a restricted Scientific Council Meeting to be held in Venice, in February/March 2015. The 18th Scientific Council Meeting, held in Bonn from 1-3 July 2014, had been supported by the Government of Germany and outputs of that Meeting would provide key contributions to COP11.

STATEMENTS FROM STATES (ITEM 11)

Depositary and Host Country (Item 11.1)

53. The representative of Germany presented document UNEP/CMS/COP11/Doc.11.1: Report of Depositary. Four countries (Fiji, Kyrgyzstan, Swaziland and Zimbabwe), had
acceded to the Convention since COP10, bringing the total number of Parties to 120 (119 States, plus the EU). Afghanistan and Brazil had indicated that they were both in advanced stages of the accession process.

54. The representative of Brazil confirmed that Brazil had finalized the most important steps for ratifying CMS and that the relevant documentation had been submitted to the Presidency for signature. This statement was greeted with applause. Brazil was now actively participating, as it had for some years, in several CMS instruments.

55. H.E. Ms. Lorena Tapia, Minister of Environment of Ecuador, representing the Host Country, highlighted the growing number of species worldwide under threat of extinction. Migratory species should be seen as indicators of wider environmental health. States needed not only to protect wildlife within their national jurisdictions, but also to cooperate with one another to conserve species that crossed international boundaries. This required effective governance systems and innovative approaches to development that moved beyond GDP growth alone. It was important to implement solutions that combined environmentally and economically sustainable development, incorporating, as was the case in Ecuador, the Rights of Nature.

**Party States (including Regional Economic Integration Organizations-REIOs) (Item 11.2)**

**Non-Party States (Item 11.3)**

56. The Chair observed that Party and Non-Party States were invited to submit statements in writing. Nevertheless, if a State wished to make a very short oral comment they were welcome to do so now. A number of Parties and observers made statements thanking the Government of Ecuador for hosting COP11. These are summarized under Agenda Item 31: **Closure of the Meeting.**

**REPORT OF THE SECRETARIAT (ITEM 12)**

**Overview of Secretariat Activities (Item 12.1)**

**Report on CMS Activities in North America (Item 12.2)**

57. The Executive Secretary made a presentation on Secretariat activities between 2011 and 2014. He reported that Fiji, Kyrgyzstan, Swaziland and Zimbabwe had joined CMS since COP10 and even more countries were taking the last steps to ratify the Convention. CMS had been strengthened by the Future Shape process which was now being implemented. Communication and outreach were becoming core activities and the new multi-instrument website and use of social media were raising the Convention’s public profile. Capacity building and implementation support were high priorities. The proposed restructuring of the Scientific Council would strengthen the scientific basis of the Convention, and voluntary contributions from Germany, Switzerland and the United Kingdom had allowed new resolutions on the development of a programme of work on Climate Change, Preventing the Risk of Poisoning to Migratory Birds, an Action Plan for Migratory African-Eurasian Landbirds and a Global Flyways Programme of Work. Further contributions from Australia, Italy and Norway had supported work on Marine Debris, Invasive Species and Ecological Networks. The MoUs continued to grow and attract more Parties and the financial and in-kind support of the Environment Agency, Abu Dhabi had been particularly crucial to successful work on the Dugongs MoU and the African-Eurasian Raptor MoU which were coordinated
from the CMS Office in Abu Dhabi. The Central Asian Mammals Initiative was an example of a successful regional approach, which might provide a way forward for revitalizing instruments in Africa. Nearly half of the income for CMS now came from voluntary contributions from Parties, the Private Sector and public organizations. Threats to biodiversity had never been greater and the Convention’s budget should reflect an urgent need to maintain momentum.

58. The Conference took note of the activities of the Secretariat. There were no questions or comments from the floor.

**STATEMENTS ON COOPERATION (ITEM 13)**

**Biodiversity-related MEAs (Item 13.1)**
**Other Intergovernmental bodies (Item 13.2)**
**Non-Governmental Organizations (Item 13.3)**

59. The Chair observed that written statements had been invited and were posted on the CMS website. He nevertheless wished to give an opportunity for CMS partners to make brief oral statements, should they so wish.

60. Statements were made by the observers from: CITES Secretariat; ASCOBANS Secretariat (referring to the written report contained in document CMS/COP11/Inf.12.3); EUROBATS Secretariat (referring to the written report contained in document CMS/COP11/Inf.12.4); AEWA Secretariat; ACCOBAMS Secretariat (referring to the written report contained in document CMS/COP11/Inf.12.2); and the Permanent Commission for the South Pacific.

**III. ADMINISTRATIVE AND BUDGETARY MATTERS**

**BUDGET AND ADMINISTRATION (ITEM 14)**

**Execution of CMS Budget 2012-2014 (Item 14.1)**

61. Mr. Bruce Noronha (Secretariat) introduced document UNEP/CMS/COP11/Doc.14.1: Execution of the CMS Budget during the 2012-2014 Triennium. This represented the situation as of 31 July 2014. It contained three elements:

- Status of the Trust Fund for Assessed Contributions as at 31 December 2013
- Status of Contributions (income)
- Status of budget implementation for staff and operations (expenditure)

62. As of 31 December 2013, the balance of the Trust Fund was €867,393. Of that amount, approximately €650,000 was committed for the 2014 budget. Therefore, the uncommitted Fund balance was €217,685. It was important to consider that the Fund balance contained unpaid pledges – an amount that had been rising, as shown in Table 3 of the document, standing at €345,981 as of 31 December 2013. Liquidity of the Fund therefore relied on unspent carry-overs and operating reserves. To address this trend the Secretariat had redoubled its efforts to urge Parties to pay their outstanding contributions for 2013 and prior years and all corresponding invoices had been reissued. In response to these measures the
balance of unpaid pledges for 2013 and prior years had fallen to €204,964 by 31 July 2014 and to €174,236 by 31 October 2014. Annex I provided an overview of the contributions status for each Party.

63. With regard to the 2014 budget, the total of unpaid contributions stood at €578,425 on 31 July 2014. However, as of 31 October 2014, this had fallen to approximately €550,000. Following consultations with some Parties, the Secretariat had been informed that the payment of approximately €425,000 could be expected shortly. The 2014 year-end balance of unpaid pledges was expected to be slightly lower than for 2013.

64. With regard to expenditures, all the resources allocated for staff and operation costs in 2014 would be fully allocated. The information presented in the document had been reviewed in the light of expenditure during the period August to October 2014 and projections remained effectively unchanged.

65. Referring to the last two tables presented in Annex II, it was important to take into account that most activities with no or low expenditure when the document was compiled related to COP activities. It was expected that all such funds would be fully allocated.

66. The COW took note of the Secretariat’s presentation.

Draft Costed Programme of Work 2015-2017 (Item 14.2)
Draft Budget for 2015-2017 (Item 14.3)

68. He noted that the draft Programme of Work 2015-2017 was a response to the Parties’ call for greater clarity, accountability and transparency. A key feature was its prioritization of tasks. The Programme of Work was closely linked to the draft Budget for 2015-2017 and the two documents should therefore be considered together.

69. Recognizing the prevailing global economic climate, the draft budget included three modest scenarios: zero real growth; status quo +3%; and status quo +5%. All three scenarios incorporated a 2% year-on-year inflation rate. The Executive Secretary briefly outlined how each of the three scenarios would translate into delivery of the Programme of Work.

70. The Chair recalled that the issues raised in the Executive Secretary’s presentation would be discussed in depth by the Budget Committee and encouraged Parties to convey their detailed remarks to that forum.

71. The representative of France called on the Secretariat to provide a fourth scenario based on the principle of zero nominal growth, i.e., minus the 2% inflation adjustment included in the three existing scenarios.

72. The representative of Chile requested a number of adjustments to the Programme of Work to better reflect the priorities of the Latin America & Caribbean region, including the raising of certain activities to the High priority category and a greater emphasis on training.
73. The representative of Fiji called for the CMS Pacific Officer position based with SPREP to be maintained beyond 2014.

74. The representative of the EU and its Member States welcomed the draft Costed Programme of Work, which enabled Parties to have a clearer overview. The EU noted in particular the priority rank assigned to various issues.

75. The Chair referred further discussion of Agenda items 14.1, 14.2 and 14.3 to the Budget Committee.

**Resource mobilization (Item 14.4)**

76. Ms. Laura Cerasi (Secretariat) introduced document UNEP/CMS/COP11/Doc.14.4/Rev.1: *Resource Mobilization* and made a presentation on fundraising activities by the Secretariat between 2011 and 2014. The goals had been to increase the predictability and stability of funding, to broaden the funding base, to increase synergies, and to promote the mobilization of resources for actions on the ground. A total of €2.6 million had been raised during the triennium. This was equal to one-third of the total amount of the core budget. The Secretariat extended its thanks to all donors, Parties, organizations and institutions, including those who had made indirect or in-kind contributions. A recent significant development had been the support of Environment Agency, Abu Dhabi on behalf of the Government of the United Arab Emirates, which had contributed US$ 1.3 million for operations in 2015. The Migratory Species Champion Programme would be an important tool. Ms. Cerasi invited the COP to acknowledge the financial and in-kind support provided, to take note of the efforts of the Secretariat in providing innovative solutions and urged Parties to provide even greater support in future.

77. The representative of the United Arab Emirates observed that the United Arab Emirates had pioneered many flagship conservation and reintroduction projects both nationally and internationally, including promotion of international cooperation involving a wide range of migratory animals. The United Arab Emirates had demonstrated its commitment to migratory species conservation in several ways and to date, had signed four CMS MoUs: IOSEA, Dugongs, African-Eurasian Raptors and Sharks.

78. The CMS Office in Abu Dhabi was hosted by Environment Agency, Abu Dhabi on behalf of the Government of the United Arab Emirates. The office provided the Secretariat that oversaw the implementation of two MoUs. Over the last five years, the contribution of the United Arab Emirates had reached almost US$ 8 million in direct funding, alongside provision of world-class office space and other logistical support.

79. The Representative of Chile strongly supported the activities outlined in the Secretariat’s report and congratulated the fundraisers involved on excellent work. She expressed regret that the Latin America & Caribbean region had not been in a position to contribute.

80. The representative of the EU and its Member States welcomed the report. He also strongly encouraged the Secretariat and all Parties to explore all funding possibilities. In this context, attention was drawn to the decision taken at CBD COP12, in relation to the Global Environment Facility, to enhance programmatic synergies among the biodiversity-related conventions. CBD COP12 had invited the governing bodies of the various biodiversity-related
conventions to provide elements of advice concerning the funding of national priorities within their respective mandates that might be referred to the GEF. CMS COP11 should seize this important opportunity to further mobilize resources for CMS priorities and to provide advice to GEF accordingly.

81. In order to support both national resource mobilization as well as funding through GEF, it was necessary to promote further integration of measures to conserve migratory species into National Biodiversity Strategies and Action Plans (NBSAPs) and national implementation of national biodiversity targets and plans in line with CMS Resolution 10.18.

82. The Meeting took note of the document and the progress made.

IV. STRATEGIC AND INSTITUTIONAL MATTERS

CMS STRATEGIC PLAN (ITEM 15)

Assessment of the Implementation of the Strategic Plan 2006-2014 (Item 15.1)
Strategic Plan for Migratory Species 2015-2023 (Item 15.2)

84. Ms. Ines Verleye (Belgium), Chair of the Strategic Plan Working Group said that it was a privilege to present the outcome of this fruitful process in the form of the Draft Strategic Plan and the corresponding Draft Resolution. The Draft Strategic Plan had been developed with financial contributions from Germany, South Africa, Switzerland and UNEP. An extensive consultation process had generated strong support for building the Draft Strategic Plan around the Aichi Biodiversity Targets, and for broadened applicability to the whole international community. The Draft Strategic Plan included five Strategic Goals and 16 Targets, which were more specific than the Aichi Biodiversity Targets and had an end date consistent with the CMS COP cycle. How to implement the plan had not been part of the current Working Group mandate, so it was proposed that a Companion Volume should be produced detailing delivery mechanisms and associated activities. The content of such a Companion Volume was scoped in Annex III to COP11/Doc 15.2.

85. The Chair invited comments from the floor.

86. The representative of Chile congratulated the Working Group Chair on an extraordinary job. She noted that the Latin America & Caribbean region had contributed through the participation of two Scientific Councillors in the Working Group. The Region supported continuation of the Working Group for the reasons specified in the Draft Resolution.

87. The representative of New Zealand, speaking in her country’s capacity as Vice-Chair of the Working Group, thanked all who had contributed to the work of the Group, and especially the Chair of the Group and the Secretariat. Extensive consultation had led to development of an extremely useful and robust plan, which would also be valuable at the national level. She hoped the COP would adopt the Draft Resolution and New Zealand looked forward to contributing further to the process.
88. The representative of the EU and its Member States, referring to COP11/Doc.15.1, endorsed the usefulness of the report of the Secretariat and agreed that the general recommendations made by the reviewer should be considered in drafting the new Strategic Plan. He then made the following statement:

“The EU and its Member States would like to acknowledge the hard work and commitment of the Strategic Plan Working Group members, and other contributors, whose expertise has produced a clear and comprehensive document. The EU and its Member States wholeheartedly welcome the financial contributions given so far by different Parties to support the drafting of the Strategic Plan. We believe that the Strategic Plan is an important document for providing a coherent direction for the CMS, aiming to ensure that all parts of the CMS Family make a coherent and effective contribution to the delivery of the CBD Aichi Targets. The EU and its Member States endorse the adoption of the draft resolution (Doc. 15.2 Annex I) subject to some amendments. The EU and its Member States also acknowledge the need for additional intersessional work to strengthen the suite of materials to support implementation of the Strategic Plan, including an open-ended register of Plan sub-targets and a Companion Volume on Implementation, and consider that the CMS Family Secretariats should be involved in the Working Group. We expect that the development of sub-targets, where agreed by the appropriate decision-making body, will ensure that matters of particular relevance to specific instruments are recognized. In developing sub-targets we consider it is important to be able to demonstrate how they contribute to the delivery of the broader goals in the Strategic Plan. We note that budgetary pressures may limit the degree to which these activities could be progressed but consider this an important activity that should be given priority. The EU and its Member States fully endorse the vision and mission of the Strategic Plan and agree with the goals and targets identified by the Working Group in the final draft of the Plan. We note that goals and targets are ambitious and recognize that they could be difficult to achieve. We welcome that the Strategic Plan builds on the Aichi Targets and that indicators in the Strategic Plan for Biodiversity provide much of its basis. We also note that the Programmes of Work and Action Plans of the CMS Family instruments have their own indicators and that the decision-making bodies of those instruments will want to consider linking those to the Plan. We agree that efforts should be put in developing clear and effective indicators to track progress towards the achievement of goals and targets over different timeframes, and at various geographical and territorial scales. However, whilst we recognize that some work will be necessary to ensure that indicators are useful in measuring the achievement of the targets, we are conscious that developing new suites of indicators has potential resource implications, risks increasing the reporting burden on Parties, and potentially diverts effort from implementation to monitoring activity. We therefore believe it is important that wherever possible existing indicators should be used, such as those linked to the Aichi Targets, or that indicators should be formulated around information that can currently be drawn from national reports. We also believe that this presents a valuable opportunity to review the current reporting process and to consider opportunities for reducing the current reporting burden on Parties by linking the information requested in National Reports directly to the indicators developed for the Strategic Plan. Finally, we recognize the need for this work to receive the necessary resources and look forward to having a discussion on this in the budget group. However, we are aware of the overall budget restraints and the
need to make the most effective use of available resources. Given the central character of the Strategic Plan, we believe that its follow-up development could equally support the necessary activities regarding other strategic activities for the next period. This will need a coherent approach during the budget discussions to support the development of a Companion Volume that addresses the key elements."

89. The Executive Secretary of EUROBATS, Mr. Andreas Streit, thanked the Strategic Plan Working Group for its hard work over several years. He reiterated the Chair’s observation that for the first time there was a Strategic Plan covering the entire CMS Family. He observed that this would benefit the conservation of all the species that the CMS Family was working for.

90. The representative of Brazil supported the remarks made by Chile on behalf of the Latin America & Caribbean regional group. He thanked the Working Group and considered it relevant to extend the Group’s mandate into the future. Regarding the Companion Volume, the fourth Global Biodiversity Outlook report demonstrated in 2013 that the world was on track to achieve only five out of 53 indicators for the 20 Aichi Targets. These disappointing outcomes made it important for CMS to prioritize implementation of the Strategic Plan.

91. The representative of South Africa, supported by Uganda, thanked the Chair and Vice-Chair of the Strategic Plan Working Group. She thanked the Secretariat for supporting the process of preparing the Plan, and urged Parties in a position to do so, to provide resources for its implementation.

92. The representative of IFAW congratulated the Chair and members of the Working Group, and observed that implementation of the Strategic Plan would help lift CMS to the next level. He offered assistance with implementation.

93. The representative of the EU and its Member States requested a little more time to submit its amendments to the Draft Resolution, which had been delayed by a technical problem.

94. The Chair agreed to postpone completion of discussion of this issue until the EU’s proposed amendments became available.

95. Following further consideration by Parties, a final version of the Draft Resolution was endorsed by the COW on 6 November (see heading: Endorsement of Amendments Proposed In-Session page 57 below).

**FUTURE SHAPE AND STRATEGIES OF CMS AND THE CMS FAMILY (ITEM 16)**

**Short- and Medium-Term Activities under Resolution 10.9 (Item 16.1)**

97. He recalled that COP10 had adopted a set of activities listed in Resolution 10.9 based on options for the future organization and strategic development of the CMS Family.
Activities in Resolution 10.9 were divided into those for implementation in the short term (2012-2014), medium term (2015-2017) and long term (2018-2020), to be used in the development of the CMS Strategic Plan 2015-2023. The activities for implementation in 2012-2014 were to be carried out with means provided by the core budget (including staff time) and voluntary contributions.

98. Document COP11/Doc.16.1 reported on progress made since November 2012 regarding the short-term activities (as at July 2014) and followed the structure of Resolution 10.9 Annex I. As many activities concerned the CMS Family, decision-making meetings of CMS instruments were invited to become involved with the implementation of those activities, as appropriate.

99. COP11/Doc.16.1 also indicated the Secretariat’s plan for carrying out medium-term activities.

100. Key Achievements to date included the following:

- Production of CMS Family website in three languages;
- Development of the Strategic Plan for Migratory Species 2015-2023 as an overarching framework for the entire CMS Family (Draft Resolution in COP11/Doc.15.2);
- Restructuring of the Scientific Council to maximize capacity of expertise and knowledge (Draft Resolution in COP11/Doc.17.1);
- Enhancement and use of the existing Online Reporting System by the CMS Family and promotion of its use by other biodiversity-related MEAs;
- Development of criteria for assessing potential new agreements under CMS (Draft Resolution in COP11/Doc.22.2);
- Coordination of capacity efforts within the CMS Family through development of the Manual for the National Focal Points of CMS and its Instruments and related training sessions in the regions; and
- Coordination of fundraising activities through development of the Migratory Species Champion Programme to ensure sustainable and long-term voluntary funding income for the CMS Family.

101. Among highlights for future work were:

- Coordination of scientific research programmes based on identification of common issues/threats shared across the CMS Family (e.g., Draft Resolutions contained in documents: Doc:23.1.1 on Flyways; Doc.23.4.6 on Marine Debris; Doc.23.4.3 on Renewable Energy);
- Development of a resource assessment for the Convention (CMS Secretariat and MoUs) if funding becomes available; and
- Collaboration and cooperation on sharing of common services and synergies among the CMS Family (Draft Resolution contained in COP11/Doc.16.2).

102. The Executive Secretary ended his presentation by inviting Parties to take note of the efforts made to date, to implement the short-term activities during 2012-2014 and to provide comments that would further guide the Secretariat in the implementation of medium-term activities during the 2015-2017 triennium.
103. The Chair opened the floor to comments.

104. The representative of Brazil suggested including a line in the matrix of activities for 2015-2017 to extend beyond the CMS Family efforts to maximise synergies and avoid duplication, to include cooperation with all relevant MEA Secretariats.

105. The representative of Chile, supported by the representative of Costa Rica, underlined the importance of CMS capacity-building training workshops for the Latin America & Caribbean region, citing the example of the pre-COP11 workshop held in Santiago, and called for the medium-term work plan to include such activities.

106. The representative of the EU and its Member States welcomed the positive progress made on several fronts. This work cut across the activities of the whole CMS Family, seeking to ensure that it was fit for purpose and could make an effective contribution to the conservation of the species listed on the CMS Appendices. It was, therefore, important that all parts of the CMS Family were fully engaged in the process.

107. The EU noted that much positive collaborative work with the AEWA Secretariat had taken place and would encourage the decision-making bodies of the CMS Family Agreements to engage proactively in the Future Shape work, and to explore opportunities for greater coordination and collaboration, delivering benefits across the whole CMS Family.

108. The EU noted that the Annex to COP11/Doc.16.1 referred to the resources that would be required to continue taking this work forward in the next triennium. Given pressures on resources it was understood that external funding would be key to making good progress. Next steps on the activities proposed would, therefore, need to be considered in the context of the budget negotiations. However, it was difficult from the information provided to assess the likely budgetary pressures arising from this work, with limited detail provided about the medium-term activities that would be undertaken or the expected costs.

109. The EU urged the Secretariat to provide more detail on the activities planned for the coming intersessional period and to provide information on the expected costs in order to enable CMS Parties to make an effective evaluation of the Secretariat’s budget proposals as a whole, and the likely need for additional resources from either the core budget or external sources.

110. With regard to medium-term activities, the EU had a number of specific comments and suggested that a Working Group might be a helpful means of considering in more detail, how these could be taken forward.

111. The representative of South Africa congratulated the Secretariat on the work done to implement the Future Shape decisions taken at COP10. Within the Africa region there were constraints on regional coordination for CMS implementation, especially with regard to partnership building and resource mobilization. Among the short-term activities that had been due for completion by 2014 was an activity to “Regionalize conservation efforts by having local coordinators, with assistance from UNEP, NGOs, Parties and MEAs, leading to greater presence in each of the regions if appropriate.” However, there was no reported progress in this regard. The Secretariat was requested to deal with this issue proactively; support for enhanced regional coordination was really needed.
112. The Meeting took note of the Executive Secretary’s presentation and of the comments made by Parties.

**Synergies with the Wider CMS Family: Analysis for Shared Common Services (Item 16.2)**

113. The Executive Secretary made a detailed presentation of document UNEP/CMS/COP11/Doc.16.2: Analysis of Shared Common Services between CMS Family Instruments. He recalled that discussions on synergies had been taking place for several years and noted a number of the meetings and processes that had stimulated the current debate. The CMS was a complex system of MoUs and Agreements and Parties had long remarked on the need to bring increased coherence to the CMS Family. The Future Shape process was a key response to such concerns.

114. The CMS had proposed to the 9th Meeting of the AEWA Standing Committee that CMS and AEWA should establish common services and a shared Executive Secretary. The AEWA Standing Committee mandated the sharing of services and referred the matter of a shared Executive Secretary to its next Meeting of Parties in November 2015. This decision had been communicated to the 41st Meeting of the CMS Standing Committee, which had agreed to pilot the sharing of common services by AEWA and CMS. Following further consultations, a pilot common Communications and Outreach Unit had been established and an interim report on the outcomes presented to the CMS Standing Committee.

115. The Executive Secretary outlined the benefits to be gained from increased synergies within the CMS Family and possible means of achieving these. He concluded by summarizing the provisions of the Draft Resolution contained in COP11/Doc.16.2.

116. Mr. Jacques Trouvilliez, Executive Secretary of AEWA, confirmed that the 9th Meeting of the AEWA Standing Committee had decided to enhance synergies with CMS to strengthen the efficacy of both instruments. A joint pilot unit had been created at the end of January 2014. The Parties to AEWA would make a final decision on this matter at the 2015 Meeting of Parties.

117. The representatives of a number of Parties, including Argentina, Chile, Egypt, the EU and its Member States, Georgia, Kenya, Monaco, Switzerland and Uganda, as well as the observer from the United States of America, endorsed in principle the desirability of increased synergies and appreciated the opportunity to discuss the issues raised. However, they also expressed concern that much more in-depth analysis would be required before any fundamental decisions could be taken. In particular, several Parties wished to see greater consideration of the potential costs and risks of merging the AEWA and CMS Secretariats; currently the document appeared to highlight mainly the potential benefits. The implications for other CMS daughter instruments also required further consideration.

118. The representative of Uganda was unable to support the Draft Resolution in its present form, while the representative of the EU and its Member States announced that the EU would table a number of proposed amendments to the Draft Resolution. The representative of Switzerland commented that the synergies exercise should not focus primarily on cost-savings, but rather it should prioritize improved implementation. Switzerland would be bringing forward amendments to the Draft Resolution in this regard.
119. The Chair concluded that a Working Group would be established to take forward the debate on this topic.

120. A final version of the Draft Resolution was endorsed by the COW on 9 November (see heading: Endorsement of Amendments Proposed In-Session page 57 below).

**OTHER STRATEGIC AND INSTITUTIONAL MATTERS (ITEM 17)**

**Options for the Restructuring of the Scientific Council (Item 17.1)**

122. The current structure of the Scientific Council included 100 Councillors with a bias towards expertise in birds, forests and wetlands. There was a need to use resources more efficiently, to balance expertise and to enhance intersessional activity. Four costed scenarios for restructuring the Scientific Council were put forward in the document. The COP was requested to consider the report on options for the restructuring of the Scientific Council, and to review and endorse the associated Draft Resolution.

123. The Chair advised that this Agenda Item would be discussed further in the Drafting Group but opened the floor to preliminary comments. Interventions were received from the representatives of Australia, Chile, Ecuador, Egypt, the EU and its Member States, New Zealand, Switzerland and Uganda, as well as the observers from the United States of America and Humane Society International.

124. Points raised included the following:

- The importance of representative regional and taxonomic expertise;
- The need for greater use of modern technology such as use of teleconferencing and electronic workspaces;
- The unacceptability of a ‘business as usual’ approach;
- The necessity for organizations such as IPBES to be represented;
- The need for voluntary participation of Observers including Parties, NGOs, relevant institutions and experts;
- The advantages of starting work intersessionally;
- A reluctance to restrict the number of COP-Appointed Councillors;
- The need to appoint the most appropriate experts regardless of the status within CMS of their country of origin; and
- The advantages of a fully open relationship with all who wished to contribute to the work of the Scientific Council, including NGOs.

125. Mr. Barbieri responded briefly to the comments made and the Chair and deferred further discussion to the Drafting Group, remarking that a balanced compromise was needed.

**Election and Appointments to the Scientific Council and the Standing Committee (Item 17.2)**

126. Referring to document UNEP/CMS/COP11/Doc.17.2: Nominations for the COP-Appointed Councillors for Aquatic Mammals and Birds, the Chair recalled that the Scientific
Council at its 18th Meeting unanimously nominated, for the consideration of COP, Dr. Giuseppe Notarbartolo di Sciara as Appointed Councillor for Aquatic Mammals. There had been two candidates for the position of Appointed Councillor for Birds. The two nominees, Dr. Rob Clay (Paraguay) and Prof. Stephen Garnett (Australia) had agreed to share the position at no extra cost.

127. At the invitation of the Chair, the COP approved the appointment of:

- Dr. Giuseppe Notarbartolo di Sciara as COP-Appointed Councillor for Aquatic Mammals
- Dr. Rob Clay and Professor Stephen Garnett as COP-Appointed Councillors for Birds

128. The Chair read out the list of existing COP-Appointed Councillors eligible and willing to continue serving for a further triennium:

- Mr. Barry Baker, COP-Appointed Councillor for Bycatch
- Prof. Colin Galbraith, COP-Appointed Councillor for Climate Change
- Dr. Zeb Hogan, COP-Appointed Councillor for Fish
- Dr. Colin Limpus, COP-Appointed Councillor for Marine Turtles
- Dr. Rodrigo Medellín, COP-Appointed Councillor for Neotropical Fauna
- Dr. Taej Mundkur, COP-Appointed Councillor for Asiatic Fauna
- Prof. Alfred Oteng-Yeboah, COP-Appointed Councillor for African Fauna

129. At the invitation of the Chair the COP confirmed the re-appointment of these Scientific Councillors for the 2015-2017 triennium.

130. Nominations for the Standing Committee: At the invitation of the Chair, nominations for election to the Standing Committee were made as follows:

**Africa** (nominated on behalf of the region by Uganda)
Representatives: Republic of Congo, South Africa, Uganda
Alternate Representatives: Algeria, Mali, United Republic of Tanzania

**Asia** (nominated on behalf of the region by Pakistan)
Representatives: Kyrgyzstan, Mongolia
Alternate Representatives: Pakistan, Tajikistan

**Europe** (nominated on behalf of the region by Poland)
Representatives: France, Norway, Ukraine
Alternate Representatives: Georgia, Latvia, Switzerland

**Oceania** (nominated on behalf of the region by New Zealand)
Representative: Australia
Alternate Representative: Philippines

**South & Central America and the Caribbean**
Representatives: Bolivia, Costa Rica
Alternate Representatives: Argentina, Panama
131. The Chair confirmed that the Chair and Vice-Chair of the new Standing Committee would be elected during a short meeting of the Committee that would take place immediately after the close of COP11.

132. At the invitation of the Chair, the COP approved the composition of the Standing Committee for the 2015-2017 triennium.

**Gap Analysis of the Convention on Migratory Species (Item 17.3)**

133. Mr. Barbieri (Secretariat) introduced document UNEP/CMS/COP11/Doc.17.3: *Draft Global Gap Analysis of the Convention on Migratory Species*. He recalled that Resolution 10.9 had requested a global gap analysis at Convention level to be supported through voluntary contributions. In the absence of voluntary contributions, the Secretariat had undertaken a draft analysis with its own capacity, COP11/Doc.17.3 being the outcome of this exercise. An initial draft had been prepared by the Secretariat and presented at the Strategic and Planning Meeting of the Scientific Council in October 2013 and at the 18th Meeting of the Scientific Council in July 2014. The COP was asked to consider whether any further development of this activity was needed or feasible, in the absence of voluntary resources to support it.

134. The Chair felt it fair to say that those who had followed the development of the document would know it had been a difficult task. He invited comments from Parties.

135. The representative of Switzerland was of the view that a gap analysis should be a regular agenda item for the Scientific Council, but was not in favour of it being a special activity needing additional financial support.

136. The representative of the EU and its Member States was grateful to the Secretariat for preparing the document. The analysis showed that the potential for further work was enormous. The EU proposed taking the current gap analysis into account when developing the Companion Volume for the Strategic Plan and recommended that all further work on gap analysis should be done in the framework of the Companion Volume.

137. The Chair invited the EU to participate in the proposed intersessional Working Group on the Companion Volume.

138. The Meeting took note of document COP11/Doc.17.3 and of the comments made by Switzerland and the EU.

**V. INTERPRETATION AND IMPLEMENTATION OF THE CONVENTION**

**PROCEDURAL ISSUES (ITEM 18)**

**Arrangements for Meetings of the Conference of the Parties (Item 18.1)**

139. Mr. Wold (Secretariat) introduced document UNEP/CMS/COP11/Doc.18.1: *Arrangements for Meetings of the Conference of the Parties* and the Draft Resolution annexed to it. The Standing Committee had established a Working Group on this issue and the Standing Committee had accepted all the Group’s recommendations at its 41st Meeting. The
document also contained additional recommendations from the Secretariat including *inter alia*:

- Whether certain proposals of the Standing Committee might better be addressed through adjustments to the Rules of Procedure;
- Observations relating to practical concerns, especially with regard to the proposed timing of specific meetings;
- Provision of documents on memory sticks; and
- A lack of reference to the flexibility that would be needed for the Secretariat to put in place the best possible arrangements for each meeting of the COP.

140. Taking these and other considerations into account, the Secretariat wondered whether a Resolution on this topic would be the best way forward.

141. The Executive Secretary noted that the document entered into very fine detail. It was sometimes extremely difficult to abide by very strict rules in all regards. It might be better to retain flexibility. Some of the current proposals could have the effect of tying the hands of the Secretariat. Therefore, rather than a Resolution, it might be better for the COP to simply take note of the document as guidance to the Secretariat.

142. The Chair opened the floor for comments.

143. The representative of the EU and its Member States stated that the EU supported the principle of improving the operation of the COP, but wished to bring forward a number of proposed amendments. He detailed these proposals to the Meeting and confirmed they had been sent to the Secretariat.

144. Referring to the substantive comments from the Secretariat and from the EU, the representative of New Zealand felt it would be possible to build in the necessary flexibility requested by the Secretariat, while maintaining the Draft Resolution. She suggested referring the matter to the Drafting Group or to a small ‘Friends of the Chair’ group.

145. The Chair invited New Zealand and the EU to hold bilateral discussions.

146. A final version of the Draft Resolution was endorsed by the COW on 7 November (see heading: *Endorsement of Amendments Proposed In-Session* page 57 below).

**Repeal of Resolutions (Item 18.2)**

147. Mr. Wold (Secretariat) made a presentation introducing document UNEP/CMS/COP11/Doc.18.2: *Repeal of Resolutions and Recommendations*, prepared by the Secretariat on behalf of the Standing Committee. At its 41st Meeting, the Standing Committee had considered recommendations of a Working Group established to consider: (a) the lack of definition of the terms “Resolution” and “Recommendation”; and (b) the need to retire Resolutions and Recommendations (or specific paragraphs thereof) that were no longer in force. The Standing Committee had accepted all of the Working Group’s recommendations. A Draft Resolution was contained in the Annex to the document and this set out proposed definitions, as well as a process for retiring Resolutions and Recommendations. Within the Draft Resolution, the Secretariat had also proposed changing the term “Recommendation” to “Decision”, as well as a provision for Resolutions and Decisions to come into effect 90 days after the meeting at which they were adopted, unless otherwise specified.
148. The Chair invited comments from the floor.

149. The representative of the EU and its Member States indicated that the EU could support the Draft Resolution subject to the inclusion of two amendments which he proceeded to table. These would be communicated to the Secretariat in writing.

150. The representative of Australia believed that further clarification was required surrounding the definition proposed for “Decision” in the Draft Resolution. She tabled a specific amendment in this regard.

151. There being no further comments, the Chair invited Australia and the EU to come together with the Secretariat in a ‘Friends of the Chair’ group in order to finalize the text of the Draft Resolution.

152. A duly revised Draft Resolution was endorsed by the COW on 7 November (see heading: Endorsement of Amendments Proposed In-Session page 57).

A Review Process for the Convention (Item 18.3)

153. Mr. Wold (Secretariat) made a presentation introducing document UNEP/CMS/COP11/Doc.18.3/Rev.1: Enhancing the Effectiveness of the Convention through a Process to Review Implementation. He noted that CMS was in a very small category of MEAs without such a review process. The paper summarized the relevant processes used by other MEAs and other relevant agreements to enhance implementation and compliance. The Draft Resolution contained in the Annex to the document proposed a way forward by which the Parties could consider establishing such a review process for CMS.

154. The Chair opened the floor for comments.

155. Interventions were made by the representatives of Chile (on behalf of the Latin America & Caribbean region), Ecuador, Egypt, the EU and its Member States, Israel, Switzerland, Uganda and the Observers from ACCOBAMS, EUROBATS, IFAW, UNEP and Wild Migration.

156. While some of the above-mentioned delegations expressed general support for the Draft Resolution, others raised substantive concerns, relating in particular to the justification for, and likely effectiveness of, a review process or compliance mechanism.

157. The Chair emphasized that the Draft Resolution would only establish a process for undertaking work on this issue in the run-up to COP12. It would not be obliging the Parties to establish a review process or compliance mechanism at the present COP. He recalled that the slogan of COP11 was “Time for Action” and it therefore seemed a pity to defer this important topic.

158. The representatives of Switzerland and Egypt supported the Chair’s comments.

159. The representative of New Zealand tabled a specific amendment to operative paragraph 2 of the Draft Resolution, which she felt might offer a way forward that all Parties could be comfortable with.
160. Following further discussion, with additional remarks made by the representatives of Chile, Ecuador, the EU and its Member States, Peru and Uganda, the Chair concluded that this matter should be referred to the Drafting Group.

161. At a subsequent session of the Committee of the Whole, the Chair invited the Secretariat to update the COW on the progress of discussions within the Drafting Group.

162. Mr. Wold (Secretariat) reported that there had been a lively debate, with views for and against the proposals set out in the paper and Draft Resolution. Other participants had stated that while they felt the case for embarking on such a review process had not been sufficiently justified until now, they would be open to looking at the issue in the future.

163. Mr. Wold recalled that the intent of proposals contained in the Draft Resolution was to establish a targeted means of providing capacity building support to assist Parties with implementation. It was not a case of applying sanctions.

164. The Chair felt that it could be helpful to simplify the proposals somewhat, but he invited comments from Parties to help identify whether there was a need for a further Working Group to meet.

165. The representative of the EU and its Member States appreciated the report from the Drafting Group but still felt there was insufficient justification of why a review process was needed. That had to be the first step; only then could other issues be addressed.

166. The Chair emphasized that the Draft Resolution was not establishing a review process, but simply initiated the necessary intersessional analysis required to inform an eventual decision at COP12.

167. The representative of Switzerland shared the view of the Chair. Switzerland supported the Draft Resolution and was open to considering a role as a funding partner.

168. The Chair indicated that Norway would also be inclined to find financial support.

169. The representative of the EU and its Member States proposed that Terms of Reference for a possible intersessional Working Group on this matter should be submitted to the Standing Committee for its consideration.

170. The Born Free Foundation, speaking on behalf of a coalition of NGOs, felt that the issue of justification had been fully addressed within the existing documentation. To defer action on this issue would send the wrong signal to the public and be a missed opportunity to drive the Convention forward.

171. Following further discussion, with contributions from the representatives of Australia and the EU and its Member States, the Chair proposed a series of amendments to the Draft Resolution.

172. The representatives of the EU and its Member States and of Switzerland indicated that they could support the Draft Resolution as amended by the Chair’s proposal.

173. A final version of the Draft Resolution was endorsed by the COW on 9 November (see heading: Endorsement of Amendments Proposed In-Session page 57 below).
COMMUNICATION, INFORMATION AND OUTREACH (ITEM 19)

Implementation of the Outreach and Communication Plan 2012-2014 (Item 19.1)
Communication, Information and Outreach Plan 2015-2017 (Item 19.2)

175. He highlighted in particular the pilot CMS/AEWA Joint Communications Team.

176. Benefits of the Joint Team included:
- Sharing many of the same communication activities, products and tools;
- Sharing specialist expertise – information management, campaigns, press/media work, publications, social media, audio-visual, multi-media, website etc.;
- Strengthened coordination, sharing of resources; and
- A more strategic approach to communications.

177. Challenges included:
- Adapting to the changes inherent in merging the teams;
- Little time for the Joint Team to settle in prior to the COP;
- Limited capacity to cope with the workload;
- Balancing CMS and AEWA needs;
- The need for further strategic direction (hence proposed Communication Strategy); and
- The absence of a budget for communications – a critical issue.

178. Priority activities for 2015-2017 included:
- Development of a global Communication Strategy and Common Branding;
- Strengthening the Joint Communications, Information Management and Awareness-raising Team; and
- Initiating the development of a Communication, Education and Public Awareness (CEPA) Programme.

179. The observer from UNEP highlighted work underway through the Information Knowledge Management Initiative for MEAs (MEA IKM) that was coordinated by UNEP.

180. The Executive Secretary of AEWA thanked Mr. Keil and his team. 2014 had been a year of transition and there had not yet been much time for the team to settle in. Thanks were due to colleagues for the efforts made to adapt to working together and he wished to reaffirm his confidence in the whole team. The work being undertaken would ensure greater visibility for CMS, AEWA and the wider CMS Family. The AEWA Secretariat encouraged support for the Draft Resolution and also voluntary contributions to enable implementation of the 2015-2017 Communications Plan.
181. The representative of the EU and its Member States considered that the establishment of the Joint Team was a relevant example of synergy and could be considered as a pilot project demonstrating the advantages of sharing services. With regard to CEPA, the EU suggested that integration with CEPA efforts, developed under CBD and Ramsar, should be considered, rather than a stand-alone CMS/AEWA CEPA initiative. The EU endorsed the Communication, Information and Outreach Plan 2015-2017, while recognizing that implementation was dependent upon the availability of adequate resources. The EU supported the Draft Resolution, subject to incorporation of some minor amendments that had been communicated to the Secretariat.

182. The representative of Senegal agreed that it was beneficial for CMS and AEWA to work together in this way and the benefits of synergy had been seen in the field, for example through support provided for World Migratory Bird Day.

183. The Chair concluded that the documents under this item had been broadly supported by the COW, subject to some minor amendments to the Draft Resolution.

184. A final version of the Draft Resolution was endorsed by the COW on 9 November (see heading: Endorsement of Amendments Proposed In-Session page 57 below).

Analysis and Synthesis of National Reports (Item 19.3)

185. Mr. Francisco Rilla (Secretariat) briefly introduced this Agenda Item and invited Ms. Patricia Cremona (UNEP/WCMC) to make a presentation introducing document UNEP/CMS/COP11/Doc.19.3: Analysis and Synthesis of National Reports.

186. Ms. Cremona recalled that the online reporting system had been used for the first time for national reports to COP11. Half of CMS Parties had submitted national reports in time to be included in the analysis. Europe was the region with the highest response rate (69 per cent of 42 Parties); Africa was the region with the lowest response rate (32 per cent of 44 Parties). Among the principal conclusions were that: Parties were taking action against threats; a majority of Parties prohibited taking of Appendix I species; migratory species had increased in certain areas; Parties were collaborating to implement transboundary measures; and there was evidence of increasing public awareness.

187. Recommendations arising from the analysis were that Parties should complete adoption of legislation prohibiting take of Appendix I species; take increased action to mitigate threats; and increase cooperation, capacity-building and knowledge-sharing.

188. In addition, CMS should enhance collaboration with related international agreements and bodies, and advance online information management to support implementation. There was also a need for increased funding and capacity for effective implementation.

189. UNEP/WCMC would welcome feedback from Parties on their experience of using the online reporting system.

190. The representatives of Costa Rica, Egypt, Kenya and South Africa welcomed the online reporting system, emphasizing the value to Parties. However, attention was also drawn to opportunities for further streamlining the system to make it more user-friendly, particularly with regard to generating printed reports.
191. Mr. Rilla and Ms. Cremona confirmed that the online reporting format would be further developed under the framework of the new CMS Strategic Plan. The CMS Secretariat and UNEP/WCMC were committed to making the revised format as helpful as possible to Parties. Feedback such as the comment on the difficulty of printing clear reports from the system would be valuable in making such changes.

**World Migratory Bird Day (item 19.4)**

193. The representative of the EU and its Member States supported the Draft Resolution.

194. The Chair, supported by the representative of Kenya, confirmed that the square brackets around one section of text should be removed.

195. The representative of Ecuador invited all delegations to support the Draft Resolution but noted that May was not a suitable month for World Migratory Bird Day (WMBD) to be held in much of the Latin America & Caribbean region; October would be much better.

196. The Chair noted that the issue of the timing of WMBD had been raised on a number of previous occasions and asked the Secretariat to take note of Ecuador’s concerns and to engage with Ecuador bilaterally on this matter after the COP.

197. The Chair concluded that the document and its associated Draft Resolution appeared to be ready for endorsement and forwarding to the Plenary for adoption.

198. A final version of the Draft Resolution was endorsed by the COW on 9 November (see heading: *Endorsement of Amendments Proposed In-Session* page 57 below).

**CAPACITY BUILDING (ITEM 20)**

**Implementation of the Capacity Building Strategy 2012-2014 (Item 20.1)**

**Capacity Building Strategy 2015-2017 (Item 20.2)**

200. The observer from UNEP recalled that UNEP had supported the CMS Manual for National Focal Points, CMS regional consultations in Africa and the Pacific and development of a CMS e-learning course under the umbrella of the InforMEA initiative. UNEP had also furthered the objectives of biodiversity-related MEAs through capacity building workshops for the development of National Biodiversity Strategies and Action Plans (NBSAPs). UNEP welcomed the CMS Capacity Building Strategy 2015-2017 and stood ready to continue to assist.
201. The representative of the EU and its Member States underlined that all capacity building work should be within the framework of the new Strategic Plan for Migratory Species and the associated Companion Volume.

202. The representative of Argentina, speaking on behalf of the Latin America & Caribbean region supported the Capacity Building Strategy 2015-2017, which would be of great importance to the region. He asked the COP to consider the region as a focal point for CMS training activities.

203. The representative of New Zealand welcomed capacity building activities by CMS, especially the recent regional workshop for the Pacific, which had an important positive effect in the region.

204. The Chair concluded that the COW had endorsed the Capacity Building Strategy 2015-2017 for forwarding to the Plenary.

**SYNERGIES AND PARTNERSHIPS (ITEM 21)**

**Report on Synergies and Partnerships (Item 21.1)**

206. The Chair opened the floor to comments.

207. The observer from the CITES Secretariat noted that the grouping of Chairs of the Scientific Advisory Bodies of the Biodiversity-related MEAs, currently not mentioned in the document, offered a useful platform for collaboration.

208. There being no other interventions, the Chair concluded that the COW had taken note of the report.

**Draft Resolution: Synergies and Partnerships (Item 21.2)**

210. The Chair opened the floor for comments.

211. The representative of the EU and its Member States endorsed the Draft Resolution and encouraged the Secretariat and other CMS bodies to continue developing effective and practical cooperation with relevant stakeholders, including other biodiversity instruments and international organizations. However, the EU wished to see stronger integration with the Convention on Biological Diversity and increased cooperation with the Ramsar Convention and therefore requested that these aspects be covered more explicitly in a revised Draft Resolution. Written amendments to this effect had been provided to the Secretariat.

212. The observer from the United States of America tabled amendments to the Draft Resolution and confirmed that these had been transmitted to the Secretariat.
213. There being no further requests for the floor, the Chair invited the representatives of the EU and its Member States and Switzerland and the observer from the United States of America to work together to finalize the Draft Resolution for forwarding to the Plenary.

214. A final version of the Draft Resolution was endorsed by the COW on 9 November (see heading: Endorsement of Amendments Proposed In-Session page 57 below).

**Draft Resolution Enhancing the Relationship between the CMS Family and Civil Society (Item 21.3)**

216. It was timely and appropriate that CMS Parties were fully apprised of what the NGO community might be able to contribute to CMS in future. Models needed to be explored to facilitate NGO involvement in CMS processes, and Wild Migration had agreed to take a lead in this. Mr. Oteng-Yeboah concluded by inviting the COW to support the Draft Resolution contained in document COP11/Doc.21.3.

217. The Chair reminded the Meeting that this Agenda Item had been brought forward at the request of Brazil so that it could be referred to the Drafting Group for further discussion and amendment. The floor was opened for preliminary comments.

218. Interventions were made by the representatives of Australia, Brazil, Chile, Egypt and the EU and its Member States, together with observers from the Born Free Foundation, IFAW and Wild Migration. All speakers thanked the Government of Ghana for preparing the document and all looked forward to further discussions in the Drafting Group.

219. Substantive points raised included the need for enhanced cooperation – not only with NGOs as expressed in the text, but also among CMS Parties – and the need to make full use of available ‘citizen science’.

220. A final version of the Draft Resolution was endorsed by the COW on 6 November (see heading: Endorsement of Amendments Proposed In-Session page 57 below).

**CMS INSTRUMENTS (ITEM 22)**

**Implementation of Existing Instruments (Item 22.1)**

**Developing, Resourcing and Servicing CMS Agreements (Item 22.2)**

**Assessment of MoUs and their Viability (Item 22.3)**

221. Ms. Virtue (Secretariat) introduced documents UNEP/CMS/COP11/Doc.22.1: Implementation of Existing CMS Instruments and UNEP/CMS/COP11/Doc.22.3: An Assessment of MoUs and their Viability. These covered 19 MoUs, plus the Gorilla Agreement which was implemented in the same way as an MoU. A total of 14 MoUs and the Gorilla Agreement were serviced by the Secretariat, three instruments were serviced by outposted offices of the Secretariat and two by Parties themselves. A difficult situation had arisen since
the number of instruments had increased but not the funding for their coordination or implementation.

222. Ms. Virtue introduced document UNEP/CMS/COP11/Doc.22.2: *Developing, Resourcing and Servicing CMS Agreements: A Policy Approach* and in particular the Draft Resolution contained in Annex 2. Parties had requested the development of a set of criteria to guide the development of any future agreements and 14 such criteria were presented.

223. The representative of Chile, referring to document COP11/Doc.22.1, observed that a Plan of Action for Andean Flamingos had been developed under the Andean Flamingo MoU but that the First Meeting of Signatories to the MoU was still pending. She expressed a wish to schedule such a meeting during COP11 so that the relevant countries could take forward the MoU. Document COP11/Doc.22.3 indicated incorrectly that there were information gaps for certain species in the Latin America & Caribbean region. All relevant information had already been communicated to the Secretariat.

224. The representative of Belarus, as a key Range State, reported on the status of the Aquatic Warbler MoU. Belarus considered the MoU to be a useful tool for management of the species, and the sharp declines that had occurred during the 20th century had been stabilized. Belarus thanked the Secretariat for its support and invited those Range States that were not yet Signatories to join the MoU as soon as possible.

225. The representative of the EU and its Member States expressed satisfaction with progress reported on most MoUs but found it unfortunate that some were not functioning properly. The EU tabled proposed amendments to the Annex of the Draft Resolution contained in document COP11/Doc.22.2.

226. The representative of Argentina followed up the intervention of Chile on document COP11/Doc.22.1, by noting that information provided by Argentina on actions taken for the conservation of the Ruddy-headed Goose (*Chloephaga rubidiceps*) were not reflected in the report. Argentina had reported actions under the MoUs on the Ruddy-headed Goose and Huemul (*Hippocamelus bisulcus*) at a workshop held in Santiago, and offered to provide any further information required.

227. The representative of Switzerland welcomed the reports and the suggested criteria and supported the Draft Resolution. However, some improvements in clarity were needed in document COP11/Doc.22.2, for the benefit of those developing new instruments in the future.

228. The representative of Senegal enquired about the MoU on the Atlantic Marine Turtles. The Coordination Unit in Dakar had been closed, since then the MoU had ceased to function effectively.

229. The observer from the United States of America noted that her country was a Signatory to several CMS MoUs. Under Agenda Item 22.2 the United States of America supported the concept of criteria for assessing proposals for species-specific instruments. With regard to Agenda Item 22.3, it was pleasing to note that the vast majority of comments made by the United States of America and other countries had been reflected in the document.

230. Ms. Virtue responded on behalf of the Secretariat. She thanked Chile and Argentina for their comments regarding information on South American species. The Secretariat greatly
appreciated the efforts of the region and confirmed that all the expected information had been received by the Secretariat, even if this was not explicit in the document. The Secretariat had noted the request for a Meeting of Signatories to the Andean Flamingo MoU. The point raised by Senegal had been taken on board and underlined the difficulty of working on many MoUs with so little funding.

231. The Chair observed that Parties had endorsed the Draft Resolution contained in document COP11/Doc.22.2 subject to inclusion of the amendments tabled by the EU. He concluded that that the Draft Resolution could then be forwarded to the Plenary for adoption.

232. A final version of the Draft Resolution was subsequently endorsed by the COW on 9 November (see heading: Endorsement of Amendments Proposed In-Session page 57).

**Concerted and Cooperative Actions (Item 22.4)**

233. Mr. Barbieri (Secretariat) introduced document UNEP/CMS/COP11/Doc.22.4: Concerted and Cooperative Actions, drawing attention to the Draft Resolution contained in the document. A voluntary contribution from Germany had supported a consultant to develop a proposed rationale, criteria and guidance on designating species for Concerted or Cooperative Actions, and on the outcomes sought when species were proposed for such Actions.

234. The EU and its Member States supported consolidating the two categories of actions in a single category of “Concerted Actions”. The Draft Resolution should specify this explicitly and it might be appropriate to repeal parts of Res.3.2 and Res.5.2 which had defined Concerted and Cooperative Actions thus far. Implementation of the measures set out in the consultant’s recommendations should be completed by COP12 and undertaken in the framework of preparing the Companion Volume under the new Strategic Plan.

235. Mr. Barbieri confirmed that the Secretariat would liaise with the consultant to clarify whether the proposal of the EU would require revision of the Draft Resolution.

236. The Chair observed that the absence of comments from other delegates suggested that the EU’s proposal could be endorsed. He invited the EU to liaise directly with the Secretariat to amend the Draft Resolution, if necessary, so that it could be taken forward to Plenary.

237. A final version of the Draft Resolution was endorsed by the COW on 9 November (see heading: Endorsement of Amendments Proposed In-Session page 57 below).

**CONSERVATION ISSUES (ITEM 23)**

**Avian Species (Item 23.1)**

**Programme of Work for Migratory Birds and Flyways (Item 23.1.1)**

Mr. Taej Mundkur, Chair of the Intersessional Working Group on Flyways, made a presentation introducing these documents and the supporting information papers. This work had been mandated by Resolution 10.10 and there had been two meetings, in Jamaica in March 2014 and in Bonn in July 2014. The main focus of the Draft Resolution was the implementation of the Programme of Work, and the Americas Flyway Framework.

The representative of Switzerland welcomed and fully supported the Draft Resolution, the Programme of Work (POW) and its Annexes. The POW provided a good example of how to implement the mission of CMS under the new Strategic Plan. The Plan was very ambitious, and the POW would help the Parties and others to focus on priority actions.

The representative of the United States of America believed that the Migratory Bird Framework for the Americas could make an important contribution to bird conservation, at last extending substantial CMS efforts on migratory birds to the Western Hemisphere. Thanks were due to the Secretariat, including the Washington Officer, for strengthening links between CMS and the Western Hemisphere Migratory Species Initiative (WHMSI).

The representative of the EU and its Member States supported the adoption of the Draft Resolution and the associated documents, and recognized a need to streamline and focus the actions foreseen by Resolution 10.10 (on Guidance on Global Flyway Conservation and Options for Policy Arrangements) into more detailed and specific programmes. The EU considered the POW to be a useful tool to better drive the planning and development of conservation actions for migratory birds and their habitats, and hoped that there would be adequate funds dedicated to the implementation of the POW.

The representative of Egypt endorsed the Draft Resolution with minor suggested amendments.

The representative of Ecuador, on behalf of the Latin America & Caribbean region, welcomed this very complete and ambitious document. The region especially recognized the value of the Migratory Bird Framework for the Americas. A wide range of initiatives would be able to use this as a common platform to protect migratory bird species. An amendment to the Draft Resolution was suggested to ensure an effective framework in the intersessional period.

The representative of the Philippines endorsed the documents, particularly welcoming the clear timeline and indicators. The Philippines belonged to the East Asian – Australasian Flyway Partnership and the POW provided guidance relevant to this and all flyways.

The representative of Kyrgyzstan welcomed and supported the POW, and in the light of continuing decreases in populations of Central Asian migratory birds, supported the initiative to join the Central Asian Flyway to AEWA. AEWA was a more powerful conservation tool than the Central Asian Flyway Action Plan, which had not implemented any significant activities in its nine years of existence.

The representative of Brazil supported the Draft Resolution, recalling that Brazil had participated since 2008 in implementing the Action Plan of the MoU on the Conservation of Southern South American Migratory Grassland Bird Species and Their Habitats. Brazil implemented large-scale bird banding activities, and a team from the National Center for Bird Conservation Research was also working continuously on the standardization of data.
collection protocols for migratory birds in Brazil, with published protocols available online. Brazil offered to host a workshop in 2015 with the goal of integrating and merging initiatives in order to implement the POW, especially through an integrated Action Plan for the Americas Flyways.

248. The representative of Pakistan welcomed the document and requested information from the Secretariat about the proposed merger of the Central Asian Flyway Action Plan and AEWA.

249. The representative of Argentina supported the comments made by Ecuador and welcomed Brazil’s offer to host a workshop. A minor proposed amendment would be provided to the Secretariat.

250. Final versions of the Draft Resolution and POW were endorsed by the COW on 9 November (see heading: Endorsement of Amendments Proposed In-Session page 57 below).

Guidelines to Prevent Poisoning of Migratory Birds (Item 23.1.2)

251. Mr. Heredia (Secretariat) introduced document UNEP/CMS/COP11/Doc.23.1.2: Review and Guidelines to Prevent the Risk of Poisoning of Migratory Birds including the Draft Resolution contained in Annex I of the document. The document had been prepared by the Intersessional Working Group to Prevent Bird Poisoning and the draft Guidelines, which covered different types of poisoning, had been discussed in a technical workshop.

252. The Chair noted that the document was undergoing detailed consideration in the Avian Issues Working Group and requested only brief interventions in the COW.

253. The observer from the United States of America stated that regulation of ammunition for the protection of wildlife was the responsibility of individual states of the USA. She confirmed that the US Federal Government would not be in a position to implement the portions of the guidelines relating to lead in ammunition.

254. The observer from SEO/BirdLife International noted that COP11 could mark the beginning of the end with regard to lead poisoning of migratory birds, as well as of many other forms of poisoning. He urged Parties to adopt the Draft Resolution.

255. The representative of the EU and its Member States confirmed that the EU strongly supported the objectives of the document, and would welcome close cooperative working on this issue with other organizations such as the Bern and Ramsar Conventions. The EU had raised a number of issues for discussion in the Avian Issues Working Group.

256. The representative of Tunisia recalled that the Tunisian Government had hosted a Working Group meeting on bird poisoning in May 2013. He supported the Draft Resolution and Guidelines and called on all Parties to support the prevention of poisoning of migratory birds, which often also affected people.

257. The representative of Peru fully supported implementing the actions contained in the Draft Resolution and reported that lead shot was already banned for shooting over wetlands in her country.
258. The representative of the Philippines supported the Draft Resolution and Guidelines as well as the associated technical review (UNEP/CMS/COP11/Inf.34: Review of the Ecological Effects of Poisoning on Migratory Birds: Report).

259. The Chair invited all interested participants to contribute to discussions in the Avian Issues Working Group.

260. A duly revised Draft Resolution and associated Guidelines were endorsed by the COW on 9 November (see heading: Endorsement of Amendments Proposed In-Session page 57 below).

Illegal Killing, Taking and Trade of Migratory Birds (Item 23.1.3)

261. Mr. Heredia (Secretariat) introduced document UNEP/CMS/COP11/Doc.23.1.3: Preventing the Illegal Killing, Taking and Trade of Migratory Birds including the Draft Resolution contained in the Annex to the document. He stressed that this Draft Resolution had nothing to do with legal, regulated hunting. The Draft Resolution called for a special Task Force to address illegal killing in the Mediterranean region, which was one of the areas where the issue was most prevalent. This Draft Resolution complemented Draft Resolution 23.4.7 on Wildlife Crime.

262. The Chair noted that the document was undergoing detailed discussion by the Avian Issues Working Group and requested brief interventions only.

263. The representative of the European Union and its Member States appreciated the recent efforts made by the CMS Secretariat, including work with the Bern Convention, regarding prevention of the illegal killing, taking and trade of migratory birds. The development of synergies among several international organizations represented an important step forward in combating wildlife crime. In this context, CMS could play an important role, promoting cooperation and sharing of information. For these reasons, the EU and its Member States supported the aims of the Draft Resolution, but had tabled a number of amendments within the Avian Issues Working Group.

264. The representative of Egypt endorsed the Draft Resolution. His country was a migratory bottleneck for over 250 migratory bird species and in recent years, illegal killing had become a major problem. The Governments of Germany and Switzerland, together with BirdLife International, had pledged to assist with the prevention of illegal killing, and the issue had been discussed at ministerial level. A framework of action with well-defined objectives had been prepared, and the formation of the Task Force was seen as being a crucial development.

265. The representative of Ecuador noted that hunting was still unregulated in some South American countries. A pilot activity similar to that for the Mediterranean region would be worth considering for Latin America. Marine birds on the Pacific coast and shorebirds on north-east coast were particularly at risk.

266. The Chair noted that the document was undergoing detailed discussion within the Avian Issues Working Group and postponed further discussion in the COW, pending receipt of a revised text.
267. A duly revised Draft Resolution was endorsed by the COW on 9 November (see heading: Endorsement of Amendments Proposed In-Session page 57 below).

Conservation of Landbirds in the African-Eurasian Region (Item 23.1.4)

268. Mr. Heredia (Secretariat) referred the Meeting to document UNEP/CMS/COP11/Doc.23.1.4: Conservation of Migratory Landbirds in the African-Eurasian Region, including the Draft Resolution contained in Annex I of the document.

269. Mr. Olivier Biber (Switzerland), the Chair of the Working Group that had drafted the Action Plan, introduced the document in more detail. The Action Plan had been mandated under Resolution 10.27, and had been finalized during a meeting held in Accra at the invitation of the Government of Ghana, with financial support from the Swiss Government. Following wide consultation by email, the final document had been reviewed by the 41st Meeting of the CMS Standing Committee in November 2013. The Action Plan was a complementary instrument to AEWA and the Raptors MoU, covering the remaining migratory bird species in the African-Eurasian flyways. A number of proposed modifications to the Draft Resolution and Action Plan were being considered by the Avian Issues Working Group.

270. The Chair postponed further discussion in the COW, pending receipt of a revised text from the Avian Issues Working Group.

271. A duly revised Draft Resolution was endorsed by the COW on 9 November (see heading: Endorsement of Amendments Proposed In-Session page 57 below).

Conservation of the Saker Falcon (Item 23.1.5)

Summary Report of the Saker Falcon Task Force (Item 23.1.5.1)

Saker Falcon Global Action Plan (SakarGAP) (Item 23.1.5.2)

273. Mr. Colin Galbraith gave a presentation summarizing the work of the Saker Falcon Task Force and the development of the Global Action Plan (GAP). The Task Force had been established by Resolution 10.28. An open process of cooperation involving dialogue and compromise among all stakeholders had been a key part of the successful development of the GAP. The main objective of the GAP was to re-establish a healthy and self-sustaining population of Saker Falcons throughout the species’ range. A core issue was sustainable use, with a move towards legal, sustainable harvesting. A programme of conservation management would be established in nesting areas with robust monitoring and regular reporting. The Draft Resolution had seven objectives, including generating resources, continuing stakeholder engagement and facilitating implementation.

274. Mr. Galbraith warmly thanked the Parties and other organizations that had contributed to the partnership. He acknowledged the Parties for approving funding for the Task Force; CITES for its high-quality input; and the Saudi Wildlife Authority and the EU for funding and
support. Long-term support had been provided by the Environment Agency, Abu Dhabi on behalf of the Government of the United Arab Emirates. Thanks were also due to the International Association for Falconry and Conservation of Birds of Prey and to the members of the Task Force themselves. Finally, the support provided by the Coordination Unit for the Raptors MoU had been nothing short of superb.

275. The representative of the United Arab Emirates expressed his gratitude for the work of the Saker Falcon Task Force and appreciation of the transparent approach taken. The United Arab Emirates had hosted two meetings of the Task Force and stakeholder workshops involving 100 participants. He expected the work of the Task Force to continue and saw the GAP as an opportunity to re-establish flourishing populations of Saker Falcons.

276. The representative of Pakistan, speaking as a member of the Task Force, congratulated both Mr. Galbraith and Mr. Williams and his team. He urged Parties to endorse the GAP and the Draft Resolution.

277. The representative of Egypt thanked members of the Saker Falcon Task Force for their excellent work and urged all Parties to endorse the Draft Resolution.

278. The representative of the European Union and its Member States considered the high-quality GAP to be a good model for future Single Species Action Plans. It was now important to endorse the Draft Resolution and to implement the GAP.

279. The observer from the CITES Secretariat welcomed the Task Force report and the GAP. International trade was a significant issue for this species, and CITES had taken an active part in the preparation of the GAP including the leveraging of funds. CITES appreciated the open way the process had been conducted, and Mr. Galbraith and the Environment Agency, Abu Dhabi deserved great credit. Implementation was now crucial and CITES stood ready to assist. He hoped that the Parties would be able to adopt the GAP.

280. The observer from the International Association for Falconry and Conservation of Birds of Prey (IAF) welcomed the GAP and its four proposed flagship projects to initiate the conservation programme for this species. The IAF offered to take the lead in funding and managing one of the four projects: establishment of an internet portal to facilitate information exchange and build trust between falconers, trappers, falcon hospitals, researchers and conservationists.

281. The final text of the Draft Resolution, together with the GAP, was endorsed by the COW on 9 November (see heading: Endorsement of Amendments Proposed In-Session page 57 below).

Bird Taxonomy (Item 23.1.6)

282. Mr. Heredia (Secretariat) introduced document UNEP/CMS/COP11/Doc.23.1.6: The Taxonomy and Nomenclature of Birds Listed on the CMS Appendices. The document had been discussed in the Avian Issues Working Group and a number of amendments had been agreed. A revised text would be submitted to the COW in due course.

283. The Chair postponed further discussion pending receipt of the amended document.
284. A duly revised Draft Resolution was endorsed by the COW on 7 November (see heading: Endorsement of Amendments Proposed In-Session page 57 below).

Aquatic Species (Item 23.2)

Conservation of Migratory Sharks and Rays (23.2.1)

286. The Chair opened the floor for comments.

287. The representative of Brazil summarized national measures taken for the conservation of sharks and rays and underlined his country’s commitment to this pressing issue. Brazil supported the Draft Resolution.

288. The representative of Ecuador supported the Draft Resolution.

289. The representative of the EU and its Member States believed the proposed listing of additional shark species under Appendix II of CMS could help generate momentum for the conservation of those species, without undermining the work carried out by Regional Fisheries Management Organizations (RFMOs) and bring added value to collective efforts for ensuring the conservation and sustainable use of sharks. Nevertheless, the EU wished to see several amendments incorporated before it would be able to endorse the Draft Resolution, and, therefore, proposed forwarding the document to the Aquatic Issues Working Group for further consideration.

290. The representative of the United Arab Emirates noted that shark-finning was banned in his country. The United Arab Emirates should, therefore, be included in the listing contained in the document of countries where shark-finning was banned.

291. The representatives of Argentina, Chile, Egypt and Senegal all endorsed the Draft Resolution.

292. The observer from Humane Society International (speaking also on behalf of a coalition of other NGOs), supported the Draft Resolution, congratulated Sweden for becoming the newest signatory to the Sharks MoU, and called on other Range States that had yet to sign the MoU to do so as soon as possible.

293. The representative of the United States of America, noting that her country was a Signatory of the Sharks MoU, supported the Draft Resolution subject to inclusion of a few minor amendments. The United States of America was ready to work with others on this Agenda Item in the Aquatic Issues Working Group.

294. The Chair concluded that further consideration would indeed be referred to the Aquatic Issues Working Group and that the COW would revert to this Agenda Item in a later session.
295. A duly revised Draft Resolution was endorsed by the COW on 9 November (see heading: *Endorsement of Amendments Proposed In-Session* page 57 below).

**Action Plan for the Loggerhead Turtle in the South Pacific Ocean (Item 23.2.2)**

296. The representative of Australia reported that, following the emergence of this issue at the Strategic Scientific Council Meeting in October 2013, Australia had worked closely with the COP-Appointed Councillor for Marine Turtles, Mr. Colin Limpus, to organize a technical meeting to elaborate a Single Species Action Plan (SSAP) for Loggerhead Turtles in the South Pacific Ocean. The Technical Meeting had been held in Brisbane, Australia, in March 2014 and brought together experts from all relevant countries, to produce a draft SSAP addressing the threats to this population. This draft was considered at the 18th Meeting of the Scientific Council and was supported unanimously. It was now being submitted to COP11 for consideration by Parties. The Aquatic Issues Working Group had reviewed the draft SSAP and associated Draft Resolution and agreed to it being presented to the COW, subject to comments from the United States of America being resolved. Australia, the United States of America and the COP-Appointed Councillor had now reached consensus on the amendments to be included. The revised Draft Resolution would now be considered further by the Aquatic Issues Working Group.

298. The representative of Ecuador, supported by Chile, endorsed the adoption of the Single Species Action Plan. She stressed the importance of establishing the synergies mentioned in the presentation and referred to Ecuador’s national action plan for marine turtles.

299. The representative of the EU and its Member States endorsed the Draft Resolution and SSAP, pointing to the current lack of international conservation measures to reduce bycatch in pelagic fishing gear.

300. The representative of Peru supported adoption of the SSAP and offered to submit additional text resulting from new data available from his country. Peru supported the view of Ecuador concerning the importance of synergies, especially with the Inter-American Convention for the Protection of Marine Turtles.

301. The representative of the United States of America supported the adoption of the SSAP and requested the Secretariat and Parties to work on implementation and awareness-raising.

302. The representative of Argentina also supported the SSAP and highlighted an opportunity for cooperation with the Inter-American Convention for the Protection of Marine Turtles at its next COP, due to be held in Mexico in 2015.

