

CMS

2025 CMS National Report

Deadline for submission of the National Reports: : 30 September 2025

Reporting period: from May 2023 to February 2025

Parties are encouraged to respond to all questions and are also requested to provide comprehensive answers, when required.

National Report format is available through the CMS Family Online Reporting System (ORS), which has been successfully implemented and used by CMS, AEWA, IOSEA and Sharks MOU in collaboration with UNEP-WCMC.

Through Resolution 12.5 (Rev. COP14) and Decisions 14.27, 14.25 National Reports and 14.2 Samarkand Strategic Plan for Migratory Species, the Standing Committee and the Secretariat were tasked with developing a new format for National Reports that aligns with the SPMS. However, given that the indicators of the SPMS are not yet in place, and due to the time constraints caused by the exceptionally short intersessional period before COP15, there is insufficient time to substantially amend the National Report format to fully align it with the SPMS.

The Standing Committee therefore agreed to develop a new format for the reporting period after COP15, and to use the previous National Report format for the current reporting period, with only minor adjustments. These adjustments would include a limited number of additional questions on topics that COP14 specifically requested to be reported through National Reports.

Additionally, it was agreed not to attach the full list of species in Appendices I and II for verification by Parties, as this information was collected during previous reporting cycles but could not be fully assessed and reflected in the National Reports format due to a lack of resources. Instead, the Standing Committee agreed to collect information on Range States for species listed in the Annex to Resolution 14.19 during this reporting cycle, in accordance with Decision 14.234.

A proposal of the National Reports format was circulated by the Secretariat to the Standing Committee members on 13 December and it was agreed through communication procedure, in line with Rule 5 of the Rules of Procedure.

This online version of the format strictly follows the one adopted by Standing Committee through communication procedure. In addition, as was also the case for reporting prior to COP14, it incorporates pre-filled information, notably in Sections II and III, based on data available at the Secretariat from the previous reporting cycles.

Please note that guidance is available for a number of questions throughout the national report as both in-text guidance and as tool tips (displayed via the information 'i' icon).

For any question, please contact Mr. Aydin Bahramlouian, Public Information Officer, aydin.bahramlouian@un.org

NOTICE: Before clicking on the hyperlinks in this questionnaire, please keep pressing the **Ctrl button** on your keyboard to open the link in a new tab.

RESOURCES FOR THE CMS NATIONAL REPORT FROM OTHER RELEVANT INTERGOVERNMENTAL PROCESSES

Convention/Agreement/Process

Information source

Convention on Biological Diversity (CBD)

National Reports

Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES)

Annual trade reports, Annual illegal trade reports, Implementation reports

Convention on Wetlands of International Importance especially as Waterfowl Habitat

National Reports, Ramsar Information Sheets

Food and Agriculture Organization of the United Nations (FAO)

Country reports

United Nations Convention to Combat Desertification (UNCCD)

National Reports

United Nations Forum on Forests (UNFF)

National Reports

United Nations Framework Convention on Climate Change (UNFCCC)

National Communications, Biennial Reports, Update Reports

Various CMS Family Agreements and Memorandums of Understanding (MOUs)

National Reports

2030 Agenda for Sustainable Development and the Sustainable Development Goals

National Reports

Note: These reporting processes of other relevant intergovernmental frameworks are examples of information resources to be used when filling out this national report, which may assist in identification and strengthening of synergies among these processes. This list is **not** exhaustive. There are many other sources of information that may also be of relevance for migratory species, their habitats and migrations systems.

High-level summary of key messages

In your country, during the reporting period, what does this report reveal about:

Guidance:

This section invites you to summarise the most important positive aspects of CMS implementation in your country and the areas of greatest concern. Please limit this specifically to the current reporting period only.

Your answers should be based on the information contained in the body of the report: the intention is for this section to distil the technical information in the report into “high level” messages for decision-makers and wider audiences.

Please try also to be specific or provide specific examples where you can, e.g. “New wildlife legislation enacted in 2024 doubled penalties for poisoning wild birds” rather than “stronger laws”; “50% shortfall in match-funding for GEF project on gazelles” rather than just “lack of funding”.

The most successful aspects of implementation of the Convention? (List up to five items):

>>> Draft wildlife law prepared (2024–2025).

Wildlife and Biodiversity department created in MoECC.

Somalia started to join regional CMS talks (ex. HAWEN IGAD, APAD,AWF

More awareness with government about migratory species.

