

# Sustainable use and trade of wildlife in Central Asia

**Katalin Kecse-Nagy**

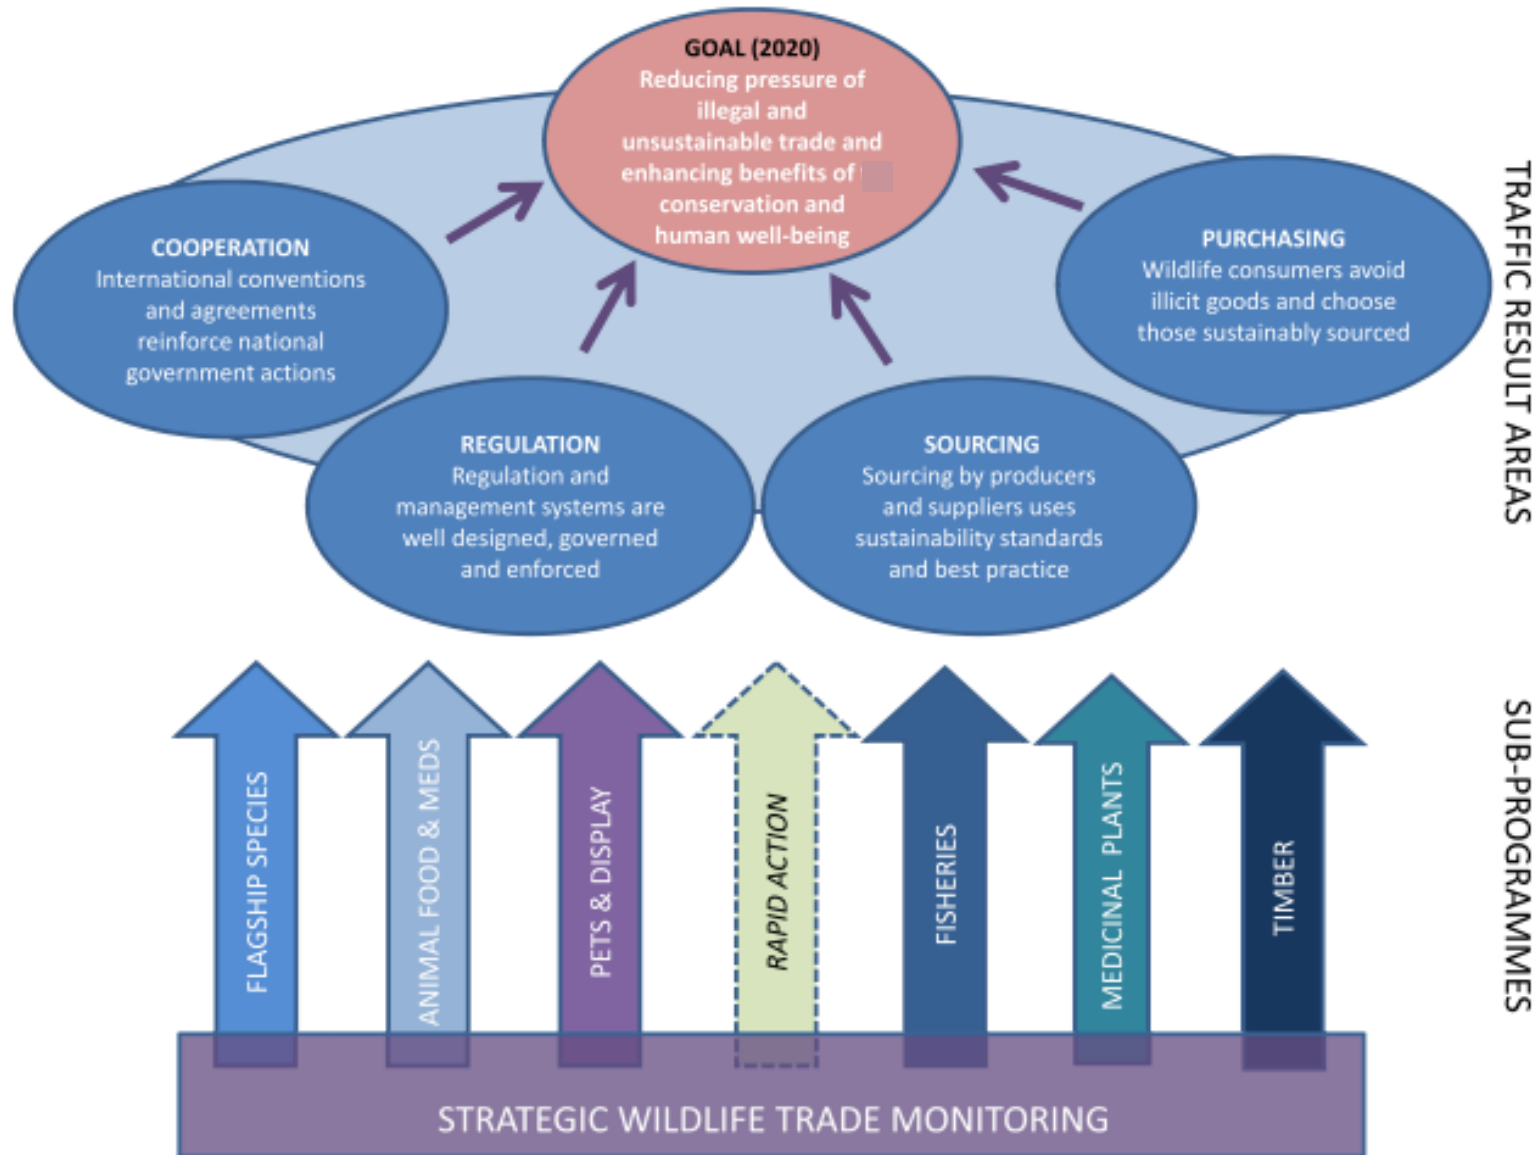

Senior Programme Officer, TRAFFIC

# Introduction to TRAFFIC

TRAFFIC, the wildlife trade monitoring network, works to ensure that trade in wild plants and animals is not a threat to the conservation of nature.

# Introduction to TRAFFIC

# Introduction

- Aim: to strengthen capacities to implement and enforce CITES in Central Asia and Russia
- Funding: from the European Union to the CITES Secretariat
- TRAFFIC: compiled three reports examining various wildlife trade related issues in Central Asia

# Report 1 - Eurasian Customs Union (ECU)

## *Wildlife trade in the Eurasian Customs Union and in selected Central Asian countries*

*Торговля объектами животного и растительного мира в странах Таможенного союза в рамках ЕврАзЭС и отдельных государствах Средней Азии*

Examines the implementation of CITES in the ECU and in selected Central Asian countries

# Eurasian Customs Union (ECU)

Current members of the **ECU**:

- BY
- KZ
- RU
- *KG – accession country*

**Source:** Map drawn on information after Silitski (2010), taken from TRAFFIC, 2012.