303. The representative of Fiji recognized the importance of cooperation with the SPREP Regional Turtle Action Plan, and pledged to voice support for the SSAP at the forthcoming meeting of the Western Pacific Fisheries Commission in Samoa.
304. The Chair invited the representative of Australia to collate any further proposed amendments and to forward the final draft of the SSAP and Draft Resolution for endorsement by the COW in due course.

305. A duly revised Draft Resolution and the associated SSAP were endorsed by the COW on 9 November (see heading: Endorsement of Amendments Proposed In-Session page 57 below).

Live Capture of Cetaceans from the Wild for Commercial Purposes (Item 23.2.3)

306. Ms. Heidrun Frisch (Secretariat) introduced document UNEP/CMS/COP11/Doc.23.2.3/Rev.1: Live Captures of Cetaceans from the Wild for Commercial Purposes, including the Draft Resolution contained in Annex II of the document, which had been submitted by the Principality of Monaco. Annex I provided background information and was a result of deliberations of the Aquatic Mammals Working Group of the Scientific Council, which had reviewed and amended the Draft Resolution.

307. The Chair advised that this Agenda Item would be discussed further in the Aquatic Issues Working Group, but opened the floor to preliminary comments.

308. The representative of Monaco said that live capture of cetaceans had consequences for their populations, and especially for the structure of their social groups. The Draft Resolution strengthened the conservation of small cetaceans by providing strict protection measures and by stressing the importance of regional and international cooperation.

309. The representative of Chile, representing the Latin America & Caribbean region, observed that the document conformed with the Buenos Aires group under the International Whaling Commission in respecting the moratorium on commercial hunting of cetaceans. The region was committed to non-lethal use of cetaceans through whale watching.

310. The observer from the ACCOBAMS Secretariat stated that the document was in line with ACCOBAMS objectives, especially Article 2 of the Agreement.

311. The observer from the CITES Secretariat recalled that the capture of live cetaceans was within the purview of CITES. He sought amendments to two operative paragraphs of the Draft Resolution, to ensure that this did not lead to a conflict of interests.

312. The observer from the Whale and Dolphin Conservation expressed support for the document.

313. The representative of the EU and its Member States, supported by Egypt, drew attention to the animal welfare implications of live cetacean capture and supported the Draft Resolution.

314. The representative of Ecuador supported the Draft Resolution and reported that ten years of whale watching in Ecuador had generated US$ 60 million and greatly assisted local communities. Non-lethal use of cetaceans was considerably more effective than capture.

315. The observer from Humane Society International called for a strong and vigorous Resolution to maximize its effectiveness.
316. The Chair recalled that this Agenda Item would be further discussed in the Aquatic Issues Working Group and an amended version of the Draft Resolution would be brought forward for the COW to consider in due course.

317. A duly revised Draft Resolution was endorsed by the COW on 7 November (see heading: Endorsement of Amendments Proposed In-Session page 57 below).

**Conservation Implications of Cetacean Culture (Item 23.2.4)**

318. Ms. Frisch (Secretariat) introduced document UNEP/CMS/COP11/Doc.23.2.4: Conservation Implications of Cetacean Culture, including the Draft Resolution contained in the Annex to the document. This work had arisen from CMS Resolution 10.15. A workshop in London in April 2014 had defined ‘culture’ as “information or behaviours that are shared by a community and acquired through social learning from conspecifics”. Culture could increase negative outcomes or increase population viability, and help define boundaries for the delineation of units for conservation. The Draft Resolution highlighted the implications of cetacean culture, requested the Scientific Council to appoint an intersessional Expert Group, and provided advice to Parties on a precautionary approach.

319. The Chair advised that this Agenda Item would be discussed further in the Aquatic Issues Working Group, but opened the floor to preliminary comments.

320. The representative of Monaco remarked that this document represented a new stage in terms of the concepts and application of CMS.

321. The representative of Chile, on behalf of the Latin America & Caribbean region, endorsed the Draft Resolution.

322. The representative of the EU and its Member States acknowledged the pioneering nature of this work and, subject to inclusion of a number of amendments, supported the Draft Resolution. The EU looked forward to contributing to discussions in the Aquatic Issues Working Group.

323. The representative of New Zealand considered many aspects of cetacean culture to be relevant to other vertebrates, probably involving all groups.

324. The observer from the Whale and Dolphin Conservation observed that units for conservation purposes were usually defined on the basis of genetics. The identification of cultural units presented a new challenge, but conservation measures could be improved by recognizing cultural units.

325. The observer from Humane Society International considered that it made solid scientific sense to include social biology in efforts to conserve cetaceans. He noted that the Meeting had received a letter of support for the Resolution from Mr. Rendell and Mr. Whitehead, which was available under ‘statements’ on the CMS COP11 webpage and annexed to the present report.

326. The Chair recalled that this Agenda Item would be further discussed in the Aquatic Issues Working Group and an amended version of the Draft Resolution would be brought forward for the COW to consider in due course.
327. A duly revised Draft Resolution was endorsed by the COW on 7 November (see heading: Endorsement of Amendments Proposed In-Session page 57 below).

Terrestrial Species (Item 23.3)

Central Asian Mammals Initiative (Item 23.3.1)
Guidelines on Wildlife-friendly Infrastructure Design for Central Asia (Item 23.3.2)
Draft Action Plan for the Conservation of Argali (Item 23.3.3)

328. Ms. Christiane Röttger (Secretariat) made a presentation presenting three documents:
UNEP/CMS/COP11/Doc.23.3.1/Rev.1: Central Asian Mammals Initiative (CAMI), including the Draft Resolution contained in an Annex to the document;
UNEP/CMS/COP11/Doc.23.3.2: Guidelines on Mitigating the Impact of Linear Infrastructure and Related Disturbance on Mammals in Central Asia; and

329. The Draft Resolution contained in the Annex to Doc.23.3.1 had been considered by the 18th Meeting of the Scientific Council and at a regional workshop of Range States hosted by the Government of Kyrgyzstan and funded by the Governments of Germany and Switzerland, together with the European Union.

330. Doc.23.3.2 included guidelines on addressing a number of issues related to the roads, railways, boundary fences and other linear infrastructure which were a growing problem for migratory mammals in Central Asia. A workshop held in Germany in 2013, with financial support from the Government of Germany, had resulted in a Declaration of Intent and an Action Plan. Subsequently, Conservation Guidelines covering 12 species in eight Central Asian countries had been developed by the Wildlife Conservation Society with funding from the Swiss Government.

331. Doc.23.3.3 concerned an Action Plan that had been developed for the largest wild sheep species, found in 11 countries of Central Asia.

332. Ms. Lira Joldubaeva, focal point for the Central Asian Mammals Initiative (CAMI), in Kyrgyzstan, presented CAMI’s Programme of Work (POW) in more detail. Central Asia was one of the last regions in the world still supporting long-distance migrations of large mammals. CAMI covered 14 countries and 14 species. The Programme of Work 2014-2020 included a vision of secure and viable populations of migratory mammals that ranged across the landscapes of Central Asia in healthy ecosystems, and that were valued by, and brought benefits to, local communities and all stakeholders. Its principal goal was to improve the conservation of migratory large mammals and their habitats in the Central Asian region by strengthening coordination and cross-border cooperation.

333. The representative of Switzerland noted that Central Asia hosted some of the most important mammal migrations in the world but had been neglected by international conservation initiatives for too long. He considered the work of CAMI to be deserving of full support, and suggested that the approach could be useful in other regions.
334. The representative of Pakistan welcomed the initiative and stressed that the success of CAMI had only been possible because of local community involvement. He urged Parties to support CAMI and community managed conservation.

335. The representative of Kyrgyzstan, supported by Tajikistan, endorsed the Argali Action Plan and the Draft Resolution.

336. The representative of the European Union and its Member States welcomed the progress made since COP10. There was a need to establish a Central Asia Officer and to make a provisional budget for the Argali Action Plan. The EU noted that the guidelines on linear infrastructure had not been reviewed by the Scientific Council and invited the Secretariat to ensure that in future any such technical reports were submitted to the Scientific Council for review.

337. The observer from the CITES Secretariat recalled that many mammal species in Central Asia were listed on CITES Appendices. International trade in hunting trophies of some of them could, in certain circumstances, be an important conservation incentive. The two Conventions needed to work together on this. CITES had therefore played an active part in the drafting of both CAMI and the Argali Action Plan, and had also commissioned three study reports as a contribution to this effort. CITES hoped that the Meeting would adopt CAMI and the Action Plan for the Argali and looked forward to working with CMS on their implementation.

338. The observer from the Conservation Force, speaking also on behalf of the Wild Sheep Foundation, welcomed the much-needed unified conservation approach to Central Asian mammals. The Argali Action Plan was a very useful basis for community-based conservation and both organizations looked forward to helping where they could.

339. At the invitation of the Chair, the COW (at its session on 9 November) endorsed the final versions of the Draft Resolutions relating to CAMI and the Argali Action Plan, as well as the Guidelines on linear infrastructure (see heading: *Endorsement of Amendments Proposed In-Session* page 57 below).

**Crosscutting Conservation Issues (Item 23.4)**

**Ecological Networks (Item 23.4.1)**

**Application of Ecological Networks to CMS to CMS (Item 23.4.1.1)**

**Strategic Review of Aspects of Ecological Networks relating to Migratory Species (Item 23.4.1.2)**

341. The Chair opened the floor to comments on what he considered to be an important and exciting initiative.
342. The representative of the EU and its Member States supported the adoption of the Draft Resolution, recognizing it as an indispensable step to addressing the needs of migratory species from the perspective of ecological networks. Given that the Draft Resolution had already benefitted from the evaluation of the CMS Scientific Council, the EU saw no need for further amendments to the present version. The EU and its Member States looked forward to the initiatives that would be undertaken to address this key conservation issue based on the use of the best scientific information to guide prioritization of actions.

343. The representative of Ukraine welcomed the work being undertaken to promote the development of ecological networks. Ecological networks, both national and regional, were a priority of Ukraine’s ecological policy and Ukraine supported the Draft Resolution.

344. The representative of the Philippines welcomed the Draft Resolution and detailed a number of proposed amendments that had been submitted electronically to the Secretariat.

345. The representative of Argentina thanked the Scientific Council and Secretariat for their efforts and, while supporting the Draft Resolution in general, tabled several proposed amendments, which would be submitted to the Secretariat electronically.

346. The observer from BirdLife International welcomed the excellent Strategic Review and the Draft Resolution and particularly welcomed the proposed amendments tabled by the Philippines. BirdLife International was pleased to offer further assistance on the topics covered by the Draft Resolution.

347. The representative of South Africa supported the statement made by BirdLife International and welcomed what it considered to be an excellent review. South Africa wished to propose a few amendments to the Draft Resolution. These would be submitted in writing to the Secretariat.

348. The representative of New Zealand proposed minor amendments to one operative paragraph of the Draft Resolution and undertook to send these to the Secretariat.

349. The Chair invited all those who had commented to send any proposed amendments to the Secretariat as soon as possible. A small Working Group would be established to take forward this Agenda Item and the COW would return to the issue later.

350. At a subsequent session of the COW, the representative of the European Union and its Member States reported that the EU and Argentina had held a bilateral meeting on the Draft Resolution concerning Ecological Networks and an agreed version had been forwarded to the Secretariat.

351. A duly revised Draft Resolution was endorsed by the COW on 9 November (see heading: Endorsement of Amendments Proposed In-Session page 57 below).

Programme of Work on Climate Change and Migratory Species (Item 23.4.2)

352. Mr. Heredia (Secretariat) briefly introduced document UNEP/CMS/COP11/Doc.23.4.2: Programme of Work on Climate Change and Migratory Species, which included a Draft Resolution submitted by Costa Rica.
353. Ms. Gina Cuza Jones, the CMS National Focal Point for Costa Rica, and Mr. Colin Galbraith, Chair of the Working Group on Climate Change, made a joint presentation introducing the documents in more detail.

354. The representative of Ecuador considered the Programme of Work (POW) to be an excellent practical example of cooperation and synergy for the CMS Family as a whole, as well as for CMS itself. UNFCCC COP20 would soon take place in Peru, amid high expectations. IPCC had recently highlighted the inter-relationships between climate change and species. Ecuador, therefore, looked forward to approval by COP11 of both the POW and the Draft Resolution itself.

355. The representative of the EU and its Member States considered the POW as a first starting point. Much further work was still necessary. An in-depth review of the existing scientific literature on the effects of climate changes on wild species was urgently needed, as well as activities to stimulate analyses of relevant scientific information. At the same time there was a need to make the best possible use of existing key case studies that provided guidance on how best to react to the effects of climate change on migratory species. The EU and its Member States invited the CMS Secretariat to support the Intersessional Working Group on Climate Change, including, through promotion of fundraising activities, to guarantee adequate financial resources.

356. However, the EU considered that this further work should be fully coordinated with the overall work of CMS. The appropriate tool for this coordination would be the Companion Volume under the new Strategic Plan. At national level, specific actions should be integrated into NBSAPs and into national plans for the mitigation of and adaptation to climate change. The EU wished to table a number of amendments to the Draft Resolution in this regard, and confirmed it would submit these in writing. Finally, the EU invited the Secretariat to collaborate more closely with IUCN in order to avoid duplication of species vulnerability assessments and to report on progress in the implementation of the POW in terms of the measures taken and their effectiveness.

357. The representative of Australia supported the proposed POW and the present version of the Draft Resolution. Given the significant resources that would be required for implementation, Australia suggested evaluation and prioritization of activities within the POW.

358. The representative of Argentina welcomed the POW but indicated that it would submit to the Secretariat some specific amendments to the Draft Resolution, in particular to make it clear that the POW should be implemented according to the circumstances of each individual Party.

359. Endorsing the Draft Resolution and welcoming the POW, the representative of Egypt considered that a clearer timeframe for implementation was required, and underlined the need for significant resources. He urged countries to reflect the POW in their NBSAPs and suggested that one pilot project should be developed to serve as a demonstration.

360. Mr. Galbraith briefly responded to some of the points raised, observing that there seemed to be a general view that prioritization was required.

361. The Chair asked that concrete comments and proposed amendments be submitted to the Secretariat promptly. However, it seemed as if there was broad support and it was therefore likely that any amendments would be fairly limited in scope.
362. A duly revised Draft Resolution and the associated POW were endorsed by the COW on 6 November (see heading: Endorsement of Amendments Proposed In-Session page 57 below).

Renewable Energy Technologies Deployment and Migratory Species (Item 23.4.3)

Renewable Energy and Migratory Species (Item 23.4.3.1)

363. The Chair informed the Meeting that, due to shortage of time, a video message by the Director of IRENA could not be played, and invited participants to watch the video from the COP11 website.

Guidelines for Sustainable Deployment (Item 23.4.3.2)

365. Mr. Jan van der Winden (Bureau Waardenburg bv.) made a presentation introducing document UNEP/CMS/COP11/Doc.23.4.3.2: Renewable Energy Technologies and Migratory Species: Guidelines for Sustainable Deployment.

366. On behalf of the Secretariat, Mr. Barbieri thanked the Bureau Waardenburg for the good work done under extremely tight time limits.

367. The representative of Brazil welcomed the efforts of the CMS Secretariat, AEWA Secretariat, BirdLife International and IRENA in compiling the report and guidelines. Considering that adverse impacts of renewable energy technologies could be substantially minimized through careful site selection and planning, Brazil agreed with, and emphasized the need to work carefully on, sensitivity mapping to inform planners and developers about the potential importance of birds in choices regarding renewable energy construction sites. A resolution from Brazil’s National Environmental Council had mandated the Brazilian environment authorities to publish annually a national report detailing the main aggregation sites known for migratory birds, as well as the known flyways within its territory, to assist in the development of such mapping. This was now a legal obligation on the Government.

368. Brazil believed that information on which species were the most impacted could only be achieved by means of comprehensive Environmental Impact Assessments (EIAs) and appropriate post-construction monitoring, resulting in a complete meta-data overview.

369. Taking these comments into account, Brazil supported the Draft Resolution and wished to be part of this initiative when the moment came to expand the geographical scope of the Energy Task Force beyond the African-Eurasian region to South America.

370. The representative of Egypt welcomed the guidelines and endorsed the Draft Resolution. He suggested the removal of the square brackets from one of the operative paragraphs and provided information on relevant experience in Egypt.

371. The representative of the EU and its Member States supported the Draft Resolution and suggested that in its further work the Task Force should make use of existing guidelines and experience from other conventions (e.g., Bern and Ramsar), Agreements such as
EUROBATS and other organizations (e.g., IUCN) to avoid duplication of work and to ensure identification of best practices.

372. The representative of South Africa welcomed the Draft Resolution and supported the guidelines document. South Africa joined Egypt in suggesting that the square brackets could be removed and also indicated it would submit an amendment in writing to the Secretariat.

373. The representative of Chile wondered if it was appropriate to be adopting an information document through the Draft Resolution.

374. The observer from the ACCOBAMS Secretariat noted that the Draft Resolution was in line with the objectives of ACCOBAMS, notably ACCOBAMS Resolution 4.17 on Guidelines to Address the Impact of Anthropogenic Noise on Cetaceans in the ACCOBAMS Area. The ACCOBAMS Secretariat would provide the CMS Secretariat with the relevant reference to Resolution 4.17 to be included in the guidelines.

375. The representative of Argentina supported the Draft Resolution and guidelines but pointed out that document Inf.26 had been prepared without an opportunity for Parties to make contributions. Relevant experience from Argentina could usefully be included as an input and to help ensure there was no regional bias in the document. Argentina also wished to bring forward amendments to the Draft Resolution emphasizing the voluntary nature of the guidelines, whose implementation would depend on the specific circumstances of each Party.

376. The Chair asked all participants who wished to propose amendments to communicate these to the Secretariat.

377. A duly revised Draft Resolution and the associated Guidelines were endorsed by the COW on 7 November (see heading: Endorsement of Amendments Proposed In-Session page 57 below).

Invasive Alien Species (Item 23.4.4)

378. Mr. Heredia (Secretariat) made a presentation introducing document UNEP/CMS/COP11/Doc.23.4.4: Review of the Impact of Invasive Alien Species on Species under the Convention on Migratory Species (CMS), including the Draft Resolution contained in Annex II to the document. He noted that document UNEP/CMS/COP11/Inf.32 included the full version of the study of the impact of invasive alien species (IAS) on migratory species. Both the study and the Draft Resolution had been reviewed by the Scientific Council.

379. The representative of Australia supported the work of CMS on IAS and offered to share its experiences on this issue with other Parties and organizations. He tabled a proposed amendment to one preambular paragraph of the Draft Resolution.

380. The representatives of Chile, Costa Rica, Fiji, Peru and the United States of America endorsed the Draft Resolution. Further amendments were tabled, involving three preambular paragraphs.

381. While supporting the Draft Resolution, the representative of Egypt considered that the issue of IAS required more innovative thinking. He suggested that a pilot project might be helpful.
382. The representative of the EU and its Member States referred to the recent adoption of an EU Regulation on IAS, which laid down a framework for effective EU-wide measures. The EU supported the Draft Resolution and was pleased that it underlined the importance of coordination with other institutions and MEAs, notably CBD. The conclusion in the report that seabird and marine turtle populations at their breeding and nesting grounds on islands were under greatest threat from IAS, suggested that this should be a priority for future work. A number of minor textual amendments had been submitted to the Secretariat.

383. The representative of New Zealand was delighted that the IAS Specialist Group of IUCN, based at the University of Auckland, had prepared the report upon which the document was based. Proposed textual amendments had been forwarded to the Secretariat.

384. The representative of Argentina joined others in supporting the Draft Resolution and referred to a GEF project on this issue, as well as a bilateral initiative with Chile on two shared IAS.

385. A final version of the Draft Resolution was endorsed by the COW on 7 November (see heading: Endorsement of Amendments Proposed In-Session page 57 below).

**Sustainable Boat-Based Wildlife Watching Tourism (Item 23.4.5)**

386. Ms. Frisch (Secretariat) made a presentation introducing document UNEP/CMS/COP11/Doc.23.4.5: Sustainable Boat-Based Wildlife Watching Tourism, including the Draft Resolution contained in Annex I to the document. This issue affected all marine species groups under CMS. There had been wide discussion within the Aquatic Issues Working Group, and the document had already changed significantly. A revised version would be provided to the COW for its further consideration in due course.

387. The Chair suspended further COW deliberations on this Agenda Item, pending receipt of the revised document.

388. A duly revised Draft Resolution was endorsed by the COW on 7 November (see heading: Endorsement of Amendments Proposed In-Session page 57 below).

**Management of Marine Debris (Item 23.4.6)**

389. Ms. Frisch (Secretariat) made a presentation introducing document UNEP/CMS/COP11/Doc.23.4.6: Management of Marine Debris, including the Draft Resolution contained in Annex I to the document. Resolution 10.4 had instructed the Scientific Council to coordinate three reviews, funded by a voluntary contribution from Australia, covering knowledge gaps, relating to debris pathways, management and impacts on migratory species, waste management on marine vessels, and the effectiveness of a public awareness campaign. The reports were presented as documents UNEP/CMS/COP11/Inf.27, Inf.28 and Inf.29. The Draft Resolution was based on the recommendations in these reviews. The Aquatic Issues Working Group would be addressing this Agenda Item later in the day.

390. The observer from UNEP tabled an amendment to the Draft Resolution drawing attention to the resolution on marine plastic debris and micro plastics adopted by the first United Nations Environment Assembly (UNEA) in June 2014.
391. The representative of Argentina considered the existence or otherwise of gaps in legislation to be a matter for consideration at national levels. It was inappropriate to include this topic in the present document.

392. The Chair concluded that further discussion by the COW should await receipt of a revised text from the Working Group.

393. A duly revised Draft Resolution was endorsed by the COW on 7 November (see heading: Endorsement of Amendments Proposed In-Session page 57 below).

Wildlife Crime (Item 23.4.7)

394. Mr. Oteng-Yeboah (Ghana) presented document UNEP/CMS/COP11/Doc.23.4.7/Rev.1: Fighting Wildlife Crime Within and Beyond Borders, including the Draft Resolution, sponsored jointly by Ghana and Monaco, contained in the Annex to the document. Wildlife crime affected economic development, national and international security, as well as biodiversity. The Draft Resolution included measures to improve management of shared wildlife populations, improve transboundary law enforcement, increase awareness, promote alternative livelihoods and reduce demand for illegal wildlife products.

395. The representative of Monaco, supported by Uganda, stressed the importance of strengthening cooperation among different bodies, including INTERPOL and CITES, and highlighted risks to economic development and tourism. He considered improving the traceability of illegally trafficked products in importing countries to be an important issue.

396. The representative of the EU and its Member States considered that fighting wildlife crime was a top priority. EU Member States had been initiating, organizing and supporting several high-level events including:

- African Elephant Summit (Gaborone, December 2013)
- London Summit on Illegal Wildlife Trade (London, February 2014)

397. The EU and its Member States recognized that CMS had an important role to play in the global response to wildlife crime, both within Range States and across national borders. The EU had tabled two amendments to an operative paragraph of the Draft Resolution.

398. The representative of Uruguay regarded the Draft Resolution as a logical strengthening of cooperation between CMS and CITES. Almost all CMS Parties were also Parties to CITES but not all species on CMS Appendices were also listed by CITES. The language used in reference to crime needed to be amended, since illegal wildlife crime was not subject to criminal penal action in many countries. Use of terms such as "violation" or "offence" would help in this regard.

399. The representative of Brazil, supported by Chile, endorsed the Draft Resolution. He considered it an advantage that it did not involve new lines of work for the CMS Secretariat. Brazil considered references to national and regional security to be exaggerated and in need of amendment or deletion. Brazil believed the Draft Resolution could be strengthened in its operative part by means of the inclusion of two additional paragraphs. These would suggest additional measures for Parties and non-Parties to enhance cooperation for preventing and minimizing the damage created by wildlife crime within and beyond borders. With these and other minor amendments, Brazil was ready to support the Draft Resolution.
400. The representative of Kenya expressed strong concern over poaching for elephant ivory and rhino horn. The document provided a means for CMS to respond to the seriousness of these threats. He suggested an amendment to one operational paragraph, but urged all Parties to support the Draft Resolution.

401. The representative of Pakistan referred to the widespread illegal trade in the Asia region for groups such as geckos, pangolins, freshwater turtles and scorpions. He suggested that this issue should be reflected in the document.

402. The representative of South Africa underlined the commitment of her country in dealing with wildlife crime, and particularly the scourge of rhino poaching. She indicated that amendments to two paragraphs of the Draft Resolution would be sent to the Secretariat.

403. The representative of Egypt declared that it was time for action. Cooperation between international organizations was essential, and truly innovative solutions were needed. There was also a need to address the root causes of wildlife crime, such as poverty, corruption, political instability and insecurity.

404. The representative of Israel emphasized the issue of prevention. Israel was implementing a major anti-poaching project in Africa using innovative technologies. He offered to assist any Parties or organizations who might be interested in adopting such methods. He refuted the statement of Brazil objecting to the reference to heightened national and international security problems resulting from wildlife crime, because of abundant evidence that this was indeed the case.

405. The representative of Ecuador drew attention to necessary changes in language in two places in the document where reference was incorrectly made to “fauna and flora”. Since the document referred to wildlife crime involving animals, the mention of flora should be deleted.

406. The observer from the CITES Secretariat recalled that the main focus of CITES was on international crime and that an additional focus by CMS on crime within national borders would be complementary. He would present text for a proposed amendment to one operative paragraph. He commended the Draft Resolution and hoped it would be adopted by the COP.

407. The observer from UNEP referred to Resolution UNEP/EA.1/3 on Illegal Trade in Wildlife that had been adopted at the First Meeting of UNEA in June 2014. This requested UNEP to take collaborative action to strengthen responses to the illegal trade in wildlife. This effort included providing support to legal, judicial and enforcement measures, and a targeted approach to awareness-raising and demand reduction for illegally sourced wildlife products.

408. The observer from the Born Free Foundation urged Parties to ensure that the language of the Draft Resolution added value to existing measures.

409. The Chair asked the representative of Monaco to collate all suggested amendments and to submit a revised text to the COW for further consideration in due course.

410. A duly revised Draft Resolution was endorsed by the COW on 9 November (see heading: Endorsement of Amendments Proposed In-Session page 57 below).
AMENDMENT OF CMS APPENDICES (ITEM 24)

Proposals for Amendment of Appendices I and II of the Convention (Item 24.1)

Proposals submitted for the inclusion of species on Appendix I and/or II (Item 24.1.x)

411. The Chair of the COW indicated that the proponent of each proposal for amendment of CMS Appendices I and II would be invited to introduce the proposal briefly. The COW would not discuss at length possible amendments to the proposal. Amending the proposal would be the responsibility of the proponent(s). Participants were invited to hand in to the Secretariat any statements they wished to make and to avoid lengthy oral interventions as far as possible. The most important thing was to state clearly, yes or no, whether the proposal was supported. If there was clear widespread support, or even full consensus, he would recommend to the Chair of the Plenary that the Plenary should be able to adopt the proposal without difficulty. However, if there were clear differences of view, or even widespread opposition, he would inform the Plenary Chair that there was no consensus in the COW, so that she could determine an appropriate way forward in Plenary.

413. The observer from Wild Migration, speaking also on behalf of Born Free Foundation, Humane Society International, IFAW, NRDC, OceanCare and Whale and Dolphin Conservation (and, he anticipated, many other NGOs present) welcomed and supported the proposal.

414. The observer from the ACCOBAMS Secretariat noted that the proposal had originally been prepared by the ACCOBAMS Scientific Committee. She was grateful to Spain and the EU for having endorsed and supported the proposal.

415. Chile, speaking on behalf of the Latin America & Caribbean regional group, supported the proposal.

416. The observer from the CITES Secretariat made the following statement:

“It is true that all sub-species, races, populations, sub-populations and so forth and indeed all individual specimens are of value for the conservation of the species and the text of CMS reflects this in its definition of the term ‘Species’ which includes “any geographically separate part of the population of any species or lower taxon of wild animals”. However, we struggle collectively to properly address the conservation of full species and if we divide all species to consider them at sub-population level, then we will surely have a big job before us. It would seem that addressing issues at a taxonomic level lower than species should be done sparingly and when there is a particular need for such a fine-grained approach. This species is listed in CITES Appendix II and we observe that if adopted, this listing would mean that the CMS status of this particular sub-population would be out of sync with the listing in CITES, a situation that we regret.”
The representative of Monaco strongly supported the proposal.

In view of the support expressed by Parties, the Chair concluded that this proposal could be forwarded to Plenary, with the recommendation that it could be adopted by consensus.

In relation to the proposal contained in document UNEP/CMS/COP11/Doc.24.1.2: Proposal for the inclusion of the Asiatic Lion (Panthera leo persica) on CMS Appendix I and of all other subspecies of Panthera leo in CMS Appendix II (Proposal I/2 & II/2), the representative of Kenya informed the COW that, in its capacity as the proponent of the proposal, Kenya was in consultation with the Secretariat to take forward issues relating to the listing proposal in the form of a Draft Resolution.

The Chair confirmed that document COP11/Doc.24.1.2 was, therefore, being withdrawn.

Speaking on behalf of the proponents, Senegal and Niger, the representative of Senegal introduced document UNEP/CMS/COP11/Doc.24.1.3: Proposal for the inclusion of the Red-fronted Gazelle (Eudorcas rufifrons) on CMS Appendix I (Proposal I/3).

The proposal was supported by the representatives of Benin, Ethiopia and the EU and its Member States.

In view of the support expressed by Parties, the Chair concluded that this proposal could be forwarded to Plenary with the recommendation that it could be adopted by consensus.

The proposal was strongly supported by the representatives of the EU and its Member States, Kyrgyzstan, Pakistan, Ukraine and IUCN (through its Bustard Specialist Group).

The observer from the CITES Secretariat noted that this species was included in CITES Appendix II and that if the proposal was adopted and the species was indeed endangered, it was to be hoped that a proposal would be put to a future CITES COP, so that the status of Great Bustard under the two Conventions could be harmonized in order to support efforts to conserve the species.

In view of the strong support expressed by Parties, the Chair concluded that this proposal could be forwarded to Plenary, with the recommendation that it could be adopted by consensus.

Speaking on behalf of the proponents, Ecuador and Paraguay, the representative of Ecuador introduced document UNEP/CMS/COP11/Doc.24.1.5: Proposal for the inclusion of the Semipalmated Sandpiper (Calidris pusilla) on CMS Appendix I (Proposal I/5).

The proposal was supported by the representatives of Argentina (who thanked Ecuador and Paraguay for accommodating Argentina’s comments on an earlier draft), Chile (on behalf of the Latin America & Caribbean region), and the EU and its Member States.
430. In view of the strong support expressed by Parties, the Chair concluded that this proposal could be forwarded to Plenary with the recommendation that it could be adopted by consensus.

432. The proposal was supported by the representatives of Australia, Chile (on behalf of the Latin America & Caribbean region), the EU and its Member States, Fiji and New Zealand.

433. In view of the strong support expressed by Parties, the Chair concluded that this proposal could be forwarded to Plenary with the recommendation that it could be adopted by consensus.

435. The proposal was supported by the representatives of Belarus, Chile (on behalf of the Latin America & Caribbean region) and Pakistan.

436. In response to a question from the representative of Norway, the representative of the EU and its Member States provided additional information concerning the reasons behind the proposal.

437. The representative of Israel supported the proposal but pointed out that a reference in the document to the problem of illegal hunting was not applicable throughout the species’ flyways. Israel was on a major migration route for European Roller but there was no illegal hunting of the species in Israel. On the contrary, it was highly valued, not least because of its importance for ecotourism.

438. In view of the widespread support expressed by Parties, the Chair concluded that this proposal could be forwarded to Plenary with the recommendation that it could be adopted by consensus.

440. The Chair noted that under the Rules of Procedure, it was not possible for listing proposals covering groups of species to be adopted en bloc by the Plenary. Instead, the Plenary would have to adopt each separate listing proposal, species-by-species. However, there was no such procedural constraint in the COW and it would be efficient to consider the proposal as a whole.

441. The representative of Chile supported the comments of the Chair and confirmed that Chile would be comfortable with taking the proposal species-by-species when it came to adoption in Plenary.

443. The proposal was supported by the representatives of Australia, Ecuador, Egypt, the EU and its Member States, Fiji, Senegal, South Africa and United Arab Emirates and by the observer from IUCN (through its Shark Specialist Group).

444. In view of the widespread support expressed by Parties, the Chair concluded that this proposal could be forwarded to Plenary with the recommendation that it could be adopted by consensus.

446. The proposal was supported by the representatives of Chile (on behalf of the Latin America & Caribbean region), Ecuador, the EU and its Member States and the representative of the United States of America.

447. The proposal was also strongly supported by the observer from Marine Megafauna Foundation, speaking also on behalf of other NGO observers, including Defenders of Wildlife, Humane Society International, Manta Trust, Pew, PRETOMA, Project AWARE, and Sharks International.

448. The observer from the CITES Secretariat commented on the proposed inclusion of the species in Appendix I. At CITES COP16 the Reef Manta Ray had been included in Appendix II of CITES, meaning that international trade in the species was allowed, provided that such trade was legal, sustainable and traceable. However, if the species was included in Appendix I of CMS, taking of specimens should be prohibited under the terms of CMS. This would mean conflicting obligations under the two Conventions for the 117 States that were Party to both. The CITES Secretariat appealed to States present at CMS COP11 to coordinate their positions under different Conventions and to act in a coherent fashion in this regard.

449. The representative of South Africa recognized the conservation needs set out in the proposal but stated that, at present, South Africa could only support listing on Appendix II since the species was only offered partial protection under national law; a situation that would hopefully be addressed.

450. In view of the widespread support expressed by Parties, the Chair concluded that this proposal could be forwarded to Plenary with the recommendation that it could be adopted by consensus. He asked if there was any objection to this course of action.

451. The representative of South Africa indicated that South Africa was not against the proposal being submitted to Plenary, but requested that its reservation be noted for the record.

452. The representative of Fiji introduced document UNEP/CMS/COP11/Doc.24.1.10 Proposal for the inclusion of all species of Mobula Rays (Genus *Mobula*) in CMS Appendices I & II (*Proposal I/10 & II/11*).
453. The proposal was supported by the representative from New Zealand and the observer from IUCN (through its Shark Specialist Group, which advised that listing was urgently required).

454. The observer from the Manta Trust, speaking on behalf of the aforementioned NGO coalition, also supported the proposal.

455. In view of the widespread support expressed by Parties, the Chair concluded that this proposal could be forwarded to Plenary with the recommendation that it could be adopted by consensus.

456. The representative of Norway introduced document UNEP/CMS/COP11/Doc.24.1.11/Rev.1: Proposal for the inclusion of the Polar Bear (*Ursus maritimus*) on CMS Appendix II (Proposal II/1), and tabled two amendments to section 4.3.1.

457. The representative of Canada outlined measures taken nationally, over many years, for Polar Bear conservation. Canada was aware of the new challenges and threats facing Polar Bears and was committed to the completion and implementation of a new circumpolar action plan that would address those new threats. This was evidence that all requirements of CMS Appendix II listing were already met. Canada had been working with Norway to improve the accuracy of the proposal. As a result, a number of improvements had been included and Canada was pleased to see the text evolving in line with its input. In conclusion, while Canada still struggled to see the benefit that would be gained from the proposed listing, it welcomed the support of the CMS community for its conservation effort, especially in the implementation of the forthcoming circumpolar action plan.

458. The representative of Canada invited Mr. Larry Carpenter from the Arctic community of Sachs Harbour to complement these observations. Mr. Carpenter noted that Inuit in Canada and across the Arctic lived with and respected Polar Bears. Inuit had worked with Canada to develop effective co-management systems that blended traditional knowledge and modern science in a way that ensured sustainability. This system led to better decision making. Inuit welcomed the support of CMS Parties but asked that Inuit ways and values be respected. Inuit considered that Appendix II listing was not warranted at the present time, as there were already numerous international agreements in place that would protect and conserve Polar Bears for the future.

459. The representatives of the EU and its Member States, and the observer from the United States of America supported the proposal.

460. The observer from Wildlife Migration speaking also on behalf of the Born Free Foundation, Humane Society International, IFAW, NRDC, and OceanCare, also supported the proposal.

461. The observer from Inuit Kapiriit Kanatami made a statement observing *inter alia*:

> “As the everyday stewards who co-exist with Polar Bears, it is crucial that the CMS and its members take our views and concerns very seriously and engage us in a timely and appropriate manner. In regard to the Polar Bear proposal, we have not been engaged by any minimum standard owed to us. We do not support this proposal. It is redundant based on the many agreements, as recognized in the
proposal itself, that serve to protect and conserve this species through international, national and sub-national cooperation. We are a part of these processes. Furthermore, we are not convinced how the CMS proposal will add value to our current conservation efforts and management. Rhetoric-driven concerns about the demise of Polar Bears are not constructive to our serious and difficult work in managing and conserving this species. The on-going use of negative publicity toward our practices is both disrespectful and non-constructive. Our management systems are built to be responsive to changes that take place over time whether they are human-induced or naturally occurring. We have been experiencing the impacts of climate change in the Arctic for the past 30 years, but this has not reduced Polar Bear populations in our regions. This is a fact. We continue to state that the real solutions to climate change are in the mitigation of emissions that have created this problem; not in the listing of Polar Bears, which undermines our management efforts and vilifies our way of life that is integral to the Arctic.”

462. The representative of Monaco had listened with great attention to what Inuit representatives had said. Monaco supported the proposal adding that the efforts of Inuit people needed to be recognized within the CMS.

463. The Chair noted that, listening to both Parties and the United States of America, he had heard support for the proposal. He, therefore, concluded that this proposal could be forwarded to Plenary with the recommendation that it could be adopted by consensus.

465. The proposal was supported by the representatives of Egypt, the EU and its Member States, Kenya and Senegal.

466. In view of the widespread support expressed by Parties, the Chair concluded that this proposal could be forwarded to Plenary with the recommendation that it could be adopted by consensus.

468. The proposal was supported by the representatives of Canada, Chile (on behalf of the Latin America & Caribbean region), Egypt, the EU and its Member States, and the United States of America.

469. In response to a question from the representative of Norway, the representative of Ecuador confirmed that the Range States were already working in a coordinated way at a regional level, for example through WHMSI and Partners in Flight. Inclusion of the species in CMS Appendix II would underpin these efforts.

470. In view of the support expressed by Parties, the Chair concluded that this proposal could be forwarded to Plenary with the recommendation that it could be adopted by consensus.

472. The proposal was supported by the representatives of Australia, Costa Rica, Ecuador, the EU and its Member States, Fiji, Senegal and the United States of America, and by the observer from the IUCN Shark Specialist Group (who presented a summary of recent scientific information that underlined the adverse conservation status of this species).

473. The observer from PRETOMA, speaking also on behalf of Turtle Restoration Network and other NGOs, strongly supported the proposal.

474. The representative of Chile considered that the updated information provided by IUCN Shark Specialist Group should be reflected in the document. Chile was unable to support the proposal in its present form.

475. The representative of Peru believed that the proposal might overlap with existing management measures and was also unable to support the document.

476. The Chair noted widespread support for the proposal, though two Parties, Chile and Peru, were not in a position to support the proposal at this stage. He concluded that the document should nevertheless be forwarded to Plenary, stressing that this would not preclude any Party from reiterating their position at that time.

478. These proposals were supported by the representatives of Chile (on behalf of the Latin America & Caribbean region), Costa Rica, Egypt, the EU and its Member States, Fiji, Monaco and Peru, and by the observer from Defenders of Wildlife, speaking also on behalf of a coalition of NGOs (including Humane Society International, IFAW, Manta Trust, Marine Megafauna Foundation, Pew, PRETOMA, Project AWARE, Shark Advocates International, Turtle Island Restoration Network, WCS and WWF) supported the proposal. The observer from IFAW (also on behalf of the NGO coalition) argued that Hammerhead Sharks would also qualify for CMS Appendix I listing and suggested Parties might consider amending the proposal in this respect, at least for the North Atlantic.

479. In view of the widespread support expressed by Parties, the Chair concluded that both proposals could be forwarded to Plenary with the recommendation that they could be adopted by consensus.

481. This proposal was supported by the representatives of Ecuador, Fiji, Israel and New Zealand, and by the observers from IUCN (through its Shark Specialist Group) and Pew (speaking also on behalf of other NGOs).
482. The representative of Australia reported that his country has carefully studied the
documentation provided and had sought advice from a range of scientific and other
stakeholders. Australia felt that there remained a number of outstanding questions
surrounding the population trend of thresher sharks that occurred in Australian waters, which
appeared not to show any evidence of decline. However, Australia recognized that there was
evidence that species of thresher shark were showing significant declines in many other parts
of their ranges.

483. The Chair concluded that he had not heard any opposition to the proposal. Therefore,
in view of the widespread support expressed by Parties, this proposal could be forwarded to
Plenary with the recommendation that it could be adopted by consensus.

484. The representative of Monaco introduced document UNEP/CMS/COP11/Doc.24.1.18:
Proposal for the inclusion of the European eel (*Anguilla anguilla*) on CMS Appendix II
(*Proposal II/12*).

485. This proposal was supported by the representatives of Chile (on behalf of the Latin
America & Caribbean region), Ecuador, the EU and its Member States, Morocco, Norway
and the United States of America.

486. Citing a need to ensure that relevant information from all parts of the species’ range
were taken into account, the representatives of Tunisia and Egypt proposed establishing an
intersessional Working Group on European eel.

487. The representative of Monaco thanked Egypt and Tunisia for their suggestion, which
could serve to strengthen the proposal.

488. In view of the widespread support expressed by Parties, the Chair concluded that this
proposal could be forwarded to Plenary, with the recommendation that it could be adopted by
consensus. He asked the Secretariat to liaise with Monaco and the other Parties concerned to
see how work to respond to the proposed listing could be taken forward intersessionally.

Criteria for Amendment of the Appendices (Item 24.2)

489. Mr. Barry Baker (COP-Appointed Scientific Councillor for Bycatch) presented
document UNEP/CMS/COP11/Doc.24.2/Rev.1: *Assessing Proposals for the Amendment of
CMS Appendices*. A Draft Resolution was contained in Annex II of the document.

490. The representative of Chile considered that some of the proposals regarding the use of
IUCN Red List Criteria were not applicable to all Parties, and suggested that an online
intersessional group could review this and report to the next COP.

491. The representative of Ethiopia expressed concern about the use of IUCN criteria
which were not always appropriate for the unique characteristics of migratory species. He
presented the example of the White-eared Kob (*Kobus kob leucotis*) as a species for which
high numbers did not necessarily reflect a favourable conservation status. He suggested a
mixed approach should be applied, complementing the use of IUCN Red List Criteria with
additional criteria to be developed specifically for migratory species.
492. The representative of New Zealand supported the Draft Resolution, but expressed concern over the proposal in square brackets to develop more detailed guidelines for consideration by the next COP. This implied that successive CMS COPs would be applying different criteria; a potentially confusing situation.

493. The representative of Brazil considered criteria for amendment of the Appendices to be fundamental to the work of CMS. However, greater clarity was needed in some parts of the document and Brazil made specific proposals on how this could be achieved. Brazil supported the suggestion of Chile for additional work to be carried out intersessionally.

494. The representative of the EU and its Member States recognized both the importance of clarity in the process of reviewing listing proposals and the value of using the existing IUCN Red List assessments to support listing decisions. The EU was conscious of the importance of coherence between different MEAs, in this case CMS and CITES. In the case of marine species, coherence with Regional Fisheries Management Organizations should also be ensured.

495. Subject to inclusion of some minor amendments, the EU strongly supported the adoption of the Draft Resolution.

496. The representative of CITES noted that Rio+20 had emphasized the importance of using agreed criteria for the listing of species. He welcomed the clarity of the proposal, which, if adopted, would make it easier for CITES and CMS to work together. At present there were mismatches between the Appendices of the two Conventions, resulting in conflicting obligations for many States which were Party to both Conventions, as well as lost opportunities for shared action. It was important that stakeholders received clear and consistent messages from both CITES and CMS. Periodic reviews of Appendices under CITES ensured that they reflected current needs, and CMS might want to consider this.

497. The representative of Australia, tabling a number of minor amendments, considered it important to note that this was only a guidance document and that the Scientific Council would retain flexibility to exercise its judgement when considering proposals for inclusion of species in the CMS Appendices. It would be unfortunate if the new guidelines were not tested further before more detailed ones were developed.

498. Following brief responses from Mr. Baker to the points raised, the Chair concluded that there appeared to be broad support for adopting the Draft Resolution subject to inclusion of a small number of amendments. All participants with proposals for amendments were asked to send these to the Secretariat promptly. The document would be revised and the COW would revisit this Agenda Item in due course.

499. A duly revised Draft Resolution was endorsed by the COW on 9 November (see below).

**Endorsement of Amendments Proposed In-Session**

500. During its sessions on 6 & 7 November, the Committee of the Whole endorsed the following revised texts to go forward to Plenary without further amendment, unless stated otherwise:

- **UNEP/CMS/COP11/CRP1**: Draft Resolution *Strategic Plan for Migratory Species 2015-2023*
• UNEP/CMS/COP11/CRP2: Draft Resolution Programme of Work on Climate Change and Migratory Species
• UNEP/CMS/COP11/CRP3: Draft Resolution Enhancing the relationship between the CMS Family and Civil Society
• UNEP/CMS/COP11/CRP4: Proposal to add Panthera leo to Appendix II: Draft Resolution Conservation and Management of the African Lion Panthera leo (Note that a further amended version of this Draft Resolution was distributed subsequently as CRP4/Rev.1 and endorsed on 9 November).
• UNEP/CMS/COP11/CRP5: Draft Resolution Future CMS Activities Related to Invasive Alien Species
• UNEP/CMS/COP11/CRP6: Draft Resolution Review of Decisions
• UNEP/CMS/COP11/CRP8: Draft Resolution Arrangements for Meetings of the Conference of the Parties
• UNEP/CMS/COP11/CRP9: Draft Resolution Sustainable Boat-Based Marine Wildlife Watching
• UNEP/CMS/COP11/CRP10: Draft Resolution Renewable Energy and Migratory Species
• UNEP/CMS/COP11/CRP12: Draft Resolution The Taxonomy and Nomenclature of Birds Listed on the CMS Appendices
• UNEP/CMS/COP11/CRP13: Draft Resolution Conservation Implications of Cetacean Culture
• UNEP/CMS/COP11/CRP15: Draft Resolution Live Captures of Cetaceans from the Wild for Commercial Purposes (Note that a further amended version of this Draft Resolution was distributed subsequently as CRP15/Rev.1 and endorsed on 9 November.)

501. In relation to CRP4 on the African Lion, the observer from the Born Free Foundation felt that listing on Appendix II would have been appropriate, but given the lack of consensus, the initiative of Kenya to bring forward the present Draft Resolution had been a fair compromise. He suggested a minor amendment to one paragraph. A further amended version of this Draft Resolution was distributed subsequently as CRP4/Rev.1 and endorsed by the COW on 9 November.

502. With regard to CRP15, the observer from the CITES Secretariat regretted that the second operative paragraph did not support the existing multilateral measures agreed by CITES for the import and international transit of live cetaceans, even if the text of the Convention permitted Parties to take stricter domestic measures.

503. The Chair underlined that CRP15 had been agreed by the Aquatic Issues Working Group and regardless of the validity of the point made by the CITES Secretariat the text of the Draft Resolution was in the hands of the Parties.

504. The representative of Argentina advised that a minor adjustment to the translation into Spanish of CRP15 was required, but that this was not a question of substance.

505. A further amended version of this Draft Resolution was distributed subsequently as CRP15/Rev.1 and endorsed by the COW on 9 November (see below).

506. During its session on 9 November, the COW considered the remaining Draft Resolutions and proposed amendments to the Rules of Procedure (CRP25) to go forward to
Plenary for adoption. The Chair of the COW noted that 11 Draft Resolutions, contained in documents CRP1 to CRP6, CRP8 to CRP10, and CRP12 and CRP13, respectively, had already been endorsed by earlier sessions of the COW.

**UNEP/CMS/COP11/CRP4/Rev.1:** Proposal to add *Panthera leo* to Appendix II: Draft Resolution *Conservation and Management of the African Lion, Panthera leo*

507. The representative of Kenya noted that an incomplete draft had inadvertently been distributed by the Secretariat. The Chair ruled that further consideration of this Draft Resolution should be deferred for a short while to enable the representative of Kenya to confer with the Secretariat.

**UNEP/CMS/COP11/CRP7/Rev.1:** Draft Resolution *Guidelines for Assessing Listing Proposals to Appendices I and II of the Convention*

508. This Draft Resolution was endorsed by the COW without further amendment.

**UNEP/CMS/COP11/CRP11:** Draft Resolution *Action Plan for Migratory Landbirds in the African-Eurasian Region*

509. This Draft Resolution was endorsed by the COW without further amendment.

**UNEP/CMS/COP11/CRP14:** Draft Resolution *Management of Marine Debris*

510. This Draft Resolution was endorsed by the COW without further amendment.

**UNEP/CMS/COP11/CRP15/Rev.1:** Draft Resolution *Live Captures of Cetaceans from the Wild for Commercial Purposes*

511. An earlier version of this Draft Resolution (CRP15) had been endorsed by the COW on the afternoon of 7 November, but the preamble had subsequently been amended at the request of the representative of Argentina. The revised Draft Resolution (CRP15/Rev.1) was endorsed by the COW without further amendment.

**UNEP/CMS/COP11/CRP16:** Draft Resolution *Single Species Action Plan for the Loggerhead Turtle (Caretta caretta) in the South Pacific Ocean*

512. This Draft Resolution was endorsed by the COW without further amendment.

**UNEP/CMS/COP11/CRP17:** Draft Resolution *The Central Asian Mammals Initiative*

513. This Draft Resolution was endorsed by the COW without further amendment.

**UNEP/CMS/COP11/CRP18:** Draft Resolution *Advancing Ecological Networks to Address the Needs of Migratory Species*

514. This Draft Resolution was endorsed by the COW subject to the inclusion of a minor amendment to the preamble tabled by the representative of South Africa.

**UNEP/CMS/COP11/CRP19:** Draft Resolution *Fighting Wildlife Crime and Offences within and beyond Borders*
515. This Draft Resolution was endorsed by the COW subject to the inclusion of amendments tabled by the representative of Monaco and the observer from UNEP and on the understanding that language versions would be harmonized (inconsistencies in the French and Spanish texts having been pointed by the representatives of Brazil, Chile, Monaco and Uruguay).

516. The representative of the United States of America, supported by the representative of Egypt, referred to the Resolution on the Illegal Trade in Wildlife approved by Ministers at the first United Nations Environment Assembly in June 2014. This had recognized that "illegal trade in wildlife and its adverse impacts...undermine good governance and the rule of law and threatens national security". The United States of America considered that CRP19 would have been stronger had it recognized this threat.

517. The representative of Brazil reiterated his Government’s view (expressed in an earlier session of the COW) that matters of national and regional security were not within the purview of CMS.

UNEP/CMS/COP11/CRP20: Draft Resolution Conservation of Migratory Sharks and Rays

518. This Draft Resolution was endorsed by the COW without further amendment.

UNEP/CMS/COP11/CRP21: Draft Resolution Communication, Information and Outreach Plan

519. This Draft Resolution was endorsed by the COW without further amendment.

UNEP/CMS/COP11/CRP22: Draft Resolution Concerted and Cooperative Actions

520. This Draft Resolution was endorsed by the COW without further amendment.

521. This Draft Resolution was endorsed by the COW without further amendment.

UNEP/CMS/COP11/CRP24: Draft Resolution Enhancing the Effectiveness of the Convention through a Process to Review Implementation

522. This Draft Resolution was endorsed by the COW without further amendment.

523. The proposed amendments to the Rules of Procedure were endorsed by the COW without further revision.

UNEP/CMS/COP11/CRP26: Draft Resolution World Migratory Bird Day

524. This Draft Resolution was endorsed by the COW without further amendment.

UNEP/CMS/COP11/CRP27: Draft Resolution Saker Falcon (Falco cherrug) Global Action Plan (SakerGAP)
This Draft Resolution was endorsed by the COW without further amendment.

**UNEP/CMS/COP11/CRP28:** Draft Resolution *Enhancing Synergies and Common Services among CMS Family Instruments*

This Draft Resolution was endorsed by the COW without further amendment.

**UNEP/CMS/COP11/CRP29:** Draft Resolution *Programme of Work on Migratory Birds and Flyways*

This Draft Resolution was endorsed by the COW without further amendment.

**UNEP/CMS/COP11/CRP30:** Draft Resolution *The Prevention of Illegal Killing, Taking and Trade of Migratory Birds*

This Draft Resolution was endorsed by the COW without further amendment.

**UNEP/CMS/COP11/CRP31:** Draft Resolution *Preventing Poisoning of Migratory Birds*

This Draft Resolution was endorsed by the COW without further amendment.

The observer from SEO/BirdLife International, supported by the observer from the Wildfowl & Wetlands Trust, welcomed the Draft Resolution and associated Guidelines. He thanked the Parties for reconciling diverging positions and underlined the need to work with hunting organizations on replacing the use of lead ammunition. He urged the prompt creation of a sub-group within the framework of the CMS Working Group on Poisoning, involving all stakeholders, including ammunition manufacturers, to develop transition schedules for different types of ammunition and to advise all actors on best practices.

The observer from the European Federation of Associations for Hunting & Conservation (FACE) made the following statement for the record:

“Thank you, Chair, for giving FACE the opportunity to express its concerns on the Guidelines to Prevent the Risk of Poisoning of Migratory Birds, specifically and limited to the delicate issue of lead.

FACE appreciates the availability of the CMS Secretariat to have an open ended discussion on the Review and Guidelines to Prevent the Risk of Poisoning of Migratory Birds by setting up a dedicated Task Group on Lead Ammunition.

We further welcome the efforts by the EU to reach a workable compromise among Parties.

FACE regrets however that the Guidelines fail to make the distinction between lead shot and bullets, which are different products specifically designed for different uses. The absence of this distinction risks jeopardising the feasibility of the proposed timeline.

FACE, representing 7 million users has the expertise to provide an informed and objective point of view on lead ammunition, including the impact that a blanket ban of lead in all ammunition will have on consumers.”
FACE would like to go on the record listing the arguments for this distinction allowing Parties to make an informed decision:

- FACE supports the ban on the use of lead shot in wetlands and would like to see this effective throughout the EU, through legal provisions and appropriate awareness measures. However we consider that a total ban on the use of lead in all ammunition would have a disproportionate negative impact on the greater majority of hunters.

- Through the process of phasing out lead shot in wetlands there is a long experience of using alternatives to lead shot in certain countries. The same cannot be said for lead bullets, where experience is limited, as alternatives do not exist for all calibres. Indeed no country has phased out the use of lead in bullets. The often quoted California ban will enter into force in 2019.

- The dispersion of lead bullets in the environment does not warrant such a draconian measure as the absolute number of shot bullets is relatively low.

- The risk of poisoning endangered scavengers can easily be minimized if not reduced to zero by implementing local bans in the interested areas. A total ban on bullets is disproportionate to risks. FACE proposes to limit the use of lead bullets wherever risk assessments demonstrate the real risk of a negative impact on migratory birds’ populations.

- Concerns related to human health in the consumption of game meat shot with lead bullets are addressed by risk management practices in treating the meat (FACE, respectfully points out that human health does not fall in the remit of CMS).

FACE appreciates that the Guidelines will be open for improvement and that a review process is enshrined in the Resolution in the light of developing research findings and other relevant information. FACE is willing to proactively participate to this process in view of reaching workable solutions in the interest of migratory birds’ conservation and the principle of sustainable use.

The success of this resolution depends on the willing cooperation of all parties. FACE truly hopes that in the course of future discussions - under the Task Group on Lead Ammunition - proportionate solutions can be found among all stakeholders.”

532. The observer from the International Association for Falconry and the Conservation of Birds of Prey (IAF) called on the Secretariat and the Parties to promote the banning of rodent poisoning within the breeding range of the Saker Falcon. He also raised the issue of diclofenac and its devastating impact on vultures, as well as neonicotinoid insecticides, the impacts of which were less well known. He called on the Secretariat and Parties to work with the international manufacturers to prevent production of these chemicals moving from country to country. Finally, he supported the medium-term phasing out of lead shot, especially in wetlands, while respecting the rights of all stakeholders.

533. The representative of Israel, supported by the representative of Ecuador, endorsed the Draft Resolution. He expressed the view that FACE should play a leadership role in educating hunters rather than resisting the phasing out of lead. He encouraged CMS Parties to reduce illegal hunting through both education and enforcement, as well as reduction in the use of lead ammunition.
534. Mr. Heredia (Secretariat) noted that the COP11 Working Group on Avian Issues had introduced a number of amendments to the original text of the Draft Resolution, adding flexibility to the implementation of the Guidelines at national level. Over the coming intersessional period, the Secretariat would continue to work with all stakeholders to optimize the implementation of the Guidelines.

**UNEP/CMS/COP11/CRP32: Draft Resolution Synergies and Partnerships**

535. Draft Resolution was endorsed by the COW subject to the inclusion of a new preambular paragraph tabled by the observer from UNEP.

**UNEP/CMS/COP11/CRP33: Draft Resolution Restructuring of the Scientific Council**

536. Draft Resolution was endorsed by the COW without further amendment.

**UNEP/CMS/COP11/CRP34: Draft Resolution Financial and Administrative Matters**

537. The representative of South Africa requested a short extension to facilitate final preparations for consideration of this document. The Chair of the COW ruled that, in the interests of time, discussion of this Agenda Item would be deferred to the Plenary.

538. Closing the session of the COW, the Chair thanked Parties for the significant steps forward that endorsement of the Draft Resolutions represented. Subject to the final adoption of the Draft Resolutions in Plenary, he underlined the need for implementation and invited additional voluntary contributions to maximize the effectiveness of CMS.

**VI. FORMAL AND CONCLUDING BUSINESS**

**INTERIM AND FINAL REPORTS OF THE CREDENTIALS COMMITTEE (ITEM 25)**

539. The representative of Pakistan (Chair of the Credentials Committee) presented interim reports to the Committee of the Whole on 5 and 6 November. At the Committee’s First Meeting on 4 November the Credentials of 53 Parties had been examined and found to be in order. At the Second Meeting, held on 6 November, the credentials of two further Parties, Georgia and United Republic of Tanzania, had been examined and found to be in order. The number of Parties whose credentials had been found to be in order therefore stood at 55.

540. The Chair of the Credentials Committee presented the Committee’s final report to the Plenary on 9 November. He noted that since the Committee’s second interim report to COW, the credentials of the delegation from Ecuador had been examined and found to be in order, bringing the total of credentials examined and found to be in order to 56. Parties were to be congratulated for complying with the Rules of Procedure and thanks were due to the Secretariat for its diligent work with Parties before and during the COP to enable such a high level of compliance.

541. There being no questions or comments from the floor, the Chair of the Plenary ruled that the final report of the Credentials Committee had been approved.
REPORTS OF SESSIONAL COMMITTEES (ITEM 26)

542. The Chair of the Committee of the Whole, Mr. Øystein Størkersen (Norway) reported that the COW had met daily from Tuesday 4 November to Friday 7 November and again during the morning of Sunday 9 November. It had been a very fruitful week and the COW had been able to complete its work on all issues with the exception of the Draft Resolution on the budget. The COW had otherwise endorsed all Draft Resolutions and proposals for listing of species on CMS Appendices.

543. The Chair of the Budget Committee, Ms. Malta Qwathekana (South Africa) reported that the Committee had met on several occasions to consider the proposed Programme of Work for 2015-2017, the proposed budget for 2015-2017 and the relevant Draft Resolution. Following lengthy discussions, agreement had now been reached.

544. The Executive Secretary confirmed that the relevant revised documents had been posted in three languages since the previous day, giving delegates adequate time for review. He recommended that any further discussion should take place under Agenda Item 27: Adoption of Resolutions and Amendments to the Appendices.

545. The Plenary Chair thanked the Chairs of the COW and the Budget Committee for the work done throughout the COP.

ADOPTION OF RESOLUTIONS AND AMENDMENTS TO THE APPENDICES (ITEM 27)

Adoption of Amendments to the Appendices

546. The Chair invited the Meeting to take a bloc decision on proposals for additions of 29 species to the CMS Appendices, as recommended by the Scientific Council and endorsed by the Committee of the Whole.

547. There being no comments from the floor to the contrary, the following species, whose common and scientific names, together with the corresponding proposed Appendix listing(s), were read out individually by the Chair of the COW, were approved by the Plenary of the COP for listing in the Appendix or Appendices indicated:

- Cuvier’s beaked whale (*Ziphius cavirostris*) – Appendix I
- Red-fronted Gazelle (*Eudorcas rufifrons*) – Appendix I
- Great Bustard (*Otis tarda*) – Appendix I
- Semipalmated Sandpiper (*Calidris pusilla*) – Appendix I
- Great Knot (*Calidris tenuirostris*) – Appendix I
- European Roller (*Coracias garrulus*) – Appendix I
- Narrow Sawfish (*Anoxypristis cuspidata*) – Appendix I & Appendix II
- Dwarf Sawfish (*Pristis clavata*) – Appendix I & Appendix II
- Smalltooth Sawfish (*Pristis pectinata*) – Appendix I & Appendix II
- Green Sawfish (*Pristis zijsron*) – Appendix I & Appendix II
- Largetooth Sawfish (*Pristis pristis*) – Appendix I & Appendix II
- Reef Manta Ray (*Manta alfredi*) – Appendix I & Appendix II
- Giant Devil Ray (*Mobula mobular*) – Appendix I & Appendix II
- Spinetail Mobula (*Mobula japonica*) – Appendix I & Appendix II
The decision to list the above-mentioned species was marked by applause from the participants.

The Chair invited the COP to consider the following two listing proposals that had been endorsed by an overwhelming majority of the COW:

- Silky Shark (Carcharhinus falciformis) – Appendix II
- European eel (Anguilla anguilla) – Appendix II

There being no objections, the Chair confirmed that these two proposals had also been adopted by the COW.

Species added to Appendices I and II by the 11th Meeting of the Conference of the Parties is listed in ANNEX VII to the present report.

The Chair invited comments from Parties.

The representatives of Chile and Peru indicated that their countries joined the consensus regarding the decision to list Silky Shark on CMS Appendix II.

These statements were greeted by warm applause.

Adopted Resolutions

All the Adopted Resolutions can be found in ANNEX VIII to the present Report.

The Chair referred the Meeting to document CRP4/Rev.1: Proposal to add Panthera leo on Appendix II: Draft Resolution Conservation and Management of the African Lion, Panthera leo that had been deferred from an earlier session of the COW.

The representative of Kenya tabled amendments to the Draft Resolution to bring it into line with the version that should have been distributed to participants.

The Plenary adopted the Draft Resolution subject to the inclusion of the amendments detailed by Kenya. The adopted version of the Resolution is published as Resolution 11.32: Conservation and Management of the African Lion, Panthera leo.
559. The Chair invited the Plenary to consider each of the remaining Draft Resolutions and associated documents, together with the relevant recommendations of the Committee of the Whole, one by one. She noted that many of the Draft Resolutions now being tabled had been amended from their original versions to take into account discussion during the Committee of the Whole, the Drafting Group, the Budget Committee and/or specific Working Groups set up by the COW.

560. The Plenary of the COP decided as follows:

**UNEP/CMS/COP11/CRP1**: Draft Resolution *Strategic Plan for Migratory Species 2015-2023*

561. The COP adopted the Draft Resolution, including the *Strategic Plan 2015-2023* and *Terms of Reference for the Strategic Plan Implementation Working Group*, without further amendment. The COP also took note of the *Assessment of Implementation of the Strategic Plan 2006-2014* contained in document UNEP/CMS/COP11/Doc.15.1 (Adopted version of the Resolution published as Resolution 11.2).

**UNEP/CMS/COP11/CRP2**: Draft Resolution *Programme of Work on Climate Change and Migratory Species*

562. The COP adopted the Draft Resolution, including the *Programme of Work* annexed to it, without further amendment (Adopted version of the Resolution published as Resolution 11.26).

**UNEP/CMS/COP11/CRP3**: Draft Resolution *Enhancing the Relationship between the CMS Family and Civil Society*

563. The COP adopted this Draft Resolution without further amendment, although the Secretariat noted that, in conformity with the agreement reached in the Drafting Group, an editorial adjustment would be made to ensure that references within the text to “NGOs” were expanded to “NGOs and CSOs”, with CSOs referring to Civil Society Organizations (Adopted version of the Resolution published as Resolution 11.11).

**UNEP/CMS/COP11/CRP5**: Draft Resolution *Future CMS Activities Related to Invasive Alien Species*

564. The COP adopted this Draft Resolution without further amendment (Adopted version of the Resolution published as Resolution 11.28).

**UNEP/CMS/COP11/CRP6**: Draft Resolution *Review of Decisions*

565. The COP adopted this Draft Resolution without further amendment (Adopted version of the Resolution published as Resolution 11.6).

**UNEP/CMS/COP11/CRP7/Rev.1**: Draft Resolution *Guidelines for Assessing Listing Proposals to Appendices I and II of the Convention*

566. The COP adopted this Draft Resolution, including the *Guidelines* annexed to it, without further amendment (Adopted version of the Resolution published as Resolution 11.33).

**UNEP/CMS/COP11/CRP8**: Draft Resolution *Arrangements for Meetings of the Conference of the Parties*
567. The COP adopted this Draft Resolution without further amendment (Adopted version of the Resolution published as Resolution 11.5).

UNEP/CMS/COP11/CRP9: Draft Resolution Sustainable Boat-Based Marine Wildlife Watching

568. The COP adopted this Draft Resolution, including the Recommended Elements for National Guidelines annexed to it, without further amendment (Adopted version of the Resolution published as Resolution 11.29).

UNEP/CMS/COP11/CRP10: Draft Resolution Renewable Energy and Migratory Species

569. The COP adopted this Draft Resolution, and endorsed the associated Guidelines, without further amendment (Adopted version of the Resolution published as Resolution 11.27).

570. The COP adopted this Draft Resolution, including the associated Action Plan, without further amendment (Adopted version of the Resolution published as Resolution 11.17).

UNEP/CMS/COP11/CRP12: Draft Resolution The Taxonomy and Nomenclature of Birds Listed on the CMS Appendices

571. The COP adopted this Draft Resolution without further amendment (Adopted version of the Resolution published as Resolution 11.19).

UNEP/CMS/COP11/CRP13: Draft Resolution Conservation Implications of Cetacean Culture

572. The COP adopted this Draft Resolution without further amendment (Adopted version of the Resolution published as Resolution 11.23).

UNEP/CMS/COP11/CRP14: Draft Resolution Management of Marine Debris

573. COP adopted this Draft Resolution without further amendment (Adopted version of the Resolution published as Resolution 11.30). The COP also took note of the key findings set out in annexes 2, 3 and 4 to document UNEP/CMS/COP11/Doc.23.4.6: Management of Marine Debris.

UNEP/CMS/COP11/CRP15/Rev.1: Draft Resolution Live Captures of Cetaceans from the Wild for Commercial Purposes

574. The COP adopted this Draft Resolution without further amendment (Adopted version of the Resolution published as Resolution 11.22).

UNEP/CMS/COP11/CRP16: Draft Resolution Single Species Action Plan for the Loggerhead Turtle (Caretta caretta) in the South Pacific Ocean

575. The COP adopted this Draft Resolution, including the associated Action Plan, without further amendment (Adopted version of the Resolution published as Resolution 11.21).
UNEP/CMS/COP11/CRP17: Draft Resolution *The Central Asian Mammals Initiative*

576. The COP adopted this Draft Resolution, including its annexes: (a) the *Programme of Work for the Conservation of Large Mammal Migrations in Central Asia*; (b) the *Guidelines to Mitigate Impact from Mining and Infrastructure on Migratory Mammals*; and (c) the *International Single Species Action Plan for the Conservation of Argali (Ovis ammon)* (Adopted version of the Resolution published as Resolution 11.24).

UNEP/CMS/COP11/CRP18: Draft Resolution *Advancing Ecological Networks to Address the Needs of Migratory Species*

577. The COP adopted this Draft Resolution without further amendment, but subject to the inclusion of the amendment that had been endorsed in the final session of the COW, immediately prior to the current Plenary session (Adopted version of the Resolution published as Resolution 11.25).

UNEP/CMS/COP11/CRP19: Draft Resolution *Fighting Wildlife Crime and Offences within and beyond Borders*

578. The COP adopted this Draft Resolution without further amendment, but subject to the inclusion of the amendments and language corrections that had been endorsed in the final session of the COW, immediately prior to the current Plenary session (Adopted version of the Resolution published as Resolution 11.31).

UNEP/CMS/COP11/CRP20: Draft Resolution *Conservation of Migratory Sharks and Rays*

579. The COP adopted this Draft Resolution without further amendment. (Adopted version of the Resolution published as Resolution 11.20).