Submission of this CMS national report.

Somalia is part regional project funded by GBF

The greatest difficulties in implementing the Convention? (List up to five items):

>>> No funding for CMS projects.

No baseline data on migratory species.

Weak enforcement and few rangers.

Human pressures on habitats (grazing, charcoal, expansion).

Low awareness among public and communities.

The main priorities for future implementation of the Convention? (List up to five items):

>>> Finalise and approve wildlife law.

Look for international funding and partners.

Start surveys and monitoring of species.

Build capacity for rangers and community monitoring.

Strengthen regional cooperation with neighbours.

I. Administrative Information

Name of the Party

>>> Somalia

Date of entry into force of the Convention in your country (DDMMYY)

>>> 01.02.1986

Any territories which are excluded from the application of the Convention

>>> No territories are excluded. The Convention applies to the entire territory of Somalia

Report compiler

Name and title

>>> Abdirashid Artan, Director of Environment, NFP CMS

Full name of institution

>>> Ministry of Environment and Climate Change

Telephone

>>> 252615242817

Email

>>> artan@moecc.gov.so

Designated CMS National Focal Point

Name and title of designated Focal Point

>>> Abdirashid Artan, Director of Environment, NFP CMS

Full name of institution

>>> Ministry of Environment and Climate Change

Mailing address

>>> Maka Al Mukrama Street
(near the State House)
Mogadishu

Western African Aquatic Mammals	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

III. Species on the Convention Appendices

III.1 Please confirm that the Excel file “Res. 14.19 species per Party” linked below correctly identifies the **Appendix II** species listed in Resolution 14.19 Guidance on the treatment of species included within aggregated families listed under Appendix II for which your country is a Range State.

The list of Resolution 14.19 species per Parties is available **here**.

Notice: Before clicking on the above hyperlink, please keep pressing the **Ctrl button** on your keyboard to open the link in a new tab.

GUIDANCE TIP:

During the last two reporting cycles, information has been collected on Appendix I and Appendix II species, and the information received still needs to be analyzed. Therefore, this reporting cycle only focuses on bird species identified under Resolution 14.19. This Resolution invites Parties to consider the list of Species in its Annex when preparing National Reports. This question aims at collecting information on Range States of species listed in the Annex to Resolution 14.19. Parties are therefore invited to review the Range State data which are available in the excel spreadsheet “Res. 14.19 species per Party”. Please confirm that the list is correct, or if amendments are needed, create a line for each species for which you wish to indicate different information from that shown in the Excel spreadsheet. Where possible, please also provide supporting evidence, such as a reference to a scientific paper. A more detailed spreadsheet with Data per countries and territories is available here as background information. The data used for these spreadsheets are based on the CMS standard references for non-passerine and passerine species, as determined by Resolution 12.27(Rev.COP14) Taxonomy and Nomenclature, using its online version HBW-BirdLife Version 9.0 (October 2024)..

Yes, the list is correct

IV. Legal Prohibition of the Taking of Appendix I Species

IV.1. Is the taking of Appendix I species prohibited by national or territorial legislation in accordance with CMS Article III(5)?

No

Where the taking of all Appendix I species is **not** prohibited and the reasons for exceptions in Article III(5) do not apply, are steps being taken to update existing legislation or develop new legislation to prohibit the taking of all relevant species?

No

Please provide further information about the circumstances

>>> Somalia does not yet have a specific legal prohibition in force. A new wildlife law has been drafted (2024-2025) which, once approved, will provide clear protection for Appendix I species, including prohibition of hunting, capture, and trade. At present, implementation depends on general environmental regulations and traditional community practices, but no dedicated legal ban is enforced.

IV.4. Are any vessels flagged to your country engaged in the intentional taking of Appendix I species outside of your country's national jurisdictional limits (consistent with the definition of "Range State" in Article I of the Convention)?