**Abbreviations:** AM – Armenia, AZ – Azerbaijan, BY – Belarus, CN- China, EE – Estonia, FI – Finland, GE – Georgia, JP – Japan, KG – Kyrgyzstan, KP – Democratic People’s Republic of Korea, KZ – Kazakhstan, LT – Lithuania, LV – Latvia, MN – Mongolia, PL – Poland, RU – Russia, TJ – Tajikistan, TM – Turkmenistan, UA – Ukraine, UZ – Uzbekistan.

# ECU

Торговля объектами животного и растительного мира  
в странах Таможенного союза в рамках ЕврАзЭС  
и отдельных государствах Средней Азии

Проект EC-CITES № S-415 по наращиванию потенциала

2013

Секретариат СИТЕС

- Removal of internal border controls - formally NOT intended to affect implementation and enforcement of obligations under CITES
- In practice, it could result in free and undeclared movements of wildlife within the ECU

# ECU – why could this be a problem?

## Possible examples of issues:

- “**permit shopping**” – a CITES export permit not granted in one member State could be granted for the same specimen in another member State
- “**exploiting the weakest link in the chain**” – potentially shifting trade routes towards less scrutiny at the borders
- “**concerns raised by the importer**” – regarding the true country of origin within the ECU

**need for a well-coordinated approach to regulate wildlife trade, for a regular exchange of information** in order to prevent potential negative impacts on the survival of Central Asia's wildlife