UNEP/CMS/COP11/CRP21: Draft Resolution *Communication, Information and Outreach Plan*

580. The COP adopted this Draft Resolution, including the associated *Plan*, without further amendment (Adopted version of the Resolution published as Resolution 11.8).

UNEP/CMS/COP11/CRP22: Draft Resolution *Concerted and Cooperative Actions*

581. The COP adopted this Draft Resolution, including its annexes: (a) the *Lists of Species for Concerted Actions and Cooperative Actions*, and (b) the *Recommendations for Enhancing Effectiveness of the Concerted and Cooperative Actions* (Adopted version of the Resolution published as Resolution 11.13).

UNEP/CMS/COP11/CRP23: Draft Resolution *Criteria for Assessing Proposals for New Agreements*

582. The COP adopted this Draft Resolution, including the *Criteria* annexed to it, without further amendment (Adopted version of the Resolution published as Resolution 11.12).
UNEPCMS/COP11/CRP24: Draft Resolution Enhancing the Effectiveness of the Convention through a Process to Review Implementation

583. The COP adopted this Draft Resolution without further amendment (Adopted version of the Resolution published as Resolution 11.7).

UNEPCMS/COP11/CRP25: Amendments to the Rules of Procedure

584. The Chair recalled that this document, relating to the Rules of Procedure for future meetings of the Conference of the Parties, had originated from Annex 2 to document UNEPCMS/COP11/Doc.4. Following discussion in the Committee of the Whole, the Drafting Group of the COW had agreed amendments to the originally tabled document and the revised text was now before the Plenary for its consideration and endorsement. The COW had recommended that the amended Rules of Procedure be submitted for adoption at COP12. The COW had also recommended that the following rules should apply intersessionally:

- Rule 3 relating to credentials;
- Rule 6 relating to the composition of the Bureau;
- Rule 21 relating to the submission of proposals for amendment of the convention and appendices; and
- Rule 22 relating to the submission of resolutions and recommendations.

585. The Chair further recalled that the COP had adopted the Draft Resolution contained in document UNEPCMS/COP11/CRP6: Review of Decisions, which called on the Parties and the Secretariat to use the term “Decision” instead of “Recommendation”. As a consequence, the Secretariat would be making the appropriate editorial adjustments to UNEPCMS/COP11/CRP25.

586. There being no objections or other interventions from the floor, the COP decided to submit the Rules of Procedure contained in CRP25 to Parties for adoption at COP12 (reproduced as ANNEX II to the present report) and that, in the meantime, Rules 3, 6, 21 and 22 (as contained in CRP25) should apply intersessionally.

UNEPCMS/COP11/CRP26: Draft Resolution World Migratory Bird Day

587. The COP adopted this Draft Resolution without further amendment (Adopted version of the Resolution published as Resolution 11.9).

UNEPCMS/COP11/CRP27: Draft Resolution Saker Falcon (Falco cherrug) Global Action Plan (SakerGAP)

588. The COP adopted this Draft Resolution, including the Action Plan annexed to it, without further amendment (Adopted version of the Resolution published as Resolution 11.18).

UNEPCMS/COP11/CRP28: Draft Resolution Enhancing Synergies and Common Services among CMS Family Instruments

589. The COP adopted this Draft Resolution without further amendment. Adopted version of the Resolution published as Resolution 11.3.
UNEP/CMS/COP11/CRP29: Draft Resolution Programme of Work on Migratory Birds and Flyways

590. The COP adopted this Draft Resolution, including the Programme of Work and Americas Flyways Framework annexed to it, without further amendment (Adopted version of the Resolution published as Resolution 11.14).

UNEP/CMS/COP11/CRP30: Draft Resolution The Prevention of Illegal Killing, Taking and Trade of Migratory Birds

591. The COP adopted this Draft Resolution, including the Terms of Reference of the Intergovernmental Task Force to Address Illegal Killing, Taking and Trade of Migratory Birds in the Mediterranean annexed to it, without further amendment (Adopted version of the Resolution published as Resolution 11.16).

UNEP/CMS/COP11/CRP31: Draft Resolution Preventing Poisoning of Migratory Birds

592. The COP adopted this Draft Resolution, including the associated guidelines, without further amendment (Adopted version of the Resolution published as Resolution 11.15).

UNEP/CMS/COP11/CRP32: Draft Resolution Synergies and Partnerships

593. The COP adopted this Draft Resolution without further amendment, but subject to the inclusion of the amendment that had been agreed in the final session of the COW, immediately prior to the current Plenary session (Adopted version of the Resolution published as Resolution 11.10).

UNEP/CMS/COP11/CRP33: Draft Resolution Restructuring of the Scientific Council

594. The COP adopted this Draft Resolution without further amendment (Adopted version of the Resolution published as Resolution 11.4).

595. The representative from Brazil thanked members of the ad hoc ‘Friends of the Chair’ Working Group that had finalized the text of this Draft Resolution.

UNEP/CMS/COP11/CRP34: Draft Resolution Financial and Administrative Matters

596. The COP adopted this Draft Resolution without further amendment, including, as recommended by the Budget Committee: (a) the Budget for the Triennium 2015–2017; (b) the Contributions of Parties to Fund the 2015–2017 Budget; (c) the Revised Terms of Reference of the Finance and Budget Subcommittee, (d) the Terms of Reference for the Administration of the Trust Fund for the Convention on the Conservation of Migratory Species of Wild Animals; and (e) the Programme of Work for the Triennium 2015–2017. All of these documents were annexed to the Draft Resolution, as adopted (Adopted version of the Resolution published as Resolution 11.1).

597. At the recommendation of the COW, the Plenary also took note of the following related documents:

598. The representatives of Chile, Fiji and Egypt underlined the importance of capacity-building and the related pre-COP workshops, and thanked the Capacity-Building Unit of the Secretariat for its work to date.

**DATE AND VENUE OF THE 12TH MEETING OF COP (ITEM 28)**

599. The Chair drew attention to document UNEP/CMS/COP11/Doc.28: *Arrangements for Hosting the 11th and 12th Meetings of the Conference of the Parties.*

600. At the invitation of the Chair, the representative of the Philippines confirmed that his country would be privileged to host the CMS COP12 in 2017. The Philippines was a mega-diverse country and an important pathway and habitat of migratory species. He continued: “From the highlands of Ecuador to the shores of the Philippines, at the other end of the world, this is what we call the ridge to reef approach. We hope to approximate the efficiency, hospitality and friendship of the people of Ecuador. If allowed by the COP, we would like to invite everybody to the Oceania region, and the Philippines, in particular, for COP12. As our tourism slogan goes, ‘It’s more fun in the Philippines’!”

601. The confirmation of the Philippines’ offer to host COP12, which was followed by a short video presentation, was welcomed with applause from participants.

602. The Chair confirmed that the COP had taken note of the Philippines’ interest and stated that Ecuador stood ready to assist the next hosts.

603. Through this Agenda Item the COP also endorsed UNEP/CMS/COP11/CRP35: *Draft Resolution Arrangements for Hosting the 11th and 12th Meetings of the Conference of the Parties,* commending the Government of Ecuador for hosting COP11 and instructing the Secretariat to work with the Government of the Philippines to make the necessary arrangements for COP12. Adopted version of this Resolution published as Resolution 11.34.

**ADOPTION OF THE REPORT (ITEM 29)**

604. The Chair drew attention to the draft Daily Reports that had been circulated to delegates. She confirmed that comments and corrections could be submitted to the Secretariat, provided this was done within a period of one month of closure of COP11. However, any Party that wished to intervene with regard to the draft Daily Reports was invited to do so now.
605. The representatives from Canada and the United Arab Emirates confirmed that they had submitted minor amendments to the Secretariat in relation to paragraph 463, and paragraphs 78, 620 and 621, respectively.

606. There being no other comments, the Report of the Meeting was adopted subject to inclusion of the amendments tabled by Canada and United Arab Emirates, and any other amendments submitted by participants within the one-month deadline.

ANY OTHER BUSINESS (ITEM 30)

607. In response to a question from the representative of South Africa, in her capacity as Chair of the Budget Committee, the Chair of the Plenary confirmed that the Draft Resolution on Financial and Administrative Matters (UNEP/CMS/COP11/CRP34) and the documents annexed to it had now been adopted by the COP. Discussions would not be reopened.

608. The Chair of the Budget Committee, supported by the representative of Switzerland, expressed concern that operative paragraph 28 of the Resolution, relating to the preparation of budget scenarios at COP12, was not very comfortable for many Parties and might prove to be a burden to the Convention.

609. The representatives of France and Belgium recalled that the substance of operative paragraph 28 had been fully discussed in the Budget Committee; many delegations had strict instructions requiring zero nominal growth as a starting point in MEA budget negotiations. Having operative paragraph 28 in place would simply save time at COP12. In any case, the relevant Draft Resolution had already been adopted by the Plenary.

610. The representative of Brazil, while acknowledging that his country was not yet a CMS Party, suggested deletion of the operative paragraph in question. Generally Parties should support environmental MEAs instead of allowing them to deteriorate. By going for zero nominal growth the COP was actually cutting funding to CMS. Parties should not continue with what was a euphemism for reducing the budget indefinitely into the future, at the same time as adding more and more tasks.

611. The representative of Germany reiterated that the text of the Resolution properly reflected what happened in the Budget Committee and had already been adopted. Germany would therefore not wish to follow the advice of Brazil. It was indeed a pity that so many Parties had such limited financial possibilities at the present time and it was to be hoped that a better situation would pertain in future. It should be stated clearly that operative paragraph 28 applied to COP12 but would of course be reviewed in relation to subsequent triennia.

612. The Chair reminded participants once more, that the Resolution in question had already been adopted. She was grateful for all comments made and participants were welcome to comment further in writing within the next 30 days, but the Resolution, as adopted, was final.

613. The observer from Humane Society International, speaking on behalf of a coalition of NGOs, made the following statement

“We leave this 11th Conference of the Parties in beautiful Ecuador with much to celebrate and I speak here on the behalf of the following organizations, the Pew Charitable Trusts, Whale and Dolphin Conservation, Born Free, IFAW, Shark..."
Advocates International, Project Aware, the Humane Society International and BirdLife International; and others may also wish to associate.

Ground-breaking resolutions have been agreed in terms of both the integration of animal social biology and culture into the work of this Convention and also the call that has gone out to the wider world to end the live capture of cetaceans at sea for commercial purposes. These are inspiring developments and put CMS firmly into a leadership role in the international conservation community.

This has also been the most innovative COP ever for the avian agenda. Guidance, with associated working groups to promote implementation on the ground, was adopted to address key threats to migratory birds, namely illegal killing, taking and trade, poisoning and poorly planned renewable energy developments. The action adopted for African-Eurasian landbirds, with a lead from African Parties, will complement existing instruments for waterbirds and raptors and provide a framework for linking with other stakeholders to ensure sustainable land use in Africa. Parties from Latin American have taken a similar lead with respect to the newly adopted Americas Flyways Framework.

Similarly, we salute all the Parties and the Secretariat in successfully carrying forward a number of excellent and important marine initiatives, including of course the listings of sharks and rays. These listings are just the start of the further urgent work that these species need to ensure that they have a future. We congratulate you on the listing of the great ice bear. We look forward to new initiatives being developed under the auspices of CMS for this emblematic species and hope that the peoples of the region will come to see this as a friendly, appropriate and respectful attempt from the wider international community to protect this species which is revered, admired and appreciated across the whole planet. While disappointed to see the withdrawal of the Appendix II listing for the lion, we appreciate the effort that has gone into developing a meaningful resolution and urge the CMS Family and all stakeholders to work together to ensure future generations can see these iconic animals in the wild, and not just behind bars or fences.

We highly commend CMS for taking far-reaching decisions to strengthen the Convention overall via the new Strategic Plan, the new Listing Criteria and other governance decisions. These things make COP11 a key meeting in the history of this Convention, increasing the chance for better conservation and well-being of migratory species around the world. We urge governments to take action resulting in adequate financial support for the work ahead. We encourage you all to build further on what has been agreed here on the cross-cutting threats including marine debris, poisoning, illegal trade and of course climate change.

The role of civil society is primarily to help you to help the migratory species. We deeply appreciate the openness of the dialogue that we have here. We sometimes have our differences, of course, but this is all part of a healthy process of dialogue and debate, as is the ability of a convention to appropriately review and accordingly amend and develop its work programmes. As partner and non-partner organizations, we commit to work with you all in achieving the best outcomes for all species and all threats.
Madam Chair, we thank the Secretariat for their excellent facilitation of this meeting and thank you one last time for the kind hospitality that Ecuador has shown to us.”

614. The representatives of Costa Rica, Ecuador and Uruguay paid tribute to the outstanding work undertaken by Chile, and by Ms. Nancy Céspedes in particular, in its capacity as Regional Representative for South and Central America and the Caribbean during the past two triennia.

615. The representative of Chile thanked Parties from the region for their kind words.

SIGNING CEREMONY

616. The Executive Secretary invited representatives of countries ready to sign Memoranda of Understanding under the CMS and with appropriate full powers to do so, to come forward to sign the relevant instruments.

617. The representative of Sweden signed the Memorandum of Understanding on the Conservation of Migratory Sharks.

618. The Secretariat noted that the Government of Samoa would also sign the Sharks MoU in the coming days, bringing the number of signatories to 38.

619. Switzerland and the Czech Republic signed the MoU on the Conservation of Migratory Birds of Prey in Africa and Eurasia, bringing the number of signatories to 48.

620. The Executive Secretary invited the representative of the United Arab Emirates to witness his countersigning of the extension of the Partnership Agreement between UNEP/CMS and Environment Agency - Abu Dhabi (EAD), first concluded in October 2009, which provided for the CMS Office - Abu Dhabi. The Agreement had been signed in Abu Dhabi earlier in the day by Ms. Razan Al Mubarak, Secretary General of EAD.

621. The representative of the United Arab Emirates stated that his country was pleased to continue supporting the CMS Office in Abu Dhabi.

622. The Executive Secretary invited the observer from Humane Society International to sign a Partnership Agreement with CMS.

623. The Meeting acknowledged the signing of the MoUs and Partnership Agreements with warm applause.

CLOSURE OF THE MEETING (ITEM 31)

624. Closing remarks were made by the Chair as representative of the Host Country and by the Executive Secretary.

625. Speaking on behalf of their respective regional groupings, the representatives of Chile, the EU and its Member States, New Zealand and Uganda (supported by Egypt), thanked the
Government and people of Ecuador for their warm hospitality in hosting the Meeting; H.E Ms. Lorena Tapia for presiding over the COP; the Chairs of in-session committees and working groups; the supportive NGO community; and the Secretariat for its preparatory work. They also reflected on fruitful outcomes but highlighted the need for enhanced implementation and the additional resources this would require.

626. The observer from the Pew Charitable Trusts thanked the Government of Ecuador for hosting the Meeting and showing impressive leadership on the conservation of sharks. Thanks were due to all NGOs present for working cooperatively on this issue. Pew would be leaving the COP very happy with the outcomes and looked forward to continuing to work for the protection of sharks.

627. H.E. Ms. Lorena Tapia and senior colleagues from the Ministry of Environment were presented with tokens of appreciation on behalf of delegates and the CMS Secretariat.

628. Thanking all participants, the Chair declared the 11th Meeting of the Conference of the Parties as closed.
PROCEEDINGS OF THE 11TH MEETING OF THE CONFERENCE OF THE PARTIES

PART I

RULES OF PROCEDURE

FOR THE 11TH MEETING OF THE CONFERENCE OF THE PARTIES

PART I

Delegates, Observers, Secretariat

Rule 1 – Delegates

(1) A Party to the Convention (hereafter referred to as a "Party") shall be entitled to be represented at the meeting by a delegation consisting of a Representative and such Alternative Representatives and Advisers as the Party may deem necessary.

(2) Without prejudice to the provisions of Rule 14, paragraph 2, the Representative of a Party shall exercise the voting rights of that Party. In their absence, an Alternative Representative of that Party shall act in their place over the full range of their functions.

(3) Logistic and other limitations may require that no more than four delegates of any Party be present at a plenary session and sessions of the Committee of the Whole established under Rule 23. The Secretariat shall notify Parties, observers and other participants of any such limitations in advance of the meeting.

Rule 2 – Observers

(1) The United Nations, its Specialized Agencies, the International Atomic Energy Agency and any State not a Party to the Convention may be represented at the meeting by observers who shall have the right to participate but not to vote.

---

1 See Articles I, paragraph 1 (k), and XVIII of the Convention. A Party is a State which has deposited with the Government of the Federal Republic of Germany its instrument of ratification, acceptance, approval or accession by 31 August 2011.

2 See Convention, Article VII, paragraph 8.
Any body or agency technically qualified in protection, conservation and management of migratory species which is either:

(a) an international agency or body, either governmental or non-governmental, or a national governmental agency or body; or

(b) a national non-governmental agency or body which has been approved for this purpose by the State in which it is located;

and which has informed the Secretariat of the Convention of its desire to be represented at the meeting by observers, shall be permitted to be represented unless at least one-third of the Parties present object. Once admitted, these observers shall have the right to participate but not to vote.

Bodies and agencies desiring to be represented at the meeting by observers shall submit the names of their representatives (and in the case of bodies and agencies referred to in paragraph (2) (b) of this Rule, evidence of the approval of the State in which they are located) to the Secretariat of the Convention prior to the opening of the meeting.

Logistic and other limitations may require that no more than two observers from any non-Party State, body or agency be present at a plenary session or a session of the Committee of the Whole of the meeting. The Secretariat shall notify Parties, observers and other participants of any such limitations in advance of the meeting.

The standard participation fee for all non-governmental organisations is fixed by the Standing Committee and announced in the letter of invitation. Greater contributions are appreciated.

Rule 3 - Credentials

The Representative or any Alternative Representative of a Party shall, before exercising the voting rights of the Party, have been granted powers by, or on behalf of, a proper authority, such as the Head of State, the Head of Government or the Minister of Foreign Affairs or the head of an executive body of any regional economic organisation or as mentioned in footnote 1 above enabling them to represent the Party at the meeting and to vote.

Such credentials shall be submitted to the Secretariat of the Convention.

A Credentials Committee of not more than five Representatives shall examine the credentials and shall report thereon to the meeting. Pending a decision on their credentials, delegates may participate provisionally in the meeting.

Rule 4 - Secretariat

The Secretariat of the Convention shall service and act as secretariat for the meeting.

---

3 See Convention, Article VII, paragraph 9.
4 See Convention, Article IX, paragraph 4(a).
Part II

Officers

Rule 5 - Chairpersons

(1) The Chairperson of the Standing Committee shall act as temporary Chairperson of the meeting until the meeting elects a Chairperson in accordance with Rule 5, paragraph 2.

(2) The Conference in its inaugural session shall elect from among the representatives of the Parties a Chairperson and a Chairperson of the Committee of the Whole. The latter shall also serve as Vice-Chairperson of the Conference.

(3) The Conference shall also elect, from among the representatives of the Parties, a Vice-Chairperson of the Committee of the Whole. If the Chairperson of the Committee of the Whole is absent or is unable to discharge the duties of Chairperson, the Vice-Chairperson shall deputize.

Rule 6 - Presiding Officer

(1) The Chairperson shall preside at all plenary sessions of the meeting.

(2) If the Chairperson is absent or is unable to discharge the duties of Presiding Officer, the Chairperson of the Committee of the Whole shall deputize.

(3) The Presiding Officer shall not vote but may designate an Alternative Representative from the same delegation.

Rule 7 - Bureau

(1) The Presiding Officer, the Chairperson and Vice-Chairperson of the Committee of the Whole, and the Chairpersons of the Scientific Council and the Standing Committee, and the Secretariat shall constitute the Bureau of the Conference with the general duty of forwarding the business of the meeting including, where appropriate, altering the timetable and structure of the meeting and specifying time limits for debates.

(2) The Presiding Officer shall preside over the Bureau.

Part III

Rules of Order and Debate

Rule 8 - Powers of Presiding Officer

(1) In addition to exercising powers conferred elsewhere in these Rules, the Presiding Officer shall at plenary sessions of the meeting:

(a) open and close the session;
(b) direct the discussions;
ensure the observance of these Rules;
(d) accord the right to speak;
(e) put questions to the vote and announce decisions;
(f) rule on points of order; and
(g) subject to these Rules, have complete control of the proceedings of the meeting and the maintenance of order.

(2) The Presiding Officer may, in the course of discussion at a plenary session of the meeting, propose to the Conference:

(a) time limits for speakers;
(b) limitation of the number of times the members of a delegation or the observers from a State not a Party, body or agency may speak on any question;
(c) the closure of the list of speakers;
(d) the adjournment or the closure of the debate on the particular subject or question under discussion; and
(e) the suspensions or adjournment of the session.

Rule 9 - Seating, Quorum

(1) Delegations shall be seated in accordance with the alphabetical order of the names of the Parties in the English language.

(2) A quorum for plenary sessions and sessions of the Committee of the Whole of the meeting shall consist of one-half of the Parties having delegations at the meeting. No plenary session or session of the Committee of the Whole shall take place in the absence of a quorum.

Rule 10 - Right to Speak

(1) The Presiding Officer shall call upon speakers in the order in which they signify their desire to speak, with precedence given to the delegates.

(2) A delegate or observer may speak only if called upon by the Presiding Officer, who may call a speaker to order if the remarks are not relevant to the subject under discussion.

(3) A speaker shall not be interrupted except on a point of order. The speaker may, however, with the permission of the Presiding Officer, give way during their speech to allow any delegate or observer to request elucidation on a particular point in that speech.

(4) The Chairperson of a committee or working group may be accorded precedence for the purpose of explaining the conclusions arrived at by that committee or working group.

Rule 11 - Submission of Proposals for Amendment of the Convention and its Appendices

(1) As a general rule proposals shall, subject to any provisions of the Convention itself, have been communicated at least 150 days before the meeting to the Secretariat, which shall have circulated them to all Parties in the working languages of the meeting. Proposals arising out of discussion of the foregoing may be discussed at any plenary session of the meeting provided copies of them have been circulated to all delegations not later than the day preceding the session.
The Presiding Officer may also permit the discussion and consideration of urgent proposals arising after the period prescribed above in the first sentence of this Rule provided that they relate to proposed amendments which have been circulated in accordance with the second sentence of this Rule and that their consideration will not unduly inhibit the proceedings of the Conference. The Presiding Officer may, in addition, permit the discussion of motions as to procedures, even though such motions have not been circulated previously.

(2) After a proposal has been adopted or rejected by the Conference it shall not be reconsidered unless a two-thirds majority of the Representatives participating in the meeting so decide. Permission to speak on a motion to reconsider a proposal shall be accorded only to a delegate from each of two Parties wishing to speak against the motion, after which the motion shall immediately be put to the vote.

Rule 12 - Submission of Resolutions or Recommendations

As a general rule Resolutions or Recommendations shall have been communicated at least 60 days before the meeting to the Secretariat who shall circulate them to all Parties in the working languages in the meeting. The remaining provisions of Rule 11 shall also apply mutatis mutandis to the treatment of Resolutions and Recommendations.

Rule 13 - Procedural Motions

(1) During the discussion of any matter, a delegate may rise to make a point of order, and the point of order shall be immediately decided by the Presiding Officer in accordance with these Rules. A delegate may appeal against any ruling of the Presiding Officer. The appeal shall immediately be put to the vote, and the Presiding Officer's ruling shall stand unless a two-thirds majority of the Representatives present and voting otherwise decide. A delegate rising to a point of order may not speak on the substance of the matter under discussion.

(2) The following motions shall have precedence in the following order over all other proposals or motions before the Conference:

(a) to suspend the session;
(b) to adjourn the session;
(c) to adjourn the debate on the particular subject or question under discussion; and
(d) to close the debate on the particular subject or question under discussion.

Rule 14 - Arrangements for Debate

(1) The Conference may, on a proposal by the Presiding Officer or by a delegate, limit the time to be allowed to each speaker and the number of times delegates or observers may speak on any question. When the debate is subject to such limits, and a speaker has spoken for the allotted time, the Presiding Officer shall call the speaker to order without delay.

(2) During the course of a debate the Presiding Officer may announce the list of speakers and, with the consent of the meeting, declare the list closed. The Presiding Officer may, however, accord the right of reply to any delegate if a speech delivered after the list has been declared closed makes this desirable.
During the discussion of any matter, a delegate may move the adjournment of the debate on the particular subject or question under discussion. In addition to the proposer of the motion, a delegate may speak in favour of, and a delegate of each of two Parties may speak against the motion, after which the motion shall immediately be put to the vote. The Presiding Officer may limit the time to be allowed to speakers under this Rule.

A delegate may at any time move the closure of the debate on the particular subject or question under discussion, whether or not any other delegate has signified the wish to speak. Permission to speak on the motion for closure of the debate shall be accorded only to a delegate from each of two Parties wishing to speak against the motion, after which the motion shall immediately be put to the vote. The Presiding Officer may limit the time to be allowed to speakers under this Rule.

During the discussion of any matter a delegate may move the suspension or the adjournment of the session. Such motions shall not be debated but shall immediately be put to the vote. The Presiding Officer may limit the time allowed to the speaker moving the suspension or adjournment of the session.

 Whenever the Conference considers a recommendation originating from the Committee of the Whole, where the discussion of the recommendation has been conducted with interpretation in the three working languages of the session, there shall be no further discussion on the recommendation, and it shall immediately be decided upon, subject to the second paragraph.

However, any delegate, if seconded by another delegate of another Party, may present a motion for the opening of debate on any recommendation. Permission to speak on the motion for opening the debate shall be granted only to the delegate presenting the motion and the secondary, and to a delegate of each of two Parties wishing to speak against, after which the motion shall immediately be put to the vote. A motion to open the debate shall be granted if, on a show of hands, one-third two-thirds of the voting Representatives support the motion. While speaking on a motion to open the debate a delegate may not speak on the substance of the recommendation itself.

Part IV

Voting

Rule 15 - Methods of Voting

Without prejudice to the provisions of Rule 1, paragraph 2, each representative duly accredited according to Rule 3 shall have one vote. Regional economic integration organizations, in matters within their competence, shall exercise their right to vote with the number of votes equal to the number of their member States which are Parties. In such case, the member States of such organizations shall not exercise their right individually\(^5\).

Representatives of Parties which are three or more years behind in paying their subscriptions on the date of the opening session of the meeting of the Conference of the Parties shall not be eligible to vote. However, the Conference of the Parties may allow such Parties to vote by a majority of the voting Representatives present.

---

\(^5\) See Convention, Article 1, paragraph 2.
exercise their right to vote if it is satisfied that the delay in payment arises from exceptional and unavoidable circumstances, and shall receive advice in this regard from the Standing Committee.

(3) The Conference shall normally vote by show of hands, but any Representative may request a roll-call vote. The roll-call vote shall be taken in the seating order of the delegations. The Presiding Officer may require a roll-call vote on the advice of the tellers where they are in doubt as to the actual number of votes cast and this is likely to be critical to the outcome.

(4) All votes in respect of the election of officers or of prospective host countries shall be by secret ballot and, although it shall not normally be used, any Representative may request a secret ballot for other matters. If seconded, the question of whether a secret ballot should be held shall immediately be voted upon. The motion for a secret ballot may not be conducted by secret ballot.

(5) Voting by roll-call or by secret ballot shall be expressed by "Yes", "No" or "Abstain". Only affirmative and negative votes shall be counted in calculating the number of votes cast.

(6) If votes are equal, the motion or amendment shall not be carried.

(7) The Presiding Officer shall be responsible for the counting of the votes and shall announce the result. The Presiding Officer may be assisted by tellers appointed by the Secretariat.

(8) After the Presiding Officer has announced the beginning of the vote, it shall not be interrupted except by a Representative on a point of order in connection with the actual conduct of the voting. The Presiding Officer may permit Representatives to explain their votes either before or after the voting, and may limit the time to be allowed for such explanations.

Rule 16 - Majority

Except where otherwise provided for under the provisions of the Convention, these Rules or the Terms of Reference for the Administration of the Trust Fund, all votes shall be taken by a two-thirds majority of votes cast.

Rule 17 - Procedure for Voting on Motions and Amendments

(1) A delegate may move that parts of a proposal or of an amendment be voted on separately. If objection is made to the request for such division, the motion for division shall be voted upon first. Permission to speak on the motion for division shall be accorded only to a delegate from each of two Parties wishing to speak in favour of and a delegate from each of two Parties wishing to speak against the motion. If the motion for division is carried, those parts of the proposal or amendment which are subsequently approved shall be put to the vote as a whole. If all operative parts of the proposal or amendment have been rejected, the proposal or the amendment shall be considered to have been rejected as a whole.

(2) When an amendment is moved to a proposal, the amendment shall be voted on first. When two or more amendments are moved to a proposal, the Conference shall vote first on the amendment furthest removed in substance from the original proposal and then on the amendment next furthest removed therefrom, and so on until all amendments have been put to the vote. When, however, the adoption of one amendment necessarily implies the rejection of another amendment, the latter amendment shall not be put to the vote. If one or more amendments are
adopted, the amended proposal shall then be voted upon. A motion is considered an amendment to a proposal if it merely adds to, deletes or revises part of that proposal.

(3) If two or more proposals relate to the same question, the Conference shall, unless it decides otherwise, vote on the proposals in the order in which they have been submitted. The Conference may, after voting on a proposal, decide whether to vote on the next proposal.

Rule 18 - Elections

(1) If in an election to fill one place no candidate obtains the required majority in the first ballot, a second ballot shall be taken restricted to the two candidates obtaining the largest number of votes. If in the second ballot the votes are equally divided, the Presiding Officer shall decide between the candidates by drawing lots.

(2) If in the first ballot there is a tie amongst candidates obtaining the second largest number of votes, a special ballot shall be held amongst them to reduce the number of candidates to two.

(3) In the case of tie amongst three or more candidates obtaining the largest number of votes in the first ballot, a special ballot shall be held amongst them to reduce the number of candidates to two. If a tie then results amongst two or more candidates, the Presiding Officer shall reduce the number to two by drawing lots, and a further ballot shall be held in accordance with paragraph 1 of this Rule.

Part V

Languages and Records

Rule 19 - Official and Working Languages

(1) English, French and Spanish shall be the official and working languages of the meeting.

(2) Speeches made in any of the working languages shall be interpreted into the other working languages.

(3) The official documents of the meeting shall be distributed in the working languages.

Rule 20 - Other Languages

(1) A delegate may speak in a language other than a working language. They shall be responsible for providing interpretation into a working language, and interpretation by the Secretariat into the other working languages may be based upon that interpretation.

(2) Any document submitted to the Secretariat in any language other than a working language shall be accompanied by a translation into one of the working languages.
Rule 21 - Summary Records

(1) Summary records of the meeting shall be circulated to all Parties in the official languages of the meeting.

(2) Committees and working groups shall decide upon the form in which their records shall be prepared.

Part VI

Publicity of Debates

Rule 22 - Plenary Sessions

All plenary sessions of the meeting shall be open to the public, except that in exceptional circumstances the Conference may decide, by a two-thirds majority of Representatives present and voting, that any single session be closed to the public.

Rule 23 - Sessions of Committees and Working Groups

As a general rule, sessions of committees and working groups other than the Committee of the Whole shall be limited to the delegates and to observers invited by the Chairpersons of the committees or working groups.

Part VII

Committees and Working Groups

Rule 24 - Establishment of Committees and Working Groups

(1) In addition to the Credentials Committee, the Conference of the Parties shall establish a committee to forward the business of the meeting. This committee shall be called the Committee of the Whole. It shall be responsible for making recommendations to the Conference on any matter of a scientific or technical nature, including proposals to amend the Appendices of the Convention, as well as recommendations concerning financial, administrative and any other matter to be decided upon by the Conference.

(2) The Conference and the Committee of the Whole may establish such working groups as may be necessary to enable them to carry out their functions. They shall define the terms of reference and composition of each working group, the size of which shall be limited according to the number of places available in assembly rooms.

(3) The Credentials Committee and each working group shall elect their own officers.
Rule 25 - Procedure

Insofar as they are applicable, these Rules shall apply *mutatis mutandis* to the proceedings of committees and working groups; however, with the exception of the Committee of the Whole, interpretation may not be provided in sessions of the committees and working groups.

Part VIII

Amendment

Rule 26 - Amendment

These rules may be amended as required by decision of the Conference.
Part I

Representatives, Observers, Secretariat

Rule 1 - Representatives

(1) A Party to the Convention (hereafter referred to as a "Party") shall be entitled to be represented at the meeting by a delegation consisting of a Representative and such Alternative Representatives and Advisers as the Party may deem necessary.

(2) Without prejudice to the provisions of Rule 13, paragraph 2, the Representative of a Party shall exercise the voting rights of that Party. In their absence, an Alternative Representative of that Party shall act in their place over the full range of their functions.

(3) Logistics and other limitations may require that no more than four Representatives of any Party be present at a plenary session and sessions of the Committee of the Whole established under Rule 17. The Secretariat shall notify Parties of any such limitations in advance of the meeting.

Rule 2 - Observers

(1) The United Nations, its Specialized Agencies, the International Atomic Energy Agency and any State not a Party to the Convention may be represented at the meeting by observers who shall have the right to participate but not to vote.

(2) Any body or agency technically qualified in protection, conservation and management of migratory species, which is either:
(a) an international agency or body, either governmental or non-governmental, or a national governmental agency or body; or
(b) a national non-governmental agency or body that has been approved for this purpose by the State in which it is located;

and that has informed the Secretariat of the Convention of its desire to be represented at the meeting by observers, shall be permitted to be represented unless at least one-third of the Parties present object. Once admitted, these observers shall have the right to participate but not to vote.

(3) Bodies and agencies desiring to be represented at the meeting by observers shall submit the names of their representatives (and in the case of bodies and agencies referred to in paragraph (2) (b) of this Rule, evidence of the approval of the State in which they are located) to the Secretariat of the Convention prior to the opening of the meeting.

(4) Logistics and other limitations may require that no more than two observers from any non-Party State, body or agency be present at a plenary session or a session of the Committee of the Whole of the meeting. The Secretariat shall notify observers and other participants of any such limitations in advance of the meeting.

(5) The standard participation fee for all non-governmental organizations is fixed by the Standing Committee and announced in the letter of invitation.

Rule 3 - Credentials

(1) The credentials of representatives as well as the names of alternate representatives and advisers shall be submitted to the secretariat if possible not later than twenty-four hours after the opening of the session. Any later change in the composition of the delegation shall also be submitted to the secretariat. The credentials shall be issued either by the Head of State or Government or by the Minister of Foreign Affairs or, in the case of a regional economic integration organization, by the competent authority of that organization.

(2) All credentials shall be submitted to the Secretariat of the Convention in their original form, on letterhead of the official enabling the Representative to participate at the meeting, together with a translation into English, French or Spanish if they are not in one of these languages. Photocopies, scans, and faxes of the original letter will not suffice.

(3) A Credentials Committee of not more than five Representatives from at least three regions shall examine submitted credentials and shall report thereon to the meeting.

(4) Pending a decision on their credentials, representatives may participate provisionally in the meeting, but not vote.

(5) Representatives are encouraged to submit their credentials prior to the meeting to allow efficient processing by the Secretariat and Credentials Committee.

---

1 For the purpose of interpreting this Rule, in the case of the European Union “competent authority” means the President of the European Commission or the Commissioner responsible for the environment.
Rule 4 - Secretariat

The Secretariat of the Convention shall service and act as secretariat for the meeting and the Bureau of the Conference of the Parties.

Part II

Officers

Rule 5 - Election and Duties of Chair

(1) The Chair of the Standing Committee shall act as temporary Chair of the meeting until the meeting elects a Chair in accordance with Rule 5, paragraph 2(a).

(2) The Conference in its first session shall elect from among the representatives of the Parties:
   (a) a Chair of the Conference;
   (b) a Chair of the Committee of the Whole, who shall also serve as Vice-Chair of the Conference; and
   (c) a Vice-Chair of the Committee of the Whole.

(3) The Chair of the Conference and the Chair of the Committee of the Whole shall preside over sessions of the Plenary and the Committee of the Whole respectively in the capacity of Presiding Officer and shall have no voting power.

(4) If the Chair of the Conference or the Chair of the Committee of the Whole is absent or is unable to discharge his/her duties, the respective Vice-Chair shall deputize for him/her as Presiding Officer.

Rule 6 - Bureau

(1) The Officers listed in Rule 5 (2) together with the Chairs of the Scientific Council and the Standing Committee, and, members of the Standing Committee shall constitute the Bureau of the Conference with the general duty of ensuring the effective enforcement of the Rules of Procedure and forwarding the business of the meeting including, where appropriate, altering the timetable and structure of the meeting and specifying time limits for debates.

(2) The Chair of the Conference shall preside over the Bureau.

(3) If the Chair of the Conference is absent or is unable to discharge his/her duties, the Chair of the Committee of the Whole shall deputize for him/her. If the Chair of the Conference and the Chair of the Committee of the Whole are both unavailable, the Vice-Chair of the Committee of the Whole shall deputize for him/her.
Part III

Rules of Order and Debate

Rule 7 - Powers of the Presiding Officer

(1) In addition to exercising powers conferred elsewhere in these Rules, the Presiding Officer shall at plenary sessions of the meeting:

(a) open and close the session;
(b) direct the discussion;
(c) ensure the observance of these Rules;
(d) accord the right to speak;
(e) put questions to a vote and announce decisions;
(f) rule on points of order; and
(g) subject to these Rules and the Convention, have complete control of the proceedings and the maintenance of order.

(2) The Presiding Officer may, in the course of discussion at a plenary session of the meeting, propose to the Conference:

(a) time limits for speakers;
(b) limitation of the number of times the members of a delegation or the observers from a State not a Party, body or agency may speak on any question;
(c) the closure of the list of speakers;
(d) the adjournment or the closure of the debate on the particular subject or question under discussion; and
(e) the suspensions or adjournment of the session.

Rule 8 - Seating and Quorum for the Plenary and Committee of the Whole

(1) Delegations shall be seated in accordance with the alphabetical order of the names of the Parties in the English language except that the European Union shall be seated next to the State holding the rotating Presidency of the European Union.

(2) A quorum for plenary sessions and sessions of the Committee of the Whole of the meeting shall consist of one-half of the Parties having delegations at the meeting. No plenary session or session of the Committee of the Whole shall take place in the absence of a quorum.

Rule 9 - Right to Speak

(1) The right to speak shall extend to Party Representatives, Alternative Representatives and Advisers whose credentials are under consideration or have been accepted, and to observers who have been admitted to the meeting in accordance with Rule 2, as well as to the Secretariat.

(2) The Presiding Officer shall call upon speakers in the order in which they signify their desire to speak, with precedence given to Party Representatives. Amongst observers, precedence shall be given to non-Party States, intergovernmental organizations and non-governmental organizations, in this order. However, the Presiding Officer may depart from this general rule and
call on speakers in the order that the Presiding Officer judges appropriate to ensure the timely progress of the debate.

(3) A Representative or observer may speak only if called upon by the Presiding Officer, who may call a speaker to order if the remarks are not relevant to the subject under discussion.

(4) A speaker shall not be interrupted except on a point of order. The speaker may, however, with the permission of the Presiding Officer, give way during their speech to allow any Representative or observer to request elucidation on a particular point in that speech.

(5) The Chair of a committee or working group may be accorded precedence for the purpose of explaining the conclusions arrived at by that committee or working group.

(6) The Conference and Committee of the Whole may, on a proposal by the Presiding Officer or by a Representative, limit the time to be allowed to each speaker and the number of times the members of a delegation or the observers either from a State not a Party, or from an agency or body may speak on any question. When the debate is subject to such limits, and a speaker has spoken for the speaker’s allotted time, the Presiding Officer shall call the speaker to order without delay.

(7) During the course of a debate the Presiding Officer may announce the list of speakers and, with the consent of the Conference or Committee, declare the list closed. The Presiding Officer may, however, accord the right of reply to any Representative or observer if an intervention delivered after the Presiding Officer has declared the list closed makes this desirable.

Rule 10 - Procedural Motions

(1) During the discussion of any matter, a Representative may rise to make a point of order, and the point of order shall be immediately decided by the Presiding Officer. A Representative may appeal against the ruling of the Presiding Officer. The appeal shall be immediately put to the vote, and the Presiding Officer's ruling shall stand unless a two-thirds majority of the Representatives present and voting otherwise decides. In such instances, a Representative rising to a point of order may not speak on the substance of the matter under discussion.

(2) The following motions shall have precedence in the following order over all other proposals or motions before the Conference:

   (a) to suspend the session;
   (b) to adjourn the session;
   (c) to adjourn the debate on the particular subject or question under discussion; and
   (d) to close the debate on the particular subject or question under discussion.

(3) In addition to the proposer of the motion in (2) above, a Representative from one other Party may speak in favour of the motion and a Representative of each of two Parties may speak against it, after which the motion shall be immediately put to a vote. The Presiding Officer may limit the time to be allowed to the speakers.
Rule 11 - Motions to open and reopen debates in Conference sessions

(1) Whenever the Conference considers a recommendation originating from the Committee of the Whole, where the discussion of the recommendation has been conducted with interpretation in the three working languages, there shall be no further discussion on the recommendation, and it shall immediately be decided upon, subject to paragraph (2) of this Rule.

(2) However, any Representative, if seconded by a Representative of another Party, may present a motion for the opening of debate on any recommendation. Permission to speak on the motion for opening the debate shall be granted only to the Representative presenting the motion and a seconder, and to a Representative of each of two Parties wishing to speak against, after which the motion shall immediately be put to the vote. A motion to open the debate shall be granted if, on a show of hands, two-thirds of the Representatives present and voting support the motion. While speaking on a motion to open the debate a Representative may not speak on the substance of the recommendation itself.

(3) Whenever the Conference considers a recommendation originating in plenary session, where the discussion of the recommendation has been conducted with interpretation in the three working languages, it may be reconsidered during the meeting only under the following circumstances.

(4) Any Representative, if seconded by a Representative of another Party, may present a motion for the reopening of debate. Permission to speak on the motion shall be granted only to the Representative presenting it and the seconder, and to a Representative of each of two Parties wishing to speak against the motion, after which the motion shall immediately be put to a vote. A motion to reopen the debate shall be granted if two-thirds of the Representatives present and voting support the motion. While speaking on a motion to reopen the debate, a Representative may not speak on the substance of the decision itself.

Rule 12 - Publicity of Debates

(1) All plenary sessions of the meeting shall be open to the public, except that in exceptional circumstances the Conference may decide, by a two-thirds majority of Representatives present and voting, that any single session be closed to the public.

(2) As a general rule, sessions of committees and working groups other than the Committee of the Whole shall be limited to Representatives and observers invited by the Chairs of the committees or working groups.

Part IV

Voting

Rule 13 - Methods of Voting

(1) Without prejudice to the provisions of Rule 1, paragraph 2, each Representative duly accredited according to Rule 3 shall have one vote. Regional economic integration organizations, in matters within their competence, shall exercise their right to vote with the number of votes
equal to the number of their member States that are Parties. In such case, the member States of such organizations shall not exercise their right individually.

(2) Representatives of Parties that are three or more years in arrears in the payment of its assessed contributions on the date of the opening session of the meeting of the Conference of the Parties shall not be eligible to vote. However, the Conference of the Parties may allow such Parties to exercise their right to vote if it is satisfied that the delay in payment arises from exceptional and unavoidable circumstances, and shall receive advice in this regard from the Standing Committee. The exceptional and unavoidable circumstances shall be communicated in advance by the Party concerned to the Standing Committee for consideration at its meeting prior to the meeting of the Conference of the Parties.

(3) The Conference shall normally vote by show of hands, but any Representative may request a roll-call vote. The roll-call vote shall be taken in the seating order of the delegations. The Presiding Officer may require a roll-call vote on the advice of the tellers where they are in doubt as to the actual number of votes cast and this is likely to be critical to the outcome.

(4) All votes in respect of the election of Officers or of prospective host countries shall be by secret ballot and, although it shall not normally be used, any Representative may request a secret ballot for other matters. If seconded, the question of whether a secret ballot should be held shall immediately be voted upon and decided by two-thirds majority. The motion for a secret ballot may not be conducted by secret ballot.

(5) Voting by roll-call or by secret ballot shall be expressed by "Yes", "No" or "Abstain". Only affirmative and negative votes shall be counted in calculating the number of votes cast.

(6) The Presiding Officer shall be responsible for the counting of the votes and shall announce the result. The Presiding Officer may be assisted by tellers appointed by the Secretariat.

(7) After the Presiding Officer has announced the beginning of the vote, it shall not be interrupted except by a Representative on a point of order in connection with the actual conduct of the voting. The Presiding Officer may permit Representatives to explain their votes either before or after the voting, and may limit the time to be allowed for such explanations.

Rule 14 - Majority

(1) The Parties shall make every effort to reach agreement on all matters by consensus.

(2) Except where otherwise provided for under the provisions of the Convention, all votes shall be taken by a two-thirds majority of votes cast.

Rule 15 - Procedure for Voting on Motions and Amendments

(1) Any Representative may propose an amendment to a draft resolution or other document. The Presiding Officer may permit the immediate discussion and consideration of amendments to draft resolutions and other documents, even though such amendments have not been circulated previously.
(2) A Representative may move that parts of a proposal or of an amendment be voted on separately. If objection is made to the request for such division, the motion for division shall be voted upon first. Permission to speak on the motion for division shall be accorded only to a Representative from each of two Parties wishing to speak in favour of the motion and a Representative from each of two Parties wishing to speak against the motion. If the motion for division is carried, those parts of the proposal or amendment that are subsequently approved shall be put to the vote as a whole. If all operative parts of the proposal of the amendment have been rejected, the proposal or the amendment shall be considered to have been rejected as a whole.

(3) When an amendment is moved to a proposal, the amendment shall be voted on first. When two or more amendments are moved to a proposal, the Conference shall vote first on the amendment furthest removed in substance from the original proposal and then on the amendment next furthest removed therefrom, and so on until all amendments have been put to the vote. When, however, the adoption of one amendment necessarily implies the rejection of another amendment, the latter amendment shall not be put to the vote. If one or more amendments are adopted, the amended proposal shall then be voted upon. A motion is considered an amendment to a proposal if it merely adds to, deletes or revises part of that proposal.

(4) If two or more proposals relate to the same question, the Conference shall, unless it decides otherwise, vote on the proposals in the order in which they have been submitted. The Conference may, after voting on a proposal, decide whether to vote on the next proposal.

Rule 16 – Elections

(1) If in an election to fill one place no candidate obtains the required majority in the first ballot, a second ballot shall be taken restricted to the two candidates obtaining the largest number of votes. If in the second ballot the votes are equally divided, the Presiding Officer shall decide between the candidates by drawing lots.

(2) If in the first ballot there is a tie amongst candidates obtaining the second largest number of votes, a special ballot shall be held amongst them to reduce the number of candidates to two.

(3) In the case of a tie amongst three or more candidates obtaining the largest number of votes in the first ballot, a special ballot shall be held amongst them to reduce the number of candidates to two. If a tie then results amongst two or more candidates, the Presiding Officer shall reduce the number to two by drawing lots, and a further ballot shall be held in accordance with paragraph (1) of this Rule.

Part V

Committees and working groups

Rule 17 - Establishment of Committees and Working Groups

(1) In addition to the Credentials Committee, the Conference of the Parties shall establish a committee to forward the business of the meeting. This committee shall be called the Committee of the Whole. It shall be responsible for making recommendations to the Conference on any matter of a scientific or technical nature, including proposals to amend the Appendices of the
Constitution, as well as recommendations concerning financial, administrative, and any other matter to be decided upon by the Conference.

(2) The Conference and the Committee of the Whole may establish such working groups as may be necessary to enable them to carry out their functions. They shall define the terms of reference and composition of each working group, the size of which shall be limited according to the number of places available in assembly rooms.

(3) The Credentials Committee and each working group shall elect their own officers.

Part VI
Languages and Records

Rule 18 - Official and Working Languages

(1) English, French, and Spanish shall be the official and working languages of the meeting.

(2) Speeches made in any of the working languages shall be simultaneously interpreted into the other working languages.

(3) The official documents of the meeting shall be distributed in the working languages.

(4) With the exception of the Committee of the Whole, where simultaneous interpretation will be provided, simultaneous interpretation in sessions of other committees and working groups will not normally be available.

Rule 19 - Other Languages

(1) A Representative may speak in a language other than a working language. They shall be responsible for providing interpretation into a working language, and interpretation by the Secretariat into the other working languages may be based upon that interpretation.

(2) Any document submitted to the Secretariat in any language other than a working language shall be accompanied by a translation into one of the working languages.

Rule 20 - Summary Records

(1) Summary records of the meeting shall be circulated to all Parties in the official languages of the meeting.

(2) Committees and working groups shall decide upon the form in which their records shall be prepared.
Part VII

Submission of documents

Rule 21- Submission of Proposals for Amendment of the Convention and its Appendices

(1) As a general rule, proposals for amendment of the Convention and its Appendices shall, subject to any provisions of the Convention itself, have been communicated at least 150 days before the meeting to the Secretariat, which shall circulate them to all Parties in the working languages of the meeting as soon as possible after receipt.

(2) The Representative of the Party that has submitted a proposal for amendment of Appendices I or II may, at any time, withdraw the proposal or amend it to reduce its scope or to make it more precise. Once a proposal has been withdrawn, it may not be re-submitted during the meeting. Once a proposal has been amended to reduce its scope, it may not be re-amended during the meeting to increase the scope of the amended proposal.

(3) Any other Representative may propose an amendment to a proposal for amendment of Appendix I or II to reduce its scope or to make it more precise.

(4) The Presiding Officer may permit the immediate discussion and consideration of a proposed amendment referred to in paragraph (3) of this Rule even though it has not been circulated previously.

Rule 22 - Submission of Resolutions and Recommendations

(1) Parties must submit any proposed Resolutions and Recommendations that include a scientific element to the Executive Secretary at least 150 days prior to the commencement of the meeting.

(2) Parties should endeavour to submit any proposed Resolutions and Recommendations not including a scientific element to Executive Secretary within the timeline set out in paragraph (1), and in any event Parties must submit such proposals at least 90 days prior to the commencement of the meeting.

(3) All proposed Resolutions and Recommendations that include a scientific element shall be submitted by the Executive Secretary to the Scientific Council for scrutiny of their scientific and technical accuracy at least 120 days prior to the commencement of the meeting. The Scientific Council shall provide appropriate advice to the Standing Committee on all proposed Resolutions and Recommendations.

(4) The Executive Secretary shall transmit the documents to the Conference of the Parties at least 60 days before the meeting.

---

2 The phrase “reduce its scope” includes situations, such as amending a proposal to include a species in Appendix I so as to include that same species in Appendix II; and amending a species listing proposal to include fewer populations. However, it does not include situations, such as amending a proposal to include a species in Appendix II to include that same species in Appendix I; or amending a species listing proposal to add populations to the proposal or include different populations in the proposal.
(5) Proposed Resolutions and Recommendations arising out of discussion of documents submitted in accordance with paragraphs (1) to (4) may be discussed at any plenary session of the meeting provided copies of them have been circulated to all delegations not later than the day preceding the session. The Presiding Officer may also permit the discussion and consideration of urgent proposals arising after the period prescribed in the first sentence of this paragraph provided that they relate to proposed amendments which have been circulated and that their consideration will not unduly inhibit the proceedings of the Conference.

Part VIII

Rules of Procedure of committees and working groups

Rule 23 - Procedure

Insofar as they are applicable, these Rules shall apply mutatis mutandis to the proceedings of committees and working groups.

Part IX

Amendment to the Rules of Procedure

Rule 24 – Amendment

(1) The Rules adopted by the Conference of the Parties shall remain in effect until Rules of Procedure are adopted at the start of the next meeting of the Conference of the Parties.

(2) These rules may be amended by decision of the Conference. Amendments to these Rules shall be decided by a two-thirds majority of votes cast.

## Annex IV: List of Documents

### Document No. (Agenda Item No. (in bold)) | Title of Document
--- | ---
COP11/Doc.24.1.9/Addendum | Addendum to the Proposal for the inclusion of the Reef Manta Ray (*Manta alfredi*) in CMS Appendix I and II
COP11/Doc.24.1.10/Rev.1 | Proposal for the inclusion of all species of Mobula Rays (Genus *Mobula*) on CMS Appendix I and II
COP11/Doc.24.1.10/Addendum | Addendum to the Proposal for the inclusion of all species of Mobula Rays (Genus *Mobula*) on CMS Appendix I and II
COP11/Doc.24.1.11/Rev.2 (English only) | Proposal for the inclusion of the Polar Bear (*Ursus maritimus*) on CMS Appendix II
COP11/Doc.24.1.12 (English only) | Proposal for the inclusion of the White-eared Kob (*Kobus kob leucotis*) on CMS Appendix II
COP11/Doc.24.1.13 (English and Spanish only) | Proposal for the inclusion of the Canada Warbler (*Cardellina Canadensis*) on CMS Appendix II
COP11/Doc.24.1.14/Rev.1 | Proposal for the inclusion of the Silky Shark (*Carcharhinus falciformis*) on CMS Appendix II
COP11/Doc.24.1.15/Corr2 | Proposal for the inclusion of the Great Hammerhead Shark (*Sphyrna mokarran*) on CMS Appendix II
COP11/Doc.24.1.16/Rev.1/Corr2 | Proposal for the inclusion of the Scalloped Hammerhead Shark (*Sphyrna lewini*) on CMS Appendix II
COP11/Doc.24.1.17 | Proposal for the inclusion of all species of Thresher Shark, Genus *Alopias* on CMS Appendix II
COP11/Doc.24.1.18/Rev.1 | Proposal for the inclusion of the European eel (*Anguilla anguilla*) on CMS Appendix II
COP11/Doc.24.2/Rev.1* | Assessing Proposals for the Amendment of the CMS Appendices
COP11/Doc.28* | Arrangements for Hosting the 11th and 12th Meeting of the Conference of the Parties

Agenda Item 1: Opening remarks and introductions

1. The Chair of the Standing Committee, Mr. Alfred Oteng-Yeboah (Ghana) opened the Meeting.

2. The Executive Secretary, Mr. Bradnee Chambers welcomed all participants to the Meeting and to Quito and congratulated the local organizers on the quality of their preparations, the warmth of their welcome and the beauty of their country. He observed that all logistics and documents had been well prepared and that everything was in place for a successful COP11. The full list of participants is attached as Annex 2 to the present report.

Agenda Item 2: Adoption of the Agenda and Meeting schedule

Agenda Item 2.1: Provisional Agenda and Documents

Agenda Item 2.2: Annotated Agenda and Meeting Schedule

3. The Chair introduced documents UNEP/CMS/StC42/Doc.2.1/Rev.1: Provisional Agenda and Documents and asked whether any members wished to propose amendments.

4. The representative of Chile, in her role as Chair of the Finance and Budget Committee, asked for Agenda Item 9, the Report of the Finance and Budget Sub-Committee, to be considered before Agenda Item 8, the Report on the Implementation of the CMS Budget during the Triennium 2012-2014.
5. The Agenda was adopted, subject to inclusion of the amendment tabled by Chile. The Agenda is attached as Annex 1 to this report.

**Agenda Item 3: Adoption of the Report of the 41st Meeting of the CMS Standing Committee**

6. The Secretariat introduced document UNEP/CMS/StC42/Doc.3: *Draft Report of the 41st Meeting of the CMS Standing Committee, Bonn (Germany), 27-28 November 2013* noting that it had previously been circulated to the members of the Standing Committee and that written comments had been incorporated into the present version of the draft report.

7. The representative of New Zealand drew attention to Agenda Item 14, paragraph 78 of the document, which stated incorrectly that the online reporting system was not working (instead of now working). This error should be corrected.

8. There being no other comments, the Standing Committee approved the Report of the 41st Meeting, subject to inclusion of the minor correction tabled by New Zealand.

**Agenda Item 4: Progress Report on activities since the 41st Meeting of the CMS Standing Committee**

9. The Executive Secretary noted that this Agenda Item would be covered in depth during the COP. Nevertheless there was one item he wished to report to the Standing Committee regarding the Memorandum of Understanding (MoU) between the Standing Committee and UNEP. Following the 41st Meeting of the Standing Committee in November 2013, a draft MoU had been circulated among Committee members between 29 May and August 2014, and a number of comments had been received. At the same time, IPSAS, a new accounting system was being adopted by the UN, and some aspects of this were expected to have a significant influence on the MoU. For this and other reasons, UNEP had indicated a preference for postponing conclusion of the MoU.

10. The representative of UNEP confirmed the information presented by the Executive Secretary report, noting that the IPSAS accounting system was UN-wide and beyond the control of UNEP. In February 2014 the Executive Director of UNEP had established a Task Team composed of the MEA Secretariats administered by UNEP to examine the effectiveness of the administrative arrangements in place. There were two Working Groups covering administrative arrangements and programmatic cooperation, chaired respectively by the CITES and CBD Secretariats. The Working Groups will report to UNEP in January 2015 and it will be important to incorporate their findings into the revised draft MoU. Resolution 1.12 of the United Nations Environment Assembly at its first session on 27 June 2014 also dealt with the relationship between UNEP and MEAs and it would be important to take that Resolution into account in a revised draft MoU. For these reasons it was hoped that negotiations on the draft MoU would resume in the first quarter of 2015.

11. The Standing Committee noted the comments of the Executive Secretary and the representative of UNEP.
Agenda Item 5: Strategic Plan for Migratory Species 2015-2023

13. The draft Strategic Plan had been developed with financial contributions from Germany, South Africa, Switzerland and UNEP. An extensive consultation process had generated strong support for building the draft Strategic Plan around the Aichi Biodiversity Targets, and for broadened applicability to the whole international community. The draft Strategic Plan included five Strategic Goals and 16 Targets, which were more specific than the Aichi Biodiversity Targets and had an end date consistent with the CMS COP cycle. How to implement the plan had not been part of the current Working Group mandate, so it was proposed that a Companion Volume should be produced detailing delivery mechanisms and associated activities. The content of such a Companion Volume was scoped in Annex III to StC42/Doc.5.

14. The Chair invited comments from the floor.

15. The representative of Poland, a member of the Working Group on the Strategic Plan, thanked the Group for the quality of its work. For Poland, the most important point was that for each Strategic Goal the starting point should be described very clearly so that progress could be tracked effectively.

16. The Standing Committee noted the report of the Working Group. The Chair invited members to review the draft COP11 Resolution contained in Annex I of StC42/Doc.5 and hoped that members would join him in commending the draft Strategic Plan to the COP for adoption.

Agenda Item 6: Cooperation with other MEA Secretariats

17. The Executive Secretary reported that the CMS Secretariat had held discussions with the CBD and Ramsar Secretariats, with a view to establishing Joint Work Plans with each of them. It had been agreed that more time was needed to prepare Joint Work Plans with each of them. It had been agreed that more time was needed to prepare draft Joint Work Plans but that this stage should be completed in time for consideration by StC44.

Agenda Item 6.1: Joint Work Plan with CITES

18. Ms. Melanie Virtue (Secretariat) introduced document UNEP/CMS/StC42/Doc.6.1: Cooperation between CMS and CITES. She recalled that the CITES and CMS Secretariats had been implementing Joint Work Plans since 2008. Annex 1 to the document contained a progress report on implementation of the 2nd Joint Work Plan 2012-2014. Annex II contained the draft 3rd Joint Work Plan 2015-2020. This took into account, inter alia, the Aichi Biodiversity Targets, the CITES Strategic Vision and the proposed CMS Strategic Plan. The Joint Work Plan did not have cost implications for the CMS budget, but additional external funding would be sought for certain elements. Cooperative working by CITES and CMS could lead to efficiencies and synergies in fundraising efforts.
19. The Chair invited the Standing Committee to take note of the report on implementation of the Joint Work Plan 2012-2014 and to approve the draft Joint Work Plan for 2015-2020. He opened the floor for comments.

20. The CITES Secretariat thanked the CMS Secretariat for the document that had been tabled and for the work done over the last few years. The CITES Secretariat was pleased with the progress described in Annex I. There was a need to bear in mind that not all CITES Parties were Party to CMS. Some 63 States were Party to CITES but not to CMS and some CITES Parties attached higher priority than others to engaging with CMS. Nevertheless, the draft 3rd Joint Work Plan had already been endorsed by the CITES Standing Committee and it was to be hoped that the CMS Standing Committee would do likewise. A side event on 4 November, organized jointly by both Secretariats, would look in more detail at prospects for synergy and cooperation, at regional and national levels, as well as at global level.

21. In response to a question from the representative of Chile, the Executive Secretary noted the close cooperation between CMS and INFORMEA. Discussions were continuing with a view to strengthening collaboration further.

22. The representative of South Africa thanked the various Secretariats for their efforts to enhance synergies between MEAs, but noted the need for mechanisms that could help cascade the good work being done at global level to regional and national levels.

23. There being no further interventions, the Chair concluded that the Standing Committee had taken note of the work accomplished by the two Secretariats under the Joint Work Plan 2012-2014 and had approved the draft Joint Work Plan 2015-2020. He called on Standing Committee Members and other Parties to give strong support to the side event on 4 November 2014.

**Agenda Item 7: Process for Election of the new Members of the Standing Committee for next triennium (and Budget Sub-Committee) in accordance with Res.9.15**

24. Referring to document UNEP/CMS/Resolution 9.15: *Composition and Organisation of the Standing Committee*, the Executive Secretary remarked that effective regional coordination would be a central element of COP11, given the very full agenda. Rooms had been made available for regional meetings and the times for the first such meetings notified to all delegates. One of the most important tasks would be the nomination of candidates for election as Regional Representatives and Alternate Representatives in the new Standing Committee. He recalled that Parties having already served two consecutive terms as Regional Representative would not be eligible for re-election. Parties that had served only one term would be eligible for re-election, while there were no restrictions on the number of terms that could be served by Alternate Representatives. Africa and Europe were entitled to three Regional Representatives each, Americas and Asia two Regional Representatives, and Oceania one. The regional groupings were invited to advise the Secretariat as soon as possible of their nominations; these would then be put before Plenary for adoption on the final day of the COP.

25. It had previously been decided by the Standing Committee that nominations for the Sub-Committee on Finance & Budget should be drawn from among the new Standing Committee members. This would avoid the significant additional travel costs incurred if Sub-
Committee members were elected from outside the Standing Committee, as had been the case during the 2012-2014 triennium.

26. There being no questions from the floor, the Chair concluded that the points made by the Executive Secretary had been duly noted by the Standing Committee.

**Agenda Item 9: Report of the Finance and Budget Sub-Committee**

27. At the request of the Chair of the Finance & Budget Sub-Committee, this Agenda Item was taken before Agenda Item 8: Financial and Human resources.

28. Ms. Nancy Céspedes (Chile), Chair of the Finance & Budget Sub-Committee recalled two decisions taken by StC41:

   (a) Financial reports should be produced by the Secretariat every six months for consideration of the Finance & Budget Sub-Committee; and

   (b) Members of the Sub-Committee, should, in future, be elected from among the members of the Standing Committee.

29. In conformity with decision (a), the Sub-Committee received the Secretariat’s financial report for 1 January to 31 July 2014 in August 2014. This information had also been used in preparing document UNEP/CMS/COP11/Doc.14.1: *Execution of the CMS Budget during the 2012-2014 Triennium*. The Chair of the Sub-Committee had received an e-mail from the Secretariat questioning if it would be necessary to hold a meeting of the Sub-Committee prior to COP11, since detailed budgetary discussions would be taking place at the COP. She had circulated that email to members of the Sub-Committee and received only two comments; one from a Sub-Committee member and one from an observer.

30. Ms. Céspedes noted that although it had been agreed at StC41 that the draft budget for 2015-2017 should be drawn up with the support of the Sub-Committee, the Sub-Committee had not, in fact, received any request from the Secretariat to support the development of the draft budget for the forthcoming triennium.

31. There being no questions or comments, the Chair of the Standing Committee concluded that the Committee had taken due note of the comments made by the Chair of the Finance & Budget Sub-Committee.

**Agenda Item 8: Financial and Human resources**

32. At the request of the Chair of the Finance & Budget Sub-Committee, this Agenda Item was taken after Agenda Item 9: Report of the Finance & Budget Sub-Committee.

**Agenda Item 8.1: Report on the Implementation of the CMS Budget during the Triennium 2012-2014**

33. Mr. Bruce Noronha (Secretariat) introduced document UNEP/CMS/COP11/Doc.14.1: *Execution of the CMS Budget during the 2012-2014 Triennium*. This represented the situation as of 31 July 2014. It contained three elements:
34. As of 31 December 2013, the balance of the Trust Fund was €867,393. Of that amount, approximately €650,000 was committed for the 2014 budget. Therefore the uncommitted Fund balance was €217,685. It was important to consider that the Fund balance contained unpaid pledges - an amount that had been rising, as shown in Table 3 of the document, standing at €345,981 as of 31 December 2013. Liquidity of the Fund therefore relied on unspent carry-overs and operating reserves. To address this trend the Secretariat has redoubled its efforts to urge Parties to pay their outstanding contributions for 2013 and prior years, and all corresponding invoices had been reissued. In response to these measures the balance of unpaid pledges for 2013 and prior years had fallen to €204,000 by 31 July 2014, and to €174,000 by 31 October 2014. Annex I provided an overview of the contributions status for each Party.

35. With regard to the 2014 budget, the total of unpaid contributions stood at €578,000 on 31 July 2014. However, as of 31 October 2014, this had fallen to approximately €550,000, of which €425,000 was at an advanced stage of processing. The 2014 year-end balance of unpaid pledges was expected to be slightly lower than for 2013.

36. With regard to expenditures, all the resources allocated for staff and operations costs in 2014 would be fully allocated. The information presented in the document had been reviewed in the light of expenditure during the period August to October 2014 and projections remained effectively unchanged.

37. Referring to the last two tables presented in Annex II, it was important to take into account that most activities with no or low expenditure when the document was compiled related to COP activities. It was expected that all such funds would be fully allocated.

38. The Chair opened the floor for comment.

39. The representative of South Africa noted that Table 6 (Savings as of 31 December 2013 rephased into 2014) appeared to indicate that savings from the core budget had been used to fund JPO positions. It was her understanding that such positions were sponsored by Parties and should not be funded from the core budget.

40. Mr. Noronha (Secretariat) recalled that StC41 had approved utilization of core budget savings to support the fourth year of a JPO position.

41. The representative of South Africa responded that it was a standard principle that Parties sponsor JPO positions. It was undesirable to set a precedent of such a position being funded from the core budget, even if such rephasing had been endorsed by the Standing Committee. It would have been preferable to see how the savings could have been utilized for other purposes.

42. The Executive Secretary stressed that the positions supported by the rephasing were temporary positions, not permanent core budget positions. The core budget savings enabled two positions to be extended exceptionally.
43. Several members, including the representatives of Chile, South Africa and Uganda, supported by the representatives of France and Poland, sought clarification with regard to paragraph 14 of UNEP/CMS/COP11/Doc.14.1, which referred to the Associate Programme Officer position based in Washington DC. Points raised included: the basis for including the position in the core budget at COP10; the degree to which the position had been successful in mobilising funds; the extent to which the position was realising tangible benefits within the Americas region; and the over-expenditures incurred in relation to this position.

44. The Executive Secretary recalled that the position was shared with and 50% funded by UNEP. He noted that the position was not dedicated solely to fundraising; a comprehensive report had been submitted to StC41 and the Officer had been available at that Meeting to answer questions. A further report had been submitted ahead of COP11, under Agenda Item 12.2.

45. Mr. Noronha (Secretariat) explained the specific provisions of the UN system that treats taxation of US citizens differently from those of citizens of other countries, and which meant in the case of the Associate Programme Officer, those costs had to be covered through the budget line for that position.

46. Following further discussion, it was agreed that this matter should be taken up by the COP11 Budget Committee, bringing together the relevant COP Agenda Items, namely Agenda Item 12.2: Report on CMS Activities in North America and Agenda Item 14.1: Execution of CMS Budget 2012-2014. The Committee would be tasked with finding a way forward to resolve remaining concerns over this issue.

47. Subject to the reservations expressed in relation to paragraph 14, document UNEP/CMS/COP11/Doc.14.1 was endorsed by the Standing Committee.

**Agenda Item 10: Status of Preparations for CMS COP11**

**Agenda Item 10.1: Summary of Preparatory Work**

**Agenda Item 10.2: Logistical Arrangements and Procedures**

**Agenda Item 10.2.1: Meeting Structure**

**Agenda Item 10.2.2: Conference Timetable including High Level Ministerial Panel, Champions night, side events and other meetings**

**Agenda Item 11: Briefing on key Documents for COP**

48. The Standing Committee accepted a proposal by the Executive Secretary that Agenda Items 10 and 11 should be considered together.