No

V. Awareness

V.1. Please indicate the actions that have been taken by your country during the reporting period to increase people's awareness of the values of migratory species, their habitats and migration systems (note that answers given in section XVIII may also be relevant).
(select all that apply)

GUIDANCE TIP:

Awareness raising may include actions, steps, programmes, initiatives and/or activities described in various CMS documents, such as Resolution, Res. **11.9 (Rev.COP13)** (World Migratory Bird Day), as well as a number of other resolutions and decisions which include specific provisions about awareness raising, including Resolutions Res. **13.6** (Insect Decline), Res. **14.18** (Avian Influenza), Res. **14.17** (Communities and livelihoods), Res. **14.16** (Ecological Connectivity), Res. **14.15** (Action Plan to address aquatic Wild Meat Harvests), Res. **14.14** (CMS Jaguar Initiative), Res. **14.13** (Initiative for Central Asian Flyway), Res. **14.12** (Single Species Action Plan for the Angelshark (*Squatina squatina*) in the Mediterranean Sea), Res. **14.10** (Single Species Action Plan for the Atlantic Humpback Dolphin (*Sousa teuszii*), Res. **14.8** (Conservation and sustainable management of seagrass ecosystems), Res. **14.5** (Reducing the risk of vessel strikes for marine megafauna), Res. **14.1** (Samarkand Strategic Plan for migratory species 2024 - 2032), Res. **12.6 (Rev.COP14)** (Wildlife health and migratory species), Res. **12.11 (Rev.COP14)** (Flyways), Res. **12.17** (Conservation and Management of Whales and their Habitats in the South Atlantic Region), Res. **12.19 (Rev.COP14)** (Endorsement of the African Elephant Action Plan), Res. **12.20** (Management of Marine Debris), Res. **12.21 (Rev.COP14)** (Climate Change and Migratory Species), Res. **12.25** (Promoting Conservation of Critical Intertidal and Other Coastal Habitats for Migratory Species), Res. **11.16 (Rev.COP14)** (The Prevention of Illegal Killing, Taking and Trade of Migratory Birds), Res. **11.17 (Rev.COP14)** (Action Plan for Migratory Landbirds in the African-Eurasian Region), Res. **11.24 (Rev.COP13)** (Central Asian Mammal Initiative), Res. **11.31 (Rev.COP14)** (Illegal and unsustainable taking of wildlife), Res. **8.12 (Rev.COP12)** (Improving the Conservation Status of Raptors and Owls in the African-Eurasian Region), and Decision 14.194 (Ecological Connectivity), Decision 14.54 (Marine Wildlife Watching) and Decision 14.223 (Impacts of Plastic Pollution on Aquatic, Terrestrial and Avian Species).

- Press and media coverage
- Community-based celebrations, exhibitions and other events
- Engagement of specific stakeholder groups

VI. Mainstreaming Migratory Species in Other Sectors and Processes

VI.1. Does the conservation of migratory species currently feature in any national or local strategies and/or planning processes in your country relating to development, poverty reduction and/or livelihoods?

Yes

Please provide details:

GUIDANCE TIP:

Please describe how CMS objectives are incorporated in other sectoral strategies such as transport, construction, agriculture, tourism, education, spatial planning, Sustainable Development Goals and other strategies.

>>> Conservation of migratory species is not yet fully included in national development or poverty reduction strategies. However, Somalia has drafted wildlife legislation (2024–2025) and the Ministry of Environment and Climate Change is working to align with Sustainable Development Goals. Some CMS objectives are reflected in sector work, for example: promoting community livelihoods through sustainable use of rangelands, raising awareness in education programs, and linking biodiversity to ecotourism potential. Integration with agriculture, transport and construction is still limited but is a future priority.

VI.2. Does your country integrate the 'values of migratory species and their habitats' in any other national reporting processes?

E.g. Agenda 2030, reporting for International Whaling Commission, CBD, EU Nature Directives, etc.

GUIDANCE TIP:

Responses to this question should be focused on the reporting processes of the country rather than on plans and regulations within the country. This question intends to understand if the values of migratory species and habitats are featured in other national reporting that your country participates in, such as reporting to other biodiversity MEAs, the International Whaling Commission, European Commission etc.

No

VI.3. Provide some examples of significant involvements (if any) of non-governmental organizations and/or civil society in the conservation of migratory species in your country.

>>> Currently, Somalia does not formally include migratory species and their habitats in other national reporting processes. Some biodiversity information is shared under reporting for the Convention on Biological Diversity (CBD), but CMS-related values are not yet systematically integrated in national or international reporting, including SDG or other MEA reports. Strengthening this integration is a priority for future reporting.

VI.4. Provide some examples of significant involvements (if any) of the private sector in the conservation of migratory species in your country.

>>> At present, there is very limited involvement of the private sector in migratory species conservation in Somalia. Some small community-based ecotourism initiatives and local wildlife awareness programs involve private operators, but there are no formal private sector projects specifically supporting CMS objectives. Encouraging private sector engagement is a priority for future implementation.

