False killer whale *Pseudorca crassidens*

## NO FOREIGN INDUSTRIAL FISHING

will enable Palau to:

- preserve its natural resources for future generations
- improve and preserve sustainable Palauan fisheries
- increase & preserve shark/ whale/ manta ray tourism
- develop catch & release sports fishing tourism
- stop illegal shark finning, whaling & smuggling

## WHAT YOU CAN DO

Support the ban on foreign industrial fishing in Palau's EEZ waters (629,000 sq km), & be part of creating the world's largest marine reserve. Let's end the damage being done to Palau's ocean ecosystems and economy by illegal and uncontrolled industrial over-fishing. This way Palauans can learn to fish in Palau waters sustainably and in harmony with tourism and nature.