49. Mr. Johannes Stahl (Secretariat) summarized the logistical arrangements that had been made for the COP. The Government of Ecuador was generously providing transportation from three hubs in the city within reach of all hotels, to the Conference Centre, and had subsidized the cost of the excursions on 8 November. Arrangements for the High Level Panel on 3 November, Champions Night, 35th Anniversary celebrations and two receptions were also presented.
50. The Executive Secretary drew attention to the COP website, and in particular the new COP11 ‘splash’ page and the ‘In-Session’ page where in-session documents would be uploaded for the convenience of delegates as the Meeting progressed.

51. The representative of Norway, supported by the representative of France, expressed concern about the time implications of the relatively complex transportation logistics. He suggested that in the interests of saving time, consideration should be given to establishing additional working groups and that every effort should be made to move through the Agenda as efficiently as possible.

52. The Executive Secretary responded that every effort had been made by the Host Country to put together a flexible transport schedule that was as convenient as possible.

53. The representative of New Zealand suggested that Working Groups could begin earlier than 2000 hrs, as currently scheduled.

Agenda Item 10.2.1: Meeting Structure: Committees, Working Groups and election of Chairs/Vice Chairs

54. The Executive Secretary made a short presentation proposing arrangements to maximise the efficiency of the COP. In view of the very full Agenda, he proposed that a Drafting Group could work in parallel with the COW. The Drafting Group would focus mainly on institutional and governance issues, while the COW concentrated on implementation matters, supported as required by short-term working/contact groups for specific draft Resolutions and other key documents. The Budget Committee would operate as normal. Regional coordination meetings would be an important means of ensuring that the views and priorities of Parties were communicated to the appropriate forum, especially in the case of Parties with small delegations that needed to engage with parallel sessions.

55. The Chair invited the Standing Committee to support the proposals outlined by the Executive Secretary so that they could be put to the COP plenary for adoption.

56. Following responses to requests for clarification made by the representatives of New Zealand, South Africa and Uganda, the Standing Committee agreed to table the proposed arrangements for consideration by the COP.

57. The Executive Secretary noted that in response to concerns raised at COP10, the Secretariat had reached out to the regions seeking proposals for Chairs of the principal bodies of the COP. As a consequence of these consultations with Parties, the following nominations had been received:

Chair of the Committee of the Whole: Mr. Øystein Størkensen, Norway
Chair of the Drafting Group: Mr. Alfed Oteng-Yeboah, Ghana
Chair of the Budget Committee: Ms. Malta Qwathekana, South Africa

58. For short-term working/contact groups, Chairs would be proposed as the need arose.

59. The Standing Committee approved submitting the names of the proposed Chairs, for consideration by the COP.
Agenda Item 12: Report by the Chair of the Scientific Council on the outcomes of the 18th Meeting of the Scientific Council

61. The Chair of the CMS Scientific Council, Mr. Fernando Spina (Italy) made a presentation summarizing the activities of the Scientific Council between 2011 and 2014.

62. A number of Working Groups had been very active during the triennium and their work had been facilitated by promotion of the new online Scientific Councillors’ workspace. Much work had been done on development of organizational changes in the modus operandi of the Scientific Council. Mr. Spina drew attention to the work of the Saker Falcon Task Force, the Landbirds Action Plan, the Working Group on Minimizing Poisoning, and work on the conservation implications of cetaceans culture. Contacts with other MEAs had been maintained and he, in his role as Chair of the Scientific Council, had represented CMS at meetings of IPBES and the Bern Convention. Mr. Spina had secured funding from the Po Delta Regional Park for a restricted Scientific Council Meeting in Venice, in February or March 2015. The 18th Scientific Council Meeting in Bonn, from 1-3 July 2014 had been very generously supported by the Government of Germany and outputs of that Meeting would provide key contributions to COP11. Mr. Spina concluded by inviting the Standing Committee to take note of his report, and to provide guidance concerning the Council’s future activities.

63. The Chair thanked Mr. Spina for an informative presentation and drew attention to the fact that many Scientific Councillors had been unable to attend COP11, since the Scientific Council Meeting itself had been held some months prior to the COP.

64. The representative of Uganda thanked Mr. Spina applauded the successful fundraising efforts made by the Chair of the Scientific Council, and sought clarification over the criteria used to select participants for the restricted Scientific Council Meeting that had been held in Formia, Italy.

65. Mr. Spina responded that only COP-Appointed Councillors had been invited, due to the resource limitations and the need for in-depth discussions within a small group. It had been decided not to invite national delegates because the self-funding requirement was felt to discriminate unfairly in favour of those countries with adequate financial resources.

66. The representative of Chile congratulated Mr. Spina on the scale and efficiency of his work. She was struck by the lack of participation of Scientific Councillors at COP11, and drew attention to the importance of restructuring the Scientific Council.

67. The representative of South Africa thanked Mr. Spina for his excellent work and for the support he made available despite budget constraints. She also expressed regret that in spite of its important role in guiding the activities of the Convention, the budget for the Scientific Council had been cut at COP10.

Agenda Item 13: Date and Venue of the 43rd Meeting of the Standing Committee

69. The Executive Secretary confirmed that the 43rd Meeting of the Standing Committee would take place in Quito immediately following the close of the final plenary session on 9 November 2014.

Agenda Item 14: Any other business

70. There was no other business.

Agenda Item 15: Closure of the Meeting

71. The Chair closed the Meeting at 1714 hrs. underlining the need for regional groupings to select their candidates for election to the new Standing Committee as soon as possible during the course of the COP.

Agenda Item 1: Introductory Remarks

1. Mr. Bradnee Chambers (Executive Secretary) opened the Meeting, explaining that he would preside over the Meeting until the officers of the Standing Committee had been elected (Agenda Item 3).

2. Mr. Chambers invited Mr. Alfred Oteng-Yeboah (Ghana), the outgoing Chair of the Standing Committee to say a few words.

3. Mr. Oteng-Yeboah said that he had enjoyed the challenge of chairing the Standing Committee over the previous triennium and was sure that he would be leaving the Committee in the hands of a competent successor. He would remain at the disposal of the Convention should his advice be required.

4. He concluded his comments by thanking the staff at the Secretariat for all their support during his term of office.

Agenda Item 2: Adoption of the Agenda

5. Mr. Chambers introduced the Provisional Agenda (StC43/Doc.2) and invited any proposals for amendments. None were made, so the agenda was adopted as presented (see Annex 1 to the present Report).
Agenda Item 3: Election of officials to fill the posts of Chair and Vice-Chair of the Standing Committee for the triennium 2015-2017

6. Mr. Chambers invited nominations for the post of Chair.

7. Mr. Adams (Germany) noting Norway’s considerable support for the Convention and that Mr. Øystein Størkersen had presided over the Committee of the Whole and other MEA-related bodies with consummate success proposed Norway. There were no objections, so Norway was duly elected.

8. Mr. Chambers invited nominations for the post of Vice-Chair.

9. Kyrgyzstan nominated Mongolia. There were no objections, so Mongolia was declared elected as Vice-Chair.

10. Mr. Chambers invited Mr. Størkersen to preside over the remainder of the meeting.

Agenda Item 4: Election of the members of the Finance and Budget Sub-Committee

11. The Chair noted a change in the Terms of Reference that meant that the Finance and Budget Sub-Committee would be drawn from members of the Standing Committee and invited the Secretariat to explain the procedure.

12. Mr. Chambers said that each region had been asked to nominate one representative.

14. All nominees agreed to serve.

15. Germany, a member of the Standing Committee in its capacity of Depositary of the Convention, requested to serve on the Sub-Committee; this request was agreed to.

16. With regard to the Chair of the Sub-Committee, Panama (Alternate for South and Central America and the Caribbean) nominated Ecuador. Ecuador accepted the nomination and was declared elected.

Agenda Item 5: Date and Venue for the 44th Meeting of the Standing Committee

17. The Chair asked the Secretariat to introduce this item.

18. Mr. Chambers said that the Standing Committee normally met in October or November and the Secretariat would circulate suitable dates and make final arrangements for the 2015 Meeting (StC44) in consultation with the Chair.

Agenda Item 6: Any other business

19. There was none.
Agenda Item 7: Closure of the Meeting

20. The Chair speaking both personally and on behalf of Norway was honoured to have been asked to serve and he looked forward to working with the Secretariat to deal with the challenges ahead.

21. With all business concluded, the Chair declared the Meeting over. The List of Participants is attached as Annex 2 to the present Report.

FINANCIAL AND ADMINISTRATIVE MATTERS

Adopted by the Conference of the Parties at its 11th Meeting (Quito, 4-9 November 2014)

Recalling Article VII, paragraph 4, of the Convention, which reads as follows:

“The Conference of the Parties shall establish and keep under review the financial regulations of this Convention. The Conference of the Parties shall, at each of its ordinary meetings, adopt the budget for the next financial period. Each Party shall contribute to this budget according to a scale to be agreed upon by the Conference”;

Acknowledging with appreciation the financial and other support provided by the United Nations Environment Programme (UNEP) and giving special thanks to the Host Government (Germany) and other donors for their substantial additional contributions in support of the implementation of the Convention, as well as other support offered to the organs of the Convention during the previous triennium;

Appreciating the importance of all Parties being able to participate in the implementation of the Convention and related activities;

Noting the increased number of Parties, other countries and also organisations attending the meeting of the Conference of Parties as observers, and the resulting additional expenditure to Parties so incurred; and

Noting that the current level of the Trust Fund balance and the rising trend in year-end balances of Parties’ arrears, make it impossible to drawdown on the Trust Fund balance to contribute to the financing of the current budget as this could adversely affect the liquidity of the fund;

The Conference of the Parties to the Convention on the Conservation of Migratory Species of Wild Animals

1. Confirms that all Parties should contribute to the budget adopted at the scale agreed upon by the Conference of the Parties in accordance with Article VII, paragraph 4, of the Convention;

2. Adopts the budget for 2015 to 2017 attached as Annex I to the present Resolution and the Program of Work attached as Annex V;
3. **Adopts** the scale of contributions of Parties to the Convention, based on the UN Scale of Assessment, as listed in Annex II to the present Resolution and **decides** to apply that scale *pro rata* to new Parties;

4. **Requests** Parties, in particular those that are required to pay small contributions, to consider paying for the whole triennium in one instalment;

5. **Urges** all Parties to pay their contributions as promptly as possible preferably not later than the end of March in the year to which they relate and, if they so wish, to inform the Secretariat whether they would prefer to receive a single invoice covering the whole triennium;

6. **Notes** with concern that a number of Parties have not paid their contributions to the core budget for 2014 and prior years which were due on 1 March of each year, thus affecting adversely the implementation of the Convention;

7. **Urges** all Parties with arrears to co-operate with the Secretariat in arranging for the payment of their outstanding contributions without delay;

8. **Decides** to set the threshold of eligibility for funding delegates to attend the Convention’s meetings at 0.200 per cent on the United Nations scale of assessment, and as a general rule furthermore to exclude from such eligibility countries from the European Union, European countries with strong economies and/or countries that have payments in arrears of more than three years;

9. **Decides** that representatives from countries with contributions in arrears three years or more should be excluded from holding office in Convention bodies and denied the right to vote; and **requests** the Executive Secretary to explore with these Parties innovative approaches for the identification of possible funding to resolve their arrears prior to the next meeting;

10. **Decides** that Resolutions adopted by this Conference of the Parties that establish, *inter alia*, bodies, mechanisms or activities that have financial implications not provided for in Annex I, are subject to available funds from voluntary contributions;

11. **Encourages** all Parties to make voluntary contributions to the Trust Fund to support requests from developing countries to participate in and implement the Convention throughout the triennium;

12. **Requests** the Executive Secretary to provide Parties with a detailed list of core ongoing and future activities and projects not covered by the core budget, to assist Parties to identify those they intend to fund;

13. **Encourages** States not Parties to the Convention, governmental, intergovernmental and non-governmental organizations and other sources to consider contributing to the Trust Fund or to special activities;

14. **Decides** that the Executive Secretary, subject to the approval of the Standing Committee and in urgent cases with the approval of the Chair, shall have the authority to spend or to apply funds saved from implementation of the core budget and funds from new
parties joining the convention to activities in the approved costed program of work not covered in the core budget;

15. **Encourages** the Executive Secretary, with the approval of the Standing Committee and in line with UN rules, to use opportunities provided by vacancies to explore ways to strengthen the capacity of the Secretariat within its assigned budget, including through structural change;

16. **Approves** the creation of:

   a) one part-time (50%) P-2 position of Associate Programme Officer, Central Asian Mammals Initiative (CAMI);

   b) one part-time (50%) P-2 position of Associate Information Officer;

17. **Requests** the Executive Director of UNEP to assist the Secretariat to undertake a review of the grading of the Secretariat’s posts, in line with the functions of the Secretariat, taking into account the outcome of the Working Group on Future Shape of CMS, to enable decisions on the grading of the posts to be taken by Parties at COP12;

18. **Invites** Parties to consider the feasibility of financing Junior Professional Officers and/or providing gratis personnel or technical experts to the Secretariat to increase its technical capacity in line with UN Rules and Regulations;

19. **Instructs** the Finance and Budget Subcommittee of the Standing Committee to:

   i) meet one day prior to the start of every regular meeting of the Standing Committee, and to work intersessionally by electronic or other means;

   ii) work with the Secretariat to prepare all financial and budgetary documents for consideration by the Standing Committee; and

   iii) operate under the terms of reference attached as Annex III to this Resolution;

20. **Confirms** that the CMS Secretariat will continue to provide Secretariat services to ASCOBANS and to the Gorilla Agreement in the next triennium;

21. **Requests** the Executive Director of UNEP to continue to incorporate aspects of the Convention’s programme of work into the programme of work of UNEP and consider, as appropriate, providing financial support to specific CMS activities in this context;

22. **Requests** the Executive Director of UNEP to extend the duration of the Convention Trust Fund to 31 December 2017;

23. **Approves** the terms of reference for the administration of the Trust Fund, as set forth in Annex IV to the present Resolution, for the period 2015 to 2017;

24. **Decides** that all contributions to the Trust Fund shall be paid in Euros;
25. *Requests* the Secretariat to carefully monitor exchange rate fluctuations and adjust levels of expenditure, where necessary; and *decides* that the Secretariat, as a last resort, can request the Standing Committee to drawdown from the Trust Fund balance on an exceptional basis;

26. *Further decides* that there should be maintained a working capital at a constant level of at least 15 per cent of estimated annual expenditure or US$500,000, whichever is higher;

27. *Requests* the Secretariat to give due attention to the recommendations from the Future Shape process while preparing the budget for the next triennium; and

28. *Requests* the Executive Secretary to prepare budget proposals in the same format for consideration by the Conference of the Parties at its 12th Meeting, including, as a minimum, a zero nominal growth budget scenario, a zero real growth budget scenario and, in consultation with the Finance and Budget Subcommittee, if necessary, a third scenario.
### Annex I to Resolution 11.1

**Budget for the Triennium 2015-2017**

ANNEX III TO RESOLUTION 11.1

REVISED TERMS OF REFERENCE
OF THE FINANCE AND BUDGET SUBCOMMITTEE

1. Composition of the Subcommittee:

a) The Finance and Budget Subcommittee shall be composed, from among the members of the Standing Committee, of one country representative from each of the CMS regions, nominated by the region; and

b) The Subcommittee shall elect a Chairman from among its members.

2. Meetings and mode of operation of the Subcommittee:

a) The Subcommittee shall meet in closed session (i.e. attended only by members of the Subcommittee, Party observers and the Secretariat) one day prior to each meeting of the Standing Committee; and

b) The members of the Subcommittee shall communicate by electronic means between meetings of the Standing Committee. For this purpose, the Secretariat shall establish a forum on its website for communications among the members and for the sharing of documents, which may be read by non-members, who would communicate their views to their regional representative on the Subcommittee.

3. Responsibilities of members of the Subcommittee:

Members of the Subcommittee shall seek and represent the views of their region in carrying out their duties, and shall report back to their regions.

4. Responsibilities of the Subcommittee:

To fulfil the mandate of Resolution Conf.9.14, the Subcommittee shall:

a) Broadly, consider all aspects of the financing and budgeting of the Convention and develop recommendations to the Standing Committee. The Subcommittee should focus on keeping the Convention fiscally solvent while providing for essential support services for the efficient and effective functioning of the Convention;

b) Evaluate the programme of work of the Secretariat and other documents with budgetary implications relative to:

   i) The duties and responsibilities of the Secretariat mandated in the text of the Convention; and
   ii) Ensuring that the activities undertaken by the Secretariat under the approved budget are consistent with Resolutions and Decisions of the Conference of the Parties;

c) Consider administrative procedures and other aspects of the financing and budgeting of the Convention, and make recommendations for improving the efficiency with which funds are expended;
d) Using the information developed through the processes described in paragraphs a)-c):
   
   i) work with the Secretariat to prepare all financial and budgetary documents for consideration by the Standing Committee;
   
   ii) further develop the report format to ensure that the financial reports are easily understood and transparent, and that they enable informed decisions to be taken in relation to the financial performance of the Convention;
   
   iii) make recommendations to the Standing Committee on all financial and budgetary documents and proposals developed through this process; and
   
   iv) otherwise assist the Standing Committee in providing oversight of financial and budgetary matters, including the preparation of documents for meetings of the Conference of the Parties;

e) The Secretariat shall issue to all Standing Committee members a report, every six months, to be sent electronically, which identifies and explains any projected expenditure that differs from the approved budget by more than 20% for total staff costs or, in the case of non-staff costs, for each activity, together with the proposed approach for managing any such projected over-expenditure.
ANNEX IV TO RESOLUTION 11.1

TERMS OF REFERENCE
FOR THE ADMINISTRATION OF THE TRUST FUND FOR THE CONVENTION ON THE CONSERVATION OF MIGRATORY SPECIES OF WILD ANIMALS

1. The Trust Fund for the Convention on the Conservation of Migratory Species of Wild Animals (hereinafter referred to as the Trust Fund) shall be continued for a period of three years to provide financial support for the aims of the Convention.

2. The financial period shall be three calendar years beginning 1 January 2015 and ending 31 December 2017, subject to the approval of the Governing Council of UNEP.

3. The Trust Fund shall continue to be administered by the Executive Director of the United Nations Environment Programme (UNEP).

4. The administration of the Trust Fund shall be governed by the Financial Regulations and Rules of the United Nations, the Staff Regulations and Rules of the United Nations and other administrative policies or procedures promulgated by the Secretary-General of the United Nations.

5. In accordance with United Nations rules, UNEP shall deduct from the expenditure of the Trust Fund an administrative charge equal to 13 per cent of the expenditure charged to the Trust Fund in respect of activities financed under the Trust Fund.

6. The financial resources of the Trust Fund for 2015-2017 shall be derived from:

(a) The contributions made by the Parties by reference to Annex II, including contributions from any new Parties; and

(b) Further contributions from Parties and contributions from States not Parties to the Convention, other governmental, intergovernmental and non-governmental organizations and other sources.

7. All contributions to the Trust Fund shall be paid in Euros. For contributions from States that become Parties after the beginning of the financial period, the initial contribution (from the first day of the third month after deposit of the instrument of ratification, acceptance or accession till the end of the financial period) shall be determined pro rata based on the contributions of other States Parties on the same level as the United Nations scale of assessment, as it applies from time to time. However, if the contribution of a new Party determined on this basis were to be more than 22 per cent of the budget, the contribution of that Party shall be 22 per cent of the budget for the financial year of joining (or pro rata for a partial year). The scale of contributions for all Parties shall then be revised by the Secretariat on 1 January of the next year. Contributions shall be paid in annual instalments. Contributions shall be due on 1 January 2015, 2016 and 2017.
8. Contributions shall be paid into the following accounts:

Contributions in Euros:

UNEP Euro Account  
Account No. 6161603755  
J.P. Morgan AG  
Junghofstrasse 14  
60311 Frankfurt/Main, Germany  
Bank code number 501 108 00  
SWIFT No. CHASDEFX  
IBAN: DE 565011080061616 03755

Contributions in US Dollars:

UNEP Trust Fund  
Account No. 485 002 809  
J.P. Morgan Chase  
International Agencies Banking Division  
270 Park Avenue 43rd Floor  
New York, N.Y. 10017, USA  
Wire transfers: Chase ABA number 021000021  
SWIFT number BIC-CHASUS33, or  
CHIPS participant number 0002

9. For the convenience of the Parties, for each of the years of the financial period the Executive Director of UNEP shall as soon as possible notify the Parties to the Convention of their assessed contributions.

10. Contributions received into the Trust Fund that are not immediately required to finance activities shall be invested at the discretion of the United Nations, and any income shall be credited to the Trust Fund.

11. The Trust Fund shall be subject to audit by the United Nations Board of Auditors.

12. Budget estimates covering the income and expenditure for each of the three calendar years constituting the financial period, prepared in Euros, shall be submitted to the meeting of the Conference of the Parties to the Convention.

13. The estimates for each of the calendar years covered by the financial period shall be divided into sections and objects of expenditure, shall be specified according to budget lines, shall include references to the programmes of work to which they relate, and shall be accompanied by such information as may be required by or on behalf of the contributors and such further information as the Executive Director of UNEP may deem useful and advisable. In particular, estimates shall also be prepared for each programme of work for each of the calendar years, with expenditures itemized for each programme so as to correspond to the sections, objects of expenditure and budget lines described in the first sentence of the present paragraph.

14. The proposed budget, including all necessary information, shall be dispatched by the Secretariat to all Parties at least 90 days before the date fixed for the opening of the ordinary meeting of the Conference of the Parties at which they are to be considered.
15. The budget shall be adopted by unanimous vote of the Parties present and voting at that Conference of the Parties.

16. In the event that the Executive Director of UNEP anticipates that there might be a shortfall in resources over the financial period as a whole, the Executive Director shall consult with the Secretariat, which shall seek the advice of the Standing Committee as to its priorities for expenditure.

17. Commitments against the resources of the Trust Fund may be made only if they are covered by the necessary income of the Convention.

18. Upon the request of the Secretariat of the Convention, after seeking the advice of the Standing Committee, the Executive Director of UNEP should, to the extent consistent with the Financial Regulations and Rules of the United Nations, make transfers from one budget line to another. At the end of the first calendar year of the financial period, the Executive Director of UNEP may proceed to transfer any unspent balance of appropriations to the second calendar year, provided that the total budget approved by the Parties shall not be exceeded, unless specifically sanctioned in writing by the Standing Committee.

19. At the end of each calendar year of the financial period¹ the Executive Director of UNEP shall submit to the Parties, through the UNEP/CMS Secretariat, the year-end accounts. The Executive Director shall also submit, as soon as practicable, the audited accounts for the financial period. Those accounts shall include full details of actual expenditure compared to the original provisions for each budget line.

20. Those financial reports required to be submitted by the Executive Director of UNEP shall be transmitted simultaneously by the Secretariat of the Convention to the members of the Standing Committee.

21. The Secretariat of the Convention shall provide the Standing Committee with an estimate of proposed expenditures over the coming year simultaneously with, or as soon as possible after, distribution of the accounts and reports referred to in the preceding paragraphs.

22. The present terms of reference shall be effective from 1 January 2015 to 31 December 2017.

¹ The calendar year 1 January to 31 December is the accounting and financial year, but the accounts official closure date is 31 March of the following year. Thus, on 31 March the accounts of the previous year must be closed, and, it is only then that the Executive Director may submit the accounts of the previous calendar year.

STRATEGIC PLAN FOR MIGRATORY SPECIES 2015-2023

Adopted by the Conference of the Parties at its 11th Meeting (Quito, 4-9 November 2014)

Recalling CMS Resolution 10.5 which welcomed the updated version of the Strategic Plan for the Convention on the Conservation of Migratory Species of Wild Animals (2006-2011) to cover the next three-year period (2012-2014) without making substantive changes;

Taking into account that CMS Resolution 10.5 also established a Working Group to draft a new Strategic Plan for the period 2015-2023 to be submitted to the 11th Meeting of the CMS Conference of the Parties in 2014;

Recalling Decision X/20 of the Conference of the Parties to the Convention on Biological Diversity in which CMS is recognized as the lead partner in the conservation and sustainable use of migratory species over their entire range;

Further recalling Decision X/2 of the Conference of the Parties to the Convention on Biological Diversity by which the Strategic Plan for Biodiversity 2011-2020 and the Aichi Biodiversity Targets were adopted, and which invited the UN Environment Management Group (EMG) to identify measures for effective and efficient implementation of the Strategic Plan across the United Nations system;

Noting the EMG senior officials’ agreement in November 2012 to support the implementation of the strategic planning processes of the biodiversity-related multilateral environmental agreements, such as for migratory species;

Noting that Decision X/2 of the Conference of the Parties to the Convention on Biological Diversity urged Parties and other governments to support the updating of National Biodiversity Strategies and Action Plans (NBSAPs) as effective instruments to promote the implementation of the Strategic Plan for Biodiversity and mainstreaming of biodiversity at the national level, taking into account synergies among the biodiversity-related conventions in a manner consistent with their respective mandates;

Noting that UNGA Resolution 65/161 paragraph 19 decided to declare 2011–2020 the United Nations Decade on Biodiversity, with a view to contributing to the implementation of the Strategic Plan for Biodiversity 2011–2020 and requested the Secretary-General, in consultation with Member States, to lead the coordination of the activities of the Decade on behalf of the United Nations system, with the support of the secretariat of the Convention on
Biological Diversity, the secretariats of other biodiversity-related conventions and relevant United Nations funds, programmes and agencies;

Noting the report of the Chair of the CMS Strategic Plan Working Group (document UNEP/CMS/COP11/Doc.15.2);

Grateful for the work undertaken by that Working Group in preparing the new Plan, including taking account of lessons learned from experience in implementing the Strategic Plan 2006-2014, considering the outcomes of the Future Shape process and the strategic planning processes in other multilateral environmental agreements; and providing substantial opportunities for making contributions to the drafting of the Plan;

Welcoming contributions to the Strategic Plan’s development by Parties and stakeholders, including the report *A Natural Affiliation: Developing the Role of NGOs in the Convention on Migratory Species Family*; and acknowledging that key partnerships to support delivery of the Strategic Plan will include those with other Conventions, civil society, the private sector, and regional bodies; and

Mindful of the need to avoid creating additional reporting burdens that risk diverting action from implementation;

The Conference of the Parties to the
Convention on the Conservation of Migratory Species of Wild Animals

Strategic Plan for Migratory Species 2015-2023

1. **Adopts** the Strategic Plan for Migratory Species 2015-2023 as appended in Annex 1 to this Resolution;

2. **Requests** the Secretariat to integrate the goals and targets of the Strategic Plan into work programmes under the Convention, and to take action to raise awareness of the Plan;

3. **Urges** Parties and invites other States, the CMS Family of instruments, relevant multilateral bodies, intergovernmental organizations, and civil society organizations working towards the conservation of migratory species to integrate the goals and targets of the Strategic Plan within relevant policy and planning instruments, and also to take action to raise awareness of the Plan;

4. **Invites** the decision-making bodies of CMS instruments to consider the Strategic Plan for adoption at their next meetings;

Sub-targets to support the Strategic Plan targets

5. **Encourages** the decision-making bodies of CMS instruments, as well as other partners and stakeholders working for the conservation of migratory species, as appropriate, to identify existing or develop new sub-targets for the species and issues relevant to those instruments

---

and organizations that support the achievement of the targets in the Strategic Plan for Migratory Species; and to inform the CMS Secretariat of such sub-targets;

6. Requests the Secretariat to maintain a register of sub-targets as a “living” document able to be supplemented and updated by contributions from the CMS Family of instruments and from other partners and stakeholders wishing to contribute, and to provide updates on additions to the register to future meetings of the Conference of the Parties for the duration of the Strategic Plan;

**Indicators and Companion Volume**

7. Notes the indicative headline indicators and Companion Volume outline presented in document UNEP/CMS/Conf.11/Doc.15.2;

8. Confirms the need for additional inter-sessional work to strengthen the suite of materials to support implementation of the Strategic Plan, including:

   a) indicators for the Strategic Plan for Migratory Species, drawing as far as possible from existing work, such as that under the global Biodiversity Indicators Partnership; and

   b) a Companion Volume on Implementation for the new Strategic Plan, based on available tools, to provide guidance on implementation of the Plan;

**Extension of the Strategic Plan Working Group mandate**

9. Decides to extend the mandate of the Strategic Plan Working Group to include the tasks of elaborating the indicators and Companion Volume during the triennium 2015-2017, and requests the Working Group to submit progress reports to the Standing Committee for approval of their progressive implementation. The new Terms of Reference for the Strategic Plan Working Group are appended as Annex 2 to this Resolution;

10. Requests the Secretariat to undertake the necessary background compilation of material to feed into the efforts of the Working Group, including:

   a) The work being undertaken by relevant specialist international fora on indicators, such as the global Biodiversity Indicators Partnership; and

   b) Analysis of programmes of work and action plans adopted under the Convention and CMS Family instruments, along with their own indicators, for synergies;

**Implementation**

11. Further requests the Secretariat to consider amendments to the format for National Reports, where necessary, in respect of assessing implementation of the Strategic Plan and those indicators for which such reports are identified as a potentially important source of information, and the scope for streamlining existing reporting processes to reduce reporting burdens, and to submit any proposed amendments to the Standing Committee for its consideration and transmission to the 12th Meeting of the Conference of the Parties;
12. *Decides* to keep the implementation of the Strategic Plan under review at its 12th, 13th and 14th Meetings in the light of the Plan’s stated goals, targets and indicators and in line with chapter 4 section 7 of the Strategic Plan;

13. *Recognizes* that a wide range of civil society organizations and other stakeholders make an invaluable contribution to implementing the Convention and to conserving migratory species, and encourages these organizations to report on this work to meetings of the Conference of the Parties; and

14. *Invites* UNEP, Parties, multilateral donors and others to provide financial assistance for the implementation of this Resolution.
Annex 1 to Resolution 11.2

The Strategic Plan for Migratory Species
2015-2023

Chapter 1: Rationale

1.1 Background to the SPMS

At the Tenth Meeting of the Conference of the Parties to the Convention on Migratory Species (CMS COP10; November 2011; Bergen, Norway), Parties resolved to prepare a new Strategic Plan for the period 2015-2023. COP8 had previously adopted a Plan for the period 2006-2011, which was extended by COP10 with minor changes to 2014.

The end-date of the present Plan was agreed because it coincides with the CMS COP cycle and, more importantly, it allows time for a review of progress during the UN Decade on Biodiversity (see Figure 1, with CMS milestones shaded). It also provides an opportunity to assess how the Strategic Plan for Migratory Species 2015-2023 (SPMS) has supported the Strategic Plan for Biodiversity 2011-2020 and its Aichi Biodiversity Targets. The SPMS targets are more specific and continue in effect for longer than the Aichi Biodiversity Targets (most of which have a 2020 end-date).

Figure 1: Timeline for Biodiversity and Migratory Species Strategic Plans

A Strategic Plan Working Group (SPWG) was established with the task of drafting the Strategic Plan 2015-2023 for consideration by the Conference of the Parties at its 11th Meeting. The Working Group commissioned a review of implementation experience to date, and took account of strategic planning processes in other multilateral environmental agreements. Two key recommendations emerged from its discussions:

(1) The Strategic Plan for Biodiversity and its Aichi Biodiversity Targets should be used as a framework when developing the SPMS. This approach was taken to: keep the SPMS

---

3 CMS COP13 will not be able to assess the evaluation of SPMS towards the Aichi Targets given that the evaluation of achievement of the Aichi Targets will only take place right before CMS COP 13. The integration of that evaluation will therefore only be possible at CMS COP14, hence the 2023 end date of the SPMS.

consistent with UN General Assembly resolutions on biodiversity; link migratory species priorities to the relevant Aichi Targets; and provide a logical and effective way for migratory species targets to be integrated into National Biodiversity Strategies and Action Plans (NBSAPs), thereby ensuring they are part of national planning and priority-setting processes.

(2) The new plan should be a Strategic Plan for Migratory Species (the SPMS) and should focus on the conservation of migratory animals (populations, species or lower taxonomic levels, as the context requires), rather than on the Convention itself. This approach shifted the focus from the institution to the issue, thereby broadening relevance and “ownership” among the CMS “Family” of instruments and beyond. This approach is also consistent with COP decisions regarding the CMS “Future Shape” process, which identified the need for a coordinated and coherent approach to migratory species conservation among CMS and its daughter agreements.

Migratory species have distinct conservation needs, associated in particular with their temporal cycles and transboundary migration patterns. Conservation of migratory species at the population level can only be achieved by coordinated and cooperative international action between the Range States that share these populations on their migration routes. These States and other relevant stakeholders therefore share a joint responsibility to develop and implement coherent strategies. That responsibility may include activities such as collaboration to, inter alia, ensure free and open access to relevant data, information and models, so as to provide sound scientific grounding for decisions relating to migratory species.

Overall it demands the taking of a migration systems approach, which by its very nature is a strategic consideration. “Migration systems” is a concept which reflects the interdependent complexes of places, routes between places, populations, ecological factors and temporal cycles involved. A “migration systems approach” therefore implies conservation strategies which give holistic attention not only to populations, species and habitats, but to the entire span of migration routes and the functioning of the migration process.

Since 1979, the Convention on Migratory Species has provided the primary specialized intergovernmental framework for these cooperative efforts, through its agreements, action plans and other systematic instruments.

This SPMS therefore does not duplicate the Strategic Plan for Biodiversity, but complements it by adding the necessary specificity for and focus on migratory species conservation, including within the context of the CMS Family.

The close interaction between the SPMS and the Strategic Plan for Biodiversity, furthermore facilitates national coordination on and integration of issues related to migratory species into national biodiversity strategies and action plans (NBSAPs), given that those are based on the Strategic Plan for Biodiversity and its Aichi Targets.

1.2 Why are migratory species a global priority?

Migratory species are a significant component of biodiversity in general, underpinning ecological systems. Many different groups of animals are involved, from antelopes to fish, from whales to elephants, from bats to birds and even butterflies. They form a substantial proportion of the world’s genetic variety, having evolved in particularly intricate interrelationships with plant and other animal species; and they play essential roles in ecosystem functioning and dynamics. Their multi-dimensional

---

5 For example, Resolution 67/212 where the General Assembly: “Notes the efforts to mainstream the Aichi Biodiversity Targets in the contribution of the United Nations system to support the Strategic Plan for Biodiversity 2011–2020, and invites the United Nations system to continue facilitating cooperation among its members in support of the implementation of the Strategic Plan.” This also has relevance, among other things, to the UN’s post-2015 Sustainable Development Goals.

6 Recognition of this is enshrined for example in cooperation agreements with other Conventions; and in the case of the CBD also by CBD COP Decision VI/20 (2002) which recognizes CMS as “the lead partner in conserving and sustainably using migratory species”.

185
connectedness gives them a special role as ecological keystone species and indicators of the linkages between ecosystems and of ecological change.

These same attributes mean that migratory species have their own special vulnerabilities. Migration journeys expose them to heightened survival risks, and habitat requirements are often a complex mix of different components in breeding areas, non-breeding areas, and the places in between. Concentrations of large numbers of individuals during specific periods at specific sites, also increases the risk of serious impacts from negative pressures at those sites. Barriers to migration pose special challenges, whether or not in the form of physical obstacles, which may cause direct mortality, or fragmentation of ecological resources disrupting movement from one place to another.

Many of the actions defined in this Plan are accordingly directed towards “migration systems”, as described in section 1.1 above.

The repeating cycles and trans-boundary ranges inherent to the phenomenon of migration, as well as the massive scale of animal movements often involved, are fundamental to the ability of the planet to support humankind and biodiversity overall. Migration is a key adaptation to natural rhythms and evolutionary changes; and by the same token both migratory species and their habitats can be affected/disrupted by human impacts, including climate change.

A great many migratory species are of major direct and indirect importance for human well-being, including people’s food security and livelihoods. Many human communities rely on the regular influx of migratory animals: as a basis for subsistence; for economically and/or culturally important hunting, fishing, tourism and recreation; or to maintain ecosystem function in a way that allows another resource to be harvested. Levels of use (of species or their habitats) by one community can significantly affect availability of the resource to communities in different, possibly distant, locations. The conservation and sustainable use of migratory species is therefore a key contribution to wider aims of sustainable development and requires global attention.

1.3 Scope of the SPMS

The Working Group considered that the SPMS would have more political impact and visibility when providing guidance at a strategic level. Enabling activities or instruments that concern implementation – an essential component of a successful and effective Strategic Plan – are addressed in a separate Companion Volume to support the implementation of the Plan.

The SPMS defines long-term and high-level outcomes in a way that allows progress toward them to be tracked and evaluated, and adaptive changes to be made as necessary.

The migration systems approach taken is reflected in the SPMS by clear references to: (1) migratory species; (2) their habitats and migration routes; and (3) threats to both. All elements are included in the targets to the extent possible.

The SPMS is designed to apply to migratory species as defined by the Convention, i.e. the entire population or any geographically separate part of the population of any species or lower taxon of wild animals, a significant proportion of whose members cyclically and predictably cross one or more national jurisdictional boundaries. This definition reflects the importance of concerted international action necessary to address trans-boundary challenges associated with the conservation of migratory species. In addition, it invites meaningful engagement by all interested stakeholders – including CMS and its daughter instruments. The word “species” where it occurs in this Plan should be interpreted in line with the same definition, meaning that such references may apply to lower taxonomic levels when the context so requires.

The SPMS provides a broad framework that is capable of harnessing all related migratory species conservation efforts by the international community as a whole in the same direction (see Figure 2, which shows the scope and the context of the SPMS). In doing so it creates opportunities for greater coherence and visibility at national, regional and global levels in policy and political terms for these issues.
Figure 2: The Strategic Plan for Migratory Species: its scope and the context
Chapter 2: Vision and Mission

The purpose of the Strategic Plan for Migratory Species is to provide vision, leadership, and a driving force toward the full and effective implementation of goals and targets related to migratory species.

This SPMS aims to achieve the following vision:

“Living in harmony with nature – where populations and habitats of migratory species (along with all biodiversity) are valued, conserved, restored and wisely used, thereby contributing to global sustainability.”

The following Mission guides the implementation of this Plan:

"To promote actions to ensure the favourable conservation status of migratory species and their habitats, and to ensure the ecological integrity, connectivity and resilience of migration systems."

Chapter 3: Strategic Goals and Targets

Goals

The five goals articulated below express strategic outcomes of this Plan. These include conservation outcomes and ways to measure them. Operational detail to support implementation is provided in a Companion Volume (see also chapter 4 below).

Targets

Under each goal, performance targets are provided that specify the scale and nature of the main tangible shifts required in each case. The purpose of the targets is to define priorities and to clarify what constitutes successful performance. Where applicable, this includes a quantifiable standard. Broadly derived from the Aichi Biodiversity Targets in the Strategic Plan for Biodiversity – so as to facilitate coherence with biodiversity-related activities (see Annex A) and support efforts during the UN Decade of Biodiversity – the SPMS goals and targets have been drafted to contribute to the objectives of the CMS instruments, retain a clear identity, and reflect the needs of migratory species. This means that each one has been independently re-examined in the context of conditions existing in 2014, and is based on judgements about achievability and the specific priority needs of migratory species in this context.

Nothing in this Plan shall be taken to dilute or reduce the commitments represented by the Aichi Biodiversity Targets. In general, each target should be achieved at global level within the timeframe set for the corresponding Aichi Target (see Annex A), where applicable. Individual governments may wish to set earlier deadlines for some or all of the targets according to their national circumstances. Adoption of specific national plans of action may assist in elaborating such matters.

Sub-targets

Certain key contributions to the delivery of the targets in this Plan can be defined in the form of subsidiary targets, addressing specific issues. In some cases, more specific aspects of a given target may be sufficiently well-defined (e.g., under one of the CMS daughter instruments, or another international process) so it is possible to distil specific sub-targets.

One important category of sub-targets relates to actions or processes which will be or are being undertaken in the context of one or more of the CMS “Family” of Agreements, Memoranda of Understanding and Action Plans. Each governing body of those instruments can adopt such sub-targets where considered appropriate. This can for example take the form of specific targets on a particular species or an Action Plan, or Conservation & Management Plan with its own targets, which are
considered supportive of - but distinguished from - the rest of the Strategic Plan in that respect. They are noted in a separate register maintained by the CMS Secretariat, and encourage an integrated approach to implementation of the Plan across the Family of instruments.

This picture will evolve, and further sub-targets are likely to be agreed in their own contexts. The register of sub-targets is therefore designed to be an open-ended list which will be updated from time to time. There is no implication that a sub-target necessarily needs to be defined in respect of any particular SPMS target or any particular instrument. Conversely, the sub-targets given at any one time do not necessarily represent the totality of commitments that may exist or may further need to be defined at this level.

**Indicators**

Core measurable indicators are included to track and account for progress towards the achievement of the targets. These are shown in Annex B, and are based on indicators devised for use with the corresponding Aichi Targets. Details on indicators (including achievement milestones) can be found in the implementation Companion Volume.

**Goal 1: Address the underlying causes of decline of migratory species by mainstreaming relevant conservation and sustainable use priorities across government and society**

<table>
<thead>
<tr>
<th>Target 1: People are aware of the multiple values of migratory species and their habitats and migration systems, and the steps they can take to conserve them and ensure the sustainability of any use.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Note:</strong> “Awareness” here is intended to be more than passive, and to include positive support and engagement at political levels, as well as among the public. It includes awareness of the values represented by the phenomenon of migration itself. The values concerned may be socio-economic, including cultural, as well as ecological.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Target 2: Multiple values of migratory species and their habitats have been integrated into international, national and local development and poverty reduction strategies and planning processes, including on livelihoods, and are being incorporated into national accounting, as appropriate, and reporting systems.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Note:</strong> Actions towards this SPMS target may also contribute to SPMS target 13.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Target 3: National, regional and international governance arrangements and agreements affecting migratory species and their migration systems have improved significantly, making relevant policy, legislative and implementation processes more coherent, accountable, transparent, participatory, equitable and inclusive.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Note:</strong> Reference to governance “affecting” migratory species here indicates that this is not limited only to conservation governance, but extends to other levels/sectors that may also have an effect.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Target 4: Incentives, including subsidies, harmful to migratory species, and/or their habitats are eliminated, phased out or reformed in order to minimize or avoid negative impacts, and positive incentives for the conservation of migratory species and their habitats are developed and applied, consistent with engagements under the CMS and other relevant international and regional obligations and commitments.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Note:</strong> The precise approach to this will vary, in some cases sub-nationally, according to specific local circumstances.</td>
</tr>
</tbody>
</table>

**Goal 2: Reduce the direct pressures on migratory species and their habitats**

| Target 5: Governments, key sectors and stakeholders at all levels have taken steps to achieve or have implemented plans for sustainable production and consumption, keeping the impacts of use of natural |
resources, including habitats, on migratory species well within safe ecological limits to promote the favourable conservation status of migratory species and maintain the quality, integrity, resilience, and ecological connectivity of their habitats and migration routes.

Note: Where there is uncertainty about what constitutes a “safe ecological limit” in a given case, a precautionary approach should be taken.

Target 6: Fisheries and hunting have no significant direct or indirect adverse impacts on migratory species, their habitats or their migration routes, and impacts of fisheries and hunting are within safe ecological limits.

Note: Achievement of this target will require that migratory species are managed and harvested sustainably, legally and through the use of ecosystem-based approaches. Overexploitation of migratory species must be avoided, and recovery plans and measures should be in place for all depleted species. Where there is uncertainty about what constitutes a “safe ecological limit” in a given case, a precautionary approach should be taken.

Target 7: Multiple anthropogenic pressures have been reduced to levels that are not detrimental to the conservation of migratory species or to the functioning, integrity, ecological connectivity and resilience of their habitats.

Note: The pressures concerned may include those relating to climate change, renewable energy developments, power lines, by-catch, underwater noise, ship strikes, poisoning, pollution, disease, invasive species, illegal and unsustainable take and marine debris.

Goal 3: Improve the conservation status of migratory species and the ecological connectivity and resilience of their habitats

Target 8: The conservation status of all migratory species, especially threatened species, has considerably improved throughout their range.

Note: Actions towards this SPMS target may also contribute to SPMS target 11.

Target 9: International and regional action and cooperation between States for the conservation and effective management of migratory species fully reflects a migration systems approach, in which all States sharing responsibility for the species concerned engage in such actions in a concerted way.

Note: The Convention on Migratory Species, being “concerned particularly with those species of wild animals that migrate across or outside national jurisdictional boundaries”, emphasizes that “conservation and effective management of migratory species of wild animals require the concerted action of all States within the national jurisdictional boundaries of which such species spend any part of their life cycle”. This would include the necessary capacity building as a key component of trans-boundary cooperation. Target 9 seeks more complete engagement by all of the States who share joint responsibility in such circumstances.

Target 10: All critical habitats and sites for migratory species are identified and included in area-based conservation measures so as to maintain their quality, integrity, resilience and functioning in accordance with the implementation of Aichi Target 11, supported where necessary by environmentally sensitive land-use planning and landscape management on a wider scale.

Note: Aichi Target 11 states that “at least 17 per cent of terrestrial and inland water, and 10 per cent of coastal and marine areas, especially areas of particular importance for biodiversity and ecosystem services, are conserved through effectively and equitably managed, ecologically representative and well-connected systems of protected areas and other effective area-based conservation measures, and integrated into the wider landscapes and seascapes”.

190
**Goal 4: Enhance the benefits to all from the favourable conservation status of migratory species**

**Target 11:** Migratory species and their habitats which provide important ecosystem services are maintained at or restored to favourable conservation status, taking into account the needs of women, indigenous and local communities, and the poor and vulnerable.

*Note:* The services concerned may include water supply, quality and regulation; disaster risk reduction; climate regulation; cultural services; food and other socio-economic benefits, all contributing to people’s health, livelihoods and well-being. Actions towards this SPMS target may also contribute to SPMS target 8.

**Target 12:** The genetic diversity of wild populations of migratory species is safeguarded, and strategies have been developed and implemented for minimizing genetic erosion.

*Note:* Safeguarding actions may include maintenance of the original gene pool for migratory species that are managed under human care for re-introduction into the wild and other purposes, or are otherwise of socio-economic as well as cultural value.

**Goal 5: Enhance implementation through participatory planning, knowledge management and capacity building**

**Target 13:** Priorities for effective conservation and management of migratory species, their habitats and migration systems have been included in the development and implementation of national biodiversity strategies and action plans, with reference where relevant to CMS agreements and action plans and their implementation bodies.

*Note:* Other types of national plans and strategies, such as those for the implementation of other Multilateral Environmental Agreements or national development plans, may also be highly relevant. Even if they are not designed overtly to have biodiversity-related purposes, plans for issues such as land use, resource use, public health, disaster risk reduction, infrastructure distribution and economic development can include provisions that make an important difference to migratory species conservation. Actions towards this SPMS target may also contribute to SPMS target 2.

**Target 14:** The traditional knowledge, innovations and practices of indigenous and local communities relevant for the conservation and sustainable use of migratory species, their habitats and migration systems, and their customary sustainable use of biological resources, are respected, subject to national legislation and relevant international obligations, with the full and effective participation of indigenous and local communities, thereby contributing to the favourable conservation status of migratory species and the ecological connectivity and resilience of their habitats.

*Note:* This target reflects international thinking on the subject in other fora.

**Target 15:** The science base, information, training, awareness, understanding and technologies relating to migratory species, their habitats and migration systems, their value, functioning, status and trends, and the consequences of their loss, are improved, widely shared and transferred, and effectively applied.

*Note:* The “science base” here does not relate only to new research and monitoring, but also to making better use of existing datasets (including improving their public availability), and improving the standardization of data collection protocols. In addition to investigation and understanding of specific events, phenomena, patterns and consequences, greater efforts may also be required to improve data on baseline conditions, so that meaningful assessments of significance, and assessments of change, can be made.

---

7 At the time of adopting this Plan, terminology for referring to indigenous people/peoples and local communities is under debate in other intergovernmental contexts. The wording in this Plan should not be taken to favour any one terminology over another.
Target 16: The mobilization of adequate resources from all sources to implement the Strategic Plan for Migratory Species effectively has increased substantially.

Note: This target refers to resource mobilization in the broad sense including international and domestic funding from public, private and other sources. It however also implies policy choices that reduce the costs of improving the status of migratory species and thus also benefits from the correct implementation of Goals 1 and 2. Developing countries, least developed countries, small island developing states and countries with economies in transition have particularly acute needs in this regard. Resource flows to as well as within these countries need to increase, both through "north-south" and "south-south" cooperation.

Chapter 4. Enabling Conditions for Implementation

The successful achievement of the SPMS objectives depends on the commitment and engagement of Range States and other stakeholders. The SPMS was designed to maximize high-level political engagement in migratory species issues, and real impact will come from the willingness and commitment of all concerned to be imaginative, positive, collaborative, and determined to realize the adopted vision through their everyday actions in practice.

This needs to be supported by a range of organizational arrangements and implementation measures. Building on lessons learned from the implementation of the 2006-2014 CMS Strategic Plan, the present chapter describes the main areas in which suitable high-level conditions need to be created in order to enable the range of implementation measures required. This covers, in particular: delivery mechanisms, supporting infrastructure and performance assessment. In each of these areas a minimum level of human, technical and financial resources will be required if this plan is to succeed. To this end, the suggestions below should assist governmental and non-governmental actors to translate and integrate the global targets into their specific regional and national contexts.

More detailed guidance on the practical dimensions related to the implementation of the SPMS by all concerned stakeholders is provided in the Companion Volume on Implementation which accompanies this Strategic Plan. That Companion Volume is intended to help both country experts and other stakeholders to put in place and execute the necessary means of implementation towards reaching the goals and objectives of the SPMS.

1) Outreach, promotion and uptake of the Plan

The SPMS and its issues will be promoted by the entire CMS Family and CMS channels in order to raise awareness of the Plan and effect implementation of the targets.

The Plan expresses priorities that are shared at the global level, but it is also designed to frame a well-integrated response to those priorities at multiple scales. National planning processes therefore are indispensable in “translating” the Plan to different contexts. The existence of a robust agreed framework at global level should greatly assist such national processes, for example by offering already-validated thinking that can be adapted, rather than having to be originated afresh. If national plans and policies are approached in this way, ensuring compatibility with the SPMS, proposals for international collaboration, and (where relevant) financial support, should have much greater chances of success.

2) The delivery framework

The Convention and the CMS Family of instruments have a specific role as a primary delivery framework for the SPMS, as well as their subsidiary bodies and national focal points.

Existing delivery mechanisms and activities include among others relevant CMS Family decisions, action plans, guidelines and programmes supporting the SPMS, including priorities for development of future CMS instruments and initiatives.
The SPMS should furthermore guide the COP when developing new instruments and tools to support the individual targets.

3) **Key partnerships and other supporting delivery frameworks**

Key partnerships to support delivery of the SPMS include those with other Conventions, civil society, the private sector and regional bodies. A wide range of civil society organizations and other stakeholders make an invaluable contribution to implementing the Convention and conserving migratory species. This large amount of work is often facilitated by governmental processes, and could usefully be reported by governments at the national and international levels.

4) **Capacity development**

The CMS Family, Parties and other stakeholders need to address capacity building needs relating to information, awareness, knowledge and understanding as covered in the strategic targets. This is supported in particular by implementation of the CMS Capacity Building Strategy. A further step in this direction is capacity development using the Manual for the National Focal Points for CMS and its Instruments - a capacity building tool to guide the national focal points of CMS and its instruments on their roles and responsibilities, helping them to make a more effective contribution to implementation.

5) **Resourcing for biodiversity**

As total funds currently committed to migratory species conservation are insufficient to achieve the full suite of goals and targets expressed in this Plan, creative mobilization of additional resources from all sources is required.

What matters about resource mobilization for biodiversity in the end is the amount of resources available for biodiversity. Those resources can be financial, human and technical, both domestic and international, and can come from a variety of sources.

“In-kind” support from the voluntary efforts of individuals and civil society at large can be expected to make a major contribution to scientific research, surveillance, awareness raising, and other areas of implementation. Innovations in knowledge management and information technology will also substantially increase the power of what can be done with available resources.

Target 16 addresses this at a headline level. It should be supported in particular by implementation of the Resource Mobilization Strategy adopted under the Convention on Biological Diversity (COP 9 Decision IX/11, 2008) and the associated targets agreed by COP11 in 2012 in Decision XI/4.

In this respect, it is important to keep in mind that resourcing for the implementation of the SPMS happens through several mechanisms, in particular through (i) the reduction of expenses, (ii) increasing the efficient use of the available resources and (iii) the generation of new resources, as discussed further below:

i. The challenge of mobilizing resources is certainly about reducing the need for more resources in the first place. The need for resources for the targets depends highly on the policy choices made by key sectors. Different costing scenarios are therefore possible, depending on the sectoral policies. If less biodiversity is impacted negatively by national, regional and/or global policies, then fewer resources will be needed to protect or restore it. Examples from key sectors such as forestry, fisheries, agriculture and so on show that win-win situations for both the sector and biodiversity are possible and desirable when considered under a medium- to long-term perspective. Integration of migratory species issues into sectoral policies can support sustainable development and a more stable long-term basis. This can be done through increased allocations towards biodiversity activities but also through enhancing biodiversity aspects in sectoral policies and better engaging all actors, including key production sectors and the private sector.
ii. Increased available funding also depends on the effectiveness, efficiency and sustainability of international and national financial flows for biodiversity. This needs the necessary institutional, national, administrative and managerial capacities to ensure the enabling environment for more effective, efficient and sustainable use of resources and to mobilize private and public-sector investments. Not every action to implement the Plan therefore costs money and some of the principles of efficiency and partnership espoused by this Plan actively facilitate a more efficient use of the available resources.

iii. Finally, generating new resources will remain very necessary to achieve the implementation of the Plan. With the engagement of champions, ambassadors, philanthropists and skilled public relations specialists, the evocative cause of migratory species lends itself well to fundraising efforts at all levels. Guided by the SPMS, specific implementation activities may be clustered into appealing regional or thematic programmes for this purpose, or advertised in portfolios of costed projects.

6) **Monitoring and evaluation, including indicators, milestones and feedback to the sub-targets, as well as headline measures of success by which overall success of the SPMS may be judged**

The SPMS defines expected long-term and high-level outcomes in a way that allows the assessment of progress and results. Setting a direction is meaningless, if not followed by: evaluations of implementation; assessments of on-the-ground impacts; and calculations of ‘return on investment’. In addition, a system of learning and adaptive management should be integral to the system.

To this end, Annex B outlines the scope of existing or planned indicators that should (to varying degrees) track progress toward individual SPMS targets. Further detail on these indicators is provided in the Companion Volume. To be credible, the monitoring and evaluation regime will need to be thorough, transparent, and trustworthy, with a clear (and plausible) sense of the logic of expected causal pathways between activities, outcomes, and impacts. Robustness and quality in this area may even be a way of providing some of the strength that most biodiversity-related conventions lack through the absence of compliance mechanisms.

Clear allocation of responsibility for the work required to operate various aspects of the indicators regime (and to develop relevant new measures, where required) is an important part of the conditions that enable good implementation of the Plan. Initial leadership on this has been given in COP Resolution 11.2.

Programmes of Work adopted under the CMS and action plans of CMS Family instruments may have their own indicators. There will be a need to ensure that appropriate linkages are made and advantage is taken of potential synergies between those and the indicators for the Strategic Plan.

In addition to target-by-target evaluation, it is expected that principal institutions (such as the CMS COP) will endeavour to evaluate overarching headline measures of success by which the overall success of this Plan may be judged as a whole.

7) **Reporting on and review of progress at national level and by governing bodies such as the CMS COP**

The SPMS provides goals, yet is also part of a cycle of feedback and adaptive management. Using information from indicators, the SPMS should provide a means toward efficient, effective, and meaningful reporting.

National reporting cycles, such as by Parties to Convention COPs, provide one means by which progress against the SPMS can be measured. These reports can help build a picture of progress toward achievement of the goals and targets of the SPMS, and can highlight areas for attention. Continued development of harmonized on-line reporting systems, as well as information provided by NGOs and civil society, will be important in this regard.

</table>
| Target 16 | Aichi Target 20: By 2020, at the latest, the mobilization of financial resources for effectively implementing the Strategic Plan for Biodiversity 2011-2020 from all sources, and in accordance with the consolidated and agreed process in the Strategy for Resource Mobilization, should increase substantially from the current levels.  
CBD Resource Mobilization Strategy (COPIX/11) and the resource mobilization target (COPXI/4§7): “Double total biodiversity-related international financial resource flows to developing countries, in particular least developed countries and small island developing States, as well as countries with economies in transition, by 2015 and at least maintaining this level until 2020, in accordance with Article 20 of the Convention, to contribute to the achievement of the Convention’s three objectives, including through a country-driven prioritization of biodiversity within development plans in recipient countries, using the preliminary baseline referred to in paragraph 6.” |
Annex B. Indicative Strategic Plan Indicators

A central part of the monitoring & evaluation regime for the Strategic Plan for Migratory Species is a suite of headline indicators, used to track progress towards the achievement of the goals and targets. The selection of appropriate measures for these is not simply a matter of identifying issues on which data can be generated, but involves careful thought as to the ability ultimately to generate adequate “storylines” on the success or otherwise of the Plan in securing genuinely strategic outcomes and real impacts for migratory species, rather than just indicators of process implementation.

Given that the SPMS has built upon the Aichi Targets in the Strategic Plan for Biodiversity, indicators already defined in support of the latter provide much of the basis for the measures identified here.

A primary source has therefore been the suite of indicators defined in 2011 by an Ad-Hoc Technical Expert Group (AHTEG) under the Convention on Biological Diversity, and reflected subsequently in the annex to CBD COP Decision XI/3 (October 2012). The AHTEG developed 12 headline indicator titles, each of which typically relates to several Aichi Targets. At a more specific level, it developed 97 operational indicators, for each of which a “most relevant Aichi Target” was identified.

In tandem with this process, the global Biodiversity Indicators Partnership (BIP) has classified its indicator list against the Aichi Targets. At the time of adoption of this Plan there were 45 BIP indicators.

Two of the targets of the Strategic Plan for Migratory Species (target 3 on governance and target 9 on the migratory systems approach) have no direct Aichi equivalents; and some other issues go a little beyond existing biodiversity indicator regimes, such as ecological networks and factors affecting the migration process. Otherwise there has been no strong need to define new indicator topics, and the indicators listed below (elaborated in more detail in the Companion Volume on Implementation) are based on relating the AHTEG operational indicators and the BIP indicators to each of the targets in the SPMS, according to their links to relevant Aichi targets. Further work is needed to elaborate a “migratory species disaggregation” of the relevant existing or already-proposed biodiversity indicators, and in most cases to operationalize this.

The indicative list below identifies a priority selection of headline indicators that could be used (following further development, where necessary) to track progress towards achievement of the targets in the Migratory Species Strategic Plan.

<td>conjunction with any revision/rolling forward of the CMS Outreach and Communication Plan.</td>
</tr>
</tbody>
</table>

#### Target 2:

*Potentially operable in the short term:*

- (None)

*For possible future development:*

- Trends in integration of migratory species values in national and sectoral policies.

The CMS National Report Format currently asks whether the conservation of migratory species features in national or regional policies/plans, and an indicator might be developed from that foundation (accepting that this method will give an incomplete picture, given that the target applies equally to non-CMS Party countries). Addressing migratory species through NBSAPs, which is effectively a sub-indicator of this indicator, is also specifically covered in the Report Format but belongs instead under SPMS target 13 below. Similar sub-indicators could perhaps however be considered here, e.g. for PRSPs and other globally standardized policy instruments of relevance.

#### Target 3:

*Potentially operable in the short term:*

- (None)

*For possible future development:*

- Activity status/viability of CMS Family of instruments
- (Other governance-related indicator on CMS implementation).

The first suggested indicator here would aim to assess the coherent governance of the CMS Family structure, by perhaps measuring the proportion of instruments which are actively and sustainably operating as intended. Metrics for this might be derived from the MoU viability study conducted in 2014.

The exact scope of the second indicator remains to be elaborated, and depends on the extent to which it proves possible to develop a governance-related performance effectiveness indicator linked specifically to implementation of the CMS (being the most relevant governance framework). There would be complexities in establishing benchmarks for matters which are for national political discretion. The most promising prospect may lie with the existing encouragement for CMS Parties to establish and operate national liaison systems or committees (target 4.5 in the 2006-2014 CMS Strategic Plan). The Convention’s National Report Format asks a question on this, but at present it is simply a yes/no question as to the existence of such a system or committee (and will give an incomplete picture, given that the target applies equally to non-CMS Party countries).

#### Target 4:

*Potentially operable in the short term:*

- (None)
<table>

<tr>
<td>• (CMS National Report Format question, to ask about progress in implementing target 4).</td>
<td></td>
</tr>
<tr>
<td>The migratory species conservation community will want to pay attention to information reported on incentives and biodiversity in general under the two relevant indicators defined by the CBD AHTEG; but it is difficult to see how the data on those could be meaningfully disaggregated to tell a story that is specific to migratory species. Occasional case studies might be able to do so, but probably not a globally-applicable, regularly-reported indicator. The suggested route to follow for an indicator therefore is to collate narrative information in a standardized way via CMS Party National Reports, focusing the question on the migratory species dimension (and accepting that this method will give an incomplete picture, given that the target applies equally to non-CMS Party countries).</td>
<td></td>
</tr>
</tbody>

<tr>
<th>Target 5:</th>
<th>Potentially operable in the short term:</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Status of migratory species in trade.</td>
<td></td>
</tr>
<tr>
<td>This indicator is proposed as a migratory species &quot;cut&quot; of the corresponding BIP indicator (which is said to be ready for use). As well as generating stories about the species concerned, comparisons will be possible between the migratory species sub-set and the trends for all species. The indicator addresses exploitation of migratory animals themselves, and thus does not really speak to the sense in which the target addresses impacts on such species from exploitation of other resources (that dimension may have to be caught instead by proxies defined under other targets). Nonetheless it may offer useful data on more direct exploitation (and is relevant to cooperation between CMS and CITES). NB the “footprint” indicators listed against the corresponding Aichi targets (4 and 7) are ecosystem-based and do not lend themselves to separating out any specific migratory species storylines.</td>

<td>• (None)</td>
</tr>
<tr>
<td></td>
<td>Monitoring of some other aspects of this target, including hunting impacts, may be picked up through indicators defined for targets 5, 7 and 8.</td>
</tr>
<tr>
<td><strong>Target 7:</strong></td>
<td>Potentially operable in the short term:</td>
</tr>
<tr>
<td></td>
<td>• Trends in threats to migratory species (overall).</td>
</tr>
<tr>
<td></td>
<td>• Trends in threats to migratory species (sub-indicators on specific threat types)</td>
</tr>
<tr>
<td></td>
<td>These indicators require some development, but doing so should be a priority, and while the question is complex, it should be possible to generate at least some useful data on a regular basis. Isolating migratory species threats from existing monitoring systems could be complex, and monitoring trends in e.g. distribution of “obstacles to migration” may not necessarily be usable proxies for actual impact, so those angles are problematic. CMS National Reports however generate information on threats specifically relating to migrants, and although the information is rough and anecdotal (and will give an incomplete picture, given that the target applies equally to non-CMS Party countries), it may provide a pragmatic entry-point. Other threat monitoring systems should be examined for the scope to extract a migratory species “cut” of their data.</td>
</tr>
<tr>
<td></td>
<td>Sub-indicators on specific threat types may in some cases be the easier starting-point and will have useful specificity for targeting policy responses. The “overall” indicator is important too however, since target 7 is mainly concerned with the additive nature of all threats (and it is instructive to detect trends in the relative importance of different types).</td>
</tr>
<tr>
<td></td>
<td>(Extinction risk here is regarded as a state indicator rather than a pressure indicator, so is better considered under target 8).</td>
</tr>
<tr>
<td></td>
<td><em>For possible future development:</em></td>
</tr>
<tr>
<td></td>
<td>• Further sub-indicators on additional/more specific threat types.</td>

<td>--------------------</td>
</tr>
<tr>
<td><strong>Target 8:</strong></td>
<td><em>Potentially operable in the short term:</em></td>
</tr>
<tr>
<td></td>
<td>- Red List Index for migratory species.</td>
</tr>
<tr>
<td></td>
<td>- Living Planet Index for migratory species.</td>
</tr>
<tr>
<td></td>
<td>- Wild Bird Index for migratory birds.</td>
</tr>
<tr>
<td></td>
<td>The three indicators proposed here are seemingly feasible sub-sets of existing indicators currently in operation (for details see BIP). Reporting should be designed so as to cross-refer specifically (where appropriate) to the CMS Appendices and/or Appendices in CMS daughter instruments.</td>
</tr>
<tr>
<td></td>
<td><em>For possible future development:</em></td>
</tr>
<tr>
<td></td>
<td>- Trends in distribution of migratory species.</td>
</tr>
<tr>
<td></td>
<td>This proposal is based on an indicator that is a CBD “priority to be developed”, and addresses the key element of favourable status for migrants which relates to maintenance of range. Graduated measurement of this for most species will be difficult; but a crude index to begin with might be built on a basis of changes in the regularly-maintained CMS lists of Range States for Annex-listed species. This is unlikely to show any but the most drastic and time-lagged changes; and the Range State list updating process suffers from some quality control issues which would also need to be addressed. The method could potentially be adapted for use for example at the level of sub-national administrative regions.</td>
</tr>
<tr>
<td><strong>Target 9:</strong></td>
<td><em>Potentially operable in the short term:</em></td>
</tr>
<tr>
<td></td>
<td>- (None)</td>
</tr>
<tr>
<td></td>
<td><em>For possible future development:</em></td>
</tr>
<tr>
<td></td>
<td>- Trends in range-related coverage of migratory species agreements and other concerted actions between States</td>
</tr>
<tr>
<td></td>
<td>This indicator requires development. A large component of it (though not necessarily all) could begin from existing information on the ratification status of CMS Family Agreements, formal Concerted and Cooperative Actions and Species Action Plans in the framework of the CMS. To operationalize the indicator for this target however will require the additional step of relating this information to data on species ranges, since the purpose is to show completeness of international participation in respect of each of the species concerned. Range data are already collated under CMS auspices at the level of Range State lists, although this suffers from some quality control issues which would need to be addressed. The indicator title is necessarily abbreviated; but “other concerted actions” should be understood as embracing action plans and equivalents (i.e. not only the specific “concerted actions” mechanism as formally established by CMS); and “coverage” should be understood as (potentially at least) embracing both geographical coverage and a measure of active engagement by Range States.</td>
</tr>
<tr>
<td><strong>Target 10:</strong></td>
<td><em>Potentially operable in the short term:</em></td>
</tr>
<tr>
<td></td>
<td>- (None)</td>
</tr>
</tbody>
</table>
For possible future development:

- Trends in conservation status, including connectivity, of identified habitats of key importance for migratory species.
- Coverage of key habitats for migratory species in protected areas.
- Management effectiveness of areas protected specifically for migratory species.

The first of these three indicators picks up on the AHTEG indicator “Trends in the connectivity of protected and other area based approaches integrated into land and seascapes”. It will require development. Its feasibility poses considerable challenges, such as devising a valid method for systematically identifying habitats with this specific relevance, deciding how to measure changes in connectivity, and relating this meaningfully to impacts on migratory species.

Indicators of fragmentation of forests and rivers are already under discussion in a wider biodiversity context, but translating these into effects on migration is difficult.

The migratory species conservation community will want to pay attention to information reported on more general indicators of particular habitat types and ecosystem trends which are associated with the corresponding Aichi Target 5, but there appears to be no good rationale upon which to propose a “cut” of any of those which could isolate migratory species factors.

Concerning the second and third issues listed above, it may be possible to develop some kind of indicators as sub-sets of the corresponding three more generic BIP indicators on these subjects, which are all classed as ready for use (with the “coverage” and “overlays” BIP indicators both contributing to the first of the two migratory species proposals above). Isolating the components that relate specifically to migratory species however will require considerable work, and is likely to be challenging. One way to disaggregate the existing management effectiveness indicator data might be to separate out all sites covered by it which are included in flyway sites networks (and to apply the methodology to such sites where they are not already assessed for this).

Further elaboration of an approach to this also depends on addressing issues relating to absent or uncertain baselines for the quantitative elements of the corresponding Aichi target, and for the totality for sites regarded as critically important for migratory species.

The worthwhileness of investing in these indicators may need careful evaluation.
<table>
<thead>
<tr>
<th>SPMS Target</th>
<th>Headline Indicator</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Target 11:</strong></td>
<td>Potentially operable in the short term:</td>
</tr>
<tr>
<td></td>
<td>• (None)</td>
</tr>
<tr>
<td></td>
<td>For possible future development:</td>
</tr>
<tr>
<td></td>
<td>• Trends in delivery of ecosystem services directly dependent on migratory species.</td>
</tr>
</tbody>
</table>

The proposed indicator is a composite of the most relevant components of the CBD and BIP indicators which are matched to the Aichi target (14) that corresponds to this proposed migratory species target, and which include some that are ready for use and some that are in development. Work would be required to define relevant selected services, to isolate and specify cause-effect dependence on named migratory species, and to devise parameters for measurement that are linked to this dependence and do not simply repeat the species-status assessments which are already the subject of target 8 above. The proposal addresses this by aiming to measure benefits that are derived by people rather than the status of the species, although this extrapolates slightly beyond the strict scope of the target (which goes only as far as securing the potential for benefit).