VI.5. Are legislation and regulations in your country concerning Environmental Impact Assessments (EIA) and Strategic Environmental Assessments (SEA) considering the possible impediments to migration, transboundary effects on migratory species, and of impacts on migratory patterns and migratory ranges?

GUIDANCE TIP:

Please refer to Resolution **7.2 (Rev.COP14)** (Impact Assessment and Migratory Species).

Yes

Please describe any hindrances and challenges to the application of EIA and SEAs with respect to migratory species, lessons learned, and needs for further capacity development.

>>> Somalia has developed regulations for Environmental Impact Assessments (EIA) and Strategic Environmental Assessments (SEA), but these do not yet specifically consider impacts on migratory species, their movement, or transboundary effects. Integrating migratory species considerations into EIA/SEA processes is a priority for future legislation and implementation.

VI.6. To what extent have biodiversity and migratory species considerations been specifically integrated into national energy and climate policy and legislation?

GUIDANCE TIP

Please refer to Resolutions **12.21 (Rev.COP14)** (Climate Change and Migratory Species), Res. **11.27 (Rev.COP13)** (Renewable Energy and Migratory Species), Res. **10.11 (Rev.COP13)** (Power Lines and Migratory Birds), and Decision **14.207** (Renewable Energy and Migratory Species) for more information.

>>> Answer:

Biodiversity and migratory species considerations are not yet specifically integrated into Somalia's national energy or climate policies and legislation. While the Ministry of Environment and Climate Change is developing climate strategies aligned with the Sustainable Development Goals, explicit links to migratory species or their habitats, including renewable energy planning or power line impacts, are not yet addressed. Integrating CMS-relevant considerations into energy and climate planning is a priority for future policy development.

Please provide any examples related to such policy and legislation.

>>> There are no enacted policies or legislation in Somalia that specifically address migratory species in energy or climate planning. The closest examples are the draft wildlife legislation (2024-2025), which aims to protect species and habitats, and general climate adaptation strategies under the Ministry of Environment and Climate Change, which consider biodiversity broadly but do not yet include migratory species or impacts of energy infrastructure.

VII. Governance, Policy and Legislative Coherence

(SPMS Target 3: National, regional and international governance arrangements and agreements affecting migratory species and their migration systems have improved significantly, making relevant policy, legislative and implementation processes more coherent, accountable, transparent, participatory, equitable and inclusive.)

VII.1. Have any governance arrangements and agreements affecting migratory species and their migration systems in your country, or in which your country participates, resulted in improvements during the reporting period?

GUIDANCE TIP:

This question is intended to understand improvements in governance arrangements in your country, which may potentially include improvements in policy, legislation, governance processes, plans etc. Please also consider the guidance below in VII.2.

Yes

Please provide details:

>>> During the reporting period, Somalia has made initial steps to improve governance for migratory species. The Ministry of Environment and Climate Change established a Wildlife and Biodiversity Unit to coordinate CMS-related work, and the draft wildlife legislation (2024-2025) lays the foundation for stronger legal protection. These measures improve the structure for decision-making, coordination, and future policy coherence, but practical implementation and enforcement are not yet in place.

VII.2. Has any committee or other arrangement for liaison between different government agencies/ministries, sectors or groups been established at a national and/or subnational level in your country that addresses CMS implementation issues?

GUIDANCE TIP:

There is no fixed model for what these arrangements may involve, and it is for each Contracting Party to decide what best suits its own circumstances. Examples could include a steering group that includes representatives of territorial administration authorities, a coordination committee that involves the lead government department (e.g. environment) working with other departments (e.g. agriculture, industry); a forum that brings together government and NGOs; a liaison group that links with business and private sector interests; a stakeholder forum involving representatives of indigenous and local communities; a coordination team that brings together the National Focal Points for each of the biodiversity-related MEAs to which the country is a Party (see also question VII.3); or any other appropriate mechanism.

These mechanisms may be specifically focused on migratory species issues, or they may address CMS implementation in conjunction with related processes such as NBSAP coordination, a National Ramsar Committee, etc.

The Manual for National Focal Points for CMS and its Instruments may be helpful in giving further context.

Yes

Please provide details:

>>> Somalia has established a Wildlife Task Force within the Ministry of Environment and Climate Change to coordinate wildlife and migratory species issues. While it is not yet a formal multi-agency or national CMS committee, the Task Force brings together relevant government departments, NGOs, and community representatives to support coordination and planning. Strengthening this Task Force into a formal CMS coordination body is a priority for future implementation.

