

**Format for reports of Parties on implementation of the  
Convention on the Conservation of Migratory Species  
of Wild Animals (revision of June 2003)**

Reporting format agreed by the Standing Committee at its 26th Meeting (Bonn, June 2003) for mandatory use by Parties, for reports submitted to the Eighth Meeting of the Conference of the Parties (COP8) (Nairobi, 2005).

The questions below combine elements of Resolution 4.1 (Party Reports) adopted by the Fourth Meeting of the Conference of the Parties (Nairobi, June 1994) and Resolution 6.4 (Strategic Plan for the Convention on Migratory Species 2000-2005), adopted by the Sixth Meeting of the Conference of the Parties (Cape Town, November 1999), as well as commitments arising from other operational Resolutions and Recommendations of the Conference of the Parties.

Please refer to the separate instructions on completing the report. Parties are encouraged to respond to all questions, since it cannot be assumed that the absence of a response indicates that no activities taken have place in the current reporting period. Parties are also requested to provide comprehensive answers, including, where appropriate, a summary of activities, information on factors limiting action and details of any assistance required.

Which agency has been primarily responsible for the preparation of this report?

INSTITUTO DA CONSERVAÇÃO DA NATUREZA (ICN), Ministry of Environment, Landscape Planning and Regional Development

List any other agencies that have provided input:

Department of Oceanography – University of Azores;

Autonomous Government of the Azores – Regional Directorate for the Environment

Autonomous Government of Madeira – Regional Secretariat for the Environment and Natural Resources

Department of Biology, Marine Biology and Oceanography - University of Madeira;

Madeira Natural Park;

Whale Museum – Madeira

SPEA – Portuguese Society for the Study of Birds

**I(a). General Information**

Please complete any unfilled boxes and amend and/or update as appropriate the information provided in the table below:

Reports submitted:	1999, 2002, 2005
Period covered by this report:	2003 – 2005
Date of entry into force of the Convention in Portugal:	1 November 1983
Territory to which the Convention applies:	Portugal and the Autonomous Regions of Madeira and of the Azores
Reservations (against species listings):	None

<p>Designated Focal Point:  Name: Dr. João José Loureiro  Address: Instituto da Conservação da Natureza (ICN)  Rua de Santa Marta, 55  1150-294 Lisboa  Portugal</p> <p>Tel.: (+351) 21 350 79 00  Fax: (+351) 21 350 79 84  E-mail: loureiroj@icn.pt</p>	<p>Appointment to the Scientific Council:  Name: Marina Sequeira  Address: Instituto da Conservação da Natureza (ICN)  Rua de Santa Marta, 55  1150-294 Lisboa  Portugal</p> <p>Tel.: (+351) 21 350 79 00  Fax: (+351) 21 350 79 84  E-mail: sequeiram@icn.pt</p>

## I(b). Additional General Information

1	<p>Which other government departments are involved in activities/initiatives for the conservation of migratory species in your country? (Please list.)</p> <p>Portugal: Ministry of Agriculture, Rural Development and Fisheries:              General Directorate for Forestry Resources – namely for game species and migratory freshwater fishes;              General Directorate for Fisheries – namely for sharks</p> <p>Madeira: Regional Secretariat for the Environment and Natural Resources</p> <p>Azores: Regional Directorate for the Environment</p>
1a	<p>If more than one government department is involved, describe the interaction/relationship between these government departments:</p>
2	<p>List the main non-governmental organizations actively involved in initiatives for the conservation of migratory species in your country, and describe their involvement:</p> <p><i>Liga para a Protecção da Natureza</i> – portuguese NGO that has been involved in projects related to the conservation of stepic birds and their habitat, specially in Castro Verde SPA.</p> <p><i>QUERCUS</i> – portuguese NGO that in recent years has been involved in projects involving the conservation of birds of prey, the black stork and the creation and maintenance of rehabilitation centers for birds.</p> <p><i>Sociedade Portuguesa para o Estudo das Aves (SPEA)</i> – the Portuguese Society for the Study of Birds has recently signed an agreement with ICN in the framework of the project for the revision of the National Atlas of Birds. It is the national representative of BirdLife International and since January 2005 coordinates an EU LIFE project on “Important bird areas for seabirds in Portugal”.</p>
3	<p>Describe any involvement of the private sector in the conservation of migratory species in your country:</p> <p>EDP (Portuguese Electricity Company) and REN (Portuguese Electrical Network) have signed protocols with ICN in order to evaluate and minimize the impacts of electrocution from medium and high-voltage electricity transmission lines on migratory birds.</p> <p>BRISA (Portuguese Highways Company) signed a protocol with ICN in order to evaluate and minimize the impacts of the new highway A2 on the indigenous fauna.</p> <p><i>Zoomarine</i>, a dolphinarium established in southern Portugal, has been involved in projects of rehabilitation of marine mammals and sea turtles.</p> <p>Gaia Biological Park (near Oporto) has been involved in projects of bird rehabilitation.</p> <p>An agreement is under course between ICN and the Portuguese Association of Renewable Energies Producers to evaluate the impact of wind farms and hydroelectric power projects namely on bats, birds and migratory freshwater fishes. This agreement includes also the establishment of minimizing measures.</p>
4	<p>Note any interactions between these sectors in the conservation of migratory species in your country:</p> <p>Two protocols have been signed between the Institute for Nature Conservation and <i>Zoomarine</i> aiming at the establishment of a National Network for Live Marine Mammals Strandings and for the creation of a Center for Rehabilitation of Sea Turtles.</p> <p><i>QUERCUS</i> (in Castelo Branco district), in cooperation with ICN, is involved in a project for the reproduction of <i>Neophron percnopterus</i> using rehabilitated birds unable to be released into the wild.</p>