The development of ecosystem services indicators is very challenging; but it might be possible to isolate particular services from particular migratory species to act as a sample of this issue. It would be preferable to select something that is not direct consumptive use, since that is covered under other indicators; so perhaps eg pollination or grazing-related services would be the priority.

| **Target 12:** | Potentially operable in the short term: |
|              | • Strategies of relevance to migratory species developed and implemented for minimizing genetic erosion. |

Given the difficulty in devising a realistic outcome indicator for the target, the most feasible course is probably to report on the “means objective” forming the second part of the target. Limiting this to strategies addressing only migratory species might narrow the scope too strictly; hence the reference in this instance only to strategies that are “of relevance” to migratory species.

For possible future development:

• (None likely to be feasible).

Existing indicators are not well suited to addressing genetic erosion in wild animals. This may be a case where progress towards the outcome of a Strategic Plan target can only be assessed by “exception reporting”, i.e. maintaining reactive vigilance and perhaps annual reminder checks to document any instances of notable moves towards or away from the defined target state.

| **Target 13:** | Potentially operable in the short term: |
|              | • Trends in attention to migratory species in National Biodiversity Strategies and Action Plans. |
SPMS Target | Headline Indicator
--- | ---
The CMS National Report Format currently asks whether migratory species are addressed by each country’s NBSAP, and an indicator could be developed from that foundation (accepting that this method will give an incomplete picture, given that the target applies equally to non-CMS Party countries). It is likely that it would only go as far as tracking the presence or absence of references to migratory species in NBSAPs, since this is all that most Parties are likely to report in response to the existing National Report question.

*For possible future development:*

This goes further than the first indicator defined above, by addressing not just presence or absence of reference to migratory species, but the manner in which migratory species concerns are integrated into the Strategy/Action Plan. “Trends” perhaps overstates the position, since it is likely that this would be based on occasional qualitative assessment of NBSAP content with this specific question in view, and the most that might be expected is a comparison between a moment early in the time-span of the SPMS and a moment at or near the end of its time-span.

Target 13 is effectively a sub-target of target 2 above, and the indicator would therefore operate as a sub-indicator of the indicator proposed there.

**Target 14:**

*Potentially operable in the short term:*

- (None)

*For possible future development:*

- Trends in the degree to which traditional knowledge and practices are respected through full integration, participation and safeguards in national implementation of the Strategic Plan for Migratory Species.

This indicator is modelled on one of the CBD AHTEG proposals for the corresponding Aichi Target 18 (listed as a “priority for development”), but here referring to the Migratory Species Plan rather than the Biodiversity Plan. The “knowledge and practices” at issue would similarly need to be more specific to migratory species matters.

The most pragmatic way to develop this indicator might be to add a question to the CMS National Report Format (accepting that this method will give an incomplete picture, given that the target applies equally to non-CMS Party countries). This would need careful wording and a scaled response, rather than just yes/no.

**Target 15:**

*Potentially operable in the short term:*

- (None)

*For possible future development:*
<table>
<thead>
<tr>
<th>SPMS Target</th>
<th>Headline Indicator</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• Trends in publication of papers on migratory species conservation in peer-reviewed literature.</td>
</tr>
<tr>
<td></td>
<td>A method of globally measuring this indicator requires development, perhaps by defining internet and database search protocols. The indicator does not address the “effective application” part of the target, but an operable way of doing that is not easy to see. The relevant CBD AHTEG and BIP indicators (not yet in use) refer more specifically to sub-global assessments and species inventories - both of these are included in the interpretation of “publications” here, provided they are peer-reviewed; but the indicator here is intended not to be so narrowly prescribed as the AHTEG/BIP ones are.</td>

<tr>
<td></td>
<td>• Trends in official funding for actions which support implementation of the Strategic Plan for Migratory Species.</td>
</tr>
<tr>
<td></td>
<td>Indicators defined for the CBD Resource Mobilization Strategy (and listed there as “priorities for development”) might suggest that a suitable indicator for this target could be developed in relation to aggregated annual international flows of funding for achieving the goals of the SPMS, and something similar for the national level. During the development of the SPMS, however, considerable doubt was cast on the feasibility of making such indicators operable, at least for in terms of disaggregating the “migratory species” dimension of biodiversity.</td>
</tr>
<tr>
<td></td>
<td>The indicator suggested here, although crude and partial, may therefore be the most that can be expected. It would address major documentable instances of support for migratory species conservation programmes and projects, ideally where a link to one or more SPMS targets is explicit. This could include specific relevant instances of funding by multilateral bodies such as the GEF, and support from governments for actions under the CMS and its Family of instruments, among other actions.</td>
</tr>
<tr>
<td></td>
<td>There is a significant methodological challenge in defining appropriate baselines for 2015, and this will also require attention.</td>
</tr>
</tbody>
</table>
TERMS OF REFERENCE FOR THE STRATEGIC PLAN
IMPLEMENTATION WORKING GROUP

Objectives

1. The main objectives of the Working Group will be to:
   a) Develop new or identify existing detailed indicators for the Strategic Plan; and
   b) Develop a “Companion Volume on Implementation” for the Strategic Plan, in particular by taking into account available tools under the CMS as well as other multilateral environmental agreements and by identifying gaps where new tools may need to be developed.

2. To this end, the Working Group will take into account the headline indicators and Companion Volume outline presented in document UNEP/CMS/COP11/Doc.15.2.

3. The Working Group will further take into account the implementation of the Strategic Plan for Biodiversity for the period 2011-2020, as well as the strategic documents of other global biodiversity-related multilateral environmental agreements, and any other relevant documents and materials the Working Group may consider appropriate.

4. The Working Group will report to the meetings of the Standing Committee for approval of progress in the identification and/or development of the indicators (and their progressive implementation) and guidance in the preparation of the Companion Volume during the inter-sessional period.

5. The Working Group will present its findings to the 12th Meeting of the Conference of the Parties.

Composition of the Working Group

6. The Working Group shall be composed of Parties to the Convention on the basis of the same regions as the Standing Committee, with a maximum of two representatives per region. The regional groups will select their representatives based on their knowledge of the CMS, the activities of the CMS family of instruments, and the implementation of the Convention. The Chairs of the Standing Committee and the Scientific Council shall be ex-officio members of the Working Group. Other Parties to CMS, representatives of the CMS Family secretariats, and relevant multilateral environmental agreements’ secretariats and partner organizations will also be invited to contribute to the work of, and be observers of, the Group.

7. Contracting Parties shall be consulted by their regional representatives and the Working Group will also invite the views of and work in cooperation with the whole CMS family.
8. The Working Group will consult the CMS Scientific Council as appropriate, including on the scientific evidence underpinning relevant indicators.

9. The appointment of nominated representatives of the Working Group shall be agreed upon under the responsibility of the CMS Standing Committee no later than two months after the end of COP11.

10. The Chair and Vice-Chair shall be chosen from among the members of the Working Group under the responsibility of the CMS Standing Committee no later than three months after the end of COP11.

11. The work of the Working Group will be facilitated by the CMS Secretariat and supported partly from the core budget and partly from voluntary contributions.
ENHANCING SYNERGIES AND COMMON SERVICES AMONG CMS FAMILY INSTRUMENTS

Adopted by the Conference of the Parties at its 11th Meeting (Quito, 4-9 November 2014)

Mindful of the legal autonomy of each of the CMS Family instruments;

Recalling Resolution 10.9 of the CMS Conference of the Parties “Future Structure and Strategies of the CMS and CMS Family”;

Bearing in mind the greater international picture arising from Rio+20 and other processes stressing the importance of developing further synergies among MEAs;

Recalling also the decision of the 9th Meeting of the AEWA Standing Committee that requests the Executive Secretary of AEWA and the Executive Secretary of CMS to develop further synergies between AEWA and CMS and take actions to merge common services and common areas in an effort to redirect the focus of the Secretariats towards strengthening implementation support;

Further recalling the decision of the 41st Meeting of the CMS Standing Committee to support the decision of the 9th Meeting of the AEWA Standing Committee and providing for the Executive Secretaries of CMS and AEWA to conduct a shared services pilot phase and report the results to COP11;

Recalling decision 1/12 of the 1st UNEA on the relationship between the United Nations Environment Programme and multilateral environmental agreements and referring in particular to the task team established on the effectiveness of administrative arrangements and programmatic cooperation between the United Nations Environment Programme and the multilateral environmental agreements administered by UNEP;

Recognizing that CMS instruments include a broad range of Agreements and MoUs but share common objectives to conserve migratory species throughout their range;

Further recognizing that many functions provided by secretariats in the CMS Family of instruments are similar in scope and nature and could therefore create a higher potential for synergies;
Recognizing that synergies, such as through sharing services in common service areas among CMS instruments can assist to fill gaps, be mutually reinforcing, produce efficiencies and increase output;

Urging that actions taken to enhance synergies, such as through sharing services in common service areas, among CMS Family instruments should be aimed at strengthening the implementation of the instruments involved and maximizing the effective and efficient use of resources at all levels;

Noting the information provided in the analysis by the CMS Executive Secretary on common services in the CMS Family instruments and the potential approaches to common services outlined in the paper; and

Recognizing the lessons learned from the experience between the ASCOBANS and CMS joint Secretariat as well as the pilot phase on common communication, information and outreach services between the AEWA and CMS Secretariats, and noting that additional information from an independent analysis is required to make an informed decision on a comprehensive sharing of common services among CMS instruments;

The Conference of the Parties to the
Convention on the Conservation of Migratory Species of Wild Animals

1. Requests the Executive Secretary in consultation with the relevant Secretariats of CMS family instruments, to submit an independent analysis and report on the legal, financial, operational, and administrative implications of actions to enhance synergies, such as through sharing services in common service areas to the decision-making bodies of the wider CMS family before the 44th Meeting of the CMS Standing Committee and COP12 in order to establish their benefits and disadvantages;

2. Invites the relevant governing bodies of CMS instruments to consider the report and to take a decision on strengthening synergies, such as through sharing services in common service areas;

3. Invites the Meeting of the Parties to AEWA at its 6th Session (MOP6) to consider the independent analysis and report and take a decision on the way forward, as regards synergies such as through sharing services in common service areas;

4. Requests the CMS Standing Committee to consider the outcome of the 6th Session of the Meeting of Parties to AEWA (MOP6) and to take the appropriate decision in accordance with this outcome with a view to realising enhanced synergies such as through sharing services in common service areas and report to COP12;

5. Requests the CMS Standing Committee to consider the outcomes of the Meetings of decision-making bodies of other CMS Family Instruments and to take the appropriate decisions in accordance with these outcomes with a view to realising enhanced synergies such as through sharing services in common service areas and report to COP12;
6. **Instructs** the Executive Secretary of CMS to work in close cooperation with the Executive Secretaries and Coordinators of the CMS Family Instruments in implementing the outcomes of the decisions of the Standing Committee;

7. **Further requests** the Executive Secretary to report the outcomes of these decisions to UNEP in view of the ongoing process under UNEP on the effectiveness of administrative arrangements and programmatic cooperation between the United Nations Environment Programme and a number of multilateral environmental agreements in order to ensure the necessary administrative support to promote coherent and effective implementation of the CMS; and

8. **Requests** the Executive Secretary in close consultation with the Executive Secretary of AEWA to report the outcomes of the pilot phase and the implementation of this Resolution to COP12.
RESTRUCTURING OF THE SCIENTIFIC COUNCIL

Adopted by the Conference of the Parties at its 11th Meeting (Quito, 4-9 November 2014)

Aware of the provisions of Article VIII of the Convention and recalling the establishment by Resolution 1.4 of the Scientific Council, made up of members appointed by the Conference of the Parties and members appointed by individual Contracting Parties;

Also recalling the provisions of Resolutions 3.4, 4.5, 6.7, 7.12 and 8.21, dealing with various aspects of the composition, functions and operation of the Scientific Council;

Acknowledging the fundamental contribution to the implementation of the Convention made by the Scientific Council since its establishment;

Further recalling that the Future Shape process undertaken during the triennium 2009-2011 identified the restructuring of the Scientific Council as one of the sixteen target activities for CMS, as outlined in Resolution 10.9 on Future Structure and Strategies for CMS and the CMS Family, and Resolution 10.1 on Financial and Administrative Matters; and

Welcoming the document prepared by the Secretariat on options for a revision of the operational organization of the Scientific Council (UNEP/CMS/COP11/Doc.17.1);

The Conference of the Parties to the
Convention on the Conservation of Migratory Species of Wild Animals

1. Reaffirms that the Scientific Council will continue to be composed of members appointed by individual Parties (Party-appointed Councillors) and members appointed by the Conference of the Parties (COP-appointed Councillors);

2. Further reaffirms that Parties will continue to appoint qualified experts as members of the Scientific Council and that Party-appointed Councillors will continue to contribute to the work of the Council in their expert capacity and not as representatives of the Parties that appointed them;

3. Decides that, for each intersessional period between two consecutive meetings of the Conference of the Parties, a representative selection of the membership of the Scientific Council, to be named the Sessional Committee of the Scientific Council, should be identified,
composed of COP-appointed Councillors, and Party-appointed Councillors selected regionally, to be appointed at each ordinary meeting of the Conference of the Parties on the basis of a recommendation from the Secretariat in consultation with the Standing Committee;

4. **Further decides** that, for future triennia, unless otherwise decided by the Conference of the Parties, the Sessional Committee of the Scientific Council will be composed of:
   
i) Nine COP-appointed members with expertise in taxonomic and thematic issues; and

   ii) Fifteen Party-appointed members selected within the Standing Committee geographic regions, as follows: three from Africa; three from Asia; three from Europe; three from Oceania; three from South and Central America and the Caribbean;

5. **Decides** that Sessional Committee members shall normally be nominated for a minimum term of two triennia; half of the first appointees shall be nominated for a single triennium. Each ordinary meeting of the Conference of the Parties, starting from the 12th Meeting (COP12), will decide upon the renewal of half of the membership of the Sessional Committee, in order to balance continuity and renewal;

6. **Decides** that, in appointing members to the Sessional Committee of the Scientific Council from the pool of Party- and COP-appointed Councillors, the Conference of the Parties shall aim to achieve all of the following goals:
   
i) a balanced scientific representation of expertise in taxonomic and cross-cutting thematic areas;

   ii) a selection of individuals with a broad understanding of key scientific issues and concrete experience in translating science into policy in their regions; and

   iii) coverage of the predicted scientific expertise needed by the Convention for the next triennium;

7. **Requests** the Secretariat to provide for a consultative process, including Party, scientific and expert advice, in order to elaborate its recommendation in consultation with the Standing Committee to the Conference of the Parties on the composition of the Sessional Committee, observing the goals stated in the previous paragraph;

8. **Encourages** Party- and COP-appointed Councillors not included in the Sessional Committee to contribute to the work of the Scientific Council, coordinate with Sessional Committee members and participate in working groups, including through meetings and the interactive tools available to the Scientific Council, as well as to pursue activities at the national level;

9. **Requests** the Standing Committee at its 44th Meeting, in order to facilitate the convening of the first meeting of the Sessional Committee before COP12 to intersessionally select and appoint the Sessional Committee members in accordance with the procedure set out in Paragraphs 6 and 7;
10. *Decides* that, for all the effects and purposes outlined in Article VIII of the Convention and relevant resolutions, the advice, recommendations, and all other outputs of the Sessional Committee shall be considered by the Conference of the Parties and all relevant governing bodies as products of the Scientific Council itself;

11. *Instructs* the Secretariat to develop Terms of Reference for the Scientific Council, in consultation with the Council itself, with a view to their submission to the Standing Committee at its 44th Meeting for review and provisional adoption, pending their final adoption by COP12;

12. *Requests* the Scientific Council, with advice from the Secretariat, to develop and establish a revision of its Rules of Procedure, as well as elements of its *modus operandi* in accordance with this resolution;

13. *Mandates* the Standing Committee to approve the revised Rules of Procedure of the Scientific Council;

14. *Requests* the Scientific Council to submit a report on the implementation of this resolution to COP12; and

15. *Decides* to evaluate the results of the present restructuring of the Scientific Council with a view to confirm or review it during COP14.
ARRANGEMENTS FOR MEETINGS OF THE CONFERENCE OF THE PARTIES

Adopted by the Conference of the Parties at its 11th Meeting (Quito, 4-9 November 2014)

Recalling Article VII, paragraph 3, of the Convention, which states that the Secretariat shall “convene ordinary meetings of the Conference of the Parties at intervals of not more than three years, unless the Conference decides otherwise”; and

Recognizing the benefits that may accrue to the Convention and to Parties from hosting Meetings of the Conference of the Parties in different regions of the world;

The Conference of the Parties to the
Convention on the Conservation of Migratory Species of Wild Animals

Principles

1. Decides that Meetings of the Conference of the Parties shall be guided by the following principles:

(a) the purpose of a Meeting of the Conference of the Parties is to transact the business required for the implementation and operations of the Convention efficiently and effectively and that side events and other meetings held immediately before or after a Meeting of the Conference of the Parties, other than regional meetings on the eve of a Meeting of the Conference of the Parties, are complementary but secondary to this purpose;

(b) a Meeting of the Conference of the Parties will be constrained in terms of its duration by its available budget but will normally not be fewer than five days in length;

(c) efficiency in the organization and running of a Meeting of the Conference of the Parties will be significantly enhanced by thorough preparation and by good communications among the Secretariat, the Standing Committee and the Parties prior to and during the Meeting;

(d) efficiency and effectiveness of a Meeting of the Conference of the Parties will be enhanced through the participation of an active Bureau in guiding the Chairs of
Plenary, Committee of the Whole, other Committees and Working Groups, and reporting back by Bureau members to regional meetings during the Meeting; and

(e) the Regional Representatives elected to the Standing Committee will convene regional meetings for delegates immediately prior to and during a Meeting of the Conference of the Parties to inform them of discussions at the Bureau and to inform the Bureau of the views of the representatives;

**Scheduling of Meetings**

2. *Recommends* that, when feasible, to help ensure the efficient and effective transaction of the business of the Conference of the Parties:

(a) the Bureau meet, if possible, in the morning on the day before commencement of the Meeting of the Conference of the Parties; and

(b) the Standing Committee members convene regional meetings before commencement of the Meeting of the Conference of the Parties and also hold regular regional meetings, when necessary, during the Meeting;

3. *Recommends* that, with respect to side events:

(a) the Meeting of the Conference of the Parties and its subsidiary bodies (Committee of the Whole, Working Groups, Committees) take priority for scheduling and venues;

(b) the Meeting of the Conference of the Parties not be extended in order to allow time for side events;

(c) when feasible, key side events be held early in the Meeting of the Conference of the Parties to avoid potential clashes with meetings of the Committee of the Whole and other subsidiary bodies; and

(d) the Secretariat give priority to those events that directly support significant issues to be addressed by the Conference of the Parties;

**Documentation**

4. *Instructs* the Secretariat:

(a) to use a document numbering system whereby document numbers are linked to agenda item numbers;

(b) to provide a means for quickly accessing in-session documents through the CMS website;

(c) to ensure, through negotiations with the host country, that the internet service provided at the venue has sufficient capacity to meet the anticipated demand from representatives and observers for timely access to web-based documentation of the COP;
(d) to provide documents in a format that can be edited and not edited (e.g., MS Word and PDF formats);

(e) to provide to representatives and observers on arrival at the Meeting of the Conference of the Parties, when feasible and subject to budgetary constraints, meeting documents on a preloaded USB stick or equivalent media; and

(f) to monitor the quality of translation and interpretation services and provide feedback to the Bureau;

5. Requests the Secretariat when preparing a new Resolution or Decision to include the references to the relevant Resolutions and Decisions of previous COPs in the COP documentation as well as to examine all those relevant Resolutions and Decisions in effect to identify elements that may require modification or follow-up so as to avoid duplication and ensure continuity in the work of the Convention;

6. Requests representatives to transmit electronically (i.e. scan and send) a copy of their credentials to the Secretariat at least one week before commencement of the Meeting of the Conference of the Parties to allow preliminary scrutiny prior to the meeting;

7. Requests sponsored delegates, when possible, to forward their credentials as described in paragraph 7 prior to tickets and travel authorizations being issued by the Secretariat;

Date and Venue of Future Meetings of the Conference of the Parties

8. Invites Parties as well as non-Parties that may have an interest in hosting a Meeting of the Conference of the Parties (and the associated meeting(s) of the Standing Committee), to inform the Secretariat of their interest no later 180 days from the conclusion of a Meeting of the Conference of the Parties;

9. Instructs the Standing Committee at its first meeting following the date for informing the Secretariat of an interest to host a Meeting of the Conference of the Parties to review the offers received and, subject to receipt of sufficient information, to decide upon the most suitable venue(s); and

REVIEW OF DECISIONS

Adopted by the Conference of the Parties at its 11th Meeting (Quito, 4-9 November 2014)

Recognizing the need for the consistent use of terminology for decision-making within the Convention;

Recognizing also that implementation of the Convention can be improved by repealing Resolutions and Recommendations and parts thereof that are no longer in effect; and

Noting the previous work of the Standing Committee (UNEP/CMS/StC41/11/Annex IV) and the Secretariat (UNEP/CMS/Conf.10.24/Rev.1) to establish a process for the repeal of Resolutions and Recommendations no longer in force;

The Conference of the Parties to the
Convention on the Conservation of Migratory Species of Wild Animals

1. Adopts the following definitions for the submission of documents:

Resolution: Resolutions represent a decision of Parties, adopted at a Meeting of the Conference of the Parties, regarding the interpretation of the Convention or the application of its provisions. Resolutions are generally intended to provide long-standing guidance with respect to the Convention. Resolutions include decisions on how to interpret and implement the provisions of the Convention, establishing permanent committees, establishing long-term processes, and establishing the budgets of the Secretariat.

Decision: Decisions represent a decision of the Parties, adopted at a Meeting of the Conference of the Parties, containing recommendations to Parties or instructions to a specific committee or the Secretariat. They are typically intended to remain in effect for a short period only, usually until a particular task has been completed. Decisions may, for example, request a report to be submitted to the Meeting of the Conference of the Parties following that at which they were adopted, and so would remain in effect from one Meeting of the Conference of the Parties to the next.
2. **Recommends** that:

(a) when preparing a new Resolution or Decision, the proposer examine all relevant Resolutions and Decisions in effect to identify elements that may require modification or may be made redundant and recommend which parts to repeal and which to incorporate in the new Resolution;

(b) when drafting a Resolution that is intended to treat a subject comprehensively or that makes significant changes in the way in which a subject is dealt with, a Party prepare the draft so that, if adopted, it will replace and repeal all existing Resolutions (or, as appropriate, the relevant paragraphs) on the same subject;

(c) when a draft Resolution is adopted that merely adds elements to the recommendations (or other decisions) in existing Resolutions, or makes minor amendment thereto, the existing Resolutions be replaced by revised versions with the agreed changes;

(d) when drafting a Decision, specify the body (e.g., the Standing Committee) that is charged with implementing the Decision and the date by which the body should complete its task; and

(e) unless practical considerations dictate otherwise, draft Decisions, and not draft Resolutions, include:

i) instructions or requests to committees, working groups or the Secretariat, unless they are part of a long-term procedure;

ii) decisions on the presentation of the Appendices;

iii) “year of” events; and

iv) recommendations (or other forms of decision) that will be implemented soon after their adoption and will then be obsolete;

3. **Directs** the Secretariat:

(a) to establish registers, by relevant Meeting of the Conference of the Parties and by theme (e.g., “Concerted Actions” and “Agreements”) on the CMS website of Resolutions in force and Decisions in force, as well as a register of all Resolutions, Recommendations, and Decisions adopted by the Parties (for historical purposes);

(b) when revising its register of Resolutions in force after each meeting of the Conference of the Parties, to correct the texts of already existing Resolutions to ensure that all references to other Resolutions are accurate;

(c) to revise the register of Decisions in force after each meeting of the Conference of the Parties, to contain all recommendations (or other forms of decision) that are not recorded in Resolutions and that remain in effect. The Decisions shall be sorted according to subject, using the subjects of the Resolutions for guidance, and within the section for each subject they shall be divided according to the body to which they are directed. The Secretariat shall
distribute to the Parties a copy of the updated Decisions soon after each meeting of the Conference; and

(d) when revising the register of Decisions in force for the purpose of suggesting amendments, deletions or continuity, the Secretariat shall provide justification of any proposed changes to a Decision at each meeting of the Conference of the Parties;

4. **Directs** the Secretariat:

(a) to prepare a list of (1) Resolutions and Recommendations that should be repealed and (2) parts of Resolutions and Recommendations that should be repealed;

(b) when preparing these lists, to state the reason for repealing the Resolution or Recommendation or part thereof (Work Completed, Superseded, Incorporated Elsewhere);

(c) when recommending only a part of a Resolution or Recommendation to be repealed, to indicate clearly the parts of a Resolution or Recommendation to be repealed;

(d) when preparing these lists, to recommend renaming Recommendations as Resolutions or Decisions, as appropriate; and

(e) to submit these lists to the Standing Committee for its 45th Meeting;

5. **Directs** the Standing Committee to examine the content of the lists described in paragraph 4, determine its agreement or disagreement, propose any desired modifications to the lists, and submit its recommendations to the 12th Meeting of the Conference of the Parties;

6. **Directs** the Standing Committee, assisted by the Secretariat:

(a) to continuously review Resolutions and Decisions with a view to proposing their timely repeal (or repeal of elements), providing justification for any proposed changes; and

(b) to make recommendations for proposed changes to each Meeting of the Conference of the Parties (but the Standing Committee may decide, by vote, that in exceptional circumstances this may be deferred by one Meeting of the Conference of the Parties); and

7. **Decides** that the recommendations contained in Resolutions and Decisions adopted by the Conference of the Parties shall come into effect 90 days after the meeting at which they are adopted, unless otherwise specified in the relevant Resolution or Decision.
ENHANCING THE EFFECTIVENESS OF THE CONVENTION THROUGH A PROCESS TO REVIEW IMPLEMENTATION

Adopted by the Conference of the Parties at its 11th Meeting (Quito, 4-9 November 2014)

Recalling that the United Nations Environment Programme, in its Guidelines on Compliance with and Enforcement of Multilateral Environmental Agreements (2002), has identified “[s]trengthening of compliance with multilateral environmental agreements … as a key issue”;

Noting that most major multilateral environmental agreements have established a process for facilitating implementation and providing support to those Parties experiencing difficulties with implementation;

Aware that two agreements within the CMS Family, the Agreement on the Conservation of African-Eurasian Migratory Waterbirds (AEWA) and the Agreement on the Conservation of Cetaceans of the Black Sea, Mediterranean Sea and Contiguous Atlantic Area (ACCOBAMS), already have processes for reviewing the effectiveness of implementation measures (AEWA Resolution 4.6, Establishment of an Implementation Review Process (2008), ACCOBAMS Resolution 5.4, ACCOBAMS Follow-up Procedure (2013));

Recognizing that both compliance with the Convention’s obligations and the effectiveness of implementation measures are critical to the conservation and management of migratory species;

Recalling Article VII, paragraph 5, of the Convention, which provides that “the Conference of the Parties shall review the implementation of this Convention” and may, in particular, “make recommendations to the Parties for improving the effectiveness of this Convention”;

Recalling Resolution 10.9, Activity 16, of the Future Structure and Strategies for CMS, which establishes a medium-term priority (by COP12–2017) to “improve mechanisms to measure implementation of CMS and its Family … and identification of gaps and propose measures to close these gaps”; and
Recalling Article IX, paragraph 4, of the Convention, which directs the Secretariat “to invite the attention of the Conference of the Parties to any matter pertaining to the objectives of this Convention”;

The Conference of the Parties to the
Convention on the Conservation of Migratory Species of Wild Animals

1. Launches an intersessional process to explore possibilities for strengthening implementation of the Convention through the development of a review process;

2. Instructs the Secretariat to propose terms of reference for a working group to be considered for adoption by the Standing Committee at its 44th Meeting;

3. Instructs the Standing Committee at its 45th Meeting to review any progress, if a working group is established, and report to the 12th Meeting of Conference of the Parties;

4. Instructs the Secretariat to support the process;

5. Requests UNEP, Parties and other donors to provide financial assistance to support the development of the review process; and

6. Requests the Secretariat, where possible, to reduce costs by convening potential meetings of the Working Group in the most cost-effective way.
COMMUNICATION, INFORMATION AND OUTREACH PLAN

Adopted by the Conference of the Parties at its 11th Meeting (Quito, 4-9 November 2014)

Aware of the importance of communication as a central and cross-cutting element for implementing the Convention and its Agreements;

Underlining the urgent need to raise greater public awareness of migratory species, the multiple threats they face, the obstacles to their migration and the important role communication can play in encouraging actions to mitigate these threats both nationally and internationally;

Recalling Article IX, paragraph (j) of the Convention which states that it is a function of the Secretariat “to provide the general public with information concerning this Convention and its objectives”;

Considering the important contribution that the Convention and its Agreements will make towards achieving the Aichi Biodiversity Targets adopted by the Tenth Conference of the Parties to the Convention on Biological Diversity, in particular with regards to Target 1 on making people aware of the values of biodiversity and the steps they can take to conserve and use it sustainably;

Recognizing the essential role communication will play in implementing the Strategic Plan for Migratory Species 2015-2023 adopted at the 11th Meeting of the CMS Conference of the Parties, in particular with regard to Target 1 of the updated Plan, which calls for actions that will make people aware of the multiple values of migratory species and their habitats and migration systems, and the steps that can be taken to conserve them and ensure the sustainability of any use;

Acknowledging the importance of the Future Shape Process initiated through CMS Resolution 10.9, aiming to increase efficiency and enhance synergies in the whole CMS Family within the wider context of international environmental governance arising from Rio+20 and other processes stressing the need to develop further synergies among MEAs;

Recalling the decision of the 9th Meeting of the AEWA Standing Committee that requests the interim Executive Officer of AEWA and the Executive Secretary of CMS to develop further synergies between AEWA and CMS and take actions to merge common services and common areas; and
Further recalling that the 41st Meeting of the CMS Standing Committee supported the AEWA Standing Committee’s request that a pilot phase be conducted on common services between the Secretariats;

The Conference of the Parties to the Convention on the Conservation of Migratory Species of Wild Animals

1. Endorses the CMS Communication, Information and Outreach Plan for 2015-2017, contained in document UNEP/CMS/COP11/Doc.19.2 and urges Parties, CMS Family Instruments, UNEP and all partners and stakeholders working for the conservation of migratory species, actively to assist in the implementation of the Plan and to provide both voluntary contributions and in-kind support, particularly for the priority activities identified in the Plan;

2. Welcomes the initiative of the CMS Executive Secretary and the Acting Executive Secretary of AEWA to establish a new joint Communication, Information Management and Awareness-raising Unit serving the CMS and AEWA Secretariats as a pilot demonstrating enhanced synergies within the CMS Family through joint services in the area of communications;

3. Recognizes the need to provide adequate resources in the CMS Budget for 2015-2017 to support the implementation of activities described in the Communication, Information and Outreach Plan for 2015-2017 and the effective operation of the new Joint Communication, Information Management and Awareness-raising Unit;

4. Requests the CMS Executive Secretary to continue to work closely with the AEWA Executive Secretary to guide the work of the new joint CMS and AEWA Communication, Information Management and Awareness-raising Unit and to ensure the development and implementation of strategically aligned communication strategies for CMS and AEWA as models for enhanced synergies within the CMS Family;

5. Requests the CMS Executive Secretary to present the new CMS communication strategy to the 44th Meeting of the CMS Standing Committee for adoption and invites AEWA Parties to adopt a new strategically aligned AEWA communication strategy at their 6th Meeting of the Parties;

6. Requests Parties to provide voluntary contributions towards the development and implementation of the communication strategy and towards ongoing communication activities being carried out by the Secretariat, giving priority to the activities proposed in the CMS Communication, Information and Outreach Plan for 2015-2017; and

7. Repeals Resolution 8.8 and Resolution 10.7.
WORLD MIGRATORY BIRD DAY

Adopted by the Conference of the Parties at its 11th Meeting (Quito, 4-9 November 2014)

Aware of the importance of communication as a central and cross-cutting element for implementing the Convention and its Agreements;

Underlining the urgent need to raise greater public awareness of migratory birds, the multiple threats they face, the obstacles to their migration and the important role public awareness-raising campaigns can play in encouraging actions to mitigate these threats both nationally and internationally;

Acknowledging ongoing local, national and international efforts of awareness raising about migratory birds and conservation;

Recalling Article IX, paragraph (j) of the Convention which states that it is a function of the Secretariat “to provide the public with information concerning this Convention and its objectives”;

Acknowledging the thousands of World Migratory Bird Day activities which have been carried out globally since 2006 and the dedication of the people and organizations behind them as well as the central role played by the Secretariats of the Convention and the Agreement on the Conservation of African-Eurasian Migratory Waterbirds (AEWA) in the organization of the annual campaign since 2006; and

Recognizing the growing importance of World Migratory Bird Day as a key international public awareness-raising campaign dedicated to migratory birds and nature conservation celebrated when migratory birds are present either in May or at other times of the year;

The Conference of the Parties to the
Convention on the Conservation of Migratory Species of Wild Animals

1. Welcomes the celebration of World Migratory Bird Day in a growing number of countries;
2. *Invites* the United Nations General Assembly to consider declaring the second weekend in May of each year as World Migratory Bird Day;

3. *Invites* Parties, the CMS and AEWA Secretariats, the United Nations Environment Programme and other global, regional and sub-regional organizations, as well as other relevant stakeholders, including civil society, non-governmental organizations and individuals, to celebrate and raise awareness of World Migratory Bird Day to be held in May or at other appropriate times of the year;

4. *Requests* Parties and other relevant donors to provide voluntary contributions towards the annual organization of World Migratory Bird Day on the local, national and international level; and

5. *Further requests* the Secretariat to continue to facilitate cooperation and information exchange in support of World Migratory Bird Day.
SYNERGIES AND PARTNERSHIPS

Adopted by the Conference of the Parties at its 11th Meeting (Quito, 4-9 November 2014)

Recalling Resolution 7.9 on “Cooperation with Other Bodies and Processes”, Resolution 8.11 on “Cooperation with other Conventions”, Resolution 9.6 on “Cooperation with Other Bodies” and Resolution 10.21 on “Synergies and Partnerships”, as well as Resolution 10.25 on “Enhancing Engagement with the Global Environment Facility”;

Acknowledging the importance of cooperation and synergies with other bodies, including multilateral environmental agreements (MEAs) and non-governmental organizations, as well as the private sector;

Recognizing the instrumental role of partner organizations in the development and implementation of CMS and its related initiatives and outreach campaigns, including the negotiation of the Convention itself;

Appreciating the value of such partnerships in reaching a wider audience and raising public awareness of the Convention and the importance of conserving migratory species on a global scale;

Noting with appreciation all the individuals and organizations that contributed to the achievements of the Year of the Turtle (2006), Year of the Dolphin (2007/8), Year of the Gorilla (2009) and Year of the Bat (2011/12);

Expressing its gratitude to the many partner organizations that have assisted in promoting CMS and its mandate, for example, by facilitating the negotiation and implementation of species agreements under the Convention;

Welcoming the report on Synergies and Partnerships (UNEP/CMS/COP11/Doc.21.1), prepared by the UNEP/CMS Secretariat, and the progress made in enhancing cooperation, coordination, synergies as well as partnerships with biodiversity-related Conventions and other relevant institutions;

Noting with appreciation the support received from UNEP through the appointment of regional focal points for MEAs for biodiversity and ecosystems responsible for liaising with and promoting MEAs and their implantation in the UNEP regions and acknowledging their cooperation with the Secretariat;
Further taking note of the results of the UNEP project on improving the effectiveness of and cooperation among the biodiversity-related conventions and exploring opportunities for further synergies;

Welcoming the decisions taken by the Convention on Biological Diversity (CBD) and the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) on cooperation, coordination and synergies among the biodiversity-related conventions;

Welcoming also the continuing and important cooperation among the secretariats of the biodiversity-related conventions including through Memoranda of Understanding between the CMS Secretariat and the Secretariats of the International Whaling Commission, UNESCO, the Ramsar Convention, the Bern Convention and CITES;

Further welcoming the Memoranda of Understanding with the Migratory Wildlife Network\(^1\) and the IUCN Environmental Law Centre;

Aware of the ongoing discussions with the Food and Agriculture Organization of the United Nations (FAO) concerning the formalization of a Memorandum of Cooperation, and appreciating the important efforts made by CMS to enhance relationships with organizations that have different mandates or goals, such as FAO, which provide multidisciplinary solutions aimed at currently achieving food security, biodiversity conservation, and wildlife and ecosystem health;

Recognizing the importance of ongoing cooperation among secretariats of biodiversity related conventions through the Biodiversity Liaison Group to implement the Strategic Plan for Biodiversity 2011-2020 in order to reach the Aichi Biodiversity Targets (Decision X/2 of CBD);

Highlighting the Strategic Plan for Migratory Species 2015-2023 as a strategic framework for synergies and partnerships with other MEAs, organizations and stakeholders, which will provide an important contribution to the Strategic Plan for Biodiversity 2011-2020;

Further recognizing the outcome of the UN Conference on Sustainable Development, The Future We Want, which recognizes the significant contributions to sustainable development made by the MEAs and encouraging the Parties to MEAs to consider further measures to promote policy coherence at all relevant levels, improve efficiency, reduce unnecessary overlap and duplication, and enhance cooperation and coordination amongst MEAs; and

Convinced of the significant potential of increasing cooperation, coordination and synergies among the biodiversity-related conventions to enhance coherent national level implementation of each of the conventions;

The Conference of the Parties to the
Convention on the Conservation of Migratory Species of Wild Animals

1. Stresses the importance of supporting the objectives of biodiversity-related multilateral environmental agreements to improve national collaboration, communication and coordination with relevant organizations and processes;

\(^1\) Now known as Wild Migration.
2. Requests the Executive Secretary to inform biodiversity related agreements, including through the Liaison Group of Biodiversity-related multilateral environmental agreements and other relevant partners about the Strategic Plan for Migratory Species 2015-2023 and pursue further activities related to synergies and partnerships within that framework;

3. Requests the Secretariat to continue developing effective and practical cooperation with relevant stakeholders, including other biodiversity instruments and international organizations;

4. Also requests the Secretariat to identify potential strategic partners and engage with them when developing campaigns and other outreach activities and encourages all relevant stakeholders to contribute to these initiatives;

5. Further requests the Secretariat to facilitate non-formalized collaborations with partners such as the FAO, that can help to extend the multidisciplinary and transdisciplinary scope of approaches to collaboration;

6. Further requests the Secretariat to pursue strengthened partnerships with the private sector in accordance with the CMS Code of Conduct;

7. Further requests the Secretariat, its daughter Agreements within the mandates given by their Parties/Signatories and the Scientific Council to enhance their engagement with expert committees and processes initiated by partners, as appropriate;

8. Welcomes the joint work plan between the secretariats of the CMS and CITES and further requests the Secretariat to prepare proposals to strengthen cooperation, coordination and synergies, with other biodiversity-related conventions, including through joint work plans with clear targets and timetables aligned with the CMS strategic plan, for consideration by the next Conference of the Parties;

9. Requests the Secretariat to take action to strengthen implementation of CMS through the processes on the revision of national biodiversity strategies and action plans (NBSAPs), including through cooperation with the UNEP Regional Offices;

10. Also requests the Secretariat and invites the Secretariats of other conventions to continue liaising with the UNEP regional MEA focal points for biodiversity and ecosystems and make best use of their role in assisting the implementation of the biodiversity-related MEAs;

11. Further requests the Secretariat and invites the Secretariats of CBD and of other relevant MEAs to consider and advise on ways and means of more coherently addressing the conservation and sustainable use of animal species in CBD processes, including in relation to the implementation by biodiversity-related conventions of the Strategic Plan for Biodiversity 2011-2020 and its Aichi Targets; and further requests the Secretariat to report on progress to the Scientific Council and COP12;

12. Further requests the Secretariat to enhance cooperation through the Biodiversity Liaison Group and the biodiversity indicators partnership to improve a global set of biodiversity indicators;
13. **Further requests** the Secretariat to strengthen cooperation, coordination and synergies with the Ramsar Convention to pursue the most effective actions for the conservation of migratory waterbirds and their wetland habitats;

14. **Welcomes** the Gangwon Declaration adopted on the occasion of the Twelfth Meeting of the Conference of the Parties to the Convention on Biological Diversity which welcomes the importance given to biodiversity in the outcome document of the Open Working Group on Sustainable Development Goals and calls for the further integration and mainstreaming of biodiversity in the post-2015 development agenda, and **requests** the Secretariat to continue to engage with the process on the establishment of the Sustainable Development Goals in cooperation with the Biodiversity Liaison Group;

15. **Also welcomes** the CBD COP12 Decision that provides for a workshop with the task to prepare options which may include elements that can contribute to a possible road map, for Parties of the various biodiversity-related conventions to enhance synergies and improve efficiency among them, without prejudice to the specific objectives and recognizing the respective mandates and subject to the availability of resources of these conventions, with a view to enhancing their implementation at all levels and **requests** the Executive Secretary and the Standing Committee to facilitate the selection of the representatives to participate in this workshop;

16. **Invites** the members of the Biodiversity Liaison Group to strengthen cooperation and coordination with a view to increasing synergies among their respective explorations and developments of online reporting systems as a means to increase synergies on national reporting under the biodiversity-related conventions;

17. **Also invites** the members of the Biodiversity Liaison Group to consider ways and means to increase cooperation on their outreach and communication strategies;

18. **Further invites** the Biodiversity Liaison Group to take into due consideration the need to optimize monitoring efforts and improve effectiveness through the use of coherent monitoring frameworks and indicator systems;

19. **Requests** the Secretariat as far as possible to avoid duplication of work on the same issues among MEAs dedicated to nature protection issues, and **invites** the Biodiversity Liaison Group to address at its future meetings options for enhanced cooperation with regard to work on cross-cutting issues, such as climate change, bushmeat and invasive alien species, including through exploring the possibility of identifying lead MEAs in a manner consistent with their mandates, governance arrangements and agreed programmes;

20. **Recalling** CMS Res.10.25, **welcomes** the CBD COP12 Decision XII/30 on the Global Environment Facility to enhance programmatic synergies among the biodiversity-related conventions and in this context **requests** the Standing Committee to develop elements of advice for the Global Environment Facility concerning the funding of the national priorities for the CMS;

21. **Requests** the Executive Secretary to provide the elements of advice as developed by the Standing Committee in time to be considered by the CBD COP13 so that they may be referred to the Global Environment Facility through the Conference of the Parties to the Convention on Biological Diversity;
22. Requests the Secretariat to continue to report to the Standing Committee on progress made including on results of joint activities as discussed and agreed in the Biodiversity Liaison Group;

23. Recognizes that adequate resources are required to allow partnerships to be developed, and such resources could be provided in part through voluntary contributions from Parties and requests Parties to ensure that adequate resources are provided to the Secretariat to allow partnerships to be developed and strengthened;

24. Urges Parties to establish close collaboration at the national level between the focal point of the CMS and the focal points of other relevant conventions in order for Governments to develop coherent and synergistic approaches across the conventions and increase effectiveness of national efforts, for example by developing national biodiversity working groups to coordinate the work of focal points of relevant MEAs and other stakeholders inter alia through relevant measures in NBSAPs, harmonized national reporting and adoption of coherent national positions in respect of each MEA;

25. Also urges Parties to facilitate cooperation among international organizations, and to promote the integration of biodiversity concerns related to migratory species into all relevant sectors by coordinating their national positions among the various conventions and other international fora in which they are involved;

26. Encourages Parties and other governments and organizations to make use of the web-based tools, such as InforMEA, when developing and implementing mutually supportive activities among CMS Agreements and biodiversity-related conventions so as to improve coherence in their implementation;

27. Urges partner organizations to continue to promote and publicize the benefits to them, to CMS and to conservation arising from effective collaboration; and

28. Repeals Resolution 7.9, Resolution 8.11, Resolution 9.6, and Resolution 10.21.
ENHANCING THE RELATIONSHIP BETWEEN
THE CMS FAMILY AND CIVIL SOCIETY

Adopted by the Conference of the Parties at its 11th Meeting (Quito, 4-9 November 2014)

Appreciative of the sustained commitment to the CMS Family that has been consistently demonstrated by civil society, including Civil Society Organizations (CSOs), Non-Governmental Organizations (NGOs), scientific institutions, independent scientists and independent policy experts in many parts of the world, a commitment recognized in key Resolutions and Recommendations since CMS COP4;

Aware that the United Nations Environment Programme (UNEP) Governing Council at its First Universal session in February 2013 adopted Decision 27/2 on institutional arrangements, inter alia, to explore new mechanisms to promote transparency and the effective engagement of civil society in its work and that of its subsidiary bodies including: developing a process for stakeholder accreditation and participation; explore mechanisms and rules for stakeholders expert input and advice; and consider working methods and processes for informed discussions and contributions by all relevant stakeholders towards the intergovernmental decision-making process;

Recalling the Convention preamble, which states that the States are and must be the protectors of the migratory species of wild animals that live within or pass through their national jurisdictional boundaries; and that conservation and effective management of migratory species of wild animals require the concerted action of all States within the national jurisdictional boundaries of which such species spend any part of their life cycle;

Noting the findings and recommendations of ‘A Natural Affiliation: Developing the Role of NGOs in the Convention of Migratory Species Family’ (UNEP/CMS/COP11/Inf.15) that responds to a number of activities highlighted in CMS Resolution 10.9 Future Structure and Strategies of the CMS and CMS Family and also mirrors the directions of Decision 27/2 of the UNEP Governing Council;

Noting also the report of the Chair of the CMS Strategic Plan Working Group (UNEP/CMS/COP11/Doc.15.2) and CMS Resolution 11.2: Strategic Plan for Migratory Species 2015-2023;
Conscious that many of the CMS Family agreements benefit greatly from a respectful and collaborative relationship with civil society, including CSO and NGO involvement in implementation of conservation activities and also from support of the Governmental processes; and

Conscious also that the collaborative relationship could be enhanced to further benefit the CMS Family programme of work;

The Conference of the Parties to the
Convention on the Conservation of Migratory Species of Wild Animals

1. Invites the CMS Secretariat, Parties, other Governments, CSO and NGO Partners to review options for furthering the relationship between the CMS Family and civil society including, inter alia:

1.1 Mechanisms to enable CSO- and NGO-facilitated work to be formally and consistently reported across the CMS Family and to be considered by the Parties and CMS Family agreement governing bodies;

1.2 Models for further CSO and NGO involvement in CMS processes; and

1.3 Modalities for further strategic engagement with CSOs and NGOs to provide implementation and capacity-building expertise;

2. Requests the Secretariat to present a review of progress and to invite contributions from the 44th and 45th Meetings of the Standing Committee;

3. Invites the CMS Secretariat, Parties, other Governments, CSO and NGO Partners to draft recommendations and requests the Secretariat to consolidate those recommendations, and submit them to the 45th Meeting of the Standing Committee for further consideration at the 12th Meeting of the Conference of the Parties; and

4. Invites Partners and donors to consider providing financial assistance to support the review process.
CRITERIA FOR ASSESSING PROPOSALS FOR NEW AGREEMENTS

Adopted by the Conference of the Parties at its 11th Meeting (Quito, 4-9 November 2014)

Recalling that Article IV of the Convention provides for the conclusion of agreements for migratory species and for AGREEMENTS for species listed in Appendix II of the Convention, in particular for those in an unfavourable conservation status;

Noting that colloquially, and in this Resolution, the term “Agreements” is used to refer in a generic sense to AGREEMENTS, agreements and Memoranda of Understanding as the context may require;

Recognizing that the development and servicing of Agreements are subject to the availability of resources, welcoming the Secretariat’s sustained efforts pursuant to Resolutions 7.7, 8.5, 9.2 and 10.16 to foster partnerships with governments and relevant organizations to support the operation of Agreements under the Convention, and further welcoming with gratitude the generous support of this kind provided to date by numerous governments and organizations, including the financial and in-kind contributions noted in document UNEP/CMS/COP11/Doc.14.4;

Recalling that paragraph 41 of the CMS Strategic Plan 2006-2014 recommended a number of measures for ensuring that Agreements use similar systems for planning and reporting their work, in order to ensure that they are strategically aligned with the Convention;

Further recalling that in Resolution 10.16 the Parties decided on a number of considerations which must be addressed when making proposals for new Agreements, including provision for a proposal to be considered as no longer under development after a period in which no clear expression of interest or offer to lead has materialized, and instructed the Secretariat to develop for consideration and adoption at the present meeting a policy approach to the development, resourcing and servicing of Agreements in the context of Resolution 10.9 on Future Structure and Strategies of the CMS and the CMS Family;

Further recalling Resolution 10.9 in which the Parties inter alia adopted a list of activities for implementation in 2012-2014, including an assessment of CMS Memoranda of Understanding and their viability (activity 16.3), creation of criteria against which to assess proposals for new Agreements (activity 12.3) and development of a policy where implementation monitoring must be a part of any future MoUs (activity 12.5);
Taking note of the report provided by the Secretariat in document UNEP/CMS/COP11/Doc.22.3 on an assessment of the CMS MoUs and their viability; and

Taking note also of the report provided by the Secretariat in document UNEP/CMS/COP11/Doc.22.2 on a policy approach to developing, resourcing and servicing CMS Agreements, and thanking the Government of Germany for its generous financial support for this work;

The Conference of the Parties to the
Convention on the Conservation of Migratory Species of Wild Animals

1. Instructs the Secretariat and the Scientific Council, urges Parties, and invites other relevant stakeholders to apply the criteria annexed to this Resolution in developing and evaluating proposals for future Agreements;

2. Urges all Range States of existing Agreements under the Convention that have not yet done so to sign, ratify or accede as appropriate to those Agreements and to take an active part in their implementation;

3. Invites Parties, other governments and interested organizations to provide voluntary financial and other support where possible for the effective operation of Agreements under the Convention;

4. Requests the Secretariat to continue its efforts to seek partnerships with governments and relevant organizations to support and enhance the effective operation of Agreements under the Convention; and

5. Repeals paragraphs 5 and 6 of Resolution 10.16.
Annex VIII: Resolution 11.12

CMS COP11 Proceedings: Part I

Annex to Resolution 11.12

CRITERIA FOR ASSESSING PROPOSALS FOR NEW AGREEMENTS

The core of the suggested approach to developing Agreements is a method for systematically assessing the opportunities, risks, appropriateness and relative priority of any new proposal to develop an Agreement. This involves testing such proposals against a set of criteria. A standard pro-forma could be designed, perhaps in the style of a questionnaire, to capture the information needed for scrutiny of each proposal by the Scientific Council, Standing Committee and COP. Together with information on how the proposal meets the criteria, this would add details of lead individuals, budget estimates and other associated details.

The criteria below are a summary of those proposed in the report “Developing, resourcing and servicing CMS Agreements - a policy approach” (UNEP/CMS/COP11/Doc.22.2). Further advice on issues to address in relation to each criterion is given in that report.

The criteria can be applied with some flexibility, given the diversity of forms that CMS Agreements can take and the variety of situations they address. In principle, however, the more objective and transparent the substantiation of the different issues that can be provided in support of a proposal, the more likely it is to succeed.

Some criteria might function as an absolute standard for judging whether a given proposal is deserving on its own merits (e.g. criterion (iii) on clear purpose, and criterion (ix) on prospects for leadership); while other criteria might be used in a more relative way to compare two or more proposals that are competing for priority. In all cases the information compiled should, as far as possible, provide a balanced assessment of the benefits and risks associated with each issue, rather than being seen solely as a tool for persuasion.

(i) Conservation priority

Proposals should specify the severity of conservation need, for example in relation to the degree of species endangerment or unfavourable conservation status as defined under the Convention, and the urgency with which a particular kind of international cooperation is required. Links to migration issues and confidence in the underlying science may also need to be described.

(ii) Serving a specific existing COP mandate

Proposals should specify how they respond to any specifically relevant objectives expressed in CMS strategies and other decisions of the Parties.

(iii) Clear and specific defined purpose

Proposals should specify intended conservation outcomes, and should in particular make clear the way in which the target species is/are intended to benefit from international cooperation. The more specific, realistic and measurable the purpose is the better. Proposals should also have regard (as appropriate) to CMS Article V.

1 Many of the questions addressed by these criteria are also valid questions to ask of Agreements that are already in existence, for example when assessing their continuing viability.
(iv) Absence of better remedies outside the CMS system

Proposals should compare the option of a CMS Agreement with alternative options outside the Convention’s mechanisms, and explain why a CMS Agreement is the best method of meeting the defined conservation need.

(v) Absence of better remedies inside the CMS system

Proposals should compare the option of a CMS Agreement with alternative options available under the Convention (such as “concerted actions”, international species action plans and other cooperation initiatives), and explain why a CMS Agreement is the best method of meeting the defined conservation need.

(vi) If a CMS instrument is best, extending an existing one is not feasible

Proposals should demonstrate compelling reasons why a solution cannot be found by taxonomically or geographically extending an existing Agreement, taking into account the risk of loss of efficiency of the existing Agreement.

(vii) Prospects for funding

Proposals should demonstrate that there are meaningful prospects for funding, in particular from geographically concerned countries. The proposal does not necessarily need to demonstrate that full funding is in place before the proposal can be approved, but it should provide an assessment (and assurances) about likely funding. It will be helpful to include an indicative budget, estimate the minimum levels of funding required to launch the Agreement, and describe the degree to which the funding plan is considered to be sustainable.

(viii) Synergies and cost effectiveness

Proposals should specify any opportunities for the proposed Agreement to link with other initiatives in such a way that the value of both/all of them is enhanced (for example through economies of scale, new possibilities arising from a combination of efforts that would not arise otherwise, etc.). Opportunities may also include catalytic effects and associated (secondary) benefits. Proposals should specify the resources they require, but should also relate these to the scale of impact expected, so that cost-effectiveness can be judged.

(ix) Prospects for leadership in developing the Agreement

Proposals should demonstrate that there are meaningful prospects for leadership of the development process, for example by a country government or other body making firm offers to lead the negotiation process, host meetings and coordinate fundraising.

(x) Prospects for coordination of the Agreement’s implementation

Proposals should demonstrate that there are meaningful prospects for coordination of the Agreement’s implementation on an on-going basis after its adoption (for example the hosting of a secretariat, organization of meetings and management of projects).
(xi) **Feasibility in other respects**

Proposals should address all other significant issues of practical feasibility for launching and operating the Agreement (for example political stability or diplomatic barriers to cooperation).

(xii) **Likelihood of success**

In addition to evaluating the likelihood that a proposed Agreement will be implementable (criteria (vii), (x) and (xi) above), proposals should evaluate the likelihood that its implementation will lead to the intended outcome. Risk factors to consider include: uncertainty about the ecological effects; lack of a "legacy mechanism" by which results can be sustained; and activities by others that may undermine or negate the results of the Agreement.

(xiii) **Magnitude of likely impact**

In order to prioritize proposals that may be equal in other respects, proposals should provide information on the number of species, number of countries or extent of area that will benefit; the scope for catalytic and “multiplier” effects; and any other aspects of the overall scale of impact.

(xiv) **Provision for monitoring and evaluation**

Proposals should specify the way(s) in which achievement of the purposes defined under criterion (iii) above is to be measured and reported on. Good practice in this regard involves creating a simple and easy-to-operate evaluation framework including at least the following minimum ingredients:

- A statement or description of how monitoring, evaluation and reporting will operate in relation to the Agreement concerned;
- A definition of at least some key objectives that can be measured, along with a definition of the main measures that will be used for assessing progress towards the achievement of each objective;
- A distinction between (a) progress in implementing activities\(^2\) and (b) progress in achieving (ecological) outcomes\(^3\); with at least one regularly-monitorable measure being defined for each of these;
- An ability to demonstrate some causal logic that enables outcomes to be attributed to Agreement-related activities (the results of this relationship then become a measure of the Agreement’s effectiveness);
- Methods for gathering and analysing information that are sufficiently complete, consistent, transparent and trustworthy for the purpose;
- A commitment to generating information periodically and in a timely manner both for the Agreement’s own governance processes and for relevant syntheses at a CMS-wide level; and
- An effort to relate monitoring and evaluation findings to strategic goals and targets adopted by the CMS (e.g. in the [Strategic Plan for Migratory Species]), as well as to the Agreement’s own objectives.

\(^2\) For example institutions maintained; programmes delivered; trends in growth of participation.

\(^3\) For example trends in conservation status of target species, including threats.
Recalling the preamble of the Convention which refers to the Parties’ conviction that conservation and management of migratory species require the concerted action of all Range States;

Further recalling Resolution 3.2 which instructed the Secretariat and the Scientific Council to encourage and assist Parties to take concerted actions to implement the provisions of the Convention, and which initiated a process for each meeting of the Conference of Parties to recommend initiatives to benefit a selected number of species listed in Appendix I;

Further recalling Recommendation 5.2 which introduced the concept of “Cooperative Action” as a rapid mechanism to assist the conservation of species listed in Appendix II and to act as a precursor or alternative to the conclusion for any of those species of an agreement under Article IV;

Recalling also the recommendations for improving the process for Concerted and Cooperative Actions under CMS as detailed in Annex 3 to Resolution 10.23, and noting the proposals of the Secretariat and the Scientific Council to address part of those recommendations, as detailed in document UNEP/CMS/COP11/Doc.22.4/ANNEX I;

Recalling also that Resolution 3.2, as updated by Resolutions 4.2, 5.1, 6.1, 7.1, 8.29, 9.1 and 10.23, and Recommendation 6.2, as updated by Recommendations 7.1, 8.28, and Resolution 9.1 and 10.23, advise the Secretariat and the Scientific Council to encourage and assist Parties to take Concerted and Cooperative Action as summarized in the report of the 18th Meeting of the CMS Scientific Council; and

Welcoming the conservation activities undertaken by Parties and other organizations for Appendix I species designated for Concerted Action and for Appendix II species designated for Cooperative Action as summarized in the report of the 18th Meeting of the CMS Scientific Council; and

Noting the recommendations of the 18th Meeting of the Scientific Council to the 11th Meeting of the Conference of the Parties on species to be considered for concerted and cooperative action for the period 2015-2017;
The Conference of the Parties to the 
Convention on the Conservation of Migratory Species of Wild Animals

1. Adopts the lists of species designated for Concerted and Cooperative Actions in Annexes 1 and 2 of this Resolution, and encourages Parties and other stakeholders to identify and undertake activities aimed at implementing Concerted and Cooperative Actions to improve the conservation status of listed species, including the preparation of species action plans, during the 2015-2017 triennium;

2. Urges Parties to provide the in-kind and financial means required to support targeted conservation measures aimed at implementing Concerted and Cooperative Actions for the species listed in Annexes 1 and 2 to this Resolution;

3. Encourages Parties to ensure that all initiatives to undertake Concerted or Cooperative Actions pursuant to this Resolution must include a specification of the conservation and institutional outcomes expected and the timeframes within which these outcomes should be achieved;

4. Endorses the recommendations for enhancing the effectiveness of the Concerted and Cooperative Actions process as detailed in document UNEP/CMS/COP11/Doc.22.4/ANNEX I and summarized in Annex 3 to this Resolution; and

5. Requests the Secretariat, the Scientific Council and Parties, and invites other relevant stakeholders to take these recommendations fully into account in the identification of candidate species for designation for Concerted or Cooperative Action, and in the identification and subsequent implementation of action to take in response to Concerted or Cooperative Action listing.
### Annex 1 to Resolution 11.13

Annex 3 to Resolution 11.13

RECOMMENDATIONS FOR ENHANCING THE EFFECTIVENESS OF THE CONCERTED AND COOPERATIVE ACTIONS PROCESS

The recommendations below are derived from the report “Improving the process for concerted and cooperative actions” which was compiled in response to requests in Annex 3 to COP Resolution 10.23 (2011), and was provided to COP11 as document UNEP/CMS/COP11/Doc.22.4/ANNEX I.

1. It is recommended that the two processes (Concerted Actions, normally for selected Appendix I species; and Cooperative Actions, normally for selected Appendix II species) be consolidated. While a variety of approaches may continue to be taken to the purposes defined and activities undertaken in each individual case, a unified system will help to provide the greater clarity and streamlining that has been sought for some years.

2. To effect this consolidation, all future proposals (from COP12 onwards) would be made for Concerted Actions only. The Concerted Actions mechanism would be applicable to both Appendix I and Appendix II species, and its scope would broaden to include all of the kinds of activity previously pursued through Cooperative Actions, as well as those normally pursued through Concerted Actions. The Cooperative Actions mechanism itself would cease to exist.

3. Species previously listed for cooperative action, but for which no activity has yet begun, would be automatically transferred into a new unified Concerted Actions list. The list would be subject to review by the Scientific Council and the COP, to determine whether each such species should remain listed or be deleted.

4. Projects and initiatives already begun as Cooperative Actions under earlier COP decisions would continue unaffected. These too however would be subject to review by the Scientific Council and the COP. Such reviews may conclude, inter alia, that the objectives of a given action have been achieved and it has been completed, or that it should continue within the terms of the unified Concerted Actions mechanism (and be re-named accordingly).

5. It is recommended that proposals for future Concerted Action listing decisions should include a specification of certain standard items of information, according to the headings listed below. (Further guidance on issues to address under each of these is given in document UNEP/CMS/COP11/Doc.22.4/ANNEX I). The information compiled should as far as possible provide a balanced assessment of the advantages and risks associated with each issue, rather than being seen solely as a tool for persuasion.

A. Target species/population(s), and their status in CMS Appendices

A concerted action may address a single species, lower taxon or population, or a group of taxa with needs in common. The target animals in each case should be clearly defined, including by reference to their status in terms of the CMS Appendices and the geographical range(s) concerned.
B. The case for action

To be assessed according to the following criteria:

(i) Conservation priority

May relate to the degree of endangerment or unfavourable conservation status as defined under the Convention; the urgency with which a particular kind of action is required; and other priorities expressed in CMS decisions.

(ii) Relevance

May relate to the degree to which the particular conservation problem is linked to migration and requires collective multilateral action; and the degree to which the proposed action will fulfil specific CMS mandates.

(iii) Absence of better remedies

An options analysis to test whether (and why) a CMS Concerted Action is the best method of meeting the defined conservation need. Alternatives both within and outside the mechanisms of the CMS should be considered.

(iv) Readiness and feasibility

The proposal will need to demonstrate meaningful prospects for funding and leadership, and to address all significant issues of practical feasibility for undertaking the action.

(v) Likelihood of success

Feasibility (see previous criterion) only concerns whether an action is likely to be implementable. Criterion (v) seeks in addition to assess whether implementation is likely to lead to the intended outcome. Risk factors to consider include: uncertainty about the ecological effects; weakness in the underpinning science; lack of a “legacy mechanism” by which results can be sustained; and activities by others that may undermine or negate the results of the action.

(vi) Magnitude of likely impact

Proposals that are equal in other respects might be prioritized according to the number of species, number of countries or extent of area that will benefit in each case; the scope for catalytic or “multiplier” effects, contribution to synergies or potential for acting as “flagship” cases for broadening outreach.

(vii) Cost-effectiveness

Proposals should specify the resources they require, but should also relate these to the scale of impact expected, so that cost-effectiveness can be judged.

---

1 For cases where it appears that proceeding directly to the development of an Agreement or other instrument under Article IV of the Convention would be a better remedy, equivalent guidance and criteria for judging such proposals is provided in Resolution 11.12 and document UNEP/CMS/COP11/Doc.22.2/Annex 1.
C. Activities and expected outcomes

Activities to be undertaken should be specified, and their expected outcomes defined. This should address both institutional aspects (e.g. development of an Action Plan) and ecological aspects (e.g., targets for improved conservation status). Following the SMART standard (Specific, Measurable, Achievable, Relevant, Time-bound) will help; and the intended process for monitoring & evaluation should also be described.

D. Associated benefits

Opportunities to maximise added value should be identified, for example where actions targeting certain migratory animals may incidentally benefit other migratory species/taxa/populations, or where there is good scope for awareness-raising, capacity-building or encouraging new Party accessions.

E. Timeframe

Any elements of the action that are intended to be open-ended (e.g. measures to maintain conservation status) should be identified as such; and otherwise completion timeframes (and progress milestones where possible) should be specified.

F. Relationship to other CMS actions

Information should be given on how the action’s implementation will relate to other areas of CMS activity. This may form part of its purpose, for example if it is designed to lead to an Agreement; or it may involve showing how the action will support the Strategic Plan or COP decisions. It may also be necessary to show how different Concerted Actions complement or interact with each other.
PROGRAMME OF WORK ON MIGRATORY BIRDS AND FLYWAYS

Adopted by the Conference of the Parties at its 11th Meeting (Quito, 4-9 November 2014)

Recognizing that a flyways approach is necessary to ensure adequate conservation and sustainable use of migratory birds throughout their ranges, combining species- and ecosystem-based approaches and promoting international cooperation and coordination among states, the private sector, Multilateral Environmental Agreements, UN institutions, Non-Governmental Organizations, local communities and other stakeholders;

Also recognizing that there are specific threats of particular significance to migratory birds along flyways that continue to have an impact on these species and their habitats including: inland wetland reclamation; destruction of coastal and inter-tidal habitats; loss of forests and grasslands; agricultural intensification and habitat modification through desertification and overgrazing; inappropriate wind turbine development (Resolution 11.27 on Renewable Energy and Migratory Species); collisions with power lines and electrocutions (Resolution 10.11 on Powerlines and Migratory Birds); illegal and/or unsustainable killing, taking and trade (Resolution 11.16 on the Prevention of Illegal Killing, Taking and Trade of Migratory Birds); overfishing and the bycatch of seabirds; lead shot and other poisoning (Resolution 11.15 on Preventing Poisoning of Migratory Birds); invasive alien species (Resolution 11.28 on Future CMS Activities on Invasive Alien Species) and avian influenza and other disease; and marine debris (Resolution 11.30 on Management of Marine Debris);

Acknowledging that the very broad and comprehensive mandate of Resolution 10.10 on Guidance on Global Flyway Conservation and Options for Policy Arrangements needs to be streamlined and focused into a more detailed Programme of Work in order to provide Parties and stakeholders with a clear road map with timelines, priorities and indicators for the conservation of flyways and migratory birds;

Recalling that Resolution 10.10 requested CMS to work in close partnership with existing flyway organizations and initiatives in the Americas, and in particular the Western Hemisphere Migratory Species Initiative (WHMSI), to develop an overarching conservation Action Plan for migratory birds in the Americas, recognizing especially the established programmes of work and taking into account existing instruments;

Aware that Parties have endorsed a Strategic Plan for Migratory Species 2015-2023 (Resolution 11.2) with clearly defined goals and targets to promote actions to ensure the favourable conservation status of migratory species and their habitats, and that the present POW will make a significant contribution to delivering major parts of this Plan;
Acknowledging that Parties that are also Parties to the Convention on Biological Diversity have endorsed its Strategic Plan 2011-2020 and the Aichi Biodiversity Targets that commit them to *inter alia* preventing extinction of threatened species and increasing the overall area and improving the habitat quality of protected areas of terrestrial, coastal and marine habitats, as well other effective area-based conservation measures, integrated into the wider landscapes and seascapes (Targets 11 and 12 respectively); 

Also acknowledging the 2013 Resolution of Cooperation signed between the Secretariats of CMS and the Conservation of Arctic Flora and Fauna Working Group (CAFF) of the Arctic Council and tripartite CAFF/CMS/AEWA joint work plan 2013-2015 to encourage information sharing to assist in the conservation of migratory species along all the world’s flyways and to assist cooperation with non-Arctic countries on these issues, and welcoming the Arctic Migratory Bird Initiative and its associated Work Plan; 

Noting with gratitude the work undertaken by the Working Group on Flyways at its meetings in Jamaica (11-14 March 2014) and Germany (30 June 2014) and during the whole intersessional period and acknowledging the generous financial contributions provided by the Government of Switzerland as well as the contribution of Working Group members towards the successful completion of these meetings and their outputs; and

Thanking the Government of Jamaica for hosting the Flyways Meetings held on 11-14 March 2014 in Trelawney, and the Governments of Canada and Switzerland, the Organization of American States (OAS), WHMSI and the CMS Secretariat for co-organizing and sponsoring these meetings;

The Conference of the Parties to the  
*Convention on the Conservation of Migratory Species of Wild Animals*

1. **Adopts** the “Programme of Work on Migratory Birds and Flyways 2014-2023” (the POW) included as Annex 1 to this Resolution and **urges** Parties and signatories to CMS instruments, and **encourages** non-Parties organizations and stakeholders to implement the POW as a matter of priority; 

2. **Adopts** the “Americas Flyways Framework” included as Annex 2 to this Resolution and **urges** CMS Parties and signatories to CMS instruments in the Americas, and **invites** non-Parties, organizations and stakeholders to implement the Framework in collaboration with WHMSI to protect migratory birds and their habitats throughout the Western Hemisphere; 

3. **Calls** on the Flyways Working Group and on the CMS Secretariat to support the establishment of a Task Force, in conjunction with WHMSI, to coordinate the development and implementation of an action plan to achieve the global Programme of Work and Americas Flyways Framework including provisions for concerted conservation action for priority species, and to report to COP12 onwards and WHMSI; 

4. **Instructs** the Secretariat, in collaboration with Parties and relevant stakeholders and subject to the availability of resources, to implement those activities assigned to it in the POW; 

5. **Calls** on Parties to effectively implement the POW as applicable and in accordance to the circumstances of each Party and **invites** non-Parties and other stakeholders, with the
support of the Secretariat, to strengthen national and local capacity for flyway conservation including, inter alia, by developing partnerships with key stakeholders and organizing training courses; translating and disseminating documents, sharing protocols and regulations; transferring technology; designating and improving management of critically and internationally important sites; understanding the ecological functionality of flyways through research of migratory birds and their habitats; strengthening monitoring programmes; and promoting the conservation of migratory birds and ensuring any use of migratory birds is sustainable;

6. Requests Parties, GEF, UNEP and other UN organizations, bilateral and multilateral donors, the private sector and others to provide financial assistance for the implementation of this Resolution, the POW and the Americas Flyways Framework including to developing countries for relevant capacity building and conservation action;

7. Further requests the continuation of the open-ended Flyways Working Group to (a) monitor the implementation of the POW and the Americas Flyways Framework (b) review relevant scientific and technical issues, international initiatives and processes, (c) provide guidance on and input into the conservation and management of flyways at global and flyway level during the intersessional period until COP12 and (d) review and update the POW, as a basis for the continued prioritization of the CMS activities on flyways and requests Parties to provide the resources to ensure the timely implementation of this work;

8. Encourages Parties to promote the POW and the Americas Flyways Framework as a global tool to contribute to achieving the Aichi Targets in relation to conservation of migratory species and their habitats and to ensure a strong level of support for its implementation by working closely with the Convention on Biological Diversity;

9. Encourages the Secretariat to liaise with the secretariats of CMS instruments, relevant MEAs, international organizations, international conservation initiatives, NGOs and the private sector to promote synergies and coordinate activities related to the conservation of flyways and migratory birds including, where appropriate, the organization of back-to-back meetings and joint activities;

10. Requests the Secretariat to strengthen links with the Secretariat of the Arctic Council's Working Group on the Conservation of Arctic Flora and Fauna (CAFF), in the framework of the existing Resolution of Cooperation, especially to ensure that the CAFF Arctic Migratory Bird Initiative (AMBI) has maximum synergies with the POW to capitalize on the flyway approach in gaining global support for the conservation of the arctic environment; and

11. Calls on Parties to report progress in their national reports in implementing this Resolution, including monitoring and efficacy of measures taken, to COPs 12, 13 and 14.
1. **Introduction**

Migratory birds represent one of the great elements of world’s biodiversity and genetic diversity. They are found in all terrestrial and marine ecosystems around the world and are adapted to using natural and manmade habitats. Migratory bird species are exposed to a range of different factors, both natural and anthropogenic, in their annual cycles and throughout their flyways. As a consequence, a significant proportion of migratory species are declining, with some species increasingly threatened with extinction. Besides their amazing beauty and variety, they also provide a wide range of ecosystem services. Their multidimensional connectedness gives them a special role as ecological keystone species and indicators of the linkages between ecosystems and of ecological change.