VII.3. Does collaboration between the focal points of CMS and other relevant global or regional Conventions take place in your country to develop the coordinated and synergistic approaches described in paragraphs 29, 30 and 32 of **Res. 11.10 (Rev.COP14)** (Synergies and partnerships) and in paragraph 7 of **Res. 14.3** (Engagement in CBD processes including the Global Biodiversity Framework) ?

GUIDANCE TIP:

Relevant Conventions may include other global agreements such as biodiversity-related Conventions and Agreements, UNFCCC, UNCCD, as well as regional agreements, including CMS Agreements. Such collaboration may also be relevant to aligning efforts related to the Kunming-Montreal Global Biodiversity Framework, the 2030 Agenda for Sustainable Development, the United Nations Decade on Ecosystem Restoration 2021-2030, and NBSAPs as described in **Dec. 14.6**(CMS Engagement in CBD Processes Including Global Biodiversity Framework) and **Res.8.18 (Rev.COP12)** (Integration of Migratory Species into NBSAPs and into On-going and Future Programmes of Work under CBD). Guidance documents for integrating considerations relevant to Migratory Species in NBSAPs are available at CMS website.

Yes

Please provide details:

>>> Somalia's CMS focal point actively collaborates with focal points for other biodiversity-related conventions,

including the Convention on Biological Diversity (CBD), UNFCCC, and UNCCD. This collaboration supports coordinated approaches to migratory species conservation and alignment with national reporting, the Global Biodiversity Framework, and other international commitments

VII.4. Has your country or any jurisdictional subdivision within your country adopted legislation, policies, initiatives or action plans during the reporting period that promote community involvement in conservation of CMS-listed species?

No

VIII. Incentives

VIII.2. Has there been development and/or application of positive incentives in your country during the reporting period, resulting in benefits for migratory species?

No, because there is no scope to do so

IX. Sustainable Production and Consumption

IX.1. During the reporting period, has your country implemented plans or taken other steps concerning sustainable production and consumption which are relevant for conservation of migratory species?

Yes

Please describe the measures that have been planned, developed or implemented

>>> Somali planted more trees and established more policies which is general

Please describe what evidence exists to show that the intended results of these measures are being achieved.

>>> Evidence of results is limited but promising. Some pilot community programs on sustainable grazing and habitat protection have led to early positive signs, such as elephants returning to previously degraded areas. Increased awareness among local communities has also helped reduce pressure on key habitats, though no systematic monitoring exists yet.

X. Threats and Pressures Affecting Migratory Species; Including Obstacles to Migration

Which of the following pressures on migratory species or their habitats are having an adverse impact in your country on migratory species included in the CMS Appendices?

Guidance: This question asks you to identify the important pressures that are reliably known to be having an actual adverse impact on CMS-listed migratory species at present. Please avoid including speculative information about pressures that may be of some potential concern but whose impacts have not yet been demonstrated.

Please note that, consistent with the terms of the Convention, “in your country” may in certain circumstances include areas outside national jurisdictional limits where the activities of any vessels flagged to your country are involved.

Intentional Taking

GUIDANCE TIP:

Please note that as per Article 1(i) of the Convention, “Taking” means taking, hunting, fishing, capturing, harassing, deliberate killing, or attempting to engage in such conduct.

	Species/species groups affected (please provide names and indicate whether Appendix I and/or Appendix II); and any other details	Overall relative severity of impact 1 = severe 2 = moderate 3 = low
Legal hunting		
Illegal hunting		
Other harvesting and take		
Illegal trade		
Deliberate poisoning		

What are the most significant advances that have been made since the previous report in addressing intentional taking?

>>> The most significant advance during this reporting period is the drafting of Somalia’s first comprehensive wildlife legislation (2024–2025), which, once approved, will prohibit hunting, capture, and trade of CMS Appendix I species. This lays the foundation for addressing intentional taking, although enforcement has not yet started.

XI. Conservation Status of Migratory Species

XI.1. What (if any) major changes in the conservation status of migratory species included in the CMS Appendices (e.g. national Red List category changes) have been recorded in your country during the reporting period?

“Conservation status” of migratory species is defined in Article I(1)(b) of the Convention as “the sum of the influences acting on the migratory species that may affect its long-term distribution and abundance”; and four conditions for conservation status to be taken as “favourable” are set out in Article I(1)(c).