## II. Appendix I species

### 1. BIRDS

#### 1.1 General questions on Appendix I bird species

1	Identify the Ministry, agency/department, or organisation responsible for leading actions relating to Appendix I bird species: Portugal: Ministry of Environment, Landscape Planning and Regional Development - Instituto da Conservação da Natureza (ICN) Madeira: Regional Secretariat for the Environment and Natural Resources Azores. Regional Directorate for the Environment
2	Is the taking of all Appendix I bird species prohibited by the national implementing legislation cited in Table I(a) (General Information)? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If <i>other</i> legislation is relevant, please provide details:
2a	If the taking of Appendix I bird species is prohibited by law, have any exceptions been granted to the prohibition? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No If Yes, please provide details (Include the date on which the exception was notified to the CMS Secretariat pursuant to CMS Article III(7)):
3	Identify any obstacles to migration that exist in relation to Appendix I bird species: Habitat reduction and fragmentation; disturbance and mortality caused by hunting; disturbance due to human activities (barriers)..
3a	What actions are being undertaken to overcome these obstacles? Establishment of Special Areas of Conservation and Protected Areas (e.g. Santo André and Sancha lagoons, southern Portugal). Hunting management inside classified areas, including natural parks, pSICs and SPAs (already taking place). Management of recreational activities inside protected areas (already taking place). Environmental Impact Assessment.
3b	What assistance, if any, does your country require in order to overcome these obstacles?
4	What actions have been taken to prevent, reduce or control factors that are endangering or are likely to further endanger bird species, including strictly controlling the introduction of, or controlling or eliminating, already introduced exotic species (Article III(4)(c))? Control the introduction of exotic species, development of EIA for any project that might have a direct or indirect impact on bird species, establishment of SPAs (ex: <i>Falco naumanni</i> ), agreements with the private sector (ex: EDP and BRISA, see previous page).
4a	Describe any factors that may limit action being taken in this regard:
4b	What assistance, if any, does your country require to overcome these factors?

#### 1.2 Questions on specific Appendix I bird species

The following section contains a table for each Appendix I bird species for which your country is considered to be a Range State. Please complete each table as appropriate, providing information in summary form. Where appropriate, please cross-reference to information already provided in national reports that have been submitted under other conventions (e.g. Convention on Biological Diversity, Ramsar Convention, CITES). (Attach annexes as necessary.)

<i>Species Aquila heliaca</i> – Common Name(s) Imperial Eagle	
1	Is your country a Range State for this species? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
2	Please provide published distribution reference:
3	Summarise information on population size, trends and distribution (if known):
4	Indicate (with an 'X') and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available.) <input type="checkbox"/> Research <input type="checkbox"/> Monitoring <input type="checkbox"/> Species protection <input type="checkbox"/> Species restoration <input type="checkbox"/> Habitat protection <input type="checkbox"/> Habitat restoration <input type="checkbox"/> Other
5	If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?
6	Describe any future activities that are planned for this species:

<i>Species Falco naumanni</i> – Common Name(s) Lesser Kestrel	
1	Is your country a Range State for this species? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
2	Please provide published distribution reference: <ol style="list-style-type: none"> <li>1. Rocha, P.; Arajo, A.; Cruz, C. 1996 - A evolução das populações portuguesas de Francelho-das-Torres <i>Falco naumanni</i>. In Farinha, J.C.; Almeida, J.; Costa, H. (Eds.) Franco, A.; Catry, I.; Sutherland, W.J. &amp; Palmeirim, J. 2004 – Do different habitat preference survey methods</li> </ol>