It is widely recognised that the completion of the annual cycle of these birds strongly depends on national action that can be supported and strengthened by international cooperation. Ensuring their conservation worldwide is a major focus of the Convention on Migratory Species (CMS). Resolution 10.10 on *Guidance on Global Flyway Conservation and Options for Policy Arrangements* and a number of other CMS resolutions, directly or indirectly are linked to supporting/achieving conservation and management action for the migratory birds and their habitats, monitoring, reducing threats and increasing resources to implement these activities.

Moreover, to promote action for migratory birds and other migratory species, the CMS has developed a Strategic Plan for Migratory Species 2015-2023 (SPMS) with these following five goals:

**Goal 1:** Address the underlying causes of decline of migratory species by mainstreaming relevant conservation and sustainable use priorities across government and society.

**Goal 2:** Reduce the direct pressures on migratory species and their habitats.

**Goal 3:** Improve the conservation status of migratory species and the ecological connectivity and resilience of their habitats.

**Goal 4:** Enhance the benefits to all from the favourable conservation status of migratory species.

**Goal 5:** Enhance implementation through participatory planning, knowledge management and capacity building.
These goals are based on the Strategic Plan for Biodiversity and its Aichi Targets approved by Parties of the Convention on Biological Diversity. Two of the Aichi Targets (Targets 11 and 12) are particularly relevant to migratory birds.

All of the 16 targets of the SPMS are relevant to the Programme of Work on Migratory Birds and Flyways (POW).

The aim is to bring together into a single Programme of Work for the world’s flyways all the major actions required to promote the conservation of migratory birds and their habitats. This POW aims to focus on the migratory birds rather than on the Convention itself, in keeping with the aim of the SPMSs, its goals and targets. The aim is also to encourage cooperation and streamlining of actions as well to avoid unnecessary duplication with existing thematic work programmes and other ongoing/planned initiatives within and outside of the CMS family.

2. Purpose

The overall purpose of the POW is to identify and promote implementation of activities at the international and national levels that will effectively contribute to an improvement in the status of migratory birds and their habitats worldwide. This should also achieve an improvement in migratory bird species throughout the world’s flyways by:

(a) Providing a framework for effective protection of migratory birds throughout their life-cycles; and

(b) Enhancing synergies among relevant flyway-related instruments and programmes.

The POW is intended to assist Parties (and non-Parties) in establishing national programmes of work through identifying priority actions, indicators, key stakeholders and time frames. At a national level, Parties may select from, adapt, and/or add to the activities suggested in the POW according to particular national and local conditions and their level of development.

The POW also aims to promote synergies and coordination with relevant programmes of various international organizations, NGOs and the wider public. It therefore outlines priority activities directed at a range of various stakeholders according to their responsibilities/mandates and interests to work in collaboration for achieving the required outcomes.

Planning and implementation of actions require close communication and consultation with local communities to ensure the plans and actions adequately take into consideration local needs and priorities and benefit to local livelihoods.

3. Main themes

The POW is presented as six main themes; the first four themes are centred on improving conservation of birds and their habitats, while the latter two are to support their implementation.

A. Ensuring Migratory Bird Conservation through Flyway/Ecological Networks and Critical Sites and Habitats and Addressing Key Threats
B. Flyway-specific Actions  
C. Enhancing knowledge to support flyway conservation  
D. Awareness raising  
E. Monitoring and reporting  
F. Resourcing implementation

The accompanying Annex I provides details of the priority actions, indicators, proposed time frames, CMS family instruments (Agreements, MoUs, Action Plans and Working Groups) and other key stakeholders.

4. Outcome targets – by 2023

All flyway Range States have:

- Become signatories to MoUs and Agreements relevant to the POW in their flyways.
- Strengthened capacity to implement the POW.
- Raised awareness of target audiences on the importance of conservation measures for migratory birds and their habitats.
- Developed plans/processes to put the POW into effect (according to their national circumstances and needs) and incorporated these into National Biodiversity Strategies and Action Plans and/or other national planning frameworks for migratory species/habitat management.
- Secured the necessary finance and made substantial progress in POW implementation.

CMS Secretariat has:

- Organized capacity building workshops to strengthen the Parties’ capacity to implement the POW.
- Facilitated securing of financial resources to enable Parties and other implementing partners to implement the POW.
- Facilitated synergies with Secretariats/bodies of other Conventions and other partners and stakeholders to implement the POW at flyway and national levels.
5. Annex I: Details of the Programme of Work on Migratory Birds and Flyways

### Ensuring Migratory Bird Conservation through Flyway/ Ecological Networks and Critical Sites and Habitats and Addressing Key Threats

**Objectives:**

1. Enhance effective management of important habitats and critical sites in the world’s flyways to ensure life cycle conservation of all migratory birds

2. Promote stakeholders participation in implementing/supporting collaborative conservation action from within and outside the UN system

3. Implement actions to reduce or mitigate specific threats to migratory birds

(Cross-references to CMS Res 10.10 on flyways, operatives 1, 2, 3, 4, 5, 7, 8, 9 and 15, CMS Res 10.3 and Resolution 11.25 on ecological networks and Resolution 11.17 African-Eurasian Landbirds Action Plan, Aichi Targets 5, 6, 11 and 12)

1 Cross references to relevant CMS resolutions and Aichi Targets included.
2 A full list of acronyms and definitions is provided in Annex II.
3 One or more indicators are listed against an Action, the timings of achieving these vary. Indicative actions in italics.
4 Timing: A timeline to implement the action is proposed after each Action Needed. Anticipating immediate or early commencement of all actions, each is classified according to when results are expected (reporting timeline) and the priority for the Action as determined by likely influence on the achievement of the overall goal of the POW. Timing: S = results expected in short-term and actions that are already ongoing, (within one triennium); M = results expected in medium term, (within two triennia); L = results expected in long term, (within three triennia or more).
5 Main stakeholder(s) are identified with a XX, with the lead stakeholder(s) identified in bold. In the category “Others” the additional key stakeholders required for implementation of the actions are identified.
6 Prioritization of Emergency and Essential Actions (E) to be implemented at the earliest and completed no later than 2017.
7 A full list of CMS bodies and instruments is provided in Annex III.
### Annex VIII: Resolution 11.14

**Actions Needed**

1. Implement actions to manage landscapes to meet requirements of migratory birds, including through integration of these requirements into land-use policies, designation of protected trans-boundary habitat corridors and ecological networks.

#### Landscape/habitat-based conservation

6. **Annex II: Glossary of Definitions and Acronyms**

**Definitions**

**Explanatory notes:**

1. The Programme of Work uses specific terms related to migratory species and habitat conservation for which definitions and explanatory notes are considered useful.
2. The definitions are drawn from existing documentation from within the CMS family having been developed for one or more migratory bird groups. In the absence of a comprehensive and standardised set of CMS definitions, some of these definitions and guidance have been adapted from other international processes.
3. It is noted that a number of these terms have also been defined at a national level. As these may vary within and between national jurisdictions, their application at the global/international level needs to be agreed.
4. There remains a need for these terms to be defined and standardised for the CMS purposes.
5. The following definitions and explanatory notes are provided to explain various terms related to migratory species and habitat conservation used in the Programme of Work are not aimed at being definitive.

**Biodiversity Offsets** - measurable conservation outcomes of actions designed to compensate for significant residual adverse biodiversity impacts arising from project development after appropriate prevention and mitigation measures have been taken (definition as per Business and Biodiversity Offsets Programme 8).

**Critical habitat** - Any area of the planet with high biodiversity conservation significance based on the existence of habitat of significant importance to critically endangered or endangered species, restricted range or endemic species, globally significant concentrations of migratory and/or congregatory species, highly threatened and/or unique ecosystems and key evolutionary processes (definition as per International Finance Corporation 9).

**Critical site** - Criteria have been developed for the AEWA region from the relevant Ramsar and IBA criteria in order to address the identification of networks of Critical Sites for waterbirds populations during those stages of their annual cycles when the site-based conservation approach is effective. A site has been identified as ‘critical’ if it fulfils at least one of the two CSN criteria: CSN criterion 1: The site is known or thought regularly or predictably to hold significant numbers of a population of a globally threatened waterbird species. CSN criterion 2: The site is known or thought regularly or predictably to hold >1% of a flyway or other distinct population of a waterbird species (definition as per AEWA Wings over Wetlands project).

Note: the critical site definition developed for migratory waterbirds will need to be expanded to cover other migratory birds.

---

Flyway - A flyway is taken to be a geographical region within which a single migratory species, a group of migratory species, or a distinct population of a given migratory species, completes all components of its annual cycle (breeding, moult, staging, non-breeding “wintering” etc.) (Boere & Stroud 2006). Each individual species and population migrates in a different way and uses a different suite of breeding, migration staging and non-breeding (wintering) sites. Hence a single flyway is composed of many overlapping migration systems of individual bird populations and species, each of which has different habitat preferences and migration strategies. From knowledge of these various migration systems it is possible to group the migration routes used by birds into broad flyways, each of which is used by many species, often in a similar way, during their annual migrations. Recent research into the migrations of many wader or shorebird species, for example, indicates that the migrations of waders can broadly be grouped into eight flyways: the East Atlantic Flyway, the Mediterranean/Black Sea Flyway, the West Asia/Africa Flyway, the Central Asian Flyway, the East Asia/Australasia Flyway, and three flyways in the Americas and the Neotropics.

There are no clear separations between flyways, and the use of the term is not intended to imply major biological significance; rather it is a valuable concept for permitting the biology and conservation of birds, as well as other migratory species, to be considered in broad geographical units into which the migrations of species and populations can be more or less readily grouped. (definition adapted from Ramsar Resolution XI.8. Annex 2).

Habitat - means any area in the range of a migratory species which contains suitable living conditions for that species (definition as per CMS).

Internationally Important site – A site should be considered internationally important if it regularly supports 1% of the individuals in a population of one species or subspecies of waterbird or if it regularly supports 20,000 or more waterbirds (definition as per the Ramsar Convention). This Criterion identifies those wetlands which are of numerical importance for waterbirds through their support of internationally important numbers, either of one or more species, and often the total numbers of the waterbird species assemblage. Note: the definition has been developed for waterbirds and there is a need for it to be expanded to cover other migratory birds.

Landscape - An area of land that contains a mosaic of ecosystems, including human-dominated ecosystems.

Migratory species - Migratory bird species means the entire population or any geographically separate part of the population of any bird species, a significant proportion of whose members cyclically and predictably cross one or more national jurisdictional boundaries (definition as per CMS).

Net Positive Impact (NPI) - a target for project outcomes in which the impacts on biodiversity caused by the project are outweighed by the actions taken, in accordance with the Mitigation Hierarchy, to achieve net gains for biodiversity (Definition as per NPI Alliance). A net gain to biodiversity features measured in quality hectares (for habitats), number or percentage of individuals (for species), or other metrics appropriate to the feature.\(^{12}\)

**Priority species** – migratory bird species included under CMS Appendix I.

**Protected area** - is a clearly defined geographical space, recognised, dedicated and managed, through legal or other effective means, to achieve the long term conservation of nature with associated ecosystem services and cultural values (IUCN definition 2008).

**Site** – A geographical area on land or in water with defined ecological, physical, administrative, or management boundaries that it is actually or potentially manageable as a single unit (e.g. a protected area or other managed conservation unit).

For this reason, large-scale conservation priority regions such as Ecoregions, Endemic Bird Areas, and Biodiversity Hotspots, which often span multiple countries, are not considered to be sites. In the context of Key Biodiversity Areas (KBA), “site” and “area” are used interchangeably.

**Site Network/Ecological Network** – A collection of individual sustainably managed sites operating cooperatively and synergistically, both ecologically and administratively, to achieve ecological and governance benefits for migratory birds that single protected sites cannot achieve in isolation (Modified from the CMS IOSEA guidance document; see also CMS/ScC18/Doc.10.3.1 for further information).

8. Diagrammatic representation of major CMS Family, avian related instruments
Annex 2 to Resolution 11.14

AMERICAS FLYWAYS FRAMEWORK:
A FRAMEWORK FOR THE CONSERVATION OF MIGRATORY BIRDS IN THE AMERICAS

Preamble

Recalling CMS Resolution 10.10 to develop “in close partnership with existing flyway organizations and initiatives in the Americas, and in particular the Western Hemisphere Migratory Species Initiative (WHMSI), an overarching conservation Action Plan for migratory birds in the Americas, recognizing especially the established programmes of work and taking into account existing instruments”;

Taking note of the CMS Flyways Working Group and WHMSI Americas flyways experts meeting (Jamaica, March 2014) to progress the development of an overarching conservation framework for migratory birds in the Americas;

Aware of the global Programme of Work on Migratory Birds and Flyways 2014-2023 being developed by CMS and that a framework for the Americas will make a significant contribution to delivering major parts of this Plan;

Recalling Article VII of the Convention on Nature Protection and Wild Life Preservation in the Western Hemisphere (the Western Hemisphere Convention) which states that “The Contracting Governments shall adopt appropriate measures for the protection of migratory birds of economic or aesthetic value or to prevent the threatened extinction of any given species.”;

Recalling the Ramsar Convention’s Resolution X.22 “Promoting international cooperation for the conservation of waterbird flyways” that “Strongly encourages Contracting Parties and other governments to actively support and participate in relevant international plans and programmes for the conservation of shared migratory waterbirds and their habitats”;

Acknowledging the work of the North American Bird Conservation Initiative (NABCI) and the Trilateral Committee for Wildlife and Ecosystem Conservation and Management to coordinate international efforts to conserve birds in North America; and acknowledging the increasing number of regional instruments for the conservation of migratory birds in Latin America and the Caribbean;

Acknowledging the large number of other initiatives that promote the conservation and management of migratory birds across the Americas, including the Western Hemisphere Shorebird Reserve Network, Waterbird Conservation for the Americas, Partners in Flight, Joint Ventures and other collaborative efforts to protect migratory birds;

Taking note of the Atlantic Flyway Shorebird Conservation Business Strategy and an increasing number of other conservation business plans in development that have the potential to deliver effective flyway scale conservation of priority migratory birds;
Taking note of the Plan of Action adopted by the Heads of State and Government at the III Summit of the Americas (Quebec City, 2001) that calls for “the development of a hemispheric strategy to support the conservation of migratory wildlife throughout the Americas, with the active engagement of civil society”;

Taking note of the Inter-American Program for Sustainable Development, which calls upon the Organization of American States (OAS) and member states “to explore the development of the Western Hemisphere Migratory Initiative (WHMSI), in a manner that reflects the interests and priorities of all member states”;

Acknowledging the work of the Western Hemisphere Migratory Species Initiative (WHMSI) to bring together governments and civil society from throughout the Americas to advance the conservation of shared migratory species, and in particular the action plan developed for “Integrating Migratory Bird Conservation Initiatives in the Americas”; and

Therefore it is recommended by the WHMSI Steering Committee that the following framework be adopted by the relevant Parties of CMS and other interested stakeholders, and pursued by them in collaboration with WHMSI to conserve migratory birds and their habitats throughout the Western Hemisphere.

**Americas Flyways Framework**

The Americas Flyways Framework is provided to assist governments, non-profit organizations, research institutions, corporations and citizens in the conservation of migratory birds and their habitats in the Western Hemisphere.

The Americas Flyways Framework builds upon the five goals of the CMS Strategic Plan for Migratory Species 2015-2023:

Goal 1: Address the underlying causes of decline of migratory species by mainstreaming relevant conservation and sustainable use priorities across government and society

Goal 2: Reduce the direct pressures on migratory species and their habitats

Goal 3: Improve the conservation status of migratory species and the ecological connectivity and resilience of their habitats

Goal 4: Enhance the benefits to all from the favourable conservation status of migratory species

Goal 5: Enhance implementation through participatory planning, knowledge management and capacity building

These goals are based on the Strategic Plan for Biodiversity and its Aichi Targets approved by Parties of the Convention on Biological Diversity, and in particular Aichi Targets 11 and 12.

The Strategic Goals of the Americas Flyways Framework comprise both aspirations for achievement at the hemispheric level, and a flexible framework for the establishment of national and regional targets. Governments and other stakeholders are invited to set their own targets within this flexible framework to advance the conservation of migratory birds in the Western Hemisphere, taking into account the interconnectedness of migratory bird life cycles and also bearing in mind national contributions to the achievement of hemispheric targets.
Flyways of the Americas seeks to harmonize the conservation efforts of governments and all relevant partners and stakeholders by advancing the following:

**Strategic Goal 1: Mainstream biodiversity and migratory bird protection and conservation across government and society**

- **Action 1. Ensure active cooperation, coordination and reporting among migratory bird instruments, initiatives and partnerships**
  Encourage and facilitate closer cooperation among those instruments, initiatives and partnerships relating to migratory birds, and the habitats upon which they depend, seeking efficiencies, minimizing redundancies, and focusing on and addressing specific threats to halt the decline in the populations of migratory birds. Promote and integrate biodiversity values and the value of migratory birds into national and local development and poverty reduction strategies and planning processes and incorporate into national accounting, as appropriate and reporting systems.

- **Action 2. Promote collaboration with other environmental instruments**
  Encourage and facilitate closer collaboration with other environmental instruments (not focused on migratory birds), to build upon synergies and ensure that the requirements of migratory birds are integrated within appropriate policies, tools and initiatives. Develop and apply positive incentives for the conservation and sustainable use of biodiversity and migratory bird, consistent and in harmony with relevant international obligations.

- **Action 3. Promote collaboration with other sectors**
  Promote the collaborative conservation of migratory birds by working with other bodies whose prime objective is not wildlife conservation, including the private sector, to ensure that the requirements of migratory birds are integrated into land-use and maritime policies, operational guidance, safeguard and mitigation policies, and to identify and promote best practices in protection, management and sustainable use.

- **Action 4. Build awareness**
  Promote, communicate and raise awareness of the ecological, economic and cultural importance of migratory birds throughout the hemisphere among all governments and society as a whole. Ensure that people are aware of the values of biodiversity and the steps they can take to conserve and use them sustainably. Promote public awareness campaigns and other relevant activities to increase the participation of civil society in the conservation of migratory birds.

**Strategic 2: Reduce the direct pressures and threats on migratory birds and promote sustainable and productive landscapes, seascapes, land use and ocean use that benefit migratory bird populations**

- **Action 5. Promote sustainable and productive landscapes and seascapes that are compatible and beneficial to migratory bird populations**
  Work with private landowners, governments, producers and land and marine use planners to promote sustainable and compatible land and seascapes. Ensure that areas under agriculture, aquaculture, forestry and fisheries are managed sustainably, ensuring the conservation of biodiversity and migratory birds. Develop regulations, ecosystem service payment mechanisms, corporate engagement and beneficial incentives to promote bird-friendly landscapes.

- **Action 6. Assess and mitigate significant human-caused threats to bird migration**
  Identify and assess the significant threats to migratory birds and promote and foster efforts to
reduce or eliminate these threats, especially in relation to enforcement regarding illegal killing, taking and trade, poisoning, and energy production, transmission and distribution.

- **Action 7. Promote sustainability of hunting harvests and other uses and takes of migratory birds, when they may occur**
  Develop sustainable and controlled hunting management when hunting is permitted, and ensure other takes of migratory birds, eggs, and bird resources are sustainable and guided by sound scientific research and regulations.

- **Action 8. Mitigate and adapt to impacts of climate change on migratory bird species**
  Support efforts to reduce emissions and capture carbon, and take action to mitigate and adapt to the impacts of climate change on migratory bird species, including enhancing the resilience of sites to climate change and planning for the potential for shifts in the range of bird species.

**Strategic Goal 3: Protect migratory birds and the phenomenon of migration by safeguarding species, genetic diversity, ecosystems and critical habitat areas**

- **Action 9. Halt extinctions by addressing the needs of the most imperilled migratory bird species**
  Prevent the extinction or extirpation of migratory bird species by developing conservation programs and initiatives for those species most known to be threatened, including bird species on the IUCN Red List (including those listed as Alliance for Zero Extinction species) and other species in dramatic decline.

- **Action 10. Foster the conservation of high priority sites and habitats, including networks of protected areas**
  Identify and protect effective ecological networks of sites and habitats critical for the conservation of migratory bird species. Ensure that information on migratory bird species, high-priority sites and habitats is readily available. Encourage the use of formal designations, voluntary measures and agreed site management plans as appropriate to protect and manage all critical sites. Foster trans-boundary collaboration, flyway networks, effective coalitions of partners and sound and effective site management. Work with conservation initiatives and conservation business plans to guide conservation and deliver results to key sites and habitats. Recognize the interconnectedness and transnational nature of migratory bird conservation and encourage coordination between countries and all parties.

**Strategic Goal 4: Enhance the benefits to all from biodiversity, ecosystem services and migratory birds**

- **Action 11. Promote livelihoods that are consistent with and enhance migratory bird conservation**
  Promote the development of livelihoods (for example: ecotourism, sustainable and bird-friendly agriculture, agroforestry, etc.) that will lead to a productive economy and contribute positively to the protection and preservation of migratory bird populations and the phenomenon of hemispheric-wide migration. Encourage governments, businesses and other stakeholders to take steps to implement plans for sustainable production and consumption of natural resources. Ensure that ecosystems that provide essential services, including services relating to water and climate regulation, and contribute to health, livelihoods and well-being,
are restored and safeguarded, taking into account the needs of women, indigenous and local communities, and the poor and vulnerable.

- **Action 12. Empower local communities to conserve their resources**
  Empower local people and communities (including indigenous and traditional peoples) and provide them with the tools, knowledge and means to enable them to protect and manage their natural resources for the benefit of mankind, their communities, birds, and biodiversity as a whole.

**Strategic Goal 5: Enhance implementation through participatory planning, knowledge management and capacity building**

- **Action 13. Promote comprehensive biological planning**
  Promote the identification of priority bird species and sites for conservation action; develop/update full lifecycle conservation business plans as appropriate; foster the building of coalitions of partners to implement priority actions.

- **Action 14. Improve/increase and share knowledge**
  Ensure that knowledge, the science-base and technologies relating to migratory birds, their values, functions, status and trends, and the consequences of their loss, are improved, widely shared, transferred, and applied. Enhance and strengthen monitoring of the status of migratory bird populations and migratory bird habitats and sites; ensure that regular reporting is made widely available. Support targeted research to understand the ecology of priority migrants throughout their lifecycles, identifying the limiting factors barriers and threats and the policies and prescriptions necessary to address these.

- **Action 15. Build capacity**
  Strengthen collaboration and support between local, national and regional partners and build capacity for flyway-scale conservation including the strengthening of local and national capacity along critical points on the flyways. Share best practices, lessons learnt, relevant scientific and technical issues, international initiatives and processes, and provide guidance and input to the conservation and management of flyways at local, national, regional and flyways levels.

- **Action 16. Help guide funding to priority needs**
  Seek new and expand existing funding sources (both public and private) to generate the funds needed to resource migratory bird conservation at the flyway scale. Mobilize financial resources for the effective implementation of the Americas Flyways Framework.

**Implementation and Participation**

The Americas Flyways Framework is being promoted by WHMSI, an overarching framework to guide and coordinate conservation effort for the protection of migratory birds and the phenomenon of migration in the Americas. The framework will require cooperation and collaboration of governments, corporations, non-profits and other interested stakeholders.

All interested parties are encouraged to use the Americas Flyways Framework to guide their work to protect migratory birds. To establish a specific mechanism to advance the framework, WHMSI proposes to establish a voluntary, collaborative partnership: “The Partnership for the Americas Flyways Framework” (PAFF) and will formally invite the participation of
CMS and its signatories, the governments of the Western Hemisphere, and national and international non-profit organizations and other leading stakeholders to join this partnership.

The basic principles of PAFF are still under development, but are currently proposed as follows:

**Legal Status:** PAFF will be informal and voluntary.

**Purpose, Goals and Objectives:** PAFF will provide a mechanism to promote dialogue, cooperation, collaboration and coordination among a wide range of stakeholders, both public and private, to advance the Strategies and Actions of the Framework. Such actions will include sharing information, developing strategies and collaborative work efforts to advance implementation of the Framework, and report on successes, needs and opportunities over time.

PAFF will develop an implementation document that outlines periodic priorities. Additionally, governments can be invited to develop national implementation plans; NGOs can be invited to participate and develop plans as appropriate. Convention Secretariats can be invited to update their joint work plan and other frameworks to support its implementation. International initiatives can be invited to develop implementation plans; and Corporations can be invited to develop plans, either individually or jointly.

**Membership:** Membership and participation in PAFF is voluntary and Partners can withdraw with notice.

CMS may join PAFF or adopt this Framework by endorsing the text and supporting the objectives and actions of the Americas Flyways Framework. Governments, NGOs, and other interested stakeholders may join this Partnership and Framework by endorsing the text, supporting the objectives and actions of the Americas Flyways Framework and notifying WHMSI. Membership is open to new participants and new members are encouraged. WHMSI will alert all exiting Partners of any new applicants and if no issues or objections are raised within 60 days of the participant’s application, the applicant will be added to the list of Partners.

**Administration:** Initially, WHMSI will oversee the establishment and administration of PAFF, including through the appointment of an initial team of coordinators to act on behalf of PAFF.

A Steering Committee will be formed to assist WHMSI and oversee the operations of PAFF. The Steering Committee will be composed of representatives from governments as well as the non-profit and private sectors, as determined by PAFF in its initial meeting.

**Communication** between and among Partners will be encouraged, and an annual meeting, will be organized either virtual or in-person, by WHMSI and the Steering committee.

The Partners will elect a Chair and Vice-chair to a term of two years. Positions for other officers may be identified and created by the Steering Committee.

PAFF will establish advisory groups and ad hoc working groups to develop action plans and address issues as needed. These advisory and working groups will provide a key mechanism for implementing action, recruiting new participants and supporters to the Framework, communicating among Partners, and identify new needs and opportunities to protect migratory birds in the Western Hemisphere.

**Finance:** Partners are encouraged to provide or secure resources to support the activities of PAFF and to advance the Framework.
Recognising that Article III (4)(b) of the Convention requires Parties that are Range States of migratory species listed in Appendix I to endeavour “to prevent, remove, compensate for or minimize, as appropriate, the adverse effects of activities or obstacles that seriously impede or prevent the migration of the species”;

Recognising that Article III (4)(c) of the Convention requires such Parties to endeavour, “to the extent feasible and appropriate, to prevent, reduce or control factors that are endangering or are likely to further endanger such species”;

Concerned that very large numbers of migratory birds are killed annually as a result of poisoning and that this unnecessary mortality can severely affect the conservation status of vulnerable species, including many listed under CMS and its associated instruments, and that for some species poisoning is the primary cause of their unfavourable conservation status;

Highlighting the need to provide practical guidance on preventing, reducing or controlling poisoning from, inter alia, agriculture pesticides, poison bait, veterinary pharmaceutical treatments and use of lead for hunting and fishing;

Aware that international measures and concerted actions to address migratory bird poisoning are urgently needed and should involve CMS Parties, Range States, international and national organizations, the private sector and relevant stakeholders;

Further aware of the important role of industries involved in the manufacture of substances which can result in the poisoning of migratory birds; organisations involved in their sale and distribution; and representational bodies of those whose use of such substances can result in migratory bird mortality or morbidity;

Recalling Resolution 10.26 on minimizing the risk of poisoning to migratory birds, which called on the Scientific Council and the Secretariat to establish an intersessional working group, the Preventing Poisoning Working Group, to undertake a detailed assessment of the severity and scope of poisoning for migratory birds; significant knowledge gaps; and where sufficient knowledge exists to recommend suitable responses to address the problems potentially including areas where enhanced legislation may be required, features of effective regulatory regimes, and understanding socio-economic drivers of poisoning;
Acknowledging the positive actions undertaken by some Parties to the Agreement on the Conservation of African-Eurasian Migratory Waterbirds (AEWA) to phase out the use of lead shot for hunting in wetlands;

Further recalling that the Memorandum of Understanding on the Conservation of Migratory Birds of Prey in Africa and Eurasia highlights the many African-Eurasian migratory raptors with an unfavourable conservation status at a regional and/or global level as a result of poisoning;

Noting the objectives of the Rotterdam Convention on the Prior Informed Consent Procedure for Certain Hazardous Chemicals and Pesticides in International Trade, which promotes the environmentally sound use of hazardous chemicals and shared responsibility to protect the environment from harm;

Noting with satisfaction Recommendation 164 (2013), adopted by the Standing Committee to the Convention on the Conservation of European Wildlife and Natural Habitats (Bern Convention), which raises concern regarding the widespread use of poisons to kill protected species, and calls for a strengthened cooperation to enhance national and international actions to eliminate this damaging practice;

Recalling the Ramsar Convention’s Resolution XI.12 on ecosystem approaches to wetlands and health which recognizes the interactions between disease - including poisoning - in wildlife, human and domestic animals, which stressed the urgent need to ensure that policy responses are better integrated in a ‘One Health’ approach across these sectors for most effective outcomes;

Recognizing that whilst activities associated with some substances toxic to birds can have social and/or economic significance, such as the protection of agricultural crops from pests, experience shows that strategies to minimize and prevent the risk of poisoning of birds can be, nonetheless, sustainably implemented with benefits to the provision of wider ecosystem services;

Recognizing that under strictly supervised conditions and on a selective basis, the legal and regulated use of poison baits can have important conservation benefits through the control of alien invasive species;

Concerned that there is a serious geographical bias in relevant research and knowledge, and emphasizing that further research on and monitoring of migratory birds and sources of poisoning are urgently required for some poisoning sources, and that studies should be designed so as to better assist in formulating and monitoring policy;

Acknowledging that a number of Parties are already applying relevant policies, for example, removal of certain toxic agricultural insecticides from the market, implementing programmes of Integrated Pest Management, and promoting the use of non-toxic ammunition for hunting, and commending those Parties for such actions;

Noting the UNDP/GEF ‘Migratory Soaring Birds Project’ implemented by BirdLife International, which aims to ensure that the conservation needs of migratory soaring birds are addressed by industry, including the agriculture sector, along the Red Sea/Rift Valley Flyway, and recognizing the potential this project has to promote the implementation of this Resolution and associated Guidelines nationally and locally;
Stressing that capacity building at national and regional level is of fundamental importance for the effective implementation of this Resolution;

Acknowledging with thanks the Government of Tunisia for hosting the workshop held in Tunis from 27-31 May 2013 to assess the severity of poisoning and to discuss guidelines, and the generous financial support provided by the Government of Switzerland and the European Science Foundation towards the organization of this workshop; and

Taking note of the “Review of the ecological effects of poisoning on migratory birds” (UNEP/CMS/COP11/Inf.34) and thanking the Preventing Poisoning Working Group members, the Coordinator and the CMS Secretariat for their contributions to the production of this document;

The Conference of the Parties to the
Convention on the Conservation of Migratory Species of Wild Animals

1. Adopts the “Guidelines to Prevent the Risk of Poisoning to Migratory Birds” (the Guidelines) Annex 2 to document UNEP/CMS/COP11/Doc.23.1.2, agreeing that it is for each Party to determine whether or how to implement the recommended actions, considering the extent and type of poisoning risk, whilst having regard to their international obligations and commitments, including those under the Convention;

2. Urges Parties and encourages non-Parties to disseminate and implement these Guidelines, as appropriate, across all flyways, where necessary translating the Guidelines into different languages for their wider dissemination and use;

3. Encourages CMS Parties and invites Parties and Signatories of CMS Family instruments to identify within flyways, those geographical areas where poisoning is causing significant migratory bird mortality or morbidity, and address these as a matter of priority applying the Guidelines as appropriate;

4. Urges the Secretariat to consult regularly with relevant stakeholders, including government agencies, scientific bodies, non-governmental organizations and the agricultural, pharmaceutical, hunting and fishing sectors, in order to monitor the impacts of poisoning on migratory birds and to support the elaboration of national strategies and sector implementation plans as necessary;

5. Encourages CMS Parties to monitor and evaluate the impact of poisoning on migratory bird species regularly at national level, as well as the effectiveness of measures put in place to prevent, minimize, reduce, or control poisoning impacts, as appropriate;

6. Calls on Parties and non-Parties, including inter-governmental organisations and other relevant institutions to elaborate strategies to address poisoning or to include measures contained in this Resolution and in the Guidelines in their National Biodiversity Strategies and Action Plans (NBSAPs) or relevant legislation as appropriate to prevent, minimize, reduce or control the impact of poisoning on migratory bird species;

7. Instructs the Secretariat, in close cooperation with relevant CMS instruments, to liaise with the Bern Convention Secretariat and other relevant international organizations in order to
update the Guidelines as necessary, and invites Parties to contribute to the dissemination and updating of the Guidelines;

8. Invites the Rotterdam Convention on the Prior Informed Consent for Certain Hazardous Chemicals and Pesticides in International Trade to cooperate actively with CMS on matters related to poisoning of migratory birds, and in particular on the question of clarifying existing guidelines used in decision-making processes under that Convention as appropriate;

9. Invites the International Cooperation on Harmonisation of Technical Requirements for Registration of Veterinary Medicinal Products (VICH) and the Organisation for Economic Cooperation and Development (OECD) to consider conducting an evaluation of the risk that veterinary medicinal products pose to scavenging migratory bird species through either lethal or sub-lethal impacts, and using the results to provide guidance to the veterinary sector;

10. Encourages all those concerned with preventing poisoning of migratory birds to engage with such groups and create active partnerships – at appropriate scales – as a priority in implementing the Guidelines;

11. Invites Parties to note that neonicotinoid insecticides have become a main replacement for the organophosphates and carbamates reviewed; and to consider conducting further research on and monitoring migratory bird mortality incidents associated with the use of these and other insecticides;

12. Instructs the Secretariat, in collaboration with Parties and relevant international organizations, subject to the availability of funds, to organize regional workshops in high risk areas/flyways to promote the implementation of the Guidelines and to share best practice and lessons learnt;

13. Calls on Parties and invites non-Parties and stakeholders, with the support of the Secretariat, to strengthen national and local capacity for the implementation of this Resolution including, inter alia, by developing training courses, translating and disseminating examples of best practice, sharing protocols and regulations, transferring technology, and promoting the use of online tools to address specific issues that are relevant to prevent, reduce, or control poisoning of migratory birds protected under the Convention;

14. Urges Parties, UNEP and other relevant international organizations, as well as the industry, bilateral and multilateral donors and others, to consider supporting financially the implementation of this Resolution and the Guidelines, including through the coordination provided by the Preventing Poisoning Working Group, support of regional workshops, and the provision of financial assistance to developing countries for relevant capacity building;

15. Proposes the continuation of the open-ended Preventing Poisoning Working Group until COP12 under the Terms of Reference annexed to this Resolution, renewing its membership to incorporate expertise from geographical regions currently absent as well as representatives of industry and governments, to address the impact of other sources of poisoning, and geographic gaps, and to monitor the implementation of the Guidelines; and

16. Calls on Parties to report progress in implementing actions taken under this Resolution, and results achieved to future COPs through their National Reports.
Annex to Resolution 11.15

TERMS OF REFERENCE OF THE PREVENTING POISONING WORKING GROUP
(for the intersessional period until COP12)

1. Background and purpose
This Working Group was established by Resolution 10.26\(^1\) to assist the Parties to the Convention on Migratory Species (CMS) and its associated instruments, relevant MEAs and Conventions to review the causes and consequences of poisoning of migratory birds, and to recomend suitable responses to address the problems.

2. Role & Scope
The role of the Working Group is to facilitate concerted efforts, actions and procedures to prevent poisoning of migratory birds. Its geographical scope is global. The Working Group will cover all migratory bird taxa as identified by CMS and its relevant associated instruments.

3. Remit
The Working Group will:

Support implementation of the Preventing Poisoning Guidelines

a. Facilitate implementation of the Preventing Poisoning Guidelines and other relevant Resolutions adopted by COP11 as well as other relevant frameworks for action;

b. Set and implement priorities for its work;

c. Keep the Guidelines actively under review in the light of developing research findings and other relevant information and report relevant developments to the Scientific Council;

d. Assist in resource mobilization for priority actions;

e. Actively seek engagement from and with relevant agrochemical, veterinary pharmaceutical industries, and companies manufacturing lead ammunition or fishing weights;

f. Review, take account of, and communicate best practice when poisons are used as management tools in the protection of migratory birds and other biodiversity;

g. Encourage the translation and dissemination of the Guidelines widely within relevant networks, as well as to end-users and others;

---

\(^1\) Under the name Minimising the Risk of Poisoning to Migratory Birds Working Group.
h. Monitor the implementation of the relevant decisions and plans and their effectiveness and submit progress reports to the governing bodies of the participating MEAs;

i. Stimulate internal and external communication and exchange of information, experience, best practice and know-how;

j. Strengthen relevant regional and international networks; and

Assess other causes of migratory bird poisoning

k. Resources permitting, consider the need for additional guidance for preventing impacts on migratory birds from other types of poison (for example pheromone-type substances) and geographic gaps, and how these might be developed.

For effective working, the Working Group will establish task groups addressing either thematic issues (e.g., for different poison types) and/or geographical regions to progress its work.

4. Membership
The membership of the Working Group will comprise the Secretariats of the participating MEAs, as well as academic institutions, NGOs and other stakeholders, as appropriate.

The following representatives will also be invited to contribute to the Working Group:

- Representatives of CMS Parties;
- Representatives of the CMS Mediterranean Illegal Killing, Taking and Trade Task Force, African-Eurasian Migratory Landbird Working Group and Flyways Working Group; and
- Independent experts on an ad hoc basis as necessary and appropriate.

5. Governance
The Working Group will elect a Chair and a Vice-Chair from amongst its members and will operate by seeking consensus among the Group. The Working Group will report to the Scientific Council on its actions, membership and other related issues.

6. Operation
Funding permitting, a coordinator will be appointed with the following functions:
- organize the meetings of the Working Group and prepare the background documents;
- maintain and moderate the Working Group’s communications;
facilitate fundraising and resource mobilization; and

facilitate engagement with stakeholders within and beyond the Working Group.

Meetings of the Working Group will be convened at appropriate intervals, as considered necessary and funding permitting. Between meetings business will be conducted electronically which will provide the primary mode of communication.

The Working Group, in collaboration with Parties and relevant international organizations, subject to the availability of funds, will organize regional workshops in trouble spot areas to assist in developing appropriate local or regional solutions to prevent the poisoning of migratory birds.
THE PREVENTION OF ILLEGAL KILLING, TAKING AND TRADE
OF MIGRATORY BIRDS

Adopted by the Conference of the Parties at its 11th Meeting (Quito, 4-9 November 2014)

Recalling Article III (5) of the Convention which provides for Parties that are Range States to prohibit the taking of species included in Appendix I, and Article V (5) (k) on Guidelines for AGREEMENTS which suggests, where appropriate and feasible, each Agreement should prepare for procedures for co-ordinating action to suppress illegal taking;

Further recalling that the Agreement on the Conservation of African-Eurasian Migratory Waterbirds (AEWA), the Memorandum of Understanding on the Conservation of Migratory Birds of Prey in Africa and Eurasia (Raptors MoU), the Action Plan for the Conservation of African-Eurasian Migratory Landbirds (AEMLAP) as adopted through Resolution 11.17, and most other bird-related MoUs and action plans under CMS include measures related to the protection of birds;

Acknowledging the collaborative effort of the International Consortium on Combating Wildlife Crime working to bring coordinated support to national wildlife law enforcement agencies and regional networks, and the need to establish a coordination mechanism between the Consortium and CMS in relation to the mandates laid out in this Resolution on illegal killing, taking and trade of migratory birds;

Regretting that illegal killing, taking and trade of migratory birds still represent important factors against the achievement and maintenance of the favourable conservation status of bird populations in all major flyways, negatively affecting conservation actions undertaken by States and resulting in adverse impacts on the conservation, legal hunting, agriculture and tourism sectors;

Concerned that there are continued and intensified illegal killing, taking and trade of migratory birds in some areas, although also with significant reductions in others, and that the risk remains high that this is contributing to population declines of a number of species including some that are listed on CMS Appendix I and globally threatened with
extinction (e.g., Spoon-billed Sandpiper *Eurynorhynchus pygmeus*, Yellow-breasted Bunting *Emberiza aureola* and Marsh Seedeater *Sporophila palustris*);

_Aware_ that subsistence uses, recreational activities and organized crime are key drivers of such illegal killing, taking and trade for, _inter alia_, supply of food, trophies, cage birds, and support of traditional practices;

_Aware_ that such illegal killing, taking and trade are a cause of great national and international public concern along each flyway;

_Welcoming_ the practical responses by several Parties and Signatories to CMS instruments to international concern about illegal killing, taking and trade of migratory birds;

_Welcoming_ the recent enhanced focus on tackling the illegal killing, taking and trade of migratory birds in the Mediterranean region including through:

- Recommendation No 164 (2013) of the Bern Convention Standing Committee on the implementation of the Tunis Action Plan 2013-2020 for the eradication of illegal killing, trapping and trade of wild birds;

- The AEWA-led, multi-stakeholder Plan of Action to address bird trapping along the Mediterranean coasts of Egypt and Libya (UNEP/CMS/ScC18/Inf.10.12) the development of which was funded by the Government of Germany; and

- BirdLife International’s 2014 review of the scale and extent of illegal killing and taking in the Mediterranean and current development of protocols for monitoring the extent of such illegal activities;

_Recognizing_ the role of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) as the principal international instrument for ensuring that international trade in specimens of wild animals and plants does not threaten the species’ survival;

_Welcoming_ the Declaration of the London Conference on the Illegal Wildlife Trade which states that “Action to tackle the illegal trade in elephants and rhinoceroses will strengthen our effectiveness in tackling the illegal trade in other endangered species”;

_Acknowledging_ the role of legal and sustainable hunting of birds in sustainable livelihoods and conservation of habitats and the role of the hunting community in promoting and encouraging compliance with the law and sustainable hunting practices;

_Welcoming_ the recent synergies on actions to prevent illegal killing created between the Bern Convention, the EU, the Convention on Migratory Species (CMS), the Agreement on the Conservation of African-Eurasian Migratory Waterbirds (AEWA) and the Memorandum of Understanding on the Conservation of Migratory Birds of Prey in Africa and
Acknowledging the need to establish lines of action and co-operation on criminal matters affecting the environment in order to harmonise the national legislations;

Welcoming the support of the Criminal Justice Program of the EU and the efforts of European Birdlife partners to assess levels of implementation and enforcement of Directive 2008/99/EC on the Protection of the Environment through Criminal Law by EU Member States, and Welcoming also the creation of a European Network of Environmental Crime as a coordination mechanism between legal and other practitioners which works to prevent and prosecute illegal bird killing and capture, facilitate information exchange, as well as builds communication channels with other networks and MEA Secretariats;

Having regard to the Strategic Plan of the Convention on Biological Diversity 2011-2020, and its Aichi targets, and welcoming the international partnership launched to support Parties to achieve Aichi Biodiversity Target 12;

Referring to the Strategic Plan for Migratory Species 2015-2023 (UNEP/CMS/COP11/Doc.15.2) and in particular Target 6 that “fisheries and hunting have no significant direct or indirect adverse impacts on migratory species, their habitats or their migration routes, and impacts of fisheries and hunting be within safe ecological limits”;

Having regard to the Strategic Plan of AEWA, especially Target 2.3 “Measures to reduce and, as far as possible, eliminate, illegal taking of waterbirds, the use of poison baits and non-selective methods of taking are developed and implemented” and the Action Plan of the Raptors MoU, especially Priority Action 4a “Protecting all species from unlawful killing, including poisoning, shooting, persecution, and exploitation”; and

Acknowledging the widespread adoption of the zero tolerance approach, as well as progress at the Party level towards the monitoring of illegal activities and the adoption of a coordinated approach covering each stage of the chain of activities related to illegal killing, taking or trade;

The Conference of the Parties to the
Convention on the Conservation of Migratory Species of Wild Animals

1. Calls on Parties, non-Parties and other stakeholders, including non-governmental organizations, to engage in immediate cooperation to address the illegal killing, taking and trade of migratory birds through support of, and collaboration with, existing international initiatives and mechanisms to address these issues, as well as establishing (as appropriate and where added value can be assured) Task Forces targeted at facilitating concerted action to eliminate illegal killing, taking and trade of shared populations of migratory birds in those areas where such problems are prevalent;

2. Calls on the Secretariat to convene an Intergovernmental Task Force to Address Illegal Killing, Taking and Trade of Migratory Birds in the Mediterranean in conjunction with the Secretariats of AEWA, the Raptors MoU, the African-Eurasian Migratory Landbirds Action Plan and the Bern Convention, involving the Mediterranean Parties, including the
European Union, other interested Parties, including from outside the region, and other stakeholders such as BirdLife International and the Federation of Associations for Hunting and Conservation of the EU (FACE) in line with the Terms of Reference in Annex 1, to facilitate the implementation of that existing guidelines and action plans, any necessary new guidelines and action plans relating to the Mediterranean (particularly the Tunis Action Plan) and to consider whether any new guidelines, action plans or other recommendations to respond to specific problems are necessary;

3. **Calls also on** the Secretariat to actively explore with Parties and non-Party Range States and others in South and Central America and the Caribbean the potential to convene an Intergovernmental Task Force to Address Illegal Killing, Taking and Trade of Migratory Birds in that region;

4. **Urges** Parties and **encourages** non-Parties to ensure adequate national legislation to protect migratory species is in place and properly implemented and enforced, in line with CMS and its relevant associated instruments, especially AEWA and the Raptors MoU, and other international instruments, especially the Bern Convention;

5. **Urges** Parties and **invites** non-Parties to promote and ensure synergies between work to implement the Guidelines to Prevent Poisoning of Migratory Birds as adopted through Resolution 11.15, in particular in relation to poisoned baits, and to prevent illegal killing of birds;

6. **Requests** the Task Force to encourage monitoring of the trends in illegal killing, taking and trade of migratory birds using comparable methodologies internationally and to facilitate the exchange of best practice experience in combating these activities, especially between particular trouble spots around the globe, building on the experience gained in the Mediterranean;

7. **Instructs** the Secretariat, in collaboration with Parties and relevant international organizations, subject to the availability of funds, and building on the experience in the Mediterranean to support efforts to address illegal killing, taking and trade of migratory birds elsewhere in the world, including through the organisation of workshops, as appropriate;

8. **Calls on** Parties and **invites** non-Parties and stakeholders, with the support of the Secretariat, to strengthen national and local capacity for addressing illegal killing, taking and trade of migratory birds, *inter alia*, by developing training courses, translating and disseminating relevant materials and examples of best practice, sharing protocols and regulations, transferring technology, and promoting the use of online tools and other tools to address specific issues;

9. **Urges** Parties and **invites** UNEP and other relevant international organizations, bilateral and multilateral donors to support financially the operations of the Task Force to Address Illegal Killing, Taking and Trade of Migratory Birds in the Mediterranean, including through funding for its coordination, and subject to the results of monitoring mentioned in paragraph 5, the development of equivalent Task Forces at other trouble spots, including through the provision of financial assistance to developing countries for relevant capacity building; and

10. **Calls on** the Secretariat to report progress, on behalf of the Task Force to Address Illegal Killing, Taking and Trade of Migratory Birds in the Mediterranean and other similar initiatives elsewhere in the world, on implementation and, as much as possible, on assessment of the efficacy of measures taken, to COP12 in 2017.
TERMS OF REFERENCE OF THE INTERGOVERNMENTAL TASK FORCE TO ADDRESS ILLEGAL KILLING, TAKING AND TRADE OF MIGRATORY BIRDS IN THE MEDITERRANEAN (Mediterranean Illegal Killing, Taking and Trade Task Force (MIKT))

1. **Background and purpose**

This Task Force is established in line with the mandate provided by the Resolution adopted at COP11 entitled “The Prevention of Illegal Killing, Taking and Trade of Migratory Birds” to assist the Parties to the Convention on Migratory Species (CMS) and its associated instruments, relevant MEAs and Conventions to fulfil their obligations to protect migratory birds from illegal killing, taking and trade.

2. **Goal**

To ensure that no illegal killing, taking and trade of birds takes place in the Mediterranean Region.

3. **Role**

The role of the Task Force is to facilitate concerted efforts and procedures to combat illegal killing, taking and trade of migratory birds in the Mediterranean Region. It will facilitate the implementation of the existing guidelines and action plans in particular the Tunis Action Plan 2013-2020 for the Eradication of Illegal Killing, Trapping and Trade of Wild Birds, and to consider whether any new guidelines, action plans or other recommendations to respond to specific problems are necessary.

4. **Scope**

The Task Force will be regional covering all coastal States of the Mediterranean Sea.

The Task Force will cover all migratory bird taxa as identified by CMS and its relevant associated instruments, which regularly occur in the Mediterranean Region.

5. **Remit**

The Task Force will:

a. Promote and facilitate implementation of relevant decisions and plans adopted in the framework of MEAs or other frameworks;

b. Set priorities for its actions and implement them;

c. Assist in resource mobilization for priority actions;

d. Monitor the implementation of the relevant decisions and plans and their effectiveness and submit progress reports to the governing bodies of the participating MEAs;

e. Stimulate internal and external communication and exchange of information, experience, best practice and know-how; and

f. Strengthen regional and international networks.
6. **Membership**

The Task Force membership will comprise representatives of relevant government institutions in the field of environment, game management, law enforcement and judiciary in the Parties to the participating MEAs in the Mediterranean Region.

It will also involve observers from the Secretariats of the participating MEAs, as well as academic institutions, the hunting community, NGOs and other stakeholders, as appropriate.

The following representatives will also be invited to contribute to the Task Force:

- Representatives of Parties elsewhere in the African-Eurasian Flyway and beyond that wish to support the work of the Task Force;
- Representatives of the CMS Preventing Poisoning Working Group, African-Eurasian Migratory Landbird Working Group and Flyways Working Group; and
- Independent experts on migratory bird ecology and policy, the different kinds of illegal bird killing, taking and trade and their prevention.

7. **Governance**

The Task Force will elect a Chair and a Vice-Chair from amongst its members.

The Task Force will operate by seeking consensus, as much as possible, among the group.

The Task Force will operate in accordance with a *modus operandi*, which shall be established once the Task Force has been convened.

8. **Operation**

Funding permitting, a coordinator will be appointed by the Task Force with the following functions:

- Organize the meetings of the Task Force and prepare the background documents;
- Maintain and moderate the Task Force communication platform (website and intranet);
- Facilitate implementation of decisions of the Task Force, as necessary;
- Facilitate fundraising and resource mobilization; and
- Facilitate engagement with stakeholders within and beyond the Task Force.

Meetings of the Task Force will be convened at appropriate intervals, as considered necessary and funding permitting.

Between meetings business will be conducted electronically through an online workspace (intranet) within the Task Force’s website, which will provide the primary mode of communication.

The Task Force, in collaboration with Parties and relevant international organizations, subject to the availability of funds, will organize regional workshops in trouble spot areas to assist in developing appropriate local or regional solutions.
ACTION PLAN FOR MIGRATORY LANDBIRDS IN THE AFRICAN-EURASIAN REGION

Adopted by the Conference of the Parties at its 11\textsuperscript{th} Meeting (Quito, 4-9 November 2014)

*Concerned* that there is compelling scientific evidence of widespread declines of African-Eurasian migratory landbirds in recent decades, and that these declines are of growing conservation concern in both scientific and political arenas as the European breeding populations of some formerly widespread species have more than halved in the last 30 years;

*Aware* that the status of migratory landbirds is widely used as an indicator of the overall health of the environment and other biodiversity, *inter alia* the achievement of Target 12 of the CBD Strategic Plan for Biodiversity 2011-2020;

*Aware also* that the key drivers of this decline appear to be degradation of the breeding habitats, particularly within agricultural systems and woodland and forests, and in the non-breeding areas the combined factors of anthropogenic habitat degradation, unsustainable harvest and climate change;

*Recalling* that Resolution 10.27 of the Tenth Conference of the Parties urged Parties and invited non-Parties and other stakeholders with the CMS Secretariat to develop an Action Plan for the conservation of African-Eurasian migrant landbirds and their habitats throughout the flyway, for adoption at the 11\textsuperscript{th} Meeting of the Conference of the Parties, on the basis of which the COP can consider the need for a new instrument or using an existing instrument as a framework;

*Taking note* of the report of the workshop to elaborate an Action Plan on African-Eurasian Migratory Landbirds, that took place in Accra between 31 August and 2 September 2012, and *thank[ing]* the Government of Ghana for effectively hosting this workshop;

*Acknowledging* with thanks the contributions of the members of the Working Group on African-Eurasian Migratory Landbirds (the Working Group) established under the CMS Scientific Council;
Further acknowledging the essential role of the financial donors of this project, which made it possible to develop the Action Plan, in particular the Government of Switzerland and BirdLife International and its national partners;

Welcoming the establishment of the Migrant Landbirds Study Group (MLSG) as an international network of specialists and organizations working on research, monitoring and conservation of migratory landbird species, taking note of the results of its inaugural Meeting in Wilhelmshaven, Germany, 26-28 March 2014 and of the Friends of the Landbirds Action Plan (FLAP) as a forum for interested stakeholders, individual and organizations to follow and support the CMS Action Plan; and

Further welcoming the initiative of EURING (European Union for Bird Ringing) to produce a European Atlas of Bird Migration, based on recoveries of ringed birds, with the support of the CMS Secretariat;

The Conference of the Parties to the Convention on the Conservation of Migratory Species of Wild Animals

2. Especially urges Parties and encourages non-Parties to address the issue of habitat loss and degradation of migratory landbird species through the development of policies that maintain, manage and restore natural and semi-natural habitats within the wider environment, including working with local communities, and in partnership with the poverty alleviation community and the agriculture and forestry sectors in Africa;

3. Requests Parties and invites Range States to implement existing measures under CMS, AEWA, the Raptors MoU and other relevant international environmental treaties, especially where these contribute to the objectives of the Landbirds Action Plan, in order to increase the resilience of migratory landbird populations and their potential to adapt to environmental change;

4. Calls on Parties to urgently address the problems of illegal and of unsustainable taking of landbirds during migration and wintering and ensure that national conservation legislation is in place and enforced and implementation measures are taken, and requests the Secretariat to liaise with the Bern Convention and other relevant fora in order to facilitate the national and international mitigation of the problem of illegal killing of birds in line with Resolution 11.16 on the Prevention of Illegal Killing, Taking and Trade of Migratory Birds;

5. Urges Parties and invites non-Parties to implement the Guidelines to Prevent Poisoning of Migratory Birds as adopted through Resolution 11.15; in particular those referring to agricultural pesticides which have a special significance for migratory landbirds as a major source of mortality;

6. Requests the Scientific Council and the Working Group, in liaison with the Migrant Landbirds Study Group to promote work to address key gaps in knowledge and future
research directions, in particular through the analysis of existing long-term and large-scale datasets, the European Atlas of Bird Migration, the use of new and emerging tracking technologies, field studies of migrant birds in Sub-Saharan Africa, use of survey and demographic data from the Eurasian breeding grounds and use of remote sensing earth observation data of land cover change in sub-Saharan Africa;

7. **Further requests** the Scientific Council and the Working Group, in liaison with the Friends of the Landbirds Action Plan to promote and encourage increased public awareness of, and support for, migratory landbird conservation along the length of the flyway among the general public and stakeholders, including about how individual birds are shared across countries and act as indicators of the overall health of the environment, of people and all biodiversity;

8. **Instructs** the Secretariat, in collaboration with Parties and relevant international organizations, subject to the availability of funds, to organize regional workshops to address specific issues and promote the implementation of the Action Plan and share best practice and lessons learnt in the effective conservation of migratory landbirds;

9. **Further instructs** the Secretariat, subject to the availability of funds, to organize in the intersessional period between COP11 and COP12 a consultation meeting of Range States to agree on whether the Action Plan should remain as a stand-alone document or whether a new CMS instrument should be developed or an existing CMS instrument should be used as institutional framework;

10. **Calls on** Parties and invites non-Parties and stakeholders, with the support of the Secretariat, to strengthen national and local capacity for the implementation of the Action Plan including, *inter alia*, by developing partnerships with the poverty alleviation community and developing training courses, translating and disseminating examples of best practice, sharing protocols and regulations, transferring technology, and promoting the use of online tools to address specific issues that are relevant to the Action Plan;

11. **Requests** the Working Group and the CMS Scientific Council, in liaison with the Migrant Landbirds Study Group and the Friends of the Landbirds Action Plan, with the support of the CMS Secretariat, to develop as an emerging issue Action Plans for a first set of species including the Yellow-breasted Bunting *Emberiza aureola*, Turtle Dove *Streptopelia turtur* and European Roller *Coracias garrulus*;

12. **Urges** Parties and invites UNEP and other relevant international organizations, bilateral and multilateral donors, including from the poverty alleviation community, to support financially the implementation of the Action Plan including through the provision of financial assistance to developing countries for relevant capacity building;

13. **Requests** the continuation of the Working Group until COP12, extending its membership to incorporate expertise from geographical regions currently absent, to facilitate and monitor the implementation of the Action Plan; and

SAKER FALCON \textit{Falco cherrug} GLOBAL ACTION PLAN (SakerGAP)

Adopted by the Conference of the Parties at its 11\textsuperscript{th} Meeting (Quito, 4-9 November 2014)

\textit{Noting} that at its Tenth Meeting, the CMS Conference of the Parties (COP10) in Resolution 10.28 decided on an immediate Concerted Action supported by all Parties, including the establishment of a Task Force under the auspices of the Coordinating Unit of the CMS Memorandum of Understanding on the Conservation of Migratory Birds of Prey in Africa and Eurasia (Raptors MoU) to bring together Range States, Partners and interested parties, to develop a coordinated Global Action Plan, including a management and monitoring system, to conserve the Saker Falcon;

\textit{Further noting} that CMS COP10 decided that improvements in the conservation status of the Saker Falcon in any Range State may allow sustainable taking from the wild in that Range State under a management system, and that in such cases a Party or Parties may request an exclusion from the Appendix I listing to apply in that Range State, and that the Task Force would endeavour to facilitate this process through the Scientific Council inter-sessionally and through the Conference of the Parties;

\textit{Recalling} that the Saker Falcon Task Force was mandated to report to: the First Meeting of the Signatories to the CMS Raptors MoU held in the last quarter of 2012; the 18\textsuperscript{th} Intersessional CMS Scientific Council Meeting; and, to the 11\textsuperscript{th} Meeting of the CMS Conference of the Parties, with consideration given to down-listing the Saker Falcon at that time;

\textit{Recognizing} that the listing of the Saker Falcon in CMS Appendix I excludes the population in Mongolia, in recognition of its Saker Falcon conservation and management programme, which has been carried out in collaboration with the Environment Agency - Abu Dhabi, on behalf of the Government of the United Arab Emirates;

\textit{Further recognizing} that the work of the Saker Falcon Task Force has been a unique and productive partnership involving a wide range of parties, and appreciative in particular of the financial contributions made by the Parties at CMS COP10, the European Union, the Saudi Wildlife Authority on behalf of the Government of the Kingdom of Saudi Arabia, and by the CITES Secretariat, as well as of the wider support in the form of working time contributed by all the members of the Saker Falcon Task Force; and

\textit{Stressing} the need for immediate action by Range States and stakeholders to address the principal threats to the Saker Falcon at all stages of its life cycle and across its full range;
The Conference of the Parties to the
Convention on the Conservation of Migratory Species of Wild Animals

1. Congratulates the Saker Falcon Task Force on its work, including especially the transparent consensus-building approach that has been employed, and recognizes the importance of the development of the Saker Falcon Global Action Plan (SakerGAP) for the conservation and management of the species;

2. Adopts the ten-year SakerGAP presented as UNEP/CMS/COP11/Doc.23.1.5.2 as the basis for action on the conservation and management of the Saker Falcon in the coming triennium and beyond, with the overall goal ‘to re-establish a healthy and self-sustaining wild Saker Falcon population throughout its range, and to ensure that any use is sustainable’;

3. Decides to continue the Concerted Action for the Saker Falcon during the next triennium at least, to enable initial implementation of the SakerGAP to begin;

4. Further decides to continue the Saker Falcon Task Force, under the auspices of the Coordinating Unit of the CMS Raptors MoU, and instructs the Task Force to:
   - Actively promote the implementation of the SakerGAP, including by continuing to facilitate engagement, communication, cooperation and collaboration between the stakeholders;
   - Further develop, refine and implement an adaptive management and monitoring framework to improve the present conservation status of the Saker Falcon through, inter alia, regulated and sustainable use; and
   - Keep under review the option to down-list the species;

5. Welcomes the offer by the International Association for Falconry and Conservation of Birds of Prey (IAF) to lead in taking forward the first Saker Falcon Task Force Flagship Project to develop an Online Information Portal to engage falcon hospitals, falconers and trappers within a Saker Falcon Network;

6. Recommends the following reporting framework and timeline for the Task Force:
   - Report to the Second Meeting of Signatories of the CMS Raptors MoU;
   - Report to the 19th Inter-sessional CMS Scientific Council Meeting; and
   - Review progress on implementing the SakerGAP and report to the 12th Meeting of the CMS Conference of the Parties;

7. Urges Parties, Range States and stakeholders to actively support, including by voluntary financial contributions, the work of the Saker Falcon Task Force;

8. Further urges Parties, Range States and stakeholders to work collaboratively to immediately begin to mobilize the considerable resources required to fully implement the SakerGAP throughout the species’ range;
9. *Invites* Parties and Range States to integrate implementation of the SakerGAP into their national biodiversity strategies and action plans (NBSAPs), and/or National or Regional Species Action Plans developed under the Convention on Biological Diversity (CBD); and

10. *Instructs* the CMS Secretariat to convey this Resolution to the secretariats of the other Multilateral Environmental Agreements, in particular CITES, seeking their support and contributions to the implementation of the SakerGAP.
THE TAXONOMY AND NOMENCLATURE OF BIRDS
LISTED ON THE CMS APPENDICES

Adopted by the Conference of the Parties at its 11th Meeting (Quito, 4-9 November 2014)

Recalling Resolution 10.13 on Standardized Nomenclature of Birds Listed on the CMS Appendices that requests the Chair of the Scientific Council to liaise with the Chairs of the Scientific Advisory Bodies of the Biodiversity-related Conventions, the Secretariats of relevant MEAs and relevant international organizations, including IUCN, BirdLife International, Wetlands International and UNEP-WCMC, with the aim of evaluating the possible adoption of a single nomenclature and taxonomy for birds, and to inform the Scientific Council at its eighteenth meeting with a view to adopting an appropriate Resolution at COP11;

Taking note of the report of the Ad Hoc Meeting on Harmonization of Bird Taxonomy which took place in Formia (Italy) on 8 October 2013 (UNEP/CMS/ScC18/Inf.9.1) and thanking the Chair of the Scientific Council for convening that Meeting;

Taking note also of the report of the CITES Animals Committee that took place in Veracruz (México) from 28 April to 3 May 2014;

Noting that regarding albatrosses and petrels, COP10 adopted the taxonomy used by ACAP as the Convention’s standard nomenclatural reference, and that ACAP takes account of the most recent taxonomic information on species of albatrosses and petrels;

Aware that international efforts to take coherent action to conserve and sustainably use biodiversity at the species level can be significantly hampered if there is no common understanding of which animals or plants are included under a particular species name and that this lack of understanding can present particular challenges for activities such as the implementation of conventions, potentially with legal implications;

Further aware that a harmonization of bird taxonomy and nomenclature among MEAs and other partners, such as CMS, CITES, Ramsar, IUCN, BirdLife International, Wetlands International and UNEP-WCMC, can improve synergies benefitting migratory species conservation and better implementation of CMS Family instruments;

Recognizing that the Chairs of the Scientific Advisory Bodies of the Biodiversity-related Conventions (CSAB) have repeatedly expressed their support for the idea of moving
towards harmonization of nomenclature and taxonomy in the lists of species that they use, and requested stronger cooperation among MEAs towards that goal;

*Emphasising* that stability over time in the taxonomy and nomenclature of species listed under CMS is essential to ensure legal security for the implementation of the Convention;

*Acknowledging* that the adoption of a new reference for birds may imply cases of synonymy, species aggregation (lumping) and/or splitting of species, and that CMS has agreed rules on how to act in such cases and their consequent reflection in the Appendices; and

*Noting* the recommendation provided by the CMS Scientific Council at its 18th Meeting (Bonn, 1-3 July 2014), on a standard nomenclature reference for non-passerine birds, and also noting that the taxonomy of albatrosses and petrels in this reference is consistent with that adopted by ACAP;

The Conference of the Parties to the Convention on the Conservation of Migratory Species of Wild Animals

1. *Adopts* the reference recommended by the 18th Meeting of the CMS Scientific Council as the CMS standard reference for bird taxonomy and nomenclature for non-Passerine species:

2. *Confirms* that for Passerine birds, the standard references for taxonomy and nomenclature remain for the time being as outlined in Resolution 6.1, namely:

   For taxonomy and nomenclature at the level of orders and families:

   For taxonomy and nomenclature at the level of genera and species:

4. **Reaffirms** the rules adopted by the Convention for the treatment of cases of synonymy, species splitting and species aggregation (lumping) as a result of a change of standard nomenclatural reference, as follows:

- **Synonymy:** corrections can be made automatically as there is no change of status for any listed population;