If more rows are required, please upload an Excel file detailing a longer list of species.

GUIDANCE TIP:

The emphasis of this question is on “major changes” during the reporting period. Information is expected to be provided here only where particularly notable shifts in status have occurred, such as those that might be represented by a re-categorisation of national Red List threat status for a given species (or subspecies, where relevant). Please record if any CMS listed species has become extinct or extirpated from your country - or reintroduced/re-established/established - during the reporting period (or before if not previously reported to CMS).

Please note also that you are only being asked about the situation in your country. Information about global trends, and global Red List reclassifications etc, will be communicated to the CMS via other channels outside the national reporting process.

Terrestrial mammals (not including bats)

	Change in status (including time period concerned)	Comments	Source reference	Species/subspecies (indicate CMS Appendix where applicable)
	cheetah	somalia established rewcue center		1

Aquatic mammals

	Change in status (including time period concerned)	Comments	Source reference	Species/subspecies (indicate CMS Appendix where applicable)

Bats

	Change in status (including time period concerned)	Comments	Source reference	Species/subspecies (indicate CMS Appendix where applicable)

XII. Cooperating to Conserve Migration Systems

XII.1 During the reporting period, has your country initiated or participated in the development of any proposals for new CMS Agreements, including Memoranda of Understanding, to address the needs of Appendix II species?

E.g. Developments following the advice in Resolutions **12.8** and **13.7**.

No

XII.2. During the reporting period, have actions been taken by your country to encourage non-Parties to join CMS and its related Agreements?

No

XII.3. During the reporting period, has your country participated in the implementation of Concerted Actions under CMS (as detailed in Resolution **12.28 (Rev.COP14)**) to address the needs of relevant migratory species?

No

XII.4. Have any other steps been taken which have contributed to enhancing cooperation on the conservation of migratory species in ways that fully reflect a migration systems approach?

E.g. steps implementing Resolutions **12.11 (Rev.COP14)** (Flyways) and Res. **12.17** (South Atlantic Whales), and Decisions 14.130 (Action Plan for Migratory Landbirds), 14.137 (Flyways), and 14.207 (Renewable Energy and Migratory Species).

No

XII.5. Has your country mobilized resources and/or taken steps to promote and address ecological connectivity and its functionality in relevant international processes?

E.g., Kunming-Montreal Global Biodiversity Framework, 2030 Agenda for Sustainable Development, United Nations Decade on Ecosystem Restoration 2021-2030, etc.

GUIDANCE TIP:

Please describe initiatives aimed at implementing Decision 14.194.

Yes

Please provide details:

>>> GBF fund by Ethiopia and somalia leading CMS

XIII. Area-Based Conservation Measures

What are the main gaps and priorities to address, if any, in order to achieve full identification of relevant critical habitats and sites?

>>> Lack of systematic surveys and baseline data for migratory species and their habitats, including coastal wetlands, Hobyo grasslands, and riverine areas.

Limited mapping and monitoring capacity to document critical sites.

Insufficient collaboration with local communities and stakeholders to identify key areas.

Priority actions: conduct national surveys, develop a national inventory of critical sites, and strengthen data-sharing and mapping capacities.

Integrate identified critical habitats into land-use planning, protected areas, and conservation strategies.

XIII.2. Has any assessment been made of the contribution made by the country's protected areas network specifically to migratory species conservation?

Partly / for some areas

XIII.3. Has your country adopted any new legislation or other domestic measures in the reporting period in response to CMS Article III(4) (a) ("Parties that are Range States of a migratory species listed in Appendix I shall endeavor ... to conserve and, where feasible and appropriate, restore those habitats of the species which are of importance in removing the species from danger of extinction")?

No

XIII.4. In respect of protected areas in your country that are important for migratory species, have any assessments of management effectiveness been undertaken in the reporting period?

Partly / for some areas

XIII.5. Beyond Protected Areas, are other effective area-based conservation measures implemented in your country in ways which benefit migratory species?

No

XIV. Ecosystem Services

XIV.1. Has any assessment of ecosystem services associated with migratory species been undertaken in your country since the last reporting?

GUIDANCE TIP:

The phrase “associated with” migratory species allows you to report on any assessments that cover ecosystem services of systems, habitats or species assemblages that include migratory species. The question is therefore not expecting you to limit this to assessments focused solely on one or more migratory species.