	<p>produce the same conservation recommendations for Lesser Kestrels? <i>Animal Conservation</i> (2004) 7: 291-300.</p> <p>12. Cabral MJ (coord.), Almeida J, Almeida PR, Dellinger T, Ferrand de Almeida N, Palmeirim JM, Queiroz AI, Rogado L &amp; Santos-Reis M (eds.) (in prep.). <i>Livro Vermelho dos Vertebrados de Portugal</i>. Instituto da Conservação da Natureza. Lisboa.</p>
3	<p>Summarise information on population size, trends and distribution (if known):</p> <p>In 2001, the Portuguese breeding population was estimated between 286 and 291 pairs, in 2003 between 349 and 376 pairs and the last census in 2004 estimated 449 to 472 pairs. The species occurs mainly in the south part of the country (Alentejo) with 80% of the population concentrated at Castro Verde and Vale do Guadiana SPAs. The remaining 20% are spread in the IBAs of Cuba, Évora and Vila Fernando. In Campo Maior SPA the species was present in 2001 and disappeared due to lack of breeding sites and reduction of feeding habitats. The 3 EU LIFE-Nature projects coordinated by LPN in the Castro Verde SPA allowed an increase in nest availability, which may be one of the main reasons for the population increase registered in this area. Also the existence of an Agro-Environmental Measure (Zonal Plan of Castro Verde, that promotes the conservation of the pseudo-steppe habitat in Castro Verde SPA) aimed at the conservation of steppe land birds, such as the Great bustard and the Lesser Kestrel, had clear implications on the increase in population numbers in Castro Verde SPA, where prey availability is not a constraint for Lesser Kestrel conservation.</p> <p>Revision of the Portuguese Vertebrates Red Data Book (in prep.) classifies the species as VU.</p>
4	<p>Indicate (with an 'X') and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available.)</p> <p><input checked="" type="checkbox"/> Research</p> <p>Research conducted under the LPN (Liga para a Protecção da Natureza) EU LIFE Project “ Re-establishment of the Lesser Kestrel (<i>Falco naumanni</i>) in Portugal”. Research focused on hunting behaviour, hunting habitats and effects of predation and competition on the species.</p> <p>ICN is conducting a ringing program since 1994.</p> <p><b>Contact:</b> 1) Dr. Pedro Rocha, Parque Natural do Vale do Guadiana, Apartado 45, 7750 Mértola, Portugal.</p> <p>2) Liga para a Protecção da Natureza (LPN), Estrada do Calhariz de Benfica 187, 1500-124 Lisboa, Portugal.</p> <p><a href="mailto:lpn.natureza@mail.telepac.pt">lpn.natureza@mail.telepac.pt</a></p> <p><a href="http://www.lpn.pt">www.lpn.pt</a></p> <p><input checked="" type="checkbox"/> Monitoring</p> <p>National censuses of Lesser Kestrel are conducted yearly</p> <p><b>Contact:</b> Dr. Pedro Rocha, Parque Natural do Guadiana, Apartado 45, 7750 Mértola, Portugal</p> <p><input checked="" type="checkbox"/> Species protection</p> <p><input checked="" type="checkbox"/> Species restoration</p> <p><input checked="" type="checkbox"/> Habitat protection</p> <p>Project on the Conservation of Steppe Land Birds at Castro Verde region (southern Portugal)</p> <p><b>Contact:</b> Liga para a Protecção da Natureza (LPN), Estrada do Calhariz de Benfica 187, 1500-124 Lisboa, Portugal</p> <p><a href="mailto:lpn.natureza@mail.telepac.pt">lpn.natureza@mail.telepac.pt</a></p> <p><a href="http://www.lpn.pt">www.lpn.pt</a></p> <p><input checked="" type="checkbox"/> Habitat restoration</p> <p><input checked="" type="checkbox"/> Other</p> <p>Under the EU LIFE Project “Re-establishment of the Lesser Kestrel (<i>Falco naumanni</i>) in Portugal”, the following actions are been developed:</p> <ul style="list-style-type: none"> <li>• Breeding areas surveyed in 2003, 2004 and 2005.</li> <li>• Research into limiting factors carried out to identify factors that enable colony growth.</li> <li>• Measures taken to prevent predation and interspecific competition.</li> <li>• Artificial nests (more than 200) provided in Castro Verde and Guadiana SPAs; construction of walls and rehabilitation of breeding structures also provided new breeding sites.</li> <li>• Feedings areas promoted by implementation of farming techniques that are beneficial to the main prey occurrence.</li> <li>• Rehabilitation centre created in 2003 to specifically address Lesser Kestrel.</li> <li>• General public awareness campaigns for the conservation of the species.</li> <li>• Environmental education actions specially directed to the local populations and teachers</li> </ul>

5	If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?
6	Describe any future activities that are planned for this species: Development of Agriculture Zonal Plans for two SPAs (Vale do Guadiana and Campo Maior)

<i>Species Marmaronetta angustirostris</i> – Common Name(s) Marbled Teal	
1	Is your country a Range State for this species? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
2	Please provide published distribution reference:
3	Summarise information on population size, trends and distribution (if known):
4	Indicate (with an 'X') and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available.) <input type="checkbox"/> Research <input type="checkbox"/> Monitoring <input type="checkbox"/> Species protection <input type="checkbox"/> Species restoration <input type="checkbox"/> Habitat protection <input type="checkbox"/> Habitat restoration <input type="checkbox"/> Other
5	If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?
6	Describe any future activities that are planned for this species:

<i>Species Aythya nyroca</i> – Common Name(s) Ferruginous Pochard, Ferruginous Duck	
1	Is your country a Range State for this species? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
2	Please provide published distribution reference: 1. Costa, L.T.; Guedes, R.S., 1997 – Contagens de anatódeos invernantes em Portugal. Invernos de 1993/94 a 1995/96. <i>Estudos de Biologia e Conservação da Natureza</i> , <b>20</b> :56 pp. 2. Farinha, J.C.; Costa, H. 1999 – <i>Aquatic birds of Portugal. A field guide</i> [in portuguese]. Instituto da Conservação da Natureza: 268 p 3. Ministro, J. 2001 - A Importância da avifauna na gestão sustentável da Lagoa dos Salgados. Estágio de licenciatura de Engenharia do Ambiente da Universidade do Algarve 4. Costa, L. T, M. Nunes, P. Geraldés e H. Costa 2003 - Zonas Importantes para as Aves em Portugal. Sociedade Portuguesa para o Estudo das Aves, Lisboa.
3	Summarise information on population size, trends and distribution (if known): Since 2001, one breeding pair occupies regularly the Salgados Lagoon wetland. This is the first and the unique comproved record for Portugal. In autumn and winter, isolated birds are registred in different wetlands (Ria Formosa, Lagoa St. André), always in very low numbers. In Salgados Lagoon, 1 - 2 birds are regularly seen during winter. The migration and wintering records are under the 15 birds. The actual trend is stable.

4	<p>Indicate (with an 'X') and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available.)</p> <p><input type="checkbox"/> Research  <input checked="" type="checkbox"/> Monitoring</p> <p>As part of the annual waterbird counts</p> <p><input type="checkbox"/> Species protection  <input type="checkbox"/> Species restoration  <input checked="" type="checkbox"/> Habitat protection  <input type="checkbox"/> Habitat restoration  <input type="checkbox"/> Other</p> <p>The Lagoa dos Salgados (also known as Pera Marsh) is the only known breeding site for the species in Portugal. Since the classification of the Salgados Lagoon as an Important Bird Area, SPEA/BirdLife is being very active working with local NGO's and private and governmental institutions for the conservatin and protection of this site. Regular bird countings, wardening and habitat monitoring are being carried out during all year.</p> <p><b>Contacts:</b> 1) Instituto da Conservação da Natureza, Rua de Santa Marta 55, 1150-294 Lisboa, Portugal  2) João Ministro <a href="mailto:jministro@yahoo.com">jministro@yahoo.com</a> (IBA caretaker)  3) Luís Costa, Sociedade Portuguesa para o Estudo das Aves, <a href="mailto:luis.costa@spea.pt">luis.costa@spea.pt</a> (tel. +351.213220430)</p>
5	If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?
6	Describe any future activities that are planned for this species:

<b>Species <i>Oxyura leucocephala</i> – Common Name(s) White-headed Duck</b>	
1	Is your country a Range State for this species? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
2	Please provide published distribution reference:
3	Summarise information on population size, trends and distribution (if known): Population size and trends unknown.Few individuals have been sighted in some lagoons in central and southern Portugal.
4	<p>Indicate (with an 'X') and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available.)</p> <p><input type="checkbox"/> Research  <input checked="" type="checkbox"/> Monitoring as part of annual waterbird counts</p> <p><input type="checkbox"/> Species protection  <input type="checkbox"/> Species restoration  <input type="checkbox"/> Habitat protection  <input type="checkbox"/> Habitat restoration  <input type="checkbox"/> Other</p> <p><b>Contact:</b> Instituto da Conservação da Natureza, Rua de Santa Marta 55, 1150-194 Lisboa, Portugal</p>
5	If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?
6	Describe any future activities that are planned for this species:

<b>Species <i>Larus audouinii</i> – Common Name(s) Audouin's Gull</b>	
1	Is your country a Range State for this species? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No

2	<p>Please provide published distribution reference:</p> <ol style="list-style-type: none"> <li>BirdLife International 2004 - Birds in Europe: population estimates, trends and conservation status. Cambridge, UK: BirdLife International. (BirdLife Conservation Series No. 12).</li> <li>Nagy, S. &amp; Crockford, N. 2004 - Impletation in the European Union of Species Action Plans for 23 of the European most threatened birds. 3	<p>Summarise information on population size, trends and distribution (if known):</p> <p>The breeding population of Audouin's Gull is localized in Southern Portugal and is estimated at 25-30 pairs. There is no published information about the population trends.</p> <p>Revision of the Portuguese Vertebrates Red Data Book (<i>in prep.</i>) classifies the species as VU.</p>
4	<p>Indicate (with an 'X') and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available.)</p> <p><input checked="" type="checkbox"/> Research  <input checked="" type="checkbox"/> Monitoring</p> <p>As part of the annual waterbird counts</p> <p><b>Contact:</b> 1) Instituto da Conservação da Natureza, Rua de Santa Marta 55, 1150-294 Lisboa, Portugal  2) Sociedade Portuguesa para o Estudo das Aves (SPEA), Rua da Vitória 53 – 3rd E, 1100-618 Lisboa, Portugal</p> <p><a href="http://www.spea.pt">www.spea.pt</a></p> <p><input checked="" type="checkbox"/> Species protection  <input type="checkbox"/> Species restoration  <input checked="" type="checkbox"/> Habitat protection  <input type="checkbox"/> Habitat restoration  <input type="checkbox"/> Other</p>
5	<p>If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?</p>
6	<p>Describe any future activities that are planned for this species:</p> <p>As a result of collaboration between SPEA and BirLife/ Vogelbescherming Nederland the project "Conservation of Audouin's Gull (<i>Larus audouinii</i>) in Southern Portugal" is currently in progress. This project aims to study the Portuguese breeding, passage and wintering population of Audouin's Gull, and to define a national Action Plan for the species with the participation of ICN.</p>