- **Splitting:** when a listed taxon is split into two or more, each of the resulting taxa retains the listing status of the former aggregate taxon; and

- **Aggregation (lumping):** if a taxon listed in either Appendix I or Appendix II of the Convention is merged with one or more unlisted taxa, under its name or that of one of the unlisted taxa, the entire aggregate taxon will be listed in the Appendix that included the originally listed, narrower taxon in all cases where the unlisted entity thus added has the same conservation status as, or a worse one than, that of the previously listed taxon. In all other cases, a taxonomic or geographical restriction will be introduced, pending consideration by the Scientific Council and the Conference of the Parties of extended listing proposals;

5. **Instructs** the Secretariat, in consultation with the Scientific Council and the Depositary, to adapt the CMS Appendices according to the new bird reference adopted and the rules outlined above;

6. **Further instructs** the Secretariat to transmit this Resolution to the secretariats of CITES and the Ramsar Convention for consideration by their scientific bodies, and to continue to liaise with the avian CMS instruments and MEA Secretariats with a view to strengthening harmonization of taxonomic references; and

7. **Urges** other MEAs to adopt the same standard taxonomic reference for non-Passerine species of birds.
CONSERVATION OF MIGRATORY SHARKS AND RAYS

Adopted by the Conference of the Parties at its 11th Meeting (Quito, 4-9 November 2014)

Aware of the critical role that migratory sharks and rays play in marine ecosystems and local economies, and concerned about the significant mortality of these species, especially those listed on Appendices I and II of the Convention from a range of impacts and threats;

Noting IUCNs 2014 assessment on the conservation status of sharks, rays (including skate, guitarfish, sawfish, wedgefish, numbfish, etc.) and chimaera species (Chondrichthyan fish), estimating that one quarter of all examined species are threatened with extinction, and only one third are classified as being of low conservation concern;

Noting that the IUCN has warned that rays are generally more threatened and less protected than sharks, and that the Giant Manta Ray was added to CMS Appendix I and II at the Tenth Meeting of the Conference of the Parties;

Noting with concern that overfishing is the main driver behind significant declines in shark and ray species worldwide, threatening many populations, the stability of marine ecosystems, sustainable fisheries, shark- and ray-based eco-tourism and food security;

Aware that finning, the removal and retention of the fins of sharks (and some rays) and the discard at sea of the rest of the carcass, is associated with unsustainable mortality and unacceptable waste;

Also aware that the demand for shark (and some rays) fins can fuel unsustainable practices and overexploitation of these species;

Recalling the UN Fish Stocks Agreement that aims to ensure the long-term conservation and sustainable use of straddling and highly migratory fish stocks and that the United Nations General Assembly, adopted consensus Resolutions on sustainable fisheries every year since 2007 (62/177, 63/112, 64/72, 65/38, 66/68 and 67/79, 68/71), calling upon States to take immediate and concerted action to improve the implementation of and compliance with existing regional fisheries management organization or arrangement measures that regulate shark fisheries and incidental catch of sharks, in particular those measures which prohibit or restrict fisheries conducted solely for the purpose of harvesting shark fins, and, where necessary, to consider taking other measures, as appropriate, such as requiring that all sharks be landed with each fin naturally attached;
Aware that, despite past and present scientific research and monitoring, knowledge of the biology, ecology and population dynamics of many migratory sharks and rays is deficient, and that it is necessary to promote stronger co-operation among fishing nations on research, monitoring, enforcement and compliance in order to effectively implement conservation measures;

Noting that several RFMOs have adopted science-based conservation and management measures, applicable to all fishing vessels operating within the RFMO Convention areas, aiming at eradicating shark finning and ensuring protection and sustainable management of specific sharks species harvested as target and/or bycatch species;

Further noting that, with effect from 14 September 2014, eight species of shark and all manta rays are included in Appendix II of the Convention on the International Trade in Endangered Species (CITES), and that all species of sawfishes are listed in Appendix I;

Emphasizing the importance of the International Plan of Action for the Conservation and Management of Sharks, which was adopted by the Food and Agriculture Organization (FAO) of the United Nations in 1999, in providing guidance on the development of such measures, and welcoming the fact that 18 out of 26 top fishing nations have adopted National Plans of Action for Sharks (NPOA-Sharks);

Further emphasising the prominent role of RFMOs in establishing conservation and management measures for sharks, many of which are binding upon all fishing vessels operating within the RFMO convention areas, based on best available data and scientific advice provided by their Scientific Committees;

Recalling Recommendation 8.16 on the Conservation of Migratory Sharks requesting all Parties to strengthen measures to protect migratory shark species against threats, including habitat destruction, IUU fishing, and fisheries bycatch; and

Recalling the establishment of the CMS Memorandum of Understanding on the Conservation of Migratory Sharks (Sharks MoU) in 2010, which aims to achieve and maintain a favourable conservation status for migratory sharks based on the best available scientific information, taking into account the socio-economic and other values of these species, and the first Meeting of the Signatories in 2012 where the Conservation Plan for Migratory Sharks was adopted;

The Conference of the Parties to the
Convention on the Conservation of Migratory Species of Wild Animals

1. Urges Parties to ensure that all fishing and trade of sharks and rays are ecologically sustainable, and that a lack of scientific data does not preclude conservation or fisheries management action towards this objective;

2. Further urges Parties to take steps to eliminate shark finning where they have not already done so, including implementing measures such as prohibiting the removal of sharks fins at sea and discarding the carcass at sea, requiring sharks to be landed with all fins naturally attached, or other measures in line with applicable UN General Assembly Resolutions;
3. **Further urges** Parties, where they have not already done so, to develop and implement National Plans of Action for Sharks (NPOA-SHARKS) in accordance with FAO’s International Plan of Action for Sharks - IPOA-SHARKS;

4. **Further urges** Parties to comply with existing conservation and management measures in particular those of Regional Fisheries Management Organizations (RFMOs), where applicable, including compliance with data collection and submission requirements/ obligations to allow for reliable stock assessments by the Scientific Committees of these bodies;

5. **Further urges** Parties to develop and implement guidelines and procedures for implementing the provisions of CITES regulating the trade of shark products deriving from species listed under the Appendices of the Convention;

6. **Encourages** Parties to identify the needs of training and capacity development in research, species specific data collection and monitoring, and to facilitate initiatives to enhance institutional capacities and competencies in shark and ray identification, management and conservation techniques;

7. **Requests** Parties to improve the biological and ecological knowledge of migratory elasmobranchs populations and identify ways to make fishing gears more selective to support effective conservation measures through research, monitoring and information exchange and promote population assessments and research including within the frame of RFMOs and their scientific bodies where applicable;

8. **Encourages** Parties to prioritize programmes to monitor and document directed shark and ray fisheries and those fisheries where sharks and rays are a significant bycatch, which may include vessel monitoring systems, inspections and on-board observer or monitoring programmes;

9. **Further encourages** Parties, where appropriate, to promote the establishment of science-based conservation targets for migratory sharks and rays, and indicators to assess progress towards reaching these targets, including within the RFMOs where applicable;

10. **Requests** Parties to identify and conserve critical habitats and life stages, and migration routes, with a view to contributing to the development and implementation of effective conservation and sustainable management measures, based on the best available scientific knowledge and the precautionary approach;

11. **Encourages** Parties, RFMOs and other relevant bodies to minimize the impact of fishing in migration corridors and other habitats deemed critical to the recovery and sustainability of shark and ray populations, including those that straddle jurisdictional boundaries;

12. **Invites** Parties, Range States, and Cooperating Partners to sign the Sharks MoU and engage in conservation and research measures in order to prevent the unsustainable use of sharks and rays;
13. **Instructs** the Secretariat to continue to liaise with FAO, RFMOs, CITES, civil society and other relevant stakeholders in order to promote coordinated actions for the conservation and sustainable use of sharks and rays; and

14. **Encourages** Parties to bring to the attention of FAO, RFMOs and other relevant bodies the objectives of CMS and the CMS Sharks MoU with regard to the Conservation of Sharks and Rays with the aim to ensure cooperation, complementarities and improve efficiency of global instruments and bodies sharing similar objectives in relation to elasmobranchs conservation and management.
SINGLE SPECIES ACTION PLAN FOR THE LOGGERHEAD TURTLE
(Caretta caretta) IN THE SOUTH PACIFIC OCEAN

Adopted by the Conference of the Parties at its 11th Meeting (Quito, 4-9 November 2014)

Noting that the Loggerhead Turtle (Caretta caretta) was listed on CMS Appendix II in 1979 and Appendix I in 1985 and was designated for Concerted Actions for the period 2012-2014;

Noting also that there are numerous existing instruments and mechanisms that address sea turtles in the South Pacific and the Eastern Pacific, including the Secretary of the Pacific Regional Environment Programme (SPREP) the Inter-American Sea Turtle Convention (IAC), and the Permanent Commission of the South Pacific (CPPS) as well as fora that address sea turtle bycatch, such as the Western and Central Pacific Fisheries Commission, the South Pacific Regional Fisheries Management Organisation (SPRFMO) and the Inter-American Tropical Tuna Commission (IATTC);

Aware that, while there is one management unit for Caretta caretta in the South Pacific Ocean, there are no international instruments that address conservation issues of this species across the entire Pacific Ocean;

Noting with appreciation the efforts of the COP Appointed Councillor for Marine Turtles in the development of this Action Plan; and

Further noting with appreciation the role of the Australian Government in funding a Meeting of Range States, convened by CMS in Brisbane, Australia, 25-27 March 2014 to develop a draft Single Species Action Plan;

The Conference of the Parties to the
Convention on the Conservation of Migratory Species of Wild Animals

1. Adopts the Single Species Action Plan for the Loggerhead turtle (Caretta caretta) in the South Pacific Ocean as submitted to COP11 in document UNEP/CMS/COP11/Doc.23.2.2/Rev.1;

2. Urges South Pacific Parties and other Parties with fishing fleets operating in the South Pacific Ocean, and invites South Pacific non-Party Range States to implement relevant provisions of the Action Plan;
3. **Encourages** other Parties to provide technical and/or financial support to activities outlined in the Action Plan;

4. **Invites** other relevant intergovernmental frameworks, such as the Inter-American Turtle Convention, Secretariat of the Pacific Regional Environmental Programme and Regional Fisheries Management Organisations operating in the South Pacific Ocean, to take into account the provisions of the Action Plan in the consideration of their activities and to support implementation of relevant Action Plan activities that fall within their mandate, as appropriate;

5. **Instructs** the Secretariat to bring the Action Plan to the attention of all Range States and relevant intergovernmental organisations and to monitor the implementation of the Action Plan; and

6. **Requests** the COP appointed Councillor for Marine Turtles to provide guidance for the implementation of the Action Plan and report on progress to COP12.
LIVE CAPTURES OF CETACEANS FROM THE WILD FOR COMMERCIAL PURPOSES

Adopted by the Conference of the Parties at its 11\textsuperscript{th} Meeting (Quito, 4-9 November 2014)

\textit{Noting} the continuing activities targeting wild small cetacean populations for live capture, including several species listed on CMS Appendices I and II, for public display in commercial aquaria and travelling shows;

\textit{Noting} that the IUCN (through the work of the Species Survival Commission’s Cetacean Specialist Group) recognizes that live capture can be a serious threat to local cetacean populations when unmanaged and undertaken without a rigorous programme of research and monitoring, because the removal of live cetaceans from the wild, for captive display and/or research, is equivalent to incidental or deliberate killing, since the animals brought into captivity or killed during capture operations are no longer available to help maintain their natural populations;

\textit{Noting} the regularly repeated advice from the International Whaling Commission that populations of small cetaceans should not be subject to removals where such removals have not been shown to be sustainable;

\textit{Recalling} that Article III (5) of CMS requires that Parties that are Range States of a migratory species listed in Appendix I shall in principle prohibit the taking of animals belonging to such species;

\textit{Also recalling} that CMS Resolution 10.15 on a Global Programme of Work for Cetaceans requests the CMS Secretariat and Scientific Council to continue and increase efforts to collaborate with other relevant international fora with a view to avoiding duplication, increasing synergies and raising the profile of the CMS and CMS cetacean-related agreements in these fora;

\textit{Further recalling} that Resolution 9.9 on Migratory Marine Species expresses concern that migratory marine species face multiple, cumulative and often synergistic threats with possible effects over vast areas, such as by-catch, over-fishing, pollution, habitat destruction or degradation, marine noise impacts and deliberate hunts as well as climate change;

\textit{Noting} that Resolution 8.22 on human–induced impacts on cetaceans does not sufficiently address the issue of live capture for commercial purposes;
Annex VIII: Resolution 11.22

Reiterating its urgent call in Resolution 10.15 on Parties to promote the integration of cetacean conservation into all relevant sectors by coordinating their national positions among various conventions, agreements and other international fora;

Aware that all regional cetacean-related instruments concluded under CMS contain provisions, or have in place plans, relevant to the issue of live captures, namely that:

- the Whale and Dolphin Action Plan (2013-2017) of the CMS Memorandum of Understanding for the Conservation of Cetaceans and their Habitats in the Pacific Islands Region includes “direct take” as one of five major hazards to whale and dolphin populations in the Pacific Islands region and includes minimizing its impact as an objective of the Plan;

- the Small Cetacean Action Plan of the CMS Memorandum of Understanding Concerning the Conservation of the Manatee and Small Cetaceans of Western Africa and Macaronesia calls on Signatories to ensure that any live capture activities in the region do not affect the viability of local populations and comply with international regulations and agreements;

- Paragraph 4 of the Annex to the ASCOBANS Agreement requires Parties to “endeavour to establish (a) the prohibition under national law, of the intentional taking and killing of small cetaceans where such regulations are not already in force” pursuant to the Article 2.1 aim to achieve and maintain a favourable conservation status for small cetaceans; and

- Article II of the ACCOBAMS Agreement requires Parties to “prohibit and take all necessary measures to eliminate, where this is not already done, any deliberate taking of Cetaceans”, subject to limited exceptions “only in emergency situations” and “for the purpose of non-lethal in situ research aimed at maintaining a favourable conservation status for cetaceans”;

Also aware that:

- The Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) includes all cetacean species in its Appendices I or II, where imports of specimens of CITES Appendix I species to be used for primarily commercial purposes are prohibited;

- the Bern Convention on the Conservation of European Wildlife and Natural Habitats prohibits “all forms of deliberate capture and keeping” of species included in its Appendix II, including the bottlenose dolphin (*Tursiops truncatus*) and the killer whale (*Orcinus orca*);

- European Union Council Directive 92/43/EEC on the conservation of natural habitats and of wild fauna and flora lists all cetaceans in its Annex IV and subject to exceptions, requires EU Member States to take requisite measures to establish a system of strict protection for these species in their natural range, prohibiting all forms of deliberate capture or killing of wild specimens, and to prohibit the sale or exchange of cetaceans;
Article 11 (1) (b) of the Specially Protected Areas and Wildlife Protocol of the Wider Caribbean Region requires each Party to ensure protection and recovery of fauna species on its Annex 2 (including cetaceans) by prohibiting “the taking, possession or killing (including, to the extent possible, the incidental taking, possession or killing) or commercial trade” in such species or their parts or products; and

The so-called Buenos Aires Group, comprised of the majority of Latin American IWC member states, adopted in 2007 the Latin American Strategy for Cooperation on Cetacean Conservation, which assumes among its main commitments non-lethal use of cetaceans;

Acknowledging increasing global concern for animal welfare in relation to the live capture, transport and keeping of cetaceans; and

Acknowledging that a number of countries including Argentina, Australia, Brazil, Chile, China, Costa Rica, India, Lao People’s Democratic Republic, Malaysia, Member States of the EU, Mexico, Monaco, Nicaragua, Peru, Philippines, Singapore, Thailand and Uruguay, have already established total or partial prohibitions of live captures of wild cetaceans in their national waters;

The Conference of the Parties to the

Convention on the Conservation of Migratory Species of Wild Animals

1. Invites Parties that have not already done so to develop and implement national legislation, as appropriate, prohibiting the live capture of cetaceans from the wild for commercial purposes;

2. Urges Parties to consider taking stricter measures in line with CITES Article XIV with regard to the import and international transit of live cetaceans for commercial purposes that have been captured in the wild;

3. Requests the Secretariat and the Scientific Council to seek to enhance cooperation and collaboration with CITES and the IWC on small cetacean species targeted by live captures from the wild;

4. Calls on Parties to support and, where appropriate and possible, contribute to cooperation and collaboration with CITES and IWC on small cetacean species targeted by live captures from the wild;

5. Urges Parties and encourages Parties or Signatories to relevant CMS instruments and non-Party States to actively discourage new live captures from the wild for commercial purposes; and

6. Encourages Parties to share data and information on live captures with the IWC and other appropriate fora.
CONSERVATION IMPLICATIONS OF CETACEAN CULTURE

Adopted by the Conference of the Parties at its 11th Meeting (Quito, 4-9 November 2014)

Recalling that Resolution 10.15 Global Programme of Work for Cetaceans (2012-2024) instructed the CMS Scientific Council’s Aquatic Mammals Working Group to provide advice on the impact of the emergent science of cetacean social complexity and culture as it related to regional populations;

Aware that the CMS Scientific Council expert workshop on the conservation implications of cetacean culture held in April 2014 recommended that “management decisions should be precautionary and assume that populations may contain discrete social elements which have conservation significance warranting further investigation”;

Noting that the CMS Scientific Council endorsed the recommendations of the expert workshop on the conservation implications of cetacean culture, contained in UNEP/CMS/COP11/Inf.18;

Recognizing that a number of socially complex mammalian species, such as several species of cetaceans, great apes and elephants, show evidence of having non-human culture (hereafter ‘culture’);

Concerned that highly social species face unique conservation challenges;

Aware that the social transmission of knowledge between individuals may increase population viability and provide opportunities for the rapid spread of innovations and thus adaptation to environmental change;

Aware that this transmission of knowledge may also increase the impact of anthropogenic threats or can operate synergistically with anthropogenic threats to compound their impact on a specific social group or more widely;

Recognizing that the impact of removal of individuals from populations of socially complex species may have consequences beyond simply a reduction in absolute numbers;

Also recognizing that populations of some species are better delineated by cultural behaviour than genetic diversity or geographic isolation;
Conscious that the scientific investigation of culture and social complexity in mammals is a rapidly evolving field which is increasingly important for conservation management; and

Considering that the CMS Family is in a strong position to take account of this emerging information in its work;

The Conference of the Parties to the Convention on the Conservation of Migratory Species of Wild Animals

1. Welcomes the report of the CMS Scientific Council Expert Workshop on the conservation implications of cetacean culture, contained in UNEP/CMS/COP11/Inf.18;

2. Encourages Parties to consider culturally transmitted behaviours when determining conservation measures;

3. Also encourages Parties and other stakeholders to assess anthropogenic threats to socially complex mammalian species on the basis of evidence of interactions of those threats with social structure and culture;

4. Urges Parties to apply a precautionary approach to the management of populations for which there is evidence that influence of culture and social complexity may be a conservation issue;

5. Encourages Parties and other stakeholders to gather and publish pertinent data for advancing the conservation management of these populations and discrete social groups;

6. Requests the CMS Scientific Council to establish an intersessional expert working group dealing with the conservation implications of culture and social complexity, with a focus on, but not limited to cetaceans;

7. Invites relevant CMS Scientific Councillors for taxa other than cetaceans to review the findings of the workshop and engage in this expert group; and

8. Requests the expert group, subject to availability of resources, to:

   8.1 Develop a list of priority species listed on CMS for a comprehensive investigation of culture and social structure and commence more detailed analysis as appropriate, including for example developing a list of key factors that should be taken into consideration for effective conservation; and

   8.2 Report its findings and any proposals for future work through the CMS Scientific Council to CMS COP12.
THE CENTRAL ASIAN MAMMALS INITIATIVE

Adopted by the Conference of the Parties at its 11th Meeting (Quito, 4-9 November 2014)

Deeply concerned that large mammal migrations in one of the last remaining regions supporting long-distance movements, the Central Asian plains and mountains, are severely threatened by overexploitation of wildlife as well as exploitation of minerals and other natural resources and that the habitats upon which large mammals depend are becoming lost, degraded and fragmented at an unprecedented rate;

Recognizing that extractive industries, infrastructure and fences can have a particularly detrimental impact on the conservation status of migratory mammals and may cause direct mortality and fragmentation of habitats, disrupting essential movement from one place to another and further recognizing the urgent need for practical guidelines to mitigate impacts on migratory mammals from linear infrastructure, including the threat from increased human habitation and associated poaching threats along infrastructure routes, not only in Central Asia, but across the wider Asian region;

Aware that long-distance movements of many species are unpredictable, which increases the need to maintain the permeability of large landscapes;

Aware that migratory species and their habitats provide essential ecosystem services as well as cultural heritage value and economic benefits for instance through sustainable use and tourism, and that many human communities directly and indirectly rely on the availability of large mammal species and on intact ecosystems for their livelihoods;

Acknowledging the Central Eurasian Aridland Mammals Concerted Action established by Recommendations 8.23 and 9.1, which highlights the exceptional importance of Eurasian arid ecosystems for migratory species and the crucial role of CMS in conserving them, covering in particular five large mammal species listed on Appendix I (four of these designated for Concerted Action)\(^1\), and a further six on Appendix II (four of these designated for Cooperative Action)\(^2\);

---

\(^1\) Appendix I - Bukhara/Yarkand deer *Cervus elaphus yarkandensis* (listed on both Appendices, not designated for Concerted Action), Wild camel *Camelus bactrianus*, Wild yak *Bos grunniens*, Cheetah *Acinonyx jubatus*, Snow leopard *Uncia uncia*.

Further acknowledging the multiple mandates of CMS to work in the region, including Memoranda of Understanding covering the Saiga Antelope and Bukhara Deer;

Noting that most of the species in the Central Asian region listed in the Appendices of CMS are also included in the Appendices of the Convention on the International Trade in Endangered Species of Wild Fauna and Flora (CITES), thus offering opportunities for synergy as envisaged in the Memorandum of Understanding and Joint Work Programme between the Secretariats of the two Conventions;

Noting with satisfaction the progress made since COP10 in implementing these mandates, in particular the International Single Species Action Plan for the Conservation of the Argali Ovis ammon (CMS/UNEP/COP11/Doc.23.3.3), the assessment of gaps and needs in relation to migratory mammals in Central Asia (CMS/UNEP/COP11/Inf.21) and the Programme of Work for a broader Central Asian mammals initiative comprising all activities aimed at conserving large migratory mammals and implementing CMS in the Central Asian region;

Recalling the decisions under the Future Shape process, including activities 8 and 15 under Res.10.9 urging Parties to “identify opportunities for cooperation and coordination at the local and regional level through the creation of synergies based on geography”, and “to seek opportunities to develop synergistic relationships either based on geography or species clustering“, such as with the development of a common conservation programme;

Taking into account the Bishkek Declaration on the Conservation of Snow Leopards and the comprehensive, long-term Global Snow Leopard and Ecosystem Protection Programme adopted by Range States at the Global Snow Leopard Forum in Bishkek, Kyrgyz Republic in October 2013, which called upon all Range States to declare the year of 2015 as the International Year of the Snow Leopard, and October 23 as an annually celebrated Snow Leopard Day;

Grateful for the financial and in-kind support from the Governments of Switzerland and Germany and the European Union through the Deutsche Gesellschaft für Internationale Zusammenarbeit GmbH (GIZ) in pursuing the work for the conservation of migratory mammals in the Central Asian region; and

Further grateful to the Kyrgyz Government for hosting the Stakeholder Meeting on the Conservation of Large Mammals in Central Asia on 23-25 September 2014 in Bishkek, which developed the Programme of Work for the Central Asian Mammals Initiative, annexed to the present Resolution;

The Conference of the Parties to the
Convention on the Conservation of Migratory Species of Wild Animals

1. Adopts the Programme of Work for the Central Asian Mammals Initiative contained in the Annex to this Resolution and endorses the concept of the Central Asian Mammals Initiative (CAMI) as an innovative and integrative approach building on a regional programme, that identifies synergies based on common or shared work programmes, geography, species and interests in line with Future Shape decisions, to enhance cooperation and coordination at the local, regional and international level, to minimize institutional overlap and to improve efficient implementation of CMS and its instruments on large mammals in the region;
2. Further adopts the Guidelines for Addressing the Impact of Linear Infrastructure on Large Migratory Mammals in Central Asia contained in UNEP/CMS/COP11/Doc.23.3.2;

3. Also adopts the International Single Species Action Plan for the Conservation of the Argali *Ovis ammon* contained in UNEP/CMS/COP11/Doc.23.3.3;

4. Instructs the Secretariat, subject to funding, to take up the role of coordinating the implementation of the Programme of Work and to establish a post for an officer within the CMS Secretariat to coordinate the CAMI, including to support the implementation of relevant MOUs, Single Species Action Plans such as for the Argali and other CMS mandates;

5. Requests Parties and invites all Range States, partner organizations, donors and the private sector to engage in the CAMI and to provide the financial or in-kind resources to support its coordination and full and timely implementation;

6. Calls upon Range States to strengthen their transboundary cooperation, *inter alia* by using existing international and regional fora; and

7. Instructs the Scientific Council and the Secretariat to continue and strengthen efforts to collaborate with other relevant international fora with a view to strengthening synergies and implementation of CMS and the CAMI in these fora.
PROGRAMME OF WORK
FOR THE CENTRAL ASIAN MAMMALS INITIATIVE (2014-2020)

I. Introduction

The vast and still largely interconnected ecosystems of the Central Asian region harbour a number of CMS-listed large mammal species, most of which are in decline due to poaching, illegal trade, habitat loss, degradation and fragmentation from mining and infrastructure development as well as from overgrazing by and competition with livestock and conversion to agriculture. CMS Parties recognized with Recommendations 8.23 and 9.1 that the populations of many Eurasian migratory mammals\(^1\) are in a profoundly unsatisfactory state of conservation and that these ecosystems and their unique migration phenomena are a crucial area of action for the Convention. CMS is already working together with many Central Asian countries and organizations, inter alia through the Memoranda of Understanding (MoUs) for the conservation of the Saiga antelope and the Bukhara deer and the Single Species Action Plan for the Conservation of Argali. CMS policies also target the removal of barriers to migration and the building of transboundary ecological networks (Res.10.3).

The Central Asian Mammals Initiative (CAMI) has been developed under CMS to provide a common strategic framework for action at the international level to conserve migratory mammals and their habitat in the region. It aims at bringing together and harmonizing implementation of existing CMS instruments and mandates as well as initiatives undertaken by other stakeholders. A strong focus of CAMI is on promoting synergies between stakeholders and existing conservation frameworks, as well as on sharing communication and strengthening cooperation across borders, facilitating building on successes and raising awareness.

The initiative has so far produced the following:

1. An assessment of gaps and needs of migratory mammal conservation in Central Asia (Karlstetter & Mallon 2014), which included a stakeholder survey, online questionnaire and interviews in Afghanistan, China, the Islamic Republic of Iran, Kazakhstan, Kyrgyzstan, Mongolia, the Russian Federation, Tajikistan, Turkmenistan and Uzbekistan in February and March 2014, and national consultation meetings in Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan and Uzbekistan in May and June 2014 (the assessment is available as UNEP/CMS/COP11/Inf.21).

2. Based on the results of this assessment, the following outputs have been produced:
   a. A compilation of key actions that stakeholders identified as important for the conservation of migratory mammals across the region; and
   b. A draft joint Programme of Work (POW) for the CAMI, which was developed during the Stakeholder Meeting on the Conservation of Large Mammals in Central Asia, Bishkek, Kyrgyzstan (23-25 September 2014).

\(^1\) A “migratory species” under CMS means “the entire population or any geographically separate part of the population of any species or lower taxon of wild animals, a significant proportion of whose members cyclically and predictably cross one or more national jurisdictional boundaries.” (CMS 1979).
II. Taxonomic and geographical scope

The CAMI currently addresses 15 species, selected based on the following criteria:

1. Listing on the Appendices of CMS:
   - **Appendix 1:** Bukhara/Yarkand deer *Cervus elaphus yarkandensis* (also listed on Appendix II), wild camel *Camelus bactrianus*, wild yak *Bos grunniens*, snow leopard *Uncia uncia*, cheetah *Acinonyx jubatus*
   - **Appendix 2:** Saiga *Saiga tatarica* and *S. borealis mongolica*, argali *Ovis ammon*, Mongolian gazelle *Procapra gutturosa*, goitered gazelle *Gazella subgutturosa*, kulan *Equus hemionus*, kiang *Equus kiang*

2. Other long-distance migrants of Central Asia not listed under CMS: chiru *Pantholops hodgsonii*.

3. Species that have transboundary populations (today or possibly in future) and have more or less the same range as species listed above: Przewalski’s horse *Equus caballus przewalskii*, Tibetan gazelle *Procapra picticaudata*.

4. The chinkara (jebeer gazelle) *Gazella bennettii* was formally added during the Regional Stakeholder Meeting in Bishkek (23-25 September 2014).

In the Central Asian region these 15 species occur in the following 14 Range States:

Afghanistan, Bhutan, China, India, the Islamic Republic of Iran, Kazakhstan, Kyrgyzstan, Mongolia, Nepal, Pakistan, the Russian Federation, Tajikistan, Turkmenistan and Uzbekistan.

III. Vision, Goal and Objectives of the POW

Following the recommendations from the assessment mentioned above, the POW has the following Vision, Goal and Objectives:

**Vision:**

Secured and viable populations of migratory mammals that range across the landscapes of Central Asia in healthy ecosystems, are valued by, and bring benefits to, local communities and all stakeholders.

**Goal:**

To improve the conservation of migratory large mammals and their habitats in the Central Asian region by strengthening coordination and cross-border cooperation.

---

2 The standard taxonomic reference for mammals under CMS is Wilson & Reeder (2005).
Objectives:

1. To address main threats and issues currently not (sufficiently) covered by existing work programmes and stakeholders.
2. To guide planning and implementation of prioritized conservation actions on a regional scale.
3. To facilitate knowledge exchange, communication and the promotion of synergies.
4. To support implementation, coordination and resourcing of the CAMI.

IV. Structure of a draft POW

The draft POW (Table 1) is structured around the Goal and Objectives. The main issues identified under each Objective have been developed based on the outcomes of the assessment process. Activities, and to some extent the respective responsibilities and priorities, were identified during the Stakeholder Meeting on the Conservation of Large Mammals in Central Asia, Bishkek, Kyrgyzstan (23-25 September 2014).

The POW covers the period of 2014 to 2020 in line with the triennial cycle of the CMS Conference of the Parties. A revision of the assessment of gaps and needs of migratory mammal conservation in Central Asia and the POW should be undertaken in 2020.
**Table 1: Programme of Work**

**Vision:**
Secure and viable populations of migratory mammals that range across the landscapes of Central Asia in healthy ecosystems, are valued by, and bring benefits to, local communities and all stakeholders.

**Goal:**
To improve the conservation of migratory large mammals and their habitats in the Central Asian region by strengthening coordination and cross-border cooperation.

**Objective 1. To address key threats and issues currently not (sufficiently) covered by existing work programmes and stakeholders.**

**1.2. Overgrazing and livestock competition**

<p>| 1.2.1 Develop methodology for research and monitoring based on examples of best practice on a) pasture productivity, b) pasture suitability, and c) disease transmission. | Government agencies, Scientific Institutions, NGOs High |
| 1.2.2. Review and modify existing grazing norms (both legal and customary) based on e.g. carrying capacity and wildlife habitat hotspots. | Government agencies, Scientific Institutions, INGO’s Medium |
| 1.2.3. Improve livestock breeding programmes to address overstocking of pastures (focusing on breeds promoting e.g. herd health, productivity and product diversity). | Government agencies, Scientific Institutions, NGOs High |
| 1.2.4. Develop and promote awareness and educational programmes on wildlife protection among herding communities. | NGOs, Government agencies (e.g. education ministries) High |
| 1.2.5. Promote sustainable livelihood activities in herding communities to reduce focus on livestock as their main asset. | NGOs, Businesses High |
| 1.2.6. Establish joint ministerial working groups (committees) to address pasture use and wildlife protection issues. | Government agencies facilitated by NGOs High |
| 1.2.7. Establish and promote volunteer ranger mechanism to create rewards/incentives in herding communities residing near wildlife/protected areas/ecological corridors. | Government agencies, local communities, NGOs Medium |</p>
<table>

### 1.3. Industry and infrastructure development/barriers to movement

<table>
<thead>
<tr>
<th>1.3.1. Make species- and landscape-specific knowledge available, specifically:</th>
<th>CMS, UNEP-WCMC (tbc), Government agencies, National scientific institutions, NGOs</th>
<th>High (a)</th>
</tr>
</thead>
<tbody>
<tr>
<td>a) develop common standards for maps,</td>
<td>CMS, Government agencies, National scientific institutions, NGOs, mass-media</td>
<td>High/medium (b, c, d)</td>
</tr>
<tr>
<td>b) develop maps (layers) per country per species (identify key areas),</td>
<td></td>
<td>Medium (e, f)</td>
</tr>
<tr>
<td>c) develop and update map layers on existing and planned potential barriers,</td>
<td></td>
<td></td>
</tr>
<tr>
<td>d) make maps (GIS) available at national, bilateral and regional level,</td>
<td></td>
<td></td>
</tr>
<tr>
<td>e) develop species-specific factsheets (incl. behaviour, ecology, etc.), and</td>
<td></td>
<td></td>
</tr>
<tr>
<td>f) identify knowledge gaps and initiate targeted applied research.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>1.3.2. Increase public-awareness on barriers to migration, specifically:</td>
<td>CMS, Government agencies, National scientific institutions, NGOs, mass-media</td>
<td>High</td>
</tr>
<tr>
<td>---</td>
<td>---</td>
<td>---</td>
</tr>
<tr>
<td>a) raise awareness of the broad public on benefits from migratory species,</td>
<td></td>
<td></td>
</tr>
<tr>
<td>b) raise awareness of the broad public on impacts of barriers on migratory species and possible solutions, and</td>
<td></td>
<td></td>
</tr>
<tr>
<td>c) conduct information campaigns targeted at decision makers in government, sector and technical agencies.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>1.3.3. Promote the knowledge and application of technical solutions, specifically:</td>
<td>CMS, Government agencies, National scientific institutions, NGOs</td>
<td>High</td>
</tr>
<tr>
<td>---</td>
<td>---</td>
<td>---</td>
</tr>
<tr>
<td>a) document technical solutions for specific cases (species, landscape and type of barrier),</td>
<td></td>
<td></td>

<tr>
<td>b) establish a knowledge exchange platform (or use of existing ones),</td>
<td></td>
<td></td>
</tr>
<tr>
<td>c) document and monitor impacts and effectiveness of technical solutions, and</td>
<td></td>
<td></td>
</tr>
<tr>
<td>d) include the topic of barriers to migration into relevant university curricula.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
### 1.3.4. Address political issues, specifically:

- **a)** Establish national and bi-lateral multi-agency task force on border fences (including border security agencies, customs, Ministries of Foreign Affairs, environmental/wildlife agencies, international finance institutions),
- **b)** Establish national multi-agency task force on big infrastructure projects (i.e. transportation and other relevant ministries),
- **c)** Integrate migratory species conservation into national EIA regulations and implementation, and
- **d)** Integrate migratory species conservation into requirements of international financing institutions.

<table>

<td></td>
</tr>
</tbody>
</table>

### 1.4. Good governance of natural resource management/ policy and legislation

#### 1.4.1. Develop/review the existing policies and regulatory frameworks that affect migratory and transboundary species (or policies that create known/identified threats) which are of interest to CMS to address gaps.

- **executor**: Government agencies, National focal points
- **priority**: High

#### 1.4.2. Identify if the problems exist at the local level or at national level and where the policies are in conflict with each other.

- **executor**: Government agencies, NGOs
- **priority**: High/medium

#### 1.4.3. Facilitate or support a regional or issue level expert working group meeting that is tasked with developing a strategy for scaling up national policies to a regional level (National, bilateral, trilateral etc.) to harmonize/coordinate differing policies.

- **executor**: CMS, Government agencies
- **priority**: High/medium

#### 1.4.4. Provide the CAMI POW to multinational forums such as South Asia Association for Regional Cooperation, Shanghai Cooperation and others, in order to promote compliance with the POW and CMS requirements.

- **executor**: INGO, CMS, Government agencies
- **priority**: Medium

#### 1.4.5. Involve transport infrastructure, agriculture, border defence sectors, (e.g. OSCE, CAREC, FAO) in CMS relevant technical workshops to represent the interests and capacity of groups which drive identified threats.

- **executor**: CMS, INGO, Government agencies
- **priority**: High

#### 1.4.6. Create a ‘best practice’ policy guide for issues that affect migratory and transboundary species in CAMI countries.

- **executor**: CMS, Government agencies, NGOs
- **priority**: High/medium
### 1.5. Human needs/community engagement in conservation

<p>| 1.5.1. Promote sustainable livelihood schemes linked to conservation and local conditions, and to whole communities. | National and international NGOs | High |
| 1.5.2. Support local development (education, health, energy etc.), linked to conservation, linked to whole community needs. | INGOs; Development agencies | Medium |
| 1.5.3. Establish (and share best practice of) community based insurance schemes (predation, other conflict, bad weather etc.). | As a platform CMS, for implementation: National and international NGOs | High/medium |
| 1.5.4. Provide culturally and species appropriate activities for teachers using current examples such as establishing Wildlife Clubs and celebrating species days. | National and international NGOs, Government agencies (e.g. education ministry) | Medium |
| 1.5.5. Build functional associations within and between communities to form implementing and monitoring bodies under the mandate of the national government, e.g. to link communities along migration routes. | Community leaders, local government agencies, NGOs | Medium |
| 1.5.6. Promote and support the use of local knowledge and skills, e.g. with community based management plans (engagement with strategy definition), scientific research (participatory approaches), reporting outcomes with communities in a suitable language and format. | Local and national NGOs, Research/Scientific institutions | High/medium |
| 1.5.7. Promote non-extractive use especially ecotourism: Research the barriers towards wider adoption of ecotourism within Central Asia and how to build and market a desirable package. | NGOs, Tourism companies | Medium |
| 1.5.8. Integrate biodiversity conservation issues (for migratory species) into the strategies of international and national development agencies. | CMS, Government agencies | High |
| 1.5.9. Engage community conservationists with direct involvement in conservation initiatives, such as community monitoring or local wildlife champions. | National/Local Government agencies, NGOs | High/medium |</p>
<table>
<thead>
<tr>
<th>1.5.10. Engage with and encourage investment from additional NGOs and business, especially local large industries (e.g. oil, gas, mining).</th>
<th>CMS, International NGOs currently involved</th>
<th>Medium</th>

<tr>
<td><strong>1.7. Transboundary cooperation</strong></td>
<td>1.7.1. Develop an understanding and make best use of political processes, specifically: a) identify the formal processes within each range state concerning adoption of transboundary agreements and feed back to CMS, and b) highlight areas where CMS can have an influence (especially among Parties).</td>
<td>Government agencies, Focal points, CMS</td>
</tr>
<tr>
<td></td>
<td>1.7.2. Build on existing agreements, specifically: a) produce an inventory of existing MEAs, governmental/multi-partner agreements and platforms in the CAMI region, building on the CAMI gaps and needs assessment and identify entry-points for enhanced cooperation, b) partner with and integrate migratory species conservation into existing mechanisms such as CITES and development agendas , and c) explore the potential of the Eurasian Customs Region to bolster transboundary conservation (identify opportunities and risks).</td>
<td>INGOs, NGOs, CMS, relevant MEAs and international fora, Government agencies</td>
</tr>
</tbody>
</table>
1.7.3. Build on and enhance scientific and working level collaboration, specifically:
   a) promote formal and informal collaboration through scientific working groups,
   b) encourage cooperation at field and working level on survey, research and monitoring as well as for study tours and exchange visits.

| All NGOs with presence across relevant countries, Scientific institutions |
| High/medium |

1.7.4. Increase awareness, specifically:
   a) promote the benefits of transboundary cooperation among governments and stakeholders, and
   b) provide positive examples (e.g. from 1.7.3) for successful cooperation and share lessons learned.

| CMS, Focal points, Government agencies |
| Medium |

1.7.5. Strengthen transboundary communication, specifically:
   a) conduct a communication gap analysis,
   b) identify the best ways to communicate in order to promote action, and
   c) identify and increase understanding of the nuances in terms of culture, language and political settings in the different countries in order to communicate correctly.

| CMS, Government agencies, NGOs, Scientific institutions |
| Medium |

### Objective 2. To guide planning and implementation of prioritized conservation actions at a regional scale

#### 4.3 Awareness raising

| 4.3.1. | Raise awareness and understanding about the importance of the Central Asian region for migratory mammals at all levels through all means. | CMS, Government agencies, NGOs | High |

---

Notes: ¹GSLEP = Global Snow Leopard & Ecosystem Protection Program; ²NSLEP = National Snow Leopard & Ecosystem Protection Programme. ³Species occurring within the same landscape but not formally part of CAMI.
Deeply concerned that habitats for migratory species are becoming increasingly fragmented across terrestrial, freshwater and marine biomes;

Recalling Resolution 10.3 on the role of ecological networks in the conservation of migratory species highlighting the critical importance of connectivity for conservation and management in the CMS context, inviting the exploration of the applicability of ecological networks to marine migratory species and assigning to Parties, the Scientific Council and the Secretariat a number of tasks for the 11th Meeting of the Conference of the Parties and beyond;

Also recalling Resolution 10.19 on climate change urging Parties to maximize species and habitat resilience to climate change through appropriate design of ecological networks, ensuring sites are sufficiently large and varied in terms of habitats and topography, strengthening physical and ecological connectivity between sites and considering the option of seasonal protected areas;

Reaffirming Target 10 of the Strategic Plan for Migratory Species 2015-2023 (Annex 1 to Resolution 11.2), which states that “all critical habitats and sites for migratory species are identified and included in area-based conservation measures so as to maintain their quality, integrity, resilience and functioning in accordance with the implementation of Aichi Target 11”, which in turn calls for at least 17% of terrestrial and inland water and 10% of coastal and marine areas being “conserved through effectively and equitably managed, ecologically representative and well-connected systems of protected areas and other effective area-based conservation measures, and integrated into the wider landscapes and seascapes”;

Welcoming the progress made in producing a strategic review on ecological networks thanks to a voluntary contribution from Norway (UNEP/CMS/COP11/Doc.23.4.1.2) and a compilation of case studies illustrating how ecological networks have been applied as a conservation strategy to different taxonomic groups of CMS-listed species (UNEP/CMS/COP11/Inf.22) as requested by Resolution 10.3;

Expressing satisfaction with the formal establishment and launch of a Network of Sites of Importance for Marine Turtles within the framework of the CMS Indian Ocean – South-East Asia Marine Turtle Memorandum of Understanding (IOSEA) with particular emphasis on the development of robust criteria intended to lend credibility to the site selection process;
Recognizing that transboundary area-based conservation measures including networks of protected and other management areas can play an important role in improving the conservation status of migratory species by contributing to ecological networks and promoting connectivity particularly when animals migrate for long distances across or outside national jurisdictional boundaries;

Acknowledging progress made by some Parties and other Range States with the establishment of transboundary area-based conservation measures as a basis for ecological networks and promoting connectivity, for example through the KAZA Treaty on Transfrontier Conservation Areas (TFCA), signed by Angola, Botswana, Namibia, Zambia and Zimbabwe on 18 August 2011, which is a large ecological region of 519,912 km² in the five countries encompassing 36 national parks, game reserves, forest reserves and community conservancies, and further recalling that the KAZA region is home to at least 50% of all African elephants (Appendix II), 25% of African wild dogs (Appendix II) and substantial numbers of migratory birds and other CMS-listed species;

Also acknowledging that the Important Bird Areas (IBAs), both terrestrial and marine, identified by BirdLife International under criteria A4 (migratory congregations) comprise the most comprehensive ecological networks of internationally important sites for any group of migratory species, which should be effectively conserved and sustainably managed under the corresponding and appropriate legal frameworks, taking note in particular of the list of IBAs in Danger which need imminent decisive action to protect them from damaging impacts;

Taking note with interest of several IUCN processes which may contribute to the conservation of migratory species and, when adopted, promote ecological networks and connectivity, including the draft IUCN WCPA Best Practice Guideline on Transboundary Conservation drafted by the IUCN WCPA Transboundary Conservation Specialist Group, the IUCN WCPA / SSC Joint Taskforce on Protected Areas and Biodiversity work on a standard to identify Key Biodiversity Areas (KBAs) and the IUCN Joint SSC/WCPA Marine Mammal Protected Areas Task Force process to develop criteria for identifying Important Marine Mammal Areas (IMMAs);

Acknowledging that the ability to increasingly track animals globally will greatly enhance the knowledge base for informed conservation decision making, for example through global tracking initiatives such as ICARUS (International Cooperation for Animal Research Using Space), planned to be implemented on the International Space Station by the German and Russian Aerospace Centres (DLR and Roscosmos) by the end of 2015;

Recognizing that to meet their needs throughout their life history stages marine migratory species depend on a range of habitats across their migratory range whether in marine areas within and/or beyond the limits of national jurisdiction;

Also recognizing that CMS’s approach to coordinated conservation and management measures across a migratory range can contribute to the development of ecological networks and promote connectivity that are fully consistent with the law of the sea by providing the basis for like-minded Range States to take individual actions at national level and regarding their flag vessels in marine areas within and beyond the limits of national jurisdiction and to coordinate these actions across the migration range of the species concerned;

Aware of the United Nations General Assembly Ad Hoc Open-ended Informal Working Group to Study Issues Relating to the Conservation and Sustainable Use of Marine
Biological Diversity Beyond Areas of National Jurisdiction, including its deliberations with respect to area-based conservation measures and environmental impact assessment in marine areas beyond the limits of national jurisdiction;

Recalling Resolution 10.3 acknowledging that the processes, workshops and tools underway within the Convention on Biological Diversity can assist in identifying habitats important for the life cycles of marine migratory species listed on the CMS Appendices;

Welcoming the progress made in the process being undertaken by the Convention on Biological Diversity, which has convened regional workshops covering approximately 68% of world ocean areas, to scientifically describe Ecologically or Biologically Significant Marine Areas (EBSAs);

Considering that some of the scientific criteria applied to describe EBSAs are particularly relevant to marine migratory species, namely ‘special importance for life history stages of species’, ‘importance for threatened, endangered or declining species and/or habitats’, ‘vulnerability, fragility, sensitivity or slow recovery’ and ‘biological productivity’;

Recognizing that the description of areas meeting the scientific criteria for EBSAs has been undertaken on an individual site basis and that scientific guidance for selecting areas to establish a representative network of marine protected areas is provided in Annex II to CBD COP decision IX/20;

Also recognizing the importance of promoting the development of ecologically coherent networks of EBSAs;

Aware that marine migratory species provide a useful basis to further review the potential contribution of the scientific data and information used to describe EBSAs to the development of ecological networks and the promotion of connectivity by exploring whether these data and information could contribute to identifying areas meeting the needs of marine migratory species which use multiple habitats throughout the stages of their life history and across their migration range; and

Welcoming as a contribution to the strategic review on ecological networks, the Global Ocean Biodiversity Initiative (GOBI) review of EBSAs and marine migratory species undertaken to determine how marine migratory species have factored in the description of EBSAs and, through the use of preliminary case studies on cetaceans, seabirds and marine turtles, to explore the potential for the scientific data and information describing EBSAs to contribute to the conservation of migratory species in marine areas within and beyond the limits of national jurisdiction, particularly with respect to ecological networks and connectivity;

The Conference of the Parties to the
Convention on the Conservation of Migratory Species of Wild Animals

1. Expresses its gratitude to the Government of Norway for funding the work on the strategic review and case studies on ecological networks intersessionally;

2. Takes note of the compilation of case studies on ecological networks (UNEP/CMS/COP11/Inf.22);
3. **Endorses** the recommendations made in the strategic review on ecological networks (UNEP/CMS/COP11/Doc.23.4.1.2), included in the Annex to this Resolution;

4. **Requests** Parties and invites all other Range States, partner organizations and the private sector to provide financial resources and in-kind support to assist in implementing the recommendations within this Resolution, including those in the Annex;

5. **Encourages** Parties to provide financial resources and in-kind support to underpin and strengthen existing ecological network initiatives within the CMS Family of instruments, including the Western/Central Asian Site Network for the Siberian Crane and other Migratory Waterbirds, the Critical Site Network of the African Eurasian Waterbird Agreement, the newly launched CMS/IOSEA Network of Sites of Importance for Marine Turtles and the East Asian – Australasian Flyway Site Network;

6. **Calls upon** Parties to develop transboundary area-based conservation measures including protected and other area systems, when implementing the CMS ecological network mandate and to strengthen and build upon existing initiatives, including the KAZA TFCA;

7. **Urges** Parties to promote ecological networks and connectivity through, for example, the development of further site networks within the CMS Family or other fora and processes, that use scientifically robust criteria to describe and identify important sites for migratory species and promote their internationally coordinated conservation and management, with support from the CMS Scientific Council, as appropriate;

8. **Invites** Non-Parties to collaborate closely with Parties in the management of transboundary populations of CMS-listed species, including by joining CMS and its associated instruments, to support the development and implementation of ecological networks globally;

9. **Urges** Parties to address immediate threats to national sites important for migratory species within ecological networks, making use, where appropriate, of international lists of threatened sites, such as the ‘World Heritage in Danger’ list of UNESCO, the ‘Montreux Record’ of Ramsar and the ‘IBAs in Danger’ list of BirdLife International;

10. **Also urges** Parties to monitor adequately ecological networks to allow early detection of any deterioration in quality of sites, rapid identification of threats and timely action to maintain network integrity, making use where appropriate of existing monitoring methods, such as the IBA Monitoring Framework developed by BirdLife International and the International Waterbird Census coordinated by Wetlands International;

11. **Invites** the Convention on Biological Diversity, the Ramsar Convention on Wetlands, the World Heritage Convention, the IUCN World Commission on Protected Areas (WCPA) and others to use existing ecological networks, such as the Important Bird Areas of BirdLife International, to assess and identify gaps in protected area coverage, and secure conservation and sustainable management of these networks, as appropriate;

12. **Requests** Parties to adopt and implement those guidelines developed within CMS and other relevant processes, which aim to promote connectivity and halt its loss, for example through the provision of practical guidance to avoid infrastructure development projects disrupting the movement of migratory species;
13. **Encourages** Parties, other Range States and relevant organizations to apply the IUCN WCPA Best Practice Guideline on Transboundary Conservation, the IUCN WCPA / SSC Joint Taskforce on Protected Areas and Biodiversity’s Key Biodiversity Areas standard and the criteria for identifying Important Marine Mammal Areas (IMMAs) developed by the IUCN Joint SSC/WCPA Marine Mammal Protected Areas Task Force once adopted by IUCN;

14. **Calls upon** Parties and **invites** other Range States and relevant organizations to use tools such as Movebank, ICARUS and other tools to better understand the movements of CMS-listed species, including the selection of those endangered species whose conservation status would most benefit from a better understanding of their movement ecology, while avoiding actions which may enable the unauthorised tracking of individual animals and facilitate poaching;

15. **Encourages** CMS Parties to engage in the ongoing work taking place within the Convention on Biological Diversity to develop EBSA descriptions, noting that CBD COP decision XI/17 states that the description of areas meeting the EBSA scientific criteria is an evolving process to allow for updates;

16. **Calls on** Parties, other Range States, relevant organizations and individual experts in the research and conservation community to collaborate with and participate actively in the EBSA process and mobilize all available data and information related to migratory marine species, to ensure that the EBSA process has access to the best available science in relation to marine migratory species;

17. **Invites** Parties, other Range States and competent international organizations to consider the results of the initial GOBI review (UNEP/CMS/COP11/Inf.23) with respect to EBSAs and marine migratory species as they further engage in the EBSA process and **further invites** a more in-depth review by GOBI to explore the potential for the scientific data and information describing EBSAs to contribute to the conservation of migratory species in marine areas within and beyond the limits of national jurisdiction, particularly with respect to ecological networks and connectivity;

18. **Requests** the Secretariat to share the results of the initial GOBI review with relevant fora including the Convention on Biological Diversity;

19. **Encourages** Parties and the Secretariat to bring this resolution and the experience of CMS relevant to identifying pathways for marine migratory species, critical habitats and key threats, and promoting coordinated conservation and management measures across a migratory range in marine areas to the attention of the United Nations General Assembly Ad Hoc Open-ended Informal Working Group to Study Issues Relating to the Conservation and Sustainable Use of Marine Biological Diversity Beyond Areas of National Jurisdiction; and

20. **Reaffirms** Resolution 10.3 on Ecological Networks and **urges** Parties, the Scientific Council and the Secretariat to address outstanding or recurring actions.
RECOMMENDATIONS FOR FURTHER ADVANCING THE DESIGN AND IMPLEMENTATION OF ECOLOGICAL NETWORKS TO ADDRESS THE NEEDS OF MIGRATORY SPECIES

The recommendations below are derived from the report “Ecological networks - a strategic review of aspects relating to migratory species” which was compiled in response to a request in COP Resolution 10.3 (2011), and was provided to COP11 as document UNEP/CMS/COP11/Doc.23.4.1.2.

RE-STATEd FUNDAMENTALS FROM RESOLUTION 10.3

An agenda for action on ecological networks in the CMS context was set out in Resolution 10.3, and it remains applicable. The key points are summarized (in paraphrased form) below. The main opportunities for the future consist of increasingly making these provisions operational.

Resolution 10.3 invites and encourages Parties and others to (inter alia):

- collaborate to identify, designate and maintain comprehensive and coherent ecological networks of protected sites and other adequately managed sites of international and national importance for migratory animals;

- enhance the quality, monitoring, management, extent, distribution and connectivity of terrestrial and aquatic protected areas, including marine areas, so as to address as effectively as possible the needs of migratory species throughout their life cycles and migratory ranges, including their need for habitat areas that offer resilience to change (including climate change);

- make explicit the relationship between areas of importance to migratory species and other areas which may be ecologically linked to them, for example as connecting corridors or as breeding areas related to non-breeding areas, stopover sites, feeding and resting places;

- make full use of all existing complementary tools and mechanisms for the identification and designation of critical sites and site networks for migratory species and populations, for example by further designations of wetlands of international importance (Ramsar sites);

- select areas for relevant protection and conservation measures in such a way as to address the needs of migratory species as far as possible throughout their life cycles and migratory ranges;

- set network-scale objectives for the conservation of migratory species within protected area and equivalent area-based conservation systems, relating for example to restoration of fragmented habitats and removal of barriers to migration.
FURTHER RECOMMENDATIONS FOR ADVANCING THE DESIGN AND IMPLEMENTATION OF ECOLOGICAL NETWORKS

Other opportunities and recommendations arising from the Strategic Review are set out under the sub-headings below. Points marked with an asterisk (*) have been informed by examples of useful practices revealed by case studies compiled by the CMS Secretariat and presented in document UNEP/CMS/COP11/Inf.22.

Defining network objectives

1. Define a common purpose to which all the constituent areas contribute, and a shared vision amongst all the cooperating entities*.
2. Be clear as to the conservation function being performed by the system as a whole, as well as by any one site within it.
3. Define objectives for sufficiency and coherence of the system overall, in terms of its functional integrity, representativity, risk-management, ecological viability and distribution objectives, as appropriate.

Ensuring that networks have a sufficiently holistic scope

4. As well as formally protected areas, consider including other special sites, connecting corridors, community-managed lands, the wider fabric of landscape/seascape they sit within, and the ecological processes that bind them together.
5. Take a holistic view of how these various ingredients all interrelate.
6. Aim to cater where appropriate for the entire migratory range and migratory lifecycle requirements of the animals concerned.
7. Consider how the network will address temporal factors as well as spatial ones; for example in behaviour of the animals or in the distribution of water, food, temperature, wind, sight-lines/visibility, predators, prey and human interference; such that critical factors that distribute in the landscape according (for example) to a seasonal succession are catered for sufficiently.
8. Incorporate socioeconomic factors, ensuring the network takes account of the needs of people, their livelihoods and social customs where appropriate*.

Ensuring the functional benefits of connectivity

9. Design the network according to the functional ecological needs at stake, including both spatial and temporal dimensions, as well as those factors which are limiting conservation success*.
10. Consider how the “connectivity” dimension of the network can contribute to the elimination of obstacles to migration, including disturbance, habitat fragmentation and discontinuities in habitat quality as well as the more obvious physical obstacles.
11. Be clear about the functional relationships between places that are important in supporting the process of migration at an ecosystem level and a network scale.
12. Be clear how particular individual contributions in the network add up to its intended total result.
13. Where possible, test assumptions about intuited connectivity factors, e.g., the assumed importance of structural factors in the landscape.
Other design factors

14. Tailor the given network to the particular migratory patterns of the animals concerned, and to whether they travel over land, in water or through the air.

15. Be clear about the role of any “critical” sites in the system, such as temporarily highly productive stopover sites or migration “bottlenecks”, and ensure they are included.

16. Plan according to a recognition that the system overall may only be as strong as its most ecologically vulnerable component*.

17. Consider using a combination of connecting “hotspots”, buffering the core, providing “spare” capacity at times of ecological stress and disruption, and otherwise spreading risks across multiple locations*.

18. Select areas against an appropriate timeframe for defining the range of natural variation.

19. Take account of site use that may be intermittent and less than annual, but a form of site-fidelity nonetheless.

20. Include capacity for variability and resilience to change, as well as covering normal cycles of migration.

21. Include consideration of less visible aspects of functional connectivity, such as genetics, trophic processes and climate risk factors (in the latter case for example by providing for species dispersal and colonization when distributions shift).

22. Where necessary, build a network by joining relevant existing site-based conservation systems together*.

Assessing risks

23. Assess the risks, if any, of potential unwanted consequences of increased connectivity in respect of non-target species, such as disease organisms, problematic predators, ecological competitors and invasive species; and the potential for exacerbating certain kinds of human pressures.

Knowledge and engagement

24. Base network design and operation on well-researched science; but also make good use of local wisdom*.

25. Genuinely involve stakeholders (i.e. by going beyond mere consultation, to include active engagement in and influence over the design and operation of the network, thus building a broader base of “ownership” in the process)*.

26. Make appropriate use of “flagship species” to promote wider conservation agendas*.

The implementation regime

27. Ensure consistency and coordination of management and policy responses from one place to another.

28. Where appropriate, create sufficiently strong, broad and influential institutional structures, backed by an explicit formal agreement*.

29. Adopt an “adaptive management” approach (adjusting in the light of experience)*. In particular, consider any need to adapt the network’s design and/or coverage in light of shifting baselines, novel ecosystems and changes related to climate change (while guarding against spurious claims of irrecoverable change based on ulterior motives).
USEFUL AREAS FOR FURTHER WORK

1. Assess existing individual ecological networks in relation to the conservation needs of migratory species, using the recommendations and good practice points in this Annex as a guide, and addressing both (i) the functionality of the network for supporting migratory species and migration, and (ii) provisions in relevant governing frameworks and guidance for ensuring that migratory species aspects are taken fully into account.

2. Explore options for obtaining globally synthesized information about the results of the implementation of actions defined in Resolution 10.3 paragraph 7 (to assess whether Parties are addressing as effectively as possible the needs of migratory species throughout their life cycles and migratory ranges by means of ecological networks and enhanced habitat connectivity) and paragraph 9(i) (to assess the extent to which and the manner in which existing major protected area systems and initiatives aimed at promoting ecological networks address the needs of migratory species throughout their life cycles and migratory ranges).

3. In the context of the Strategic Plan for Migratory Species 2015-2023 (Annex 1 to Resolution 11.2), investigate the scope for indicators used for target 10 (on area-based conservation measures for migratory species) to shed light specifically on network-related aspects such as representativity and connectivity.

4. Seek opportunities to direct relevant research (for example on animal distributions, movement patterns, gap analyses of networks) towards further improving knowledge and understanding of the design and implementation of ecological networks in ways which provide optimal benefits for migratory species.

5. Seek opportunities to pursue collaboration and synergy in particular with the OSPAR and Helcom Commissions regarding further development of network coherence assessment methodologies to take account of migration and migratory species.

7. Develop guidance on approaches to compensating for irrecoverable loss of functionality, extent and other values of ecological networks.

8. Build further knowledge and capacity, through continuing to bring together relevant existing tools and guidance; and by developing new tools, guidance and training where necessary.

9. Promote further transfer of experience, synergies and consistent approaches to issues relating to ecological networks throughout the whole family of CMS instruments/initiatives.

10. Use appropriate fora of collaboration among multilateral environmental agreements to promote synergies and consistent approaches to issues relating to ecological networks, supported by the findings of the CMS Strategic Review\(^1\).

---

\(^1\) Note that Resolution 10.3 inter alia "requests the Secretariat, subject to availability of resources, to work with Parties and the Scientific Council and other international and regional organizations, including the Convention on Biological Diversity, in organizing regional and sub-regional workshops to promote the conservation and management of critical sites and ecological networks among Parties".
PROGRAMME OF WORK ON CLIMATE CHANGE AND MIGRATORY SPECIES

Adopted by the Conference of the Parties at its 11th Meeting (Quito, 4-9 November 2014)

Recognizing that the best available scientific information indicates that action to help migratory species adapt to climate change is urgently required in order to meet the objectives of the Convention; to give proper effect to Articles II and III, and to the instruments adopted under Article IV, whereas at the same time there is a need to expand and refine knowledge concerning the impacts of climate change on migratory species;

Emphasizing the need to coordinate action to help migratory species adapt to climate change within the framework of the CMS instruments;

Acknowledging that recent scientific evidence indicates that the importance of current protected areas and protected area networks for migratory species conservation is not expected to diminish on account of climate change and in many instances may increase;

Recognizing that it will often be necessary to enhance protected areas and networks in order to maximize representativeness and thereby increasing their contribution to migratory species conservation in light of climate change, and to better integrate these into wider landscapes and seascapes;

Mindful of the call on Parties and Signatories to CMS instruments in Resolution 10.19 to enable the full participation in CMS and CMS instruments of States that are not currently within the range of the species involved, but are expected to become Range States in the future due to climate change;

Further recognizing that the understanding of certain terms in the Convention, in particular the term “historic coverage” in Article I(1)(4)(c), should be re-examined in the current era of climate change, bearing in mind that the Convention was concluded before the implications of climate change for migratory species conservation became apparent;

Recalling that Resolution 10.19 of the Tenth Conference of the Parties (COP10) established the position of a COP-Appointed Councillor for Climate Change and requested the preparation of a Programme of Work and the convening of an intersessional Working Group;

Taking note of the report of the Workshop that took place in Guácimo (Province of Limón, Costa Rica) from 9-11 April 2014, and thanking the Government of Costa Rica and its
agency for protected areas, SINAC (National System for Conservation Areas), for very effectively hosting this workshop;

Further noting the report of the ACCOBAMS Expert Workshop on the impact of climate change on cetaceans of the Mediterranean and Black Seas that took place in Monaco on 11 June 2014, and its recommendations, including Key Messages to Governments and Others;

Acknowledging with thanks the contributions of the members of the Climate Change Working Group established under the Scientific Council; and

Further acknowledging the key role of the financial donors of this project which made it possible to develop the Programme of Work, in particular the Governments of Germany and Monaco for their voluntary contributions, and SINAC and UNDP for their in-kind contributions;

The Conference of the Parties to the Convention on the Conservation of Migratory Species of Wild Animals

1. Adopts the “Programme of Work on Climate Change and Migratory Species” (the POW) annexed to this resolution and urges Parties and Signatories to the CMS instruments and encourages non-Parties to implement the POW as a matter of priority, if applicable and to the extent possible given the particular circumstances of each Party;

2. Requests Parties and Signatories to the CMS instruments to assess what steps are necessary to help migratory species cope with climate change and take action to give effect to the POW on Climate Change;

3. Requests the Scientific Council and the Working Group on Climate Change to promote work to address key gaps in knowledge and future research directions, in particular through the analysis of existing long-term and large-scale datasets;

4. Requests the Secretariat to ensure the integration of elements of this POW into the Companion Volume of the Strategic Plan for migratory species to ensure mainstreaming of climate change, avoiding duplication, enhancing synergies and cooperation;

5. Instructs the Secretariat, in collaboration with Parties and relevant international organizations, subject to the availability of funds, to address specific issues and promote the implementation of the POW and share best practice and lessons learnt in the effective mitigation of climate change impacts, including through the organization of regional workshops;

6. Calls on Parties and non-Parties and stakeholders, with the support of the Secretariat, to strengthen national and local capacity for the implementation of the POW and the protection of species impacted by climate change, including, inter alia, by developing partnerships with key stakeholders and organizing training courses, translating and disseminating examples of best practice, sharing and implementing protocols and regulations, transferring technology, and promoting the use of online and other tool to address specific issues contained in the POW;
7. Agrees that Article I (1) (c) (4) of the Convention, on the definition of “favourable conservation status” could be interpreted as follows in light of climate change:

According to Article I (1) (c) (4) of the Convention, one of the conditions to be met for the conservation status of a species to be taken as “favourable” is that: “the distribution and abundance of the migratory species approach historic coverage and levels to the extent that potentially suitable ecosystems exist and to the extent consistent with wise wildlife management”. Whereas there is a continued need to undertake conservation action within the historic range of migratory species, such action will increasingly also need to be taken beyond the historic range of species in order to ensure a favourable conservation status, particularly with a view to climate-induced range shifts. Such action beyond the historic range of species is compatible with, and may be required in order to meet the objectives and the obligations of Parties under the Convention;

8. Urges Parties and invites relevant international organizations, bilateral and multilateral donors to support financially the implementation of the POW including through the provision of financial and other assistance to developing countries for relevant capacity building;

9. Proposes the continuation of the Climate Change Working Group until COP12, extending its membership to incorporate expertise from geographical regions currently absent, and to prioritize, facilitate and monitor the implementation of the POW;

10. Requests the Secretariat to liaise with the secretariats of relevant MEAs, including in particular the secretariats of the CBD, UNFCCC, UNCCD, Ramsar Convention and World Heritage Convention, in collaboration with/through the Biodiversity Liaison Group, to promote synergies and coordinate activities related to climate change adaptation including, where appropriate, the organization of back-to-back meetings and joint activities; and

11. Calls on Parties and the Scientific Council to report progress in implementing the POW, including monitoring and the efficacy of measures taken, to COP12 in 2017, ensuring as far as possible integration into the national reports for CMS.
PROGRAMME OF WORK ON CLIMATE CHANGE AND MIGRATORY SPECIES

Parties and other stakeholders should implement the actions contained in this Programme of Work according to their individual circumstances with a view to maximizing the benefits to migratory species.

A timeline to implement the actions contained in this Programme of Work is proposed after each action. The time categories proposed are the following:

[S]: Short term – Actions to be completed within one triennium
[M]: Medium term – Actions to be completed within two triennia
[L]: Longer term – Actions to be completed within three triennia or longer

Actions to be completed in the medium or longer term should be started as soon as possible, where appropriate.