For a broader biodiversity assessment to be relevant here, the migratory species involved must be making some identifiable contribution to the ecosystem services concerned.

No

XV. Safeguarding Genetic Diversity

XV.1. Are strategies of relevance to migratory species being developed or implemented to minimize genetic erosion of biodiversity in your country?

GUIDANCE TIP:

Strategies to be considered under this section do not necessarily have to specifically address migratory species but be of sufficient relevance in relation to the objective of safeguarding the genetic diversity of wild populations.

No

XVI. National Biodiversity Strategies and Action Plans

XVI.1. Does your country's National Biodiversity Strategy or Action Plan (NBSAP), or other relevant plans or strategies used in your country, explicitly address obligations under CMS, priorities for the conservation and management of migratory species, their habitats and migration systems, and ecological connectivity?

Yes

XVII. Traditional Knowledge, Innovations and Practices of Indigenous and Local Communities

In the absence of a national definition of 'indigenous and local communities', please refer to the Convention on Biological Diversity document **Compilation of Views Received on Use of the Term "Indigenous Peoples and Local Communities"** for helpful guidance on these terms.

XVII.2. During the reporting period, have actions been taken in your country to promote and foster effective participation and involvement of indigenous and local communities in the conservation and sustainable use of migratory species, their habitats and migration systems?

Partly / in some areas

If 'yes' or 'partly/in some areas' to either of the preceding two questions, please select which actions have been taken:

(select all that apply)

Engagement initiatives (e.g. as part of development projects)

Inclusion in governance mechanisms (legislation, policies, etc.)

Management strategies, programmes and action plans that integrate traditional & indigenous interests

XVII.3. How would you rank progress since the previous report in your country in the area of traditional knowledge innovations and practices of indigenous and local communities relevant for the conservation and sustainable use of migratory species?

2. Some progress but more work is needed

XVIII. Knowledge, Data and Capacity-Building

XVIII.1 During the reporting period, which steps taken in your country have contributed to the achievement of the results defined in the area of knowledge, data and capacity building? (Answers given in Section V may be relevant)

(select all that apply)

Capacity building

XVIII.2 Please describe the contribution these steps have made towards achieving the results defined in Target 15:

GUIDANCE TIP

Steps taken may include actions, programmes, initiatives and/or activities described in CMS documentation, such as Resolutions **14.9** (Conservation Priorities for Cetaceans), Res. **13.3** (Chondrichthyan Species), Res. **13.4** (African Carnivore initiative), Res. **13.5 (Rev.COP14)** (CMS international light pollution guidelines for migratory species), Res. **13.6** (Insect Decline), and Decisions 14.130/14.131 (AEMLAP), 14.134 (Preventing Poisoning of Migratory Birds), 14.148-14.151 (Conservation of African-Eurasian Vultures), Decisions 14.207-14.208 (Renewable Energy and Migratory Species), and 14.182 (Illegal and Unsustainable Taking of Wildlife).

Capacity building

>>> conducted training on wildlife enforcement agencies and establishing wildlife task force

XVIII.3 What assistance (if any) does your country require in order to build sufficient capacity to implement its obligations under the CMS and relevant Resolutions of the COP?

(select all that apply)

Funding support

Technical assistance

Other skills development

Exchange of information & know-how

Mobilizing volunteer effort (e.g. citizen science)

XIX. Resource Mobilization

XIX.1 During the reporting period, has your country made financial or other resources available for conservation activities specifically benefiting migratory species?

GUIDANCE TIP:

The “resources” that are relevant here can be financial, human or technical. In addition to funding, “in-kind” forms of support such as staff time or administrative infrastructure could be relevant, as could the loan of equipment, provision of data processing facilities, technology transfer, training or mentoring schemes and other initiatives for capacity building.

No

XIX.2. During the reporting period, has your country received financial or other resources for conservation activities specifically benefiting migratory species?

No

XIX.3. Which are the most important CMS implementation priorities requiring resources and support in your country during future reporting periods?

GUIDANCE TIP:

Please consider answers provided in HLS.3 when answering this question where appropriate, as they may be of relevance.

>>> Enact and implement wildlife legislation to provide legal protection for CMS-listed species.

Secure international funding and partnerships to support projects, monitoring, and capacity building.

Conduct baseline surveys and monitoring for migratory species and their habitats.

Strengthen enforcement and community engagement, including ranger training and awareness programs.

Develop multi-agency coordination and regional cooperation to address transboundary migratory species issues.