<i>Species Acrocephalus paludicola</i> – Common Name(s) Aquatic Warbler	
1	Is your country a Range State for this species? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
2	Please provide published distribution reference:
3	<p>Summarise information on population size, trends and distribution (if known):</p> <p>Every year up to 4 individuals are ringed during the autumn migration at Santo André lagoon (southern Portugal). The species is also being sighted in central Portugal (Paul do Taipal and Paul de Arzila).</p>
4	<p>Indicate (with an 'X') and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available.)</p> <p><input type="checkbox"/> Research  <input type="checkbox"/> Monitoring  <input type="checkbox"/> Species protection  <input type="checkbox"/> Species restoration  <input type="checkbox"/> Habitat protection</p>

	<input type="checkbox"/> Habitat restoration <input checked="" type="checkbox"/> Other Ringing program <b>Contact:</b> National Ringing Station / CEMPA Instituto da Conservação da Natureza, Rua de Santa Marta 55, 1150-194 Lisboa, Portugal
5	If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?
6	Describe any future activities that are planned for this species:

If you have information indicating that your country should be considered a Range State for any other bird species that is listed in CMS Appendix I, but which is not included in the tables above, please complete a table (provided below) for each species.

<i>Species name, Common Name(s):</i> <b><i>Aquila adalberti</i></b> , Iberian Imperial eagle	
1	Please provide published distribution reference: <ol style="list-style-type: none"> <li>Catry, P. 1999 – Aves nidificantes possivelmente extintas em Portugal continental. Revisão e síntese da informação disponível. <i>Airo</i> 10:1-13.</li> <li>Palma, L.; Onofre. N.; Pombal, E. 1999 – Revised distribution of diurnal birds of prey in Portugal. <i>Avocetta</i> 23:3-18.</li> <li>Blanco, H. &amp; Pacheco, C. 2003 – O regresso da Águia Imperial Ibérica (<i>Aquila adalberti</i>) como nidificante em Portugal. Actas 3º Congresso de Ornitologia, SPEA, Aveiro.</li> </ol>
2	Summarise information on population size, trends and distribution (if known): In Portugal, the species was probably common and widespread in the end of the 19th century, but it suffered a severe decline throughout the 20th century, becoming extinct as a regular breeding species in 1977 (Catry, 1999; Palma <i>et al.</i> 1999). Currently, there are regular dispersal and wintering sites of juveniles and sub-adults, involving probably 10-30 individuals in the south of Portugal. In 2003, a pair of Iberian imperial eagles occupied a territory and bred successfully near the international sector of the River Tagus, in Castelo Branco district. In 2004 a second pair was found breeding in the same region. Surveys conducted in 2003 and 2004 indicate that there might exist another three possible pairs (C. Pacheco, <i>in verbis</i> <a href="mailto:empacheco.icn@clix.pt">empacheco.icn@clix.pt</a> ). The recovery and expansion of the Spanish population in recent years has reached the Portuguese border and it seems that the re-colonization of former breeding areas in Portugal as started..
3	Indicate (with an 'X') and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available.) <input type="checkbox"/> Research <input checked="" type="checkbox"/> Monitoring The nest is located in the vicinity of the Natural Park and SPA of Tejo Internacional. Monitoring of breeding success has been carried out since 2002. <input checked="" type="checkbox"/> Species protection Contacts between the land owners and the natural park staff have secured the species from any threat. <input type="checkbox"/> Species restoration <input checked="" type="checkbox"/> Habitat protection <input checked="" type="checkbox"/> Habitat restoration <input checked="" type="checkbox"/> Other All the above mentioned activities will be carried out under the Project "Improvement of the nesting habitat of the Iberian imperial eagle <i>Aquila adalberti</i> in the Tagus International area". This is a joint project between SPEA and ICN and as received a small grant (3000 €) from RSPB. This projects aims at securing the nesting habitat, as well as the tranquillity of the location during the breeding season. The project will support the special voluntary agreements that are to be made with the landowner and the game reserves nearby. Also during the Portuguese-Spanish summit (in 2004) an agreement was established between Spain and Portugal aiming

	<p>at the conservation of the Iberian Imperial eagle populations. The project will be developed between October 2004-2006.</p> <p><b>Contact:</b></p> <p>ICN: Carlos Pacheco (Project Manager), Av. 1º de Maio 11 – 2º, 6000 Castelo Branco, Portugal (<a href="mailto:cmpacheco@clix.pt">cmpacheco@clix.pt</a>)</p> <p>SPEA: Luís Costa (SPEA Executive Director) Rua da Vitória 53 – 3º Esq., 1100-618 Lisboa, Portugal  <a href="mailto:luís.costa@spea.pt">luís.costa@spea.pt</a> ; WEB: <a href="http://www.spea.pt">www.spea.pt</a></p>
4	If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?
5	Describe any future activities that are planned for this species: Monitoring of the existing population, species and habitat protection and submission of an EU-LIFE funding project.