Measures to facilitate species adaptation in response to climate change

- Prepare species action plans for those species listed on Appendix I considered to be most vulnerable to climate change (Parties and the Scientific Council, international, intergovernmental and other relevant organizations). Action plans should be undertaken at an appropriate level (species or management unit level), but measures may be implemented at the national level. For species already covered by existing CMS instruments, those action plans should be developed under those instruments. For other species, range states should work collaboratively to prepare action plans at an appropriate scale. [M]

- Improve the resilience of migratory species and their habitats to climate change, and ensure habitat availability for the full lifecycle of the species, now and in the future, inter alia through the following actions:
  - Identify and prioritize areas currently experiencing rapid climate impacts that are important to migratory species. (Parties, scientific community and conservation stakeholders); [S]
  - Ensure that individual sites are sufficiently large, holding a variety of habitats and topography. (Parties, scientific community and conservation stakeholders); [L]
  - Ensure there is physical and ecological connectivity between sites, aiding species dispersal and colonization when distributions shift. (Parties, scientific community and conservation stakeholders); [L]
  - Consider the designation of seasonal protected areas or restrictions on land-use in areas where migratory species occur at critical stages in their lifecycle and would benefit from such protection. (Parties, scientific community, international, intergovernmental and other relevant organizations); [M]
  - Undertake specific management to eliminate, counteract or compensate for detrimental impacts of climate change and other potential threats that may interact with or exacerbate climate change. (Parties, scientific community and conservation stakeholders); [S]
Consider expanding existing protected area networks to cover important stop-over locations and sites for potential colonisation, and ensure the effective protection and appropriate management of sites to maintain or to increase the resilience of vulnerable populations to extreme stochastic events. Ensure effective monitoring of the site network in order to detect threats, and act on any deterioration in site quality, implementing specific actions to address important threats to sites. This may include increasing both the number and size of protected sites. (Parties, scientific community, international, intergovernmental and other relevant organizations including conservation stakeholders); [M]

Integrate protected areas into wider landscapes and seascapes, ensure appropriate management practices in the wider matrix and undertake the restoration of degraded habitats and landscapes/seascapes (Parties, scientific community and conservation stakeholders); [L]

Establish, maintain and regularly review a comprehensive, inter-jurisdictional inventory of current protected areas and candidate high priority protected areas in order to coordinate future conservation efforts. (Parties, scientific community and conservation stakeholders); [S]

Cooperate in respect of transboundary protected areas and populations, ensuring that barriers to migration are to the greatest possible extent eliminated or mitigated, and that migratory species are managed under commonly agreed guidelines. Where appropriate, this should be done within the framework of applicable CMS instruments. (Parties, scientific community, international, intergovernmental and other relevant organizations); [S] and

Identify migratory species that have special connectivity needs - those that are resource, area, and or dispersal limited. (Parties, scientific community and conservation stakeholders); [S]

Consider ex-situ measures and assisted colonization, including translocation, as appropriate, for those migratory species most severely threatened by climate change while bearing in mind the need to minimize the potential for unintended ecological consequences, in line with CBD COP Decision X/33 on Biodiversity and Climate Change, para 8(e). (Parties, Scientific Council, and conservation stakeholders). [L]

Periodically monitor the effectiveness of conservation actions in order to guide ongoing efforts and apply suitable adaptive responses as appropriate. (Parties and scientific community). [M]

Vulnerability assessment

- Identify and promote a standardized methodology for evaluating species’ vulnerability to climate change that includes the whole life-cycle of the species concerned. This may require the development and communication of new tools as appropriate. (Parties, Scientific Council, scientific community, international, intergovernmental and other relevant organizations). [S]

- Undertake vulnerability assessments of Appendix I and II listed species at an appropriate (e.g. regional) scale, as the first priority. (Parties, scientific community, international, intergovernmental and other relevant organizations). [S]

- Once completed, undertake climate change vulnerability assessments for other migratory species to identify those most susceptible to climate change. (Parties, scientific community, international, intergovernmental and other relevant organizations). [M]
• Determine which species vulnerable to climate change should be listed or uplisted on the CMS Appendices, as appropriate. (Parties). [S]

Monitoring and research

• Coordinate research and monitoring efforts in relation to the impacts of climate change across the CMS Family. (Parties / Signatories to CMS instruments). [S]

• Undertake research on the status, trends, distribution and ecology of migratory species. This would include identifying knowledge gaps and may require the use and refinement of existing technologies and tools (e.g. remote sensing), the development of new ones, promotion of citizen science, and coordination / knowledge exchange to improve capacity. (Parties, scientific community).[S]

• Develop an understanding of migratory routes, how they are changing (e.g. using existing recoveries of ringed birds and new tracking technologies) and the connectivity between populations (e.g. using genetic approaches) to identify key sites, locations and appropriate management units for particular species. (Parties, scientific community).[M]

• Identify key breeding and stopover locations, as well as key wintering sites (hotspots) for migratory species, and focus the monitoring of environmental change on these locations. (Parties, scientific community). [M]

• Develop and implement monitoring regimes that are adequate to distinguish declines in populations from transboundary range shifts; diagnose the causes of decline, and to help analyse the impact of climate change on migratory species, inter alia through the following measures:
  o Identify and carry out research on the impacts of climate change on migratory species, including the impact on habitats and on local (human) communities dependent on the ecosystem services provided by these species. Such research should consider impacts across the full life-cycle cycle of the species concerned. (Scientific community); [L]
  o Establish appropriate monitoring of habitat extent and quality and the abundance of key resources / interacting species (e.g., keystone prey or major predators) to identify changes and to inform vulnerability assessments. (Parties, scientific community); [M]
  o Establish and collate monitoring of other threats, to help identify synergistic threats and correctly attribute observed changes to climate change or to other causes. This may require the use and refinement of existing technologies and tools (e.g. remote sensing), the development of new ones, promotion of citizen science, and coordination / knowledge exchange to improve capacity. (Parties, scientific community); [M]
  o Ensure that monitoring is maintained in the long term, using comparative methodologies. This will require significant knowledge exchange and guidance from countries where these techniques have been developed. (Parties, scientific community, international, intergovernmental and other relevant organizations); [L]
  o Communicate and share monitoring results regularly with neighbouring and other range states (Parties, international, intergovernmental and other relevant organizations); [M]
  o Model projected future impacts of climate change to inform vulnerability assessments and action plans. (Scientific community); [S] and
o Continue to identify indicator species and/or composite indicators as a proxy for wider migratory species assemblages, habitats and ecosystems, and regularly report on the state of those indicators. (Scientific community, Parties, NGOs). [L]

- Periodically conduct research to test the effectiveness of, and assess the risks associated with, species adaptation measures in response to climate change. (Parties, scientific community). [L]

- Continue to fill the information gaps through research and monitoring, in order to make explicit the associated synergies and any trade-offs between biodiversity conservation, mitigation and adaptation efforts. (Parties, scientific community). [L]

**Climate change mitigation, human adaptation, and land use planning**

- Identify, evaluate, prioritize and reduce the additional impacts on migratory species resulting from changes in human behaviour due to climate change (the so-called “tertiary effects”). (Parties, relevant organizations). [L]

- Develop and/or revise environmental sensitivity and zoning maps, to include critical and important sites for migratory species, as an essential tool for sustainable land use planning and management and adaptation projects. (Parties, scientific community, NGOs). [S]

- Use the environmental sensitivity and zoning maps to inform the selection of sites for climate change mitigation projects, such as renewable energy projects. (Parties). [M]

- Develop general guidelines for mitigation and human adaptation projects to ensure that they are not harmful to migratory species. (Scientific Council). [S]

- From the general guidelines develop step down guidelines at the national level for mitigation and adaptation projects to ensure that they are not harmful to migratory species. (Parties, scientific community, NGOs, energy, agriculture, forestry, transport and other sectors). [M]

- Ensure that an environmental impact assessment is conducted prior to undertaking major adaptation and mitigation projects, as well as exploration and production projects, taking into account impacts on migratory species. (Parties, energy sector). [S]

- Make the monitoring of environmental impacts a standard requirement for major climate change mitigation and adaptation projects, exploration and production projects and for land use planning. (Parties, energy sector). [M]

- Ensure that projects incorporate adaptive management in mitigation and adaptation activities. (Parties). [S]

- Recognizing that there is considerable uncertainty regarding the potential effectiveness of offsetting as an approach to compensate for detrimental impacts of mitigation and human adaptation; undertake research to inform assessments of the likely role of compensatory or offsetting approaches designed to reduce and prevent detrimental impacts of mitigation and adaptation projects upon migratory species. (Parties, scientific community). [S]

- Develop and apply appropriate methodologies to consider potential cumulative impacts of mitigation and adaptation projects across the entire life-cycle of migratory species, including breeding, wintering and stop-over sites, as well as impacts upon migratory routes. These should be applied at regional, national or international population levels, as appropriate. (Parties, scientific community). [M]

- Ensure that where impacts on migratory species are significant, renewable energy and other climate change mitigation or adaptation structures are operated in ways that eliminate or minimize negative effects on migratory species (for example, including
short-term shutdowns or higher turbine cut-in speeds, with regard to wind farms). (Parties, energy sector). [S]

- Ensure that any climate change mitigation and adaptation action has appropriate social and environmental safeguards in place at all stages, taking into account the needs of CMS-listed species. (Parties, multilateral development banks, and energy sector). [M]

- Ensure that the best available scientific information on the impacts of climate change on migratory species is accessible and useable for planning and decision-making. (Parties, scientific community). [L]

**Knowledge exchange and capacity-building**

- Increase awareness of the impacts of climate change on migratory species. (Parties, scientific community, international, intergovernmental and other relevant organizations). [L]

- Utilize the relevant IPCC reports and other reviews for background information on climate change impacts and compile and disseminate relevant information. (Parties and Scientific Council). [L]

- Commission technical reviews and best-practice guidelines and encourage the publishing, sharing and distribution of periodic scientific reviews on the following topics (Parties and scientific community): [S]
  - the impacts of climate change on migratory species;
  - the potential for conservation management to increase the resistance, resilience and adaptation of migratory species populations to climate change; and
  - the impacts of anthropogenic climate change adaptation and mitigation on migratory species.

- Disseminate the outcomes of these reviews through the CMS website and workspace, where possible translating the results of those reviews into different languages. (Scientific Council). [S]

- Establish a series of regional and sub-regional or national workshops involving scientists, NGOs, national focal points for all relevant environmental conventions, policy makers and managers to exchange and discuss information. (Parties, Scientific Council, scientific community, international, intergovernmental and other relevant organizations). [S]

- Establish better links between developing country needs and developed country research through CMS family instruments to promote collaboration, coordination and actions. (Parties / Signatories to CMS instruments). [L]

- Increase the capacity of natural resource managers and other decision makers and enhance their ability to address the impacts on climate change on migratory species, including through the following actions:
  - Undertake an assessment of training needs on climate change and migratory species at the national level. (Parties); [S]
  - Develop training on the use of existing and emerging tools for managing impacts of climate change on migratory species (GIS, statistical analysis etc.). (Parties, scientific community); [S]
  - Explore and build on existing training courses and work with professional societies, academia, technical experts and natural resource agency training professionals to address key needs and augment adaptation training opportunities. (Parties, NGOs and scientific community); [S]
Identify and engage with key players who have experience in training opportunities for climate change, monitoring and modelling, and share that knowledge. (Parties, international, intergovernmental and other relevant organizations); [S]

Develop and encourage the use of existing webinars and e-learning courses on climate change and migratory species. (Parties, NGOs, scientific community); [M] and

Increase scientific and management capacity, including through university courses up to the PhD level, to address climate change impacts on migratory species. (Parties, scientific community). [M]

- Develop a baseline curriculum for webinars and e-learning courses to build capacity on climate change and migratory species among natural resource professionals and decision makers. (Secretariat, Scientific Council, scientific community). [M]
- Contribute technical and scientific information on climate change and migratory species to the national and central clearing house mechanism of the CBD. (Parties, scientific community, NGOs and other relevant organizations). [L]
- Invite the CBD COP to encourage its national focal points to make the national clearing house mechanisms available for information on migratory species and climate change. (Parties). [S]

Monitor the effectiveness of capacity building efforts on climate change and migratory species. (Parties). [L]

**Cooperation and implementation**

- Coordinate measures to facilitate species adaptation in response to climate change across the various CMS instruments. (Parties / Signatories to CMS instruments). [L]
- Work closely with and provide national UNFCCC Focal Points with expert guidance and support on how migratory species can be affected by human mitigation and adaptation activities, such as renewable energy and bio-energy development, and to collaborate closely in order to develop joint solutions aimed at minimizing negative impacts on migratory species. (CMS Focal Points and Scientific Councillors). [L]
- Promote cooperation on climate change actions amongst the CMS family instruments, including organising back-to-back meetings. (Secretariat). [L]
- Consolidate the CMS Climate Change Working Group as a means to advise, promote and implement actions. This could include the prioritisation and promotion of specific projects to funders. (Scientific Council). [S]
- Engage in and support CMS work related to climate change. (CBD, UNFCCC, UNCCD, Ramsar Convention, World Heritage Convention, IWC, Arctic Council and CAFF, Bern Convention, and other international instruments and arrangements). [L]

Engage in and support CMS work related to climate change. (CBD, UNFCCC, UNCCD, Ramsar Convention, World Heritage Convention, IWC, Arctic Council and CAFF, Bern Convention, and other international instruments and arrangements such as the Inter-American Convention (IAC) for the Protection and Conservation of Sea Turtles, international mechanisms such as the Intergovernmental Platform on Biodiversity and Ecosystem Services (IPBES), and other relevant international instruments and arrangements). [L]
• Make use of available funding mechanisms to support the maintenance of ecosystem services, with the close involvement of local communities, in order to improve the conservation status of migratory species. (Parties and relevant stakeholders). [S]

• Put in place those legislative, administrative, management and other measures necessary to implement the actions set out in this programme of work, including the incorporation of such measures in national climate change strategies, National Biodiversity Strategies and Action Plans (NBSAPs), protected area management plans, and other relevant policy instruments and processes. (Parties and non-parties). [L]

• Provide financial, technical, advisory and other appropriate support for the implementation of this programme of work. (Parties, UNEP, multilateral development banks and other national and international donors). [S]
RENEWABLE ENERGY AND MIGRATORY SPECIES

Adopted by the Conference of the Parties at its 11th Meeting (Quito, 4-9 November 2014)

Recognizing the importance to society of an adequate and stable energy supply and that renewable energy sources can significantly contribute to achieving this, and aware that renewable power generation, especially from wind energy, large solar panel power stations and biomass production, is projected by the International Energy Agency to triple by 2035;

Recognizing also that increased use of technologies to exploit renewable energy may potentially affect many migratory species listed by CMS and other legal frameworks, and concerned about the cumulative effects of such technology on the movement of migratory species, their ability to utilize critical staging areas, the loss and fragmentation of their habitats, and mortality from collisions with infrastructural developments;

Recalling Article III 4(b) of the Convention which requests Parties to endeavour, inter alia, “to prevent, remove, compensate for or minimize, as appropriate, the adverse effects of activities, or obstacles that seriously impede or prevent the migration of species” and noting the relevance of this obligation to renewable energy developments, especially given that adverse impacts of renewable energy technologies can be substantially minimized through careful site selection and planning, thorough Environmental Impact Assessments (EIAs), and good post-construction monitoring to learn from experience;

Recalling also previous decisions by CMS and aware of those of other MEAs, including CMS Agreements, as well as of relevant guidelines, on reconciling renewable energy developments with the conservation of migratory species, including:

- CMS Resolution 7.5 on ‘Wind Turbines and Migratory Species’;
- CMS Resolution 10.19 on ‘Migratory Species Conservation in the Light of Climate Change’;
- CMS Resolution 10.24 on ‘Further Steps to Abate Underwater Noise Pollution for the Protection of Cetaceans and Other Migratory Species’;
- ACCOBAMS Resolution 4.17 ‘Guidelines to Address the Impact of Anthropogenic Noise on Cetaceans in the ACCOBAMS Area’;
- AEWA Resolution 5.16 on ‘Renewable Energy and Migratory Waterbirds’ which stressed the need to address or avoid adverse effects on migratory waterbirds and contains operational recommendations of relevance to many other migratory species;
• AEWA’s ‘Guidelines on How to Avoid, Minimize or Mitigate Impact of Infrastructural Developments and Related Disturbance Affecting Waterbirds’ (Conservation Guidelines no. 11);
• EUROBATS Resolution 7.5 ‘Wind Turbines and Bat Populations’ and Guidelines for consideration of bats in wind farm projects;
• Bern Convention Recommendation No. 109 on minimizing adverse effects of wind power generation on wildlife and the guidance of 2003 on environmental assessment criteria and site selection issues related to wind-farming as well as the best practice guidance on integrated wind farm planning and impact assessment presented to the 33rd meeting of the Bern Convention Standing Committee in 2013;
• Ramsar Resolution XI.10 ‘Guidance for Addressing the Implications for Wetlands of Policies, Plans and Activities in the Energy Sector’;
• SBSTTA 16 Recommendation XVI/9 ‘Technical and Regulatory Matters on Geo-engineering in Relation to the Convention on Biological Diversity’; and
• BirdLife UNDP/GEF Migratory Soaring Bird Guidance on wind and solar energy;

and recognizing the need for closer cooperation and synergetic implementation amongst the CMS Family, other MEAs and relevant national and international stakeholders of decisions and guidelines to reconcile energy sector developments with migratory species conservation needs;

Acknowledging the critical need for liaison, communication and strategic planning to be jointly undertaken by those parts of governments responsible respectively for environmental protection and energy development to avoid or mitigate negative consequences for migratory and other species and their habitats;

Taking note of document UNEP/CMS/COP11/Inf.26: ‘Renewable Energy Technology Deployment and Migratory Species: an Overview’, which summarizes knowledge of actual and possible effects of renewable energy installations on migratory species, noting its conclusion that relatively few scientific studies are available on the short-term, long-term and cumulative impacts of renewable energy technologies, and acknowledging the urgent need for further research on the impact on migratory species of renewable energy technologies particularly in relation to ocean and solar energy;

Noting also that document UNEP/CMS/COP11/Inf.26 highlights the urgent need to collect data on the distribution of migratory species, their population size and migration routes as an essential part of any strategic planning and impact assessment, prior to and/or during the planning phase of development of renewable energy deployments, and also stresses the need to monitor regularly mortality arising from those developments;

Noting the discussion at the 18th Meeting of the Scientific Council on the drafts of document UNEP/CMS/COP11/Inf.26 and document UNEP/CMS/COP11/Doc.23.4.3.2: ‘Renewable Energy Technologies and Migratory Species: Guidelines for Sustainable Deployment’ and aware that input from other advisory bodies of the CMS Family has been incorporated into both documents;

Convinced of the relevance of the above-mentioned guidelines for sustainable deployment of renewable energy technologies to the implementation of the CMS programme of work on climate change and migratory species submitted for consideration and adoption by
Noting relevant international decisions and guidance with regard to mitigating the specific impacts of power lines on birds, including:

- CMS Resolution 10.11 on ‘Power Lines and Migratory Birds’;
- ‘Guidelines on How to Avoid or Mitigate the Impact of Electricity Power Grids on Migratory Birds in the African-Eurasian Region’ adopted by CMS COP10, AEWA MOP5 and the CMS Raptors MoU MOS1;
- AEWA Resolution 5.11 ‘Power Lines and Migratory Waterbirds’;
- Bern Convention Recommendation No. 110 on minimizing adverse effects of above-ground electricity transmission facilities (power lines) on birds;
- The Budapest Declaration on bird protection and power lines adopted in 2011 by the Conference ‘Power Lines and Bird Mortality in Europe’; and
- BirdLife UNDP/GEF Migratory Soaring Bird Guidance on power lines;

Welcoming the good cooperation and partnerships already established at both international and national levels between stakeholders including governments and their institutions, energy companies, non-government organizations (NGOs) and Secretariats of MEAs, and the concerted efforts made to address energy developments which conflict with species conservation; and

Acknowledging with thanks the financial support of the Governments of Germany and Norway through the CMS and AEWA Secretariats, of BirdLife International through the BirdLife UNDP/GEF Migratory Soaring Birds project and of IRENA towards the compilation of the report ‘Renewable Energy Technology Deployment and Migratory Species: an Overview’ and the guidelines document ‘Renewable Energy Technologies and Migratory Species: Guidelines for Sustainable Deployment’;

The Conference of the Parties to the
Convention on the Conservation of Migratory Species of Wild Animals

1. Endorses the document ‘Renewable Energy Technologies and Migratory Species: Guidelines for Sustainable Deployment’ (UNEP/CMS/COP11/Doc.23.4.3.2);

2. Urges Parties and encourages non-Parties to implement these voluntary Guidelines as applicable depending on the particular circumstances of each Party, and as a minimum to:

2.1 apply appropriate Strategic Environment Assessment (SEA) and EIA procedures, when planning the use of renewable energy technologies, avoiding existing protected areas in the broadest sense and other sites of importance to migratory species;

2.2 undertake appropriate survey and monitoring both before and after deployment of renewable energy technologies to identify impacts on migratory species and their habitats in the short- and long-term, as well as to evaluate mitigation measures; and

2.3 apply appropriate cumulative impact studies to describe and understand impacts at larger scale, such as at population level or along entire migration routes (e.g., at flyways scale for birds);
3. **Urges** Parties to implement, as appropriate, the following priorities in their development of renewable energy technologies:

3.1 **wind energy**: undertake careful physical planning with special attention to the mortality of birds (in particular of species that are long-lived and have low fecundity) and bats resulting from collisions with wind turbines and the increased mortality risk to cetaceans from permanently reduced auditory functions, and consider means of reducing disturbance and displacement effects on relevant species, including deploying measures such as ‘shutdown on demand’ as appropriate;

3.2 **solar energy**: avoid protected areas so as to limit further the impacts of deploying solar power plants; undertake careful planning to reduce disturbance and displacement effects on relevant species, as well as to minimise the risks of solar flux and trauma related injuries which could be a consequence of a number of solar energy technologies;

3.3 **ocean energy**: give attention to possible impacts on migratory species of increased noise and electromagnetic field disturbance especially during construction work in coastal habitats, and injury;

3.4 **hydro-power**: undertake measures to reduce or mitigate known serious impacts on the movements of migratory aquatic species, such as through the installation of measures such as fish passageways; and

3.5 **geo-energy**: avoid habitat loss, disturbance and barrier effects in order to continue to keep the overall environmental impacts at their current low level;

4. **Instructs** the Secretariat to convene a multi-stakeholder Task Force on Reconciling Selected Energy Sector Developments with Migratory Species Conservation (the Energy Task Force), in order to:

- promote the benefits of existing decisions;
- encourage Parties to implement current guidance and decisions;
- develop any necessary new guidelines and action plans as appropriate; and
- make recommendations on suitable responses to specific problems and gaps in knowledge;

and in convening the Energy Task Force, to work in conjunction with the Secretariats of AEWA, other relevant CMS instruments and the Bern and Ramsar Conventions, involving Parties and other stakeholders such as NGOs and the energy industry in line with the Terms of Reference annexed;

5. **Urges** Parties and invites UNEP and other relevant international organizations, bilateral and multilateral donors as well as representatives of the energy industry to support financially the operations of the Energy Task Force, including through funding for its coordination and provision of financial assistance to developing countries for relevant capacity building and the implementation of relevant guidance; and

6. **Instructs** the Secretariat to report progress on behalf of the Energy Task Force, including on implementation and, as much as possible, on assessment of the efficacy of measures taken, to COP12 in 2017.
Terms of Reference for the Multi-stakeholder Task Force on Reconciling Selected Energy Sector Developments with Migratory Species Conservation (Energy Task Force)

1. Background and purpose

The Energy Task Force is convened in line with the mandate provided by CMS Resolution 11.27 to assist Parties or Signatories to CMS, AEWA, EUROBATS, ASCOBANS, ACCOBAMS, the Raptor MoU, the Bern Convention, the Ramsar Convention and other relevant MEAs to fulfil their obligations with regard to avoiding or mitigating possible negative impacts of energy sector developments on migratory species.

2. Goal

All energy sector developments are undertaken in such a way that negative impacts on migratory species are avoided.

3. Role

The role of the Energy Task Force will be to facilitate the involvement of all relevant stakeholders in the process of reconciling energy sector developments with the conservation of migratory species where all developments take full account of the conservation priorities.

4. Scope

The geographical scope of the Energy Task Force will be global. Initially, it will be convened with an African-Eurasian scope although not excluding relevant cases in progress from other regions, and will gradually expand to other parts of the world. The timing and extent of geographic expansions shall be decided by the Energy Task Force members, and shall depend on funding being available.

The Energy Task Force will cover all migratory taxa as identified by CMS and its associated instruments. Initially, the Energy Task Force will focus on migratory birds and will gradually expand to other taxonomic groups. The timing and extent of taxonomic expansions shall be decided by the Energy Task Force members, and shall depend on funding being available.

The Energy Task Force will cover the issues of power line impacts and impacts of renewable energy technology deployments (wind, solar, hydropower, geothermal, biomass and ocean energy) with initial focus on power lines, hydro, wind and solar energy technologies. Proposals for extension of the types of energy sector developments to be covered may be made and shall be considered by the Energy Task Force, and shall depend on funding being available.

5. Remit

The Energy Task Force will:

5.1. promote implementation of the relevant guidelines adopted in the frameworks of the participating MEAs;
5.2. set priorities for its actions and implement them;
5.3. assist in resource mobilization for priority actions, including from the energy industry;
5.4. monitor the implementation of relevant guidelines and their effectiveness, as well as existing impediments for adequate implementation of such guidelines, and submit progress reports to the governing bodies of the participating MEAs;
5.5. stimulate internal and external communication and exchange of information, experience, best practice and know-how;
5.6. strengthen regional and international networks; and
5.7. stimulate more research for the renewable energy technologies deployment where substantial gaps in knowledge have been identified in the Review Report (UNEP/CMS/COP11/Inf.26).

6. Membership

The Energy Task Force is open-ended. Its member organizations will comprise the Secretariats of the participating MEAs, representatives of relevant government institutions in the field of environment and energy in the Parties to the participating MEAs, representatives of the energy industry, relevant academic institutions, NGOs and other interested stakeholders.

7. Governance

The Energy Task Force will:

7.1. operate by seeking consensus, as much as possible, among the group;
7.2. once it has been convened, operate in accordance with a modus operandi, which shall be established by its members; and
7.3. report to the CMS Conference of the Parties and governing bodies of the other participating MEAs, as requested by them.

8. Operation

Funding permitting, a coordinator will be appointed from the Energy Task Force members under an arrangement with the CMS Secretariat to support the Chair, the Vice-Chair and the Energy Task Force members, as appropriate.

The coordinator will inter alia:

- organize the meetings of the Energy Task Force;
- maintain and moderate the Energy Task Force communication platform (website and internal online workspace);
- facilitate implementation of decisions of the Energy Task Force, as necessary;
- facilitate fundraising and resource mobilization in support of the activities of the Energy Task Force; and
- facilitate engagement with stakeholders within and beyond the Energy Task Force.
Meetings of the Energy Task Force will be convened at appropriate intervals, as considered necessary and funding permitting.

Between meetings business will be conducted electronically through an online workspace within the Energy Task Force’s website, which will provide the primary mode of communication and operation of the Energy Task Force.

9. **Financing**

Funding for the operations of the Energy Task Force, including the coordinator post, as well as the implementation of identified priorities will be sought from various sources, including from member organizations.
FUTURE CMS ACTIVITIES RELATED TO INVASIVE ALIEN SPECIES

Adopted by the Conference of the Parties at its 11th Meeting (Quito, 4-9 November 2014)

Considering that Article III of the Convention requests Parties to prevent, reduce and/or strictly control the introduction of exotic species, and to control and/or eliminate those already introduced;

Aware that invasive alien species (IAS) have an impact on migratory species through predation, competition and genetic changes caused by hybridization, as well as through the transmission of diseases, impairment of breeding and by causing loss of habitat and resources crucial for migratory species;

Noting that the impact of IAS may result in local extinction or decline in population numbers of certain species as well as changes to migration patterns, and that the natural behaviour of migratory species may lead to negative interactions with IAS not only in their breeding, stopover and wintering grounds, but also during migrations, which can result in cumulative impacts from IAS;

Stressing the need to encourage continued research and collection of data on impacts on migratory species posed by IAS, and also the importance of ensuring that future management of migratory species and their habitats adequately takes into account consequent impacts and risks posed by IAS;

Noting that IAS issues are explicitly covered by CMS and related instruments concluded under its auspices, including the updated CMS Strategic Plan 2006-2014 (UNEP/CMS/Conf.10.22) and the new CMS Strategic Plan 2015-2023 where IAS are considered as one of the threats to migratory species, requiring specific measures to be dealt with, within the specificities of CMS;

Remarking that the inclusion of provisions to prevent and/or control IAS is already ensured by the Convention, where needed, e.g. within the International Single Species Action Plans (SSAP) for endangered species included in Appendix I developed in cooperation with the Convention’s daughter instruments and other partner organizations, as it is the case of the CMS/AEWA SSAP for the White-headed duck, supported by the EU and the Bern Convention;
Appreciating that a number of CMS Agreements have already made progress towards tackling the threats posed by IAS to species listed on Appendix II, e.g. the African-Eurasian Migratory Waterbird Agreement (AEWA) in 2006 adopted Guidelines on Avoidance of Introductions of Non-Native Waterbird Species;

Noting with satisfaction the important contribution of specific initiatives such as the adoption by the Agreement on the Conservation of Albatrosses and Petrels (ACAP) of conservation guidelines aiming at assisting with the development of plans for the eradication of introduced vertebrates from breeding sites of ACAP species (particularly seabirds on islands);

Welcoming initiatives such as the Wadden Sea Plan 2010 adopted by the Common Wadden Sea Secretariat, which supports the Agreement on the Conservation of Seals in the Wadden Sea as well as the Trilateral Sea Cooperation, which foresees intensified support and efforts to harmonize approaches to the prevention, management and monitoring of aquatic and terrestrial IAS;

Recognizing the collaborative effort required at global, regional and local levels to deal with IAS, especially through prevention, early detection and rapid response, and that such efforts require collaboration among governments, economic sectors and non-governmental and international organizations;

Appreciating the important developments in the growth of inter-sectoral cooperation on IAS issues between different institutions and organizations and stressing that systematic cooperation between different conventions and agreements would provide greater and more effective opportunities to address issues related to IAS;

Welcoming the Convention on Biological Diversity’s work on addressing the risks associated with the introduction of IAS’s;

Aware of the Strategic Plan for Biodiversity 2011–2020 adopted at COP10 by the Convention for Biological Diversity (Nagoya, October 2010) including Target 9 the aims of which are: “invasive alien species and pathways are identified and prioritized, priority species are controlled or eradicated, and measures are in place to manage pathways to prevent their introduction and establishment”;

Welcoming the 5th CBD/Ramsar Joint Work Plan, for 2011-2020, through which Ramsar delivers its leading role for implementing CBD programmes of work related to wetlands, including on inland waters, marine and coastal biodiversity and protected areas, as well as the revised CMS/Ramsar Joint Work Plan, as flexible frameworks for collaboration with CBD, CMS and its wetland-relevant Agreements and Memoranda (see Ramsar Resolution XI.6);

Noting CMS Resolution 10.21 which welcomed the revised CMS/Ramsar Memorandum of Cooperation and Joint Work Plan as a flexible framework for collaboration with the CMS and its wetland-relevant sister Agreements and Memoranda;

Further noting CITES Resolution Conf.13.10 (Rev. CoP14) on “Trade in alien invasive species” recommending that the Parties consider the opportunities for synergy with CBD and explore appropriate cooperation and collaboration on the issue of introductions of alien species that are potentially invasive; and
Taking note of the Review of the Impact of Invasive Alien Species on Species under CMS (UNEP/CMS/COP11/Inf.32) undertaken by the IUCN/SSC Invasive Species Specialist Group (ISSG) and thanking the government of Italy for funding this Review;

The Conference of the Parties to the
Convention on the Conservation of Migratory Species of Wild Animals

1. Calls on Parties and non-Parties to address threats from IAS and particularly to undertake concrete dedicated actions aimed at preventing and mitigating the negative impact of IAS on migratory species, consistent with applicable international obligations and with a focus on CMS-listed species, including the elaboration of national lists of species for which restrictions might apply, development and further implementation of specific and/or thematic action plans and management plans for species and pathways of greater concern, focusing on Best Practices for Addressing Risks to Biodiversity including preventing the introduction of listed species, and where IAS threats have established eradicating priority IAS from priority sites, or controlling priority IAS threats (where eradication isn't feasible) also at priority sites;

2. Requests the Scientific Council to ensure that the following are addressed: the improvement of understanding of interactions between IAS and threatened migratory species; the development of priorities for intervention; and the improvement in international cooperation and development of adaptable management strategies when discussing topics for which IAS might be relevant;

3. Instructs the Secretariat to continue to streamline activities focusing on IAS issues within the CMS Family Secretariats, whenever feasible and relevant and within the mandates given by their Parties/Signatories, in order to enhance the effective delivery of concrete conservation action (including active management of IAS and the threatened CMS species) and awareness-raising;

4. Invites Parties and non-Parties to take into account the risk of migratory species to become invasive themselves if translocated and/or introduced outside their natural range, by undertaking dedicated risk assessments incorporating future climate change scenarios for any movement of animals, including measures related to conservation actions targeting endangered species;

5. Further invites Parties and non-Parties to take into account the risk of facilitating the introduction or spread of IAS while implementing any climate change mitigation or adaptation measures;

6. Instructs the Secretariat to encourage Parties and non-Parties: (i) to ensure at national level, effective collaboration in relation to issues concerning IAS among national authorities and focal points that deal with the CBD, the CITES, Ramsar Convention, the Bern Convention, IMO, IPPC, OIE and other organizations as appropriate (ii) to address threats from IAS and (iii) as appropriate, to make full use of existing guidelines in addressing the risks associated with the introduction of alien species;

7. Further instructs the Secretariat to identify potential strategic partners and engage with them when developing information campaigns and other outreach activities and encourages all relevant stakeholders to contribute to these initiatives;
8. **Urges** the Scientific Council to address at its future meetings options for enhanced cooperation, policy coherence and implementation with regard to work on IAS, in a manner consistent with their mandates, governance arrangements and agreed programmes of the Scientific Council and other MEAs;

9. **Instructs** the Secretariat, resources permitting, to participate in the Inter-Agency Liaison Group on Invasive Alien Species, established by decision IX/4 of CBD to address gaps and inconsistencies in the international regulatory framework on the IAS issue;

10. **Noting** the need for closer collaboration with other MEAs to harmonize efforts to further address the issue of IAS, including by developing guidance, analysing the risks associated with the introduction of alien species that are a potential threat to biodiversity, and taking note that the risks associated with the introduction of alien species may include impacts on ecosystem functioning and biodiversity at the ecosystem, species and gene levels, in order to support measures to prevent the introduction and spread of the most harmful species;

11. **Encourages** Parties, non-Parties and donors to provide financial support to ensure that adequate resources are provided to the Secretariat to allow partnerships to be developed and strengthened;

12. **Requests** Parties, non-Parties and donors to avoid policies and initiatives that either limit the use of effective measures to eradicate or control IAS threatening migratory species or facilitate the introduction and further spread of IAS which represent or might present a threat to migratory species; and

13. **Instructs** the Secretariat to develop closer consultative relationships with a number of environment funding organizations with a view to mobilizing resources for the implementation of the measures directed at dealing with IAS issues in relation to migratory species.
SUSTAINABLE BOAT-BASED MARINE\textsuperscript{1} WILDLIFE WATCHING\textsuperscript{2}

Adopted by the Conference of the Parties at its 11\textsuperscript{th} Meeting (Quito, 4-9 November 2014)

Aware that tourism is a growing market and that wildlife watching is an important market segment;

Also aware that wildlife watching activities in coastal and marine environments are growing fast, and that the management of boat-based wildlife watching presents additional challenges to those in the terrestrial environment;

Noting that commercial wildlife watching operations using boats in order to view a number of migratory species, including, but not limited to whales, dolphins, porpoises, dugongs, manatees, seals, sharks, rays, birds and turtles, are increasing;

Emphasizing that some marine species can be observed from land and that this may provide a low-impact alternative, or complement, to boat-based wildlife watching where it is feasible;

Recognizing that the revenues generated through wildlife watching can provide direct and indirect benefits to local communities, enhancing their economic and social status;

Recognizing further that when wildlife watching is managed carefully, the revenues generated can benefit the conservation of the target species and their ecosystem;

Noting that wildlife watching activities can lead to positive changes in attitudes towards nature conservation;

Conscious that the sustainability of wildlife watching operations depends upon the careful maintenance of the resources that ultimately generate the income, namely the target species and their habitats;

\textsuperscript{1} The definition of 'marine' shall include all marine and transitional waters i.e. those waters between the land and the sea which includes fjords, estuaries, lagoons, deltas and rias. Additionally, these guidelines should be applied to freshwater cetaceans e.g. river dolphins.

\textsuperscript{2} As far as is appropriate to the principles outlined in this Resolution this includes wildlife watching activities occurring from vessels and shore.
Conscious also, as outlined in Resolution 11.23 on Conservation Implications of Cetacean Culture, that disturbance caused by excessive exposure to wildlife watching boats may lead to changes in the target species’ behaviour and as a result, to negative consequences, such as emigration, reduced reproduction or reductions of the population;

Appreciating the extensive work that has been undertaken in other international fora with respect to whale watching activities, in particular the Agreement on the Conservation of Cetaceans in the Mediterranean and Black Seas (ACCOBAMS), the International Whaling Commission (IWC), the Pacific Regional Environment Programme (SPREP), the UNEP Caribbean Environment Programme (UNEP/CEP) and the International Sanctuary for the Protection of Marine Mammals (Pelagos Sanctuary); and

Acknowledging that a number of governments have already enacted progressive national regulations or guidelines in order to ensure the sustainability of commercial boat-based wildlife watching and some governments prohibit associated interactions including touching, feeding or swimming with wild cetaceans;

The Conference of the Parties to the
Convention on the Conservation of Migratory Species of Wild Animals

1. Urges Parties, in whose areas of jurisdiction commercial operations involving marine boat-based wildlife watching take place, to adopt appropriate measures, such as national guidelines, codes of conduct, and if necessary, national legislation, binding regulations or other regulatory tools, to promote ecologically sustainable wildlife watching;

2. Recommends that Parties in developing such measures take into account the following guiding principles based on which the boat-based wildlife watching activities should be conducted:

   (a) The activities should not have negative effects on the long-term survival of populations and habitats; and

   (b) The activities should have minimal impact on the behaviour of watched and associated animals;

3. Further recommends that Parties consider the measures as appropriate and depending on the target species in particular with respect to the need for provisions concerning:

   (a) Licensing or permitting of operators, including training, reporting and compliance requirements;

   (b) Level of activity, including the possible setting of daily, seasonal and/or geographical exclusion areas and limitations on the number of vessels;

   (c) Method of approach, including provisions on distance to be maintained and direction and speed of vessels, as well as careful and sensitive navigation in the vicinity of animals; and
(d) Interaction, including prohibition of operators’ behaviours that disturb animals or provoke interactions, unless there is good scientific evidence that this will not have negative consequences, or negatively impact the habitat;

4. Recommends further that, insofar as they are applicable, measures adopted by the Parties also cover opportunistic wildlife watching during other commercial and private boat-based activities;

5. Strongly encourages Parties to provide that the measures take into account the size and status of any wildlife watching programme and the specific needs of all affected species;

6. Also strongly encourages Parties to review these measures periodically to enable any impacts detected through research and monitoring of the populations to be taken into account as necessary;

7. Requests Parties that have adopted measures as described in paragraph 1 for boat-based wildlife watching activities to provide the Secretariat with copies of the relevant documents;

8. Encourages Parties to ACCOBAMS, the IWC, SPREP and UNEP/CEP to implement fully the guidelines and principles already adopted or developed in these fora;

9. Requests the Scientific Council, subject to availability of resources, to review existing agreed guidelines (such as those referenced in paragraph 7), existing good practice and underpinning scientific evidence of the issues of concern, and based on this review develop guidelines as appropriate on marine boat-based wildlife watching for different taxonomic groups, differentiated if necessary by geographic areas; and

10. Further requests the Scientific Council, subject to availability of resources, to conduct periodic reviews of the state of knowledge of the impacts of boat-based wildlife watching activities on migratory species and to recommend refined and adjusted measures or guidelines as appropriate.
MANAGEMENT OF MARINE DEBRIS

Adopted by the Conference of the Parties at its 11th Meeting (Quito, 4-9 November 2014)

Recalling CMS Resolution 10.4 on Marine Debris and reiterating the concern that marine debris has negative impacts on many species of migratory marine wildlife and their habitats;

Welcoming the Resolution 1/6 on Marine Plastic Debris and Micro Plastics adopted by more than 150 countries at the first United Nations Environment Assembly (UNEA), concluded on 27 June 2014;

Aware that entanglement in and ingestion of marine debris are both conservation and welfare concerns;

Acknowledging the substantial work on this subject being undertaken by other regional and global instruments, including inter alia the UNEP Global Programme of Action for the Protection of the Marine Environment from Land-Based Activities (GPA-Marine), the Regional Seas Conventions and Action Plans (RSCAPs), the Global Partnership on Marine Litter (GPML), the Global Partnership on Waste Management (GPWM), the International Convention for the Prevention of Pollution From Ships (MARPOL), the International Maritime Organization (IMO), the Convention on Biological Diversity (CBD), the International Whaling Commission (IWC), the London Convention, London Protocol, the Food and Agriculture Organization (FAO), the International Organization for Standardization (ISO), and the Inter-American Convention for the Protection and Conservation of Sea Turtles;

Further acknowledging actions undertaken by States to reduce the negative impacts of marine debris in waters within their jurisdiction;

Noting with gratitude that the extensive reviews called for in CMS Resolution 10.4 have been carried out with financial support from the Government of Australia;

Recognizing that information on marine debris remains incomplete, especially regarding the quantity present in the ocean and entering the ocean annually, as well as its sources, pathways, prevalence in different sea compartments, and fate in terms of fragmentation, decomposition, distribution and accumulation;

Concerned that currently available information is not sufficient in order to generally understand which populations and species are the most affected by marine debris, especially the
specific effects of marine debris on migratory as opposed to resident species, and that population level effects of marine debris are unknown in many cases;

*Emphasizing* that preventing waste from reaching the marine environment is the most effective way to address this problem;

*Further emphasizing* that despite the knowledge gaps relating to marine debris and its impacts on migratory marine wildlife, immediate action should be taken to prevent debris reaching the marine environment;

*Recalling* that in the outcome document of the United Nations Conference on Sustainable Development, held in Rio de Janeiro, Brazil, in June 2012, entitled “The Future We Want”, States committed “to take action to, by 2025, based on collected scientific data, achieve significant reductions in marine debris to prevent harm to the coastal and marine environment”;

*Aware* that a significant proportion of marine debris is the result of discharges of ship-generated waste and cargo residues into the sea, lost or abandoned fishing gear, and that the protection of the marine environment can be enhanced significantly by reducing these;

*Recognizing* that a range of international, regional and industry-based measures exist to manage waste on board commercial marine vessels and prevent the disposal of garbage at sea;

*Also recognizing* that the International Maritime Organization is the authority regulating shipping on the High Seas; and

*Conscious* that a wide range of target audiences needs to be addressed through effective public awareness and education campaigns in order to achieve the behavioural change necessary for a significant reduction of marine debris;

*The Conference of the Parties to the Convention on the Conservation of Migratory Species of Wild Animals*

1. *Takes note* of the reports on Management of Marine Debris published as UNEP/CMS/COP11/Inf.27, Inf.28 and Inf.29, which cover (i) Knowledge Gaps in Management of Marine Debris; (ii) Commercial Marine Vessel Best Practice; and (iii) Public Awareness and Education Campaigns;

2. *Encourages* Parties that have not yet done so to join other relevant Conventions such as MARPOL Annex V and the London Protocol, to join Protocols to Regional Seas Conventions on Pollution from Land Based Sources, and to include the prevention and management of marine debris in relevant national legislation;

3. *Further encourages* the Parties to engage, as appropriate, with other global marine initiatives such as the UNEP’s Global Programme of Action for the Protection of the Marine Environment from Land-Based Activities (GPA-Marine), the Regional Seas Programmes, the Global Partnership on Marine Litter (GPML), the Global Partnership on Waste Management (GPWM);
4. **Further encourages** Parties to continue working on the issue of management of marine debris in order to reach agreed conclusions on this subject;

**Knowledge Gaps in Management of Marine Debris**

5. **Encourages** Parties to consider within any monitoring programmes established giving particular regard, using standardized methodologies, to the prevalence of all the types of debris that may, or are known to, have impacts on migratory species; sources and pathways of these types of debris; geographic distribution of these types of debris; impacts on migratory species, within and between regions; and population level effects on migratory species as appropriate to national circumstances;

6. **Invites** Parties to consider implementing cost-effective measures for the prevention of debris, such as levies on single-use carrier bags, deposit refund systems for beverage containers and obligations for the use of reusable items at events as appropriate to national circumstances;

7. **Encourages** Parties to establish public awareness campaigns in order to assist in preventing waste from reaching the marine environment and set up management initiatives for the removal of debris, including public beach and underwater clean-ups;

8. **Calls upon** Parties to incorporate marine debris targets when developing marine debris management strategies, including targets relating directly to impacts on migratory species, and to ensure that any marine debris management strategies plan for and carry out evaluation;

9. **Encourages** the Scientific Council, with support from the Secretariat, to promote the prioritization of research into the effects of microplastics on the species ingesting them, and support research on the significance of colour, shape or plastic type on the likelihood of causing harm, in order to be able to focus management strategies in future;

10. **Invites** the Secretariat to work with the UNEP Regional Seas Programme to support standardization and implementation of methods for studies monitoring impacts in order to produce comparable data across species and regions that will allow robust ranking of debris types for risk of harm across different species groups;

11. **Requests** the Scientific Council, with support from the Secretariat, to further the Convention’s work on the marine debris issue and investigate the feasibility of close cooperation with other biodiversity-related agreements by means of a multilateral working group;

12. **Further requests** that working groups established under the Scientific Council incorporate the issue of marine debris where relevant, drawing on the work already undertaken by the Convention;

13. **Further requests** that the Secretariat ensure appropriate links are made with other regional and global instruments working on marine debris in order to share information and avoid duplication of effort;

**Commercial Marine Vessel Best Practice**

14. **Strongly encourages** Parties to address the issue of abandoned, lost or otherwise discarded fishing gear (ALDFG), by following the strategies set out under the FAO Code of Conduct for Responsible Fisheries;
15. *Further encourages* Parties to promote measures such as the Clean Shipping Index and marine environmental awareness courses among shipping operators;

16. *Invites* the United Nations Environment Programme to continue and increase its leading role in in acting as a moderator between the different stakeholders in the maritime industry, and facilitating coordination to enable best practice measures to be implemented;

17. *Encourages* shipping operators and other key industries involved with the international transport of goods to drive environmental demands, including adopting the indirect fees system in ports, supporting the improvement of port waste reception facilities in general, adopting, where possible, the use of waste-to-energy systems on vessels and implementing relevant ISO standards;

**Public Awareness and Education Campaigns**

18. *Strongly encourages* Parties to note the examples of successful campaigns provided in UNEP/CMS/ScC18/10.4.3 when considering campaigns to address the most pressing needs in their area of jurisdiction, and to support or develop national or regional initiatives that respond to these needs;

19. *Recommends* that Parties planning to implement regulatory measures or economic instruments in order to reduce the amount of waste entering the environment to accompany these with behavioural change campaigns aiding their introduction by communicating the rationale for introducing the measure, and therefore increasing the likelihood of support;

20. *Encourages* Parties and the Secretariat to cooperate with organizations currently campaigning on marine debris, and seek to engage organizations dealing with migratory species to promote campaigns and raise awareness of marine debris amongst their members;

21. *Further encourages* Parties, the Secretariat and stakeholders to develop marine debris campaigns of specific relevance to migratory species;

22. *Invites* industry bodies to promote debris prevention measures across their industries; and

23. *Calls on* campaign organizations to survey the campaign reach, message recognition and impact upon the target behaviour or levels of marine debris in order to evaluate the success of a campaign and readily share that information to enable future campaigns to be effective.
Recognizing that wildlife crime and offences have reached an unprecedented scale and global reach, with wildlife trafficking being highly lucrative with little risk of prosecution and thus ranks right behind arms and drug smuggling and human trafficking worldwide;

Concerned that wildlife crime and offences cause an immense loss of revenue for States and local communities, severely damage livelihoods and ecosystems, negatively impact on sustainable utilization and tourism, and in some cases lead to threats to human lives and fund organized criminal and other violent groups;

Acknowledging that “The Future We Want”, adopted at Rio+20 and endorsed by consensus of the UN General Assembly, “recognize[d] the economic, social and environmental impacts of illicit trafficking in wildlife where firm and strengthened action needs to be taken on both the supply and demand sides”;

Taking note of the UNEP Governing Council Decision 27/9 on advancing justice, governance and law for environmental sustainability;

Recognizing the role of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) as the principal international instrument for ensuring that international trade in specimens of wild animals and plants does not threaten the species’ survival;

Welcoming the adoption by the United Nations Environment Assembly (UNEA) of a Resolution on illegal trade in wildlife (UNEP/EA.1/3), acknowledging the role of CMS in countering such illegal activities and including the call for strengthened cross-agency cooperation;

Further welcoming the creation of the International Consortium on Combating Wildlife Crime (ICCWC), which includes the United Nations Office on Drugs and Crime (UNODC), the secretariat of CITES, Interpol, the World Customs Organization (WCO) and the World Bank, as an important collaborative effort to strengthen enforcement;
Noting the declaration and agreed urgent measures of the African Elephant Summit (Gaborone, December 2013), the declaration of the Elysée Summit for Peace and Security in Africa (Paris, December 2013), the London Declaration on Illegal Wildlife Trade (London, February 2014), the anti-poaching declaration of African Ministers of Tourism and UN World Tourism Organization (Berlin, April 2014) and the declaration of the Conference to Combat Wildlife Trafficking and Illicit Trade (Dar es Salaam, United Republic of Tanzania, May 2014) and also noting the “African Elephant Action Plan” and “African Elephant Fund”; 

Further noting that the species listed on the CMS Appendices include many of those most affected by wildlife crime and offences, including African elephants, Argali mountain sheep, Saiga antelopes, Snow leopards, gorillas, Saker falcons, sharks, sturgeons, Manta rays and marine turtles, and that their decline has severe negative impacts, both ecological and socio-economic; 

Concerned that the African elephant is particularly affected by wildlife crime and offences including as a result of increased demand for ivory in consuming markets, with poaching rates surpassing the species’ natural growth rate and an estimated annual loss of more than 20,000 individuals in 2013 alone, which will result in an overall population decline of 20 per cent within the next 10 years, if the situation is not altered; 

Recognizing the specific role of CMS in the global response to wildlife crime and offences by strengthening population management in situ, including population monitoring, awareness raising, capacity-building, national law enforcement and creation of alternative livelihoods, both within Range States and across national borders where wildlife crime and offences is often hardest to control; 

Recalling the value of CMS instruments, including its regional agreements and action plans, and its role in creating a platform for engaging all relevant stakeholders in addressing wildlife crime and offences in concert with all other aspects of wildlife conservation and management; 

Further recalling that CMS Parties have adopted Resolutions on minimizing the risk of poisoning to migratory birds (Res.10.26), on the illegal killing, taking and trade of migratory birds (Res.11.16) and on the Central Asian Mammal Initiative (Res.11.24), which includes a programme of work for the conservation of large mammal migrations in Central Asia providing inter alia for anti-poaching and other actions to minimize wildlife crime; 

Recognizing that wildlife crime and offences are not confined to terrestrial landscapes but also have an impact on the marine environment, where Illegal, Unreported and Unregulated fishing (IUU) constitutes a severe threat to migratory species, especially in the High Seas but also in areas within national jurisdiction; 

Further recognising Parties efforts to develop and implement legislative provisions and programmes and to promote the sustainable utilization of wildlife as an integral part of conservation and secure livelihoods of vulnerable communities; and 

Welcoming the close collaboration between CMS and CITES in working towards the sustainable use of transboundary wildlife including measures to eradicate wildlife crime and offences and noting the adoption of the CMS-CITES Joint Work Programme 2015-2020 at
the 65th Meeting of the CITES Standing Committee and the 42nd Meeting of the CMS Standing Committee;

_The Conference of the Parties to the_  
_Convention on the Conservation of Migratory Species of Wild Animals_

1. **Encourages** Parties and non-Parties to take measures to increase awareness of wildlife crime and offences among their enforcement, prosecution and judicial authorities and the civil society;

2. **Urges** Parties to take appropriate measures to ensure that their legislative framework provides for penalties for wildlife crime that are effective, act as a deterrent and reflect the gravity of the offence and provide for the confiscation of specimens taken in violation of the Convention;

3. **Urges** Parties and invites non-Parties to strengthen national and transboundary law enforcement with emphasis on interdisciplinary cooperation and intelligence sharing between relevant stakeholders, such as rangers, wildlife management, customs, police and the military;

4. **Suggests** that Parties and non-Parties establish cooperative bilateral and multilateral arrangements for the management of shared wildlife populations and habitats with common boundaries, in order to minimize illegal taking and trafficking;

5. **Encourages** Parties, where relevant and appropriate, to enhance cooperation for the repatriation of live, illegally-traded wildlife and promote the establishment of legal frameworks in recipient countries that ensure a timely and cost-efficient repatriation of live animals and eggs, ensuring that any such framework is consistent with Parties’ obligations under CITES and subject to relevant biosecurity and environmental concerns and policies;

6. **Encourages** Parties and non-Parties, funding agencies and CMS Partners to support capacity-building nationally, across borders and in the High Seas for rangers, customs, police, the military and other relevant bodies;

7. **Calls upon** Parties, non-Parties and relevant development agencies to promote alternative livelihoods in local communities in order to minimize wildlife crime and offences;

8. **Suggests** the enacting of national laws that prohibit the possession and sale of illegally obtained wildlife specimens and products other than those that have been confiscated;

9. **Recommends** that Parties and non-Parties work to reduce demand for illegally obtained wildlife specimens and products within their domestic markets and utilize the CMS framework to exchange knowledge and lessons learned regarding successful demand-side reduction strategies;

10. **Proposes** that Parties and relevant funding agencies provide adequate, predictable and timely financial support for implementing the provisions of this Resolution;
11. *Calls upon* Parties and other Range States that have not already done so, to sign the CMS instruments relevant to species particularly affected by wildlife crime and offences, such as the Gorilla Agreement, AEWA, and the MOUs on Sharks, Raptors and IOSEA marine turtles, and to implement the relevant provisions;

12. *Welcomes* the cooperation between the Secretariat and the members of the Collaborative Partnership on Sustainable Wildlife Management (CPW) and *encourages* the Secretariat to continue working closely with the CPW;

13. *Encourages* the many stakeholders addressing wildlife crime affecting migratory species to collaborate closely, including Parties, non-Parties, intergovernmental, international and national organizations, Multilateral Environmental Agreements and established networks, such as ICCWC and each of its partner agencies (CITES, INTERPOL, UNODC, the World Bank and the WCO), UNEP, Regional Fishery Management Organizations (RFMOs), and regional Wildlife Enforcement Networks (WENs); and

14. *Instructs* the Secretariat to continue strengthening collaboration with relevant stakeholders in order to address wildlife crime and offences.
CONSERVATION AND MANAGEMENT OF THE AFRICAN LION, *Panthera leo*

Adopted by the Conference of the Parties at its 11th Meeting (Quito, 4-9 November 2014)

*Aware* that, in 2012, the IUCN-SSC Cat Specialist Group classified *Panthera leo* as Vulnerable, with an estimated global population reduction of approximately 30% over the past two decades (three generations); African lions occupying as little as 17% of their historic range; 42% of major lion populations in decline; and a substantial decline in lions outside protected areas;

*Conscious* that lions continue to face a number of threats leading to population declines and fragmentation, including indiscriminate killing (primarily as a result of retaliatory or pre-emptive killing to protect life and livestock), prey base depletion, habitat loss and conversion, disease, illegal international trade in lion products and unsustainable offtakes from poorly managed trophy hunting operations;

*Aware* that *Panthera leo* is presently listed in Appendix II of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES), and that CITES is undertaking a review to assess the need for stronger protection of the species; and mindful of the need to strengthen cohesion between the Convention on Migratory Species and CITES;

*Concerned* that lion populations are becoming increasingly isolated from each other, and that the biological and genetic viability of some populations are in question;

*Noting* that an updated assessment of *Panthera leo* by the IUCN, to be published in 2015, is widely expected to show continuing declines among lion populations, particularly in west and central Africa;

*Recognizing* that regional strategies for west/central and east/southern Africa, developed approximately a decade ago, acknowledged the threats to lions and identified potential solutions, but have failed to stop or reverse declines in lion range and numbers; and mindful of the need to define alternative measures to strengthen the protection of the species;

*Noting* that *Panthera leo*, as defined by Wilson & Reeder (2005), and all its evolutionarily significant constituents, including *Panthera leo persica*, satisfy the Convention’s definition of ‘migratory species’; and that Article VII.5(e) of the Convention mandates the Conference of the Parties to ‘make recommendations to the Parties for improving the conservation status of migratory species’, regardless of whether such species are listed on the CMS Appendices;
Noting that the strategic plan for migratory species 2015-2023, has the mission “to promote actions to ensure the favourable conservation status of migratory species and their habitats, and to ensure the ecological integrity, connectivity and resilience of migration systems”;

Recognizing the vital contribution made by the CMS Scientific Council through its technical and scientific support for improving the conservation of migratory species, including terrestrial mammal species, for example through its development of the Central Asian Mammal Initiative adopted at its 18th Meeting (Bonn, Germany, 1-3 July 2014);

Noting further the Government of Kenya’s proposal to the 11th Meeting of the Conference of the Parties to include the Asiatic lion (Panthera leo persica) in Appendix I of the Convention and to include all other subspecies of the lion (Panthera leo) in Appendix II of the Convention; and

Considering that, in order for Parties to make an informed decision concerning the Appendix II listing of Panthera leo, more detailed information on the basis of additional consultations is required concerning its population status in all Range States;

The Conference of the Parties to the Convention on the Conservation of Migratory Species of Wild Animals

1. Requests the Range State Parties and invites other Range States of Panthera leo to review the outcome of the IUCN process that followed the thirteenth Conference of the Parties to CITES in 2004, and the resulting Conservation Strategy for the lion in Eastern and Southern Africa (December 2006) and the Conservation Strategy for the lion in West and Central Africa (February 2006), based on the outcome of the latest IUCN assessment when available, in order to identify the strengths and weaknesses of these strategies;

2. Requests the Range State Parties and invites other Range States to consult with each other concerning the population status of Panthera leo, and requests the Secretariat to provide assistance in this regard;

3. Requests the Range State Parties and invites other Range States to consult with the CITES Secretariat through national focal points to receive information from the currently ongoing process for the species;

4. Recommends a meeting of Range State Parties, other Range States, and partner organizations, including representatives from the CMS Scientific Council, to be convened as a matter of urgency in order to assess and evaluate the implementation of the Conservation Strategy for the lion in Eastern and Southern Africa (2006) and the Conservation Strategy for the lion in West and Central Africa (2006), and develop regional conservation action plans designed to reverse population declines and possible needs for capacity-building in lion Range States;

5. Requests the Range State Parties to present a review of progress to the 44th and 45th Meetings of the Standing Committee;
6. **Invites** the Range State Parties, subject to the findings of consultations among Range States and relevant stakeholders, to work towards an Appendix II listing proposal to be presented to the 12\textsuperscript{th} Meeting of the Conference of the Parties; and

7. **Invites** partners and donors to consider providing financial assistance to support this process.
GUIDELINES FOR ASSESSING LISTING PROPOSALS TO APPENDICES I AND II OF THE CONVENTION

Adopted by the Conference of the Parties at its 11th Meeting (Quito, 4-9 November 2014)

Recalling that CMS requirements for listing migratory species in Appendix I are set out in paragraphs 1 and 2 of Article III, and requirements for listing migratory species in Appendix II are set out in paragraph 1 of Article IV of the Convention;

Emphasizing that species proposed to be included in either Appendix I or II of the Convention must be migratory species, as defined in Article I, paragraph 1(a);

Noting that in Res.5.3 the Conference of the Parties decided to interpret ‘endangered’ in Article 1 paragraph 1(e) of the Convention as meaning “facing a very high risk of extinction in the wild in the near future” and considering that this interpretation should be maintained;

Further noting that in Res.2.2, paragraph 1(a) the Conference of the Parties adopted guidelines for the interpretation of the words ‘cyclically’ and ‘predictably’ in the definition of ‘migratory species’ and considering that these interpretations should be maintained;

Noting with appreciation the work undertaken by the CMS Scientific Council through Document UNEP/CMS/COP11/Doc.24.2 to develop guidelines to assist the Scientific Council and the Conference of the Parties to assess proposals for listing of species in, and the delisting of species from, the Appendices of the Convention;

Considering that the best scientific evidence available should be used in assessing listing proposals;

Considering the unique features and phenomenon of migratory species and significance of ecological networks in this regards;

Considering further that there should be conservation benefit expected to arise from a listing proposal being adopted;

Recalling that in Res.3.1 the Conference of the Parties agreed that additions to the Appendices of the Convention should be limited to species or lower taxa and that the migratory species covered by higher taxa listings in Appendix II need only be identified when agreements were being prepared;
Further recalling that many species are listed in the Appendices of both the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) and CMS and that for States that are Party to both Conventions it is desirable that the actions of the Conventions are complementary;

Further recalling that RFMOs establish conservation and management measures for many marine species (target or by-catch) managed under their purview, as applicable to all fishing vessels operating within the RFMOs Convention Area, based on the advice of the scientific committees of these bodies; and

Recognizing the value of seeking views from other intergovernmental bodies with respect to proposals for amendments to the Appendices;

The Conference of the Parties to the Convention on the Conservation of Migratory Species of Wild Animals

1. Decides to interpret the term “endangered” in Article I, paragraph 1(e), of the Convention, as meaning:

“facing a very high risk of extinction in the near future”;

2. Decides that in the interpretation of the term "migratory species" in Article I, paragraph 1 (a) of the Convention:

(i) The word "cyclically" in the phrase "cyclically and predictably" relates to a cycle of any nature, such as astronomical (circadian, annual etc.), life or climatic, and of any frequency;

(ii) The word "predictably" in the phrase "cyclically and predictably" implies that a phenomenon can be anticipated to recur in a given set of circumstances, though not necessarily regularly in time;

3. Resolves that, by virtue of the precautionary approach and in case of uncertainty regarding the status of a species, the Parties shall act in the best interest of the conservation of the species concerned and, when considering proposals to amend Appendix I or II, adopt measures that are proportionate to the anticipated risks to the species;

4. Instructs the Scientific Council to trial the use of the guidelines as documented in the Annex to this Resolution, as a guide in assessing proposals to list migratory species in Appendices I and II, and report back to the 13th Meeting of the Conference of the Parties (COP13) on their effectiveness;

5. Instructs the CMS Scientific Council and Secretariat to update Res.1.5 by developing a new template and guidelines for the drafting of listing proposals in line with the Annex of this Resolution, for adoption by the 44th or 45th Meeting of the Standing Committee in time for its use for proposals to be submitted to the Conference of the Parties at its 12th Meeting;

6. Requests the Scientific Council to clarify the meaning of the phrase “significant proportion” in Article I, paragraph 1 (a) of the Convention Text, and report back to the COP;
7. *Requests* the Secretariat to consult other relevant intergovernmental bodies, including RFMOs, having a function in relation to any species subject to a proposal for amendment of the Appendices and to report on the outcome of those consultations to the relevant meeting of the Conference of Parties; and

8. *Decides* that this Resolution replaces Resolutions 2.2 and 5.3 for assessing listing proposals to Appendices I and II of the Convention.
Annex to Resolution 11.33

GUIDELINES FOR ASSESSMENT OF APPENDIX I AND II LISTING PROPOSALS

1. CMS requirements for listing species or populations to Appendix I are set out in paragraphs 1 and 2 of Article III:
   
i. ‘Appendix I shall list migratory species which are endangered.

   ii. A migratory species may be listed in Appendix I provided that reliable evidence, including the best scientific evidence available, indicates that the species is endangered.’

2. CMS requirements for listing migratory species on Appendix II are set out in paragraph 1 of Article IV, and states two scenarios – which can be evaluated through three ‘tests’, the first two of which (tests 1a and 1b) are linked, that need to be considered for a listing proposal to be successful:

   ‘Appendix II shall list migratory species which have an unfavourable conservation status (Test 1a) and which require international agreements for their conservation and management (Test 1b), as well as those which have a conservation status which would significantly benefit from the international cooperation (Test 2) that could be achieved by an international agreement’.

3. Evidence of the migratory status of a species should be clearly demonstrated in a listing proposal. In particular the ‘cyclically and predictably’ nature of migrations across national boundaries should be demonstrated.

4. The IUCN Red List Categories and Criteria (Version 3.1, second edition) should be used as suggested below in assessing proposals to list migratory species on Appendices I and II:

   a. a taxon assessed as ‘Extinct in the Wild’, ‘Critically Endangered’, or ‘Endangered’ using the IUCN Red List criteria is eligible for consideration for listing in Appendix I, recognising that CMS Appendix I species are broadly defined as ‘endangered’.

   b. a taxon assessed as ‘Vulnerable’ or ‘Near Threatened’ would not normally be considered for listing in Appendix I unless there is substantive information subsequent to the IUCN Red List assessment that provides evidence of deteriorating conservation status, and information about the conservation benefits that an Appendix I listing would bring.

   c. a taxon assessed as ‘Extinct in the Wild’, ‘Critically Endangered’, ‘Endangered’, ‘Vulnerable’ or ‘Near Threatened’ using the IUCN Red List criteria will be eligible for consideration for listing in Appendix II; recognising that such taxa meet the definition of ‘unfavourable conservation status’ under the Convention.
d. a taxon assessed as ‘Data Deficient’ using the IUCN Red List criteria should be evaluated in terms of the merit of any individual Appendix II proposal. Information that may be available since the Data Deficient assessment should be considered on a case by case basis. It would be exceptional for a ‘Data Deficient’ assessed taxon to be considered for listing in Appendix I.

e. the scale of the Red List assessment should match the scale of the listing proposal. Thus for a proposal to include a species in the Appendices, the Red List assessment used should be a global assessment. However, if it is proposed to include a population or geographically separate part of a population of any species, then the Red List assessment used should be with respect to that population or part of that population.

f. in making a decision on whether a taxon qualifies for listing in either Appendix I or Appendix II, information which has become available since the last IUCN Red List assessment for a taxon should also be taken into account, using the same principles and percentage changes in populations as the red-listing process.

g. if an IUCN Red List assessment is not available for a taxon, equivalent information, using the same principles and percentage changes in populations as the red-listing process, should be provided in the listing proposal to enable it to be assessed on an equivalent basis.

5. The benefits and risks to conservation of listing or delisting should be explicitly stated for both Appendix I and Appendix II proposals. Coherence with existing measures in other multilateral fora should be considered.

6. The consideration of whether species ‘require international agreements for their conservation and management’ (Test 1b), or ‘have a conservation status which would significantly benefit from the international cooperation that could be achieved by an international agreement’ (Test 2) and thus qualify for inclusion in Appendix II should be decided on a case by case basis. Any proposal to include a species in Appendix II should include an assessment of whether:

i. existing legislation in the Range States is sufficient, or if further protection is needed;

ii. the majority of the population of the species concerned is migratory or sedentary;

iii. the factors that have led to an unfavourable conservation status are anthropogenic or natural;

iv. existing bilateral or multilateral measures/agreements need to be boosted or amended;

v. all range states already protect the species or have management recovery plans in place; and
vi. listing in a CMS Appendix would support measures in other multilateral fora;

and clearly demonstrate all three of the following:

a. how the inclusion on Appendix II will benefit the taxon;

b. a Party or Parties’ intention with respect to concluding an international agreement or concerted action; and

c. a Party or Parties’ willingness to adopt the role of Focal Point for the nominated taxon and lead the development of an international agreement or concerted action.

7. With regard to removing a species from the Appendices, the Conference of the Parties should follow the processes outlined in Article III and Article XI of the Convention when assessing the status of a migratory species in relation to it being considered for removal from Appendix I and/or II. In those instances where species proposed for delisting are also subject to the provisions of other Conventions and multilateral agreements between States related to the conservation or sustainable use of wild animals, the Secretariat should consult those relevant Conventions regarding the suitability of removing the protection provided by the CMS Appendices. Such consultation should aim to ensure that a complete assessment of the consequences of delisting a species from CMS have been considered within the context of the whole management of the species.

8. Proposals for the inclusion of taxa above the species level should not normally be accepted unless all of the species within that taxon meet the requirements of the Convention. Information on each species in the higher taxon should be included in the proposal, and each species should be assessed on its own merits. If a proposal is adopted, the individual species within the higher taxon should be listed in the Appendices of the Convention rather than the higher taxon.
ARRANGEMENTS FOR HOSTING THE
11th AND 12th MEETINGS OF THE CONFERENCE OF THE PARTIES

Adopted by the Conference of the Parties at its 11th Meeting (Quito, 4-9 November 2014)

Acknowledging with gratitude the offer which the Government of Ecuador made to host the 11th Meeting of the Conference of Parties in Quito in November 2014 as well as the 42nd and 43rd Meetings of the Standing Committee;

Recalling Article VII, paragraph 3, of the Convention, which states that the Secretariat shall "convene ordinary meetings of the Conference of the Parties at intervals of not more than three years, unless the Conference decides otherwise";

Taking note of the Government of the Philippines’ expression of interest in hosting the 12th Meeting of the Conference of the Parties; and

Further taking note of the decision of the Standing Committee, taken at its 41st Meeting, to accept the offers of both Ecuador and the Philippines to host sessions of the Conference of the Parties to the Convention;

The Conference of the Parties to the Convention on the Conservation of Migratory Species of Wild Animals

1. Commends the Government of Ecuador for having taken the initiative to host the 11th Meeting of the Conference of the Parties and expresses its deep gratitude for the significant resources which contributed to the organization of the Meetings including those of the Standing Committee; and

2. Instructs the Secretariat to work with the Government of the Philippines to make the necessary arrangements for COP12.
CONFERENCE OF THE PARTIES TO THE CONVENTION ON THE CONSERVATION OF MIGRATORY SPECIES OF WILD ANIMALS
11th MEETING
Quito, Ecuador, 4-9 November 2014

Proceedings of the 11th Meeting of the Conference of the Parties
Part I