# ECU – selected sections of the report

## Summaries of country visits

- National CITES legislation
- National CITES authorities and interagency co-operation on CITES
- **Training and capacity building**
- Reported illegal trade

© BOGOMOLOV Denis / WWF-Russia

## CITES implementation in other Customs unions and regional organisations – examples for coordination and cooperation

- Association of Southeast Asian Nations (ASEAN)
- European Union (EU)
- North American Free Trade Agreement (NAFTA)
- Southern African Customs Union (SACU)

# ECU – CITES exports of hunting trophies

Reported exports\* of *Ovis ammon* hunting trophy items from the target countries (2000-2010), exporters' reports\*\*

Source: CITES trade statistics derived from the *CITES Trade Database*, UNEP-WCMC, Cambridge, UK.

\*Includes both: (i) trophies reported as direct exports from the target countries; and (ii) trophies for which a target country was reported as the country of origin.

\*\*Importers' reports are used for Russia (for 2006 only), for Kyrgyzstan (2000-2008) and for Tajikistan (all years).

Abbreviations: BY – Belarus, KZ – Kazakhstan, KG – Kyrgyzstan, RU – Russia, TJ – Tajikistan, UZ – Uzbekistan.

# ECU – Selected recommendations

## CITES in the ECU - addressed to ECU member States

- **need for organized and co-ordinated approach to CITES implementation and enforcement** → to ensure **consistency**;
- **establish co-ordinating mechanisms** → to allow for **regular and frequent information exchange and consistent decision-making on scientific to management and enforcement issues**;
  - to **formalize** these co-ordinating mechanisms in **ECU legislation**;
  - **nationally set export quotas** in the ECU context;
- to establish a **Wildlife Enforcement Network**;
- to establishment new **real-time information-sharing mechanisms** between authorities across the ECU.

# Report 2 - NDF framework

- *Framework for CITES non-detriment findings for hunting trophies with a focus on Argali Ovis ammon*
- *Структура процесса CITES, позволяющего сделать вывод о ненанесении вреда природным популяциям в ситуации трофейной охоты, с аргали (Ovis ammon) в качестве основного объекта Анализа*

- **NDF – Non-Detriment Finding** under CITES
- **Step by step guide** in determining whether trade in a particular trophy species is likely to be detrimental to its survival

# NDF guidance

# Report 3 - Trophy hunting in Central Asia

- reviews policies and regulations concerning trophy hunting in selected range States of the Argali *Ovis ammon*
- provides a framework for the establishment of sustainable hunting programmes that support conservation

# Report 3 - Trophy hunting in Central Asia

## Selected sections

**Poaching and illegal trade**

**Wildlife management**

**Transboundary initiatives**

**Best practice in community-based trophy hunting programmes**

- Pakistan, Africa

**Discussion**

- Taxonomy, split listings
- Contribution to livelihoods / species conservation
- Ecotourism
- Developing trophy hunting in the region
- Developing community-based programmes
- Governance

**Conclusions and recommendations**

the wildlife trade monitoring network

### PRESS RELEASE

## Central Asian border controls lifted. Wildlife trade under the spotlight.

Bonn, Germany, 1 July 2014 -- Member countries of the newly established Eurasian Customs Union (ECU, comprising Belarus, Kazakhstan and Russia) need to take a well-coordinated approach to better regulate wildlife trade and prevent potential negative impacts on the survival of Central Asia's wildlife, finds a new series of studies released today.

The ECU is a vast region stretching to China in the East and to the European Union in the West. With the creation of the ECU, open borders between the constituent countries have been created, similar to other regional economic integration zones.

While formally the removal of internal border controls is not intended to affect implementation and enforcement of obligations under the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES), in practice the removal could result in free and undeclared movements within the ECU of wildlife, including species listed under the Convention.

These are just some of the findings in three reports on the region

## Innovative campaign promotes success from within

**Ha Noi, 22nd September 2014**—A groundbreaking campaign is being launched in Viet Nam on World Rhino Day to promote the importance of individual character, determination and will as the secrets to success. The “Strength of Chi” campaign is based on the concept of “Chi” (“Will”) within Vietnamese culture, signifying the power of what lies within.