<i>Species name, Common Name(s):</i>	
1	Please provide published distribution reference:
2	Summarise information on population size, trends and distribution (if known):
3	<p>Indicate (with an 'X') and briefly describe any activities that have been carried out in favour of this species in the reporting period. 5	Describe any future activities that are planned for this species:

Miscellaneous information or comments on Appendix I birds in general:
---

## 2. MARINE MAMMALS

### 2.1 General questions on Appendix I marine mammals

1	<p>Identify the Ministry, agency/department, or organisation responsible for leading actions relating to Appendix I listed marine mammals:</p> <p><b>Mainland Portugal:</b> Ministry of Environment – Instituto da Conservação da Natureza (ICN)  : Ministry of Agriculture, Rural Development and Fisheries – General Directorate for Fisheries and Aquaculture</p> <p><b>Azores:</b> Department of Oceanography and Fisheries – University of the Azores</p> <p><b>Madeira:</b> Madeira Natural Park  Whale Museum - Madeira</p>
2	<p>Is the taking of all Appendix I marine mammals prohibited by the national implementing legislation cited in Table I(a) (General Information)? <span style="float: right;"><input checked="" type="checkbox"/> Yes <input type="checkbox"/> No</span></p> <p>If <i>other</i> legislation is relevant, please provide details:</p>
2a	<p>If the taking of Appendix I marine mammals is prohibited by law, have any exceptions been granted to the prohibition? <span style="float: right;"><input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</span></p> <p>If Yes, please provide details (Include the date on which the exception was notified to the CMS Secretariat pursuant to CMS Article III(7)):</p>
3	<p>Identify any obstacles to migration that exist in relation to Appendix I marine mammals:</p> <p>No obstacles identified.</p>
3a	<p>What actions are being undertaken to overcome these obstacles?</p>
3b	<p>What assistance, if any, does your country require in order to overcome these obstacles?</p>
4	<p>What actions have been taken to prevent, reduce or control factors that are endangering or are likely to further endanger species of marine mammal, including strictly controlling the introduction of, or controlling or eliminating, already introduced exotic species (Article III(4)(c))?</p> <p>Desertas island Special Protected Area was created in May 1990 (Regional Legislative Decree 14/90/M of 23 May 1990) to protect the resident colony of monk seals. Apart from the effective protection of the species, this legislation aimed at the recovery of fishing resources. Gillnetting was prohibited around the island up to the 100m depth contour. In 1992 another Regional Legislative Decree (nr. 9/95/M, 20<sup>th</sup> May 1992) classified the Desertas islands as a Natural Reserve, prohibiting also all kinds of submarine fishing activities.</p>
4a	<p>Describe any factors that may limit action being taken in this regard:</p>
4b	<p>What assistance, if any, does your country require to overcome these factors?</p>

### 2.2 Questions on specific Appendix I marine mammals

The following section contains a table for each Appendix I marine mammal species for which your country is considered to be a Range State. Please complete each table as appropriate, providing information in summary form. Where appropriate, please cross-reference to information already provided in national reports that have been submitted under other conventions (e.g. Convention on Biological Diversity, Ramsar Convention, CITES). (Attach annexes as necessary.)

<i>Species Balaenoptera musculus</i> – Common Name(s) Blue Whale	
1	Is your country a Range State for this species? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
2	<p>Please provide published distribution reference:</p> <ol style="list-style-type: none"> <li>1. Chaves, A. 1924 – Cetáceos que aparecem no mar dos Açores. <i>A Pesca Marítima</i> <b>2</b> (15): 41-44.</li> <li>2. Ferreira, E. 1935 – Gigantes dos mares dos Açores. <i>Açoreana</i> (Bol. Soc. Afonso Chaves), <b>2</b>: 74-86.</li> <li>3. Teixeira, A. 1979 – Marine mammals of the Portuguese coast. <i>Sonderdruck aus Z.f. Saugetierkunde</i> <b>44</b> (4): 221-238.</li> <li>4. 5	<p>If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?</p> <p>The species is rare in the Portuguese EEZ</p>
6	<p>Describe any future activities that are planned for this species:</p> <p><b>Madeira:</b></p> <p>Project aimed at the Conservation of Cetaceans in Madeira archipelago, conducted by the Whale Museum.</p> <p>This species, together with other baleen whales will be studied in a joint project which is now being prepared to be submitted to funding. This project is being developed together with research teams from the Azores (Imar – Açores) and the Canary Islands and aims at studying the movements, distribution and population structure of baleen whales, through genetic and satellite telemetry analysis.</p>

<i>Species Balaena glacialis glacialis</i> – Common Name(s) Northern Right Whale, Biscayan Right Whale	
1	Is your country a Range State for this species? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
2	<p>Please provide published distribution reference:</p> <p>1. Maul, G.E.; Sergeant, D.E. 1977 – New cetacean records from Madeira. <i>Bocagiana</i>, <b>43</b>: 1-8.</p> <p>2. Martin, A.R.; Walker, F.J., 1997 – Sighting of a right whale (<i>Eubalaena glacialis</i>) with calf off S.W. Portugal. <i>Marine Mammal Science</i>, <b>13</b> (1):139-140.</p>

3	Summarise information on population size, trends and distribution (if known): Population size and trends unknown. Last animals sighted in Madeira archipelago in 1967. In spite of the shipboard and aerial surveys conducted in 2001, 2002, 2003 and 2004 no animals were sighted.
4	Indicate (with an 'X') and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available.) <input type="checkbox"/> Research <input checked="" type="checkbox"/> Monitoring <input type="checkbox"/> Species protection <input type="checkbox"/> Species restoration <input type="checkbox"/> Habitat protection <input type="checkbox"/> Habitat restoration <input type="checkbox"/> Other
5	If no activities have been carried out for this species in the reporting period, what has prevented such action being taken? The species is extremely rare in the Portuguese EEZ and within its range occurs in very low numbers
6	Describe any future activities that are planned for this species: This species together with all other cetaceans species will be monitored in Madeira waters by the Whale Museum through long term program prepared during the "Project for the Conesevation of Cetaceans in Madeira archipelago"

<i>Species Monachus monachus</i> – Common Name(s) Mediterranean Monk Seal	
1	Is your country a Range State for this species? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
2	Please provide published distribution reference: <ol style="list-style-type: none"> <li>Freitas, L. 1994 - Present status, conservation and future perspectives of the Mediterranean Monk seal colony in Desertas Islands. Thesis to obtain the Master of Science in Marine and Fisheries. Zoology Department of the Aberdeen University, Scotland.</li> <li>Neves, H.C. &amp; Pires, R. 1999 – <i>The monk seal in Madeira archipelago</i>. [in portuguese] Parque Natural da Madeira:76 pp.</li> <li>Cabral MJ (coord.), Almeida J, Almeida PR, Dellinger T, Ferrand de Almeida N, Palmeirim JM, Queiroz AI, Rogado L &amp; Santos-Reis M (eds.) (<i>in prep.</i>). <i>Livro Vermelho dos Vertebrados de Portugal</i>. Instituto da Conservação da Natureza. Lisboa.</li> </ol>
3	Summarise information on population size, trends and distribution (if known): In Portugal, Madeira archipelago is the only place where monk seals can be found. There is a resident colony in the Deserta Islands and Madeira Island is an area of occurrence of the species. The population of the Deserta Islands is estimated at 24 individuals and is increasing. The number of births per year, presently 3, is also increasing. Revision of the Portuguese Vertebrates Red Data Book ( <i>in prep.</i> ) classifies the species as CR.
4	Indicate (with an 'X') and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available.) <input checked="" type="checkbox"/> Research <input checked="" type="checkbox"/> Monitoring In the Desertas Islands the monk seal study and monitoring programme, which was initiated in 1989, is maintained. It is based on direct observation of the seals without disturbing them. There are 24 lookout-sites located around the Desertas, from where the observations are documented. <input checked="" type="checkbox"/> Species protection <input type="checkbox"/> Species restoration <input checked="" type="checkbox"/> Habitat protection The surveillance of the Natural Reserve has been under the responsibility of the nature wardens who regularly patrol the islands by boat. <input type="checkbox"/> Habitat restoration <input type="checkbox"/> Other Contact: Dr. Rosa Pires, Parque Natural da Madeira, Quinta do Bom Suceso, Caminho do Meio, 9000 Funchal, Madeira

5	If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?
6	Describe any future activities that are planned for this species: A system to monitor the seals inside the caves is in preparation.

<i>Species Balaenoptera borealis</i> – Common Name(s) Coalfish Whale; Pollack Whale; Rudophi's Rorqual	
1	Is your country a Range State for this species? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
2	<p>Please provide published distribution reference:</p> <ol style="list-style-type: none"> <li>Freitas, L., Dinis, A., Alves, F., Nóbrega, F., 2004. Cetáceos no Arquipélago da Madeira. 3	Summarise information on population size, trends and distribution (if known): This species is seen all year round in Madeira waters, close inshore and offshore. The bulk of observations has been done between the 500m and 2500m contour depth at distances from shore between 0,1 and 10 nautical miles. There are data on sighting rates (obtained from aerial and sea surveys), but no population size or trend estimates are presently available for Madeira. Every year few individuals are sighted in the Azores waters during the Spring. Revision of the Portuguese Vertebrates Red Data Book ( <i>in prep</i> ) classifies the species as EN.

3	<p>Summarise information on population size, trends and distribution (if known):</p> <p>Unknown. Is common throughout the year in the Azores. Most sightings comprise female and calves groups.</p> <p>This species is seen all year round in Madeira waters but the animals do not stay close to the islands for long periods of time. This means that groups of animals (larger groups of females with juvenils and calfs (up to 40 animals), small groups of males (2-4 animals) or lonely bulls) come and go all around the year. They use Madeira waters for feeding, socializing and breeding. These animals are generally observed at depths between 1000 and 1500m and at distances between 4 and 6 nautical miles from shore. There are data on sighting rates (obtained from aerial and sea surveys), but no population size or trend estimates are presently available.</p> <p>Few strandings are registered for mainland Portugal.</p> <p>Revision of the Portuguese Vertebrates Red Data Book (<i>in prep.</i>) classifies the species as EN (evaluation was done only for the Azores and Madeira EEZs).</p>

4	<p>Indicate (with an 'X') and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available.)</p> <p><input checked="" type="checkbox"/> Research  <input checked="" type="checkbox"/> Monitoring  <input checked="" type="checkbox"/> Species protection  <input type="checkbox"/> Species restoration  <input type="checkbox"/> Habitat protection  <input type="checkbox"/> Habitat restoration  <input type="checkbox"/> Other          Further protection is given by whale watching regulations applied in the Azores.</p> <p><b><u>Azores:</u></b></p> <p>Research on the distribution, habitat use and ecology of the species has been carried in several projects by Dep. Oceanography and Fisheries of the Un. Azores and IMAR – Institute of Marine Research, including:</p> <p>MARÉ (1998-2003) Management of Marine Protected Areas in the Azores – LIFE Nature Program</p> <p>CETAMARH (ongoing) Ecology and population structure of bottlenose dolphins and sperm whales in the Azores: assessing the relationship with habitat features – FCT (National Science Fundation, Portugal)</p> <p>MACETUS (ongoing) Population structure, distribution, movements and habitat use of <i>Physeter macrocephalus</i>, <i>Globicephala macrorhynchus</i>, <i>Tursiops truncatus</i> and <i>Stenella frontalis</i> in the Macaronesian Region (Azores, Madeira and Cannaries) – FEDER - INTERREG IIIB.</p> <p><b><u>Madeira:</u></b></p> <p>MACETUS (ongoing) Population structure, distribution, movements and habitat use of <i>Physeter macrocephalus</i>, <i>Globicephala macrorhynchus</i>, <i>Tursiops truncatus</i> and <i>Stenella frontalis</i> in the Macaronesian Region (Azores, Madeira and Cannaries) – FEDER - INTERREG IIIB.</p> <p>Project aimed at the Conservation of Cetaceans in Madeira archipelago, conducted by the Whale Museum.</p> <p><b>Contacts:</b></p> <p><u>At the Azores:</u> Dept. 5	<p>If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?</p>
6	<p>Describe any future activities that are planned for this species:</p> <p>In the Azores: Further research on the ecology, distribution and interaction with human activities.</p>

**If you have information indicating that your country should be considered a Range State for any other marine mammal species that is listed in CMS Appendix I, but which is not included in the tables above, please complete a table (provided below) for each species.**

<i>Species name, Common name(s):</i>	
1	Please provide published distribution reference:
2	Summarise information on population size, trends and distribution (if known):
3	<p>Indicate (with an 'X') and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):</p> <p><input type="checkbox"/> Research  <input type="checkbox"/> Monitoring</p>

	<input type="checkbox"/> Species protection <input type="checkbox"/> Species restoration <input type="checkbox"/> Habitat protection <input type="checkbox"/> Habitat restoration <input type="checkbox"/> Other
4	If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?
5	Describe any future activities that are planned for this species:

Miscellaneous information or comments on Appendix I marine mammals in general:
--

### 3 MARINE TURTLES

#### 3.1 General questions on Appendix I marine turtles

1	Identify the Ministry, agency/department, or organisation responsible for leading actions relating to Appendix I listed marine turtles: Ministry of Environment, Instituto da Conservação da Natureza Department of Oceanography, University of Azores Department of Biology Marine Biology and Oceanography, University of Madeira
2	Is the taking of all Appendix I marine turtles prohibited by the national implementing legislation cited in Table I(a) (General Information)? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If <i>other</i> legislation is relevant, please provide details:
2a	If the taking of Appendix I marine turtles is prohibited by law, have any exceptions been granted to the prohibition? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No If Yes, please provide details (Include the date on which the exception was notified to the CMS Secretariat pursuant to CMS Article III(7)):
3	Identify any obstacles to migration that exist in relation to Appendix I marine turtles: No major obstacles exist, but sea turtles suffer general problems like by-catches, pollution impact and marine traffic interactions
3a	What actions are being undertaken to overcome these obstacles? Research programs currently conducted at Azores and Madeira address fishing interactions.
3b	What assistance, if any, does your country require in order to overcome these obstacles? Funding for countrywide actions, starting with a central database, a tagging program, and the organisation of a marine rescue and stranding network that covers the whole country, including Azores and Madeira archipelagos.
4	What actions have been taken to prevent, reduce or control factors that are endangering or are likely to further endanger species of marine turtles, including strictly controlling the introduction of, or controlling or eliminating, already introduced exotic species (Article III(4)(c))? Fishing interaction research programs at Madeira and the Azores universities, local husbandry and care facilities in southern Portugal ( <i>Zoomarine</i> ) and Madeira.
4a	Describe any factors that may limit action being taken in this regard: The reduction of accidental by-catches in fishing gear probably reduces economic revenue of fishermen. However research projects are not completed.
4b	What assistance, if any, does your country require to overcome these factors? Funding for onboard observations on a larger scale. International agreements between states that share pelagic sea turtles, mainly Portugal, Spain, Morocco, Mauritania, Cape Verde and US could be considered..

#### 3.2 Questions on specific Appendix I marine turtles

The following section contains a table for each Appendix I marine turtle species for which your country is considered to be a Range State. Please complete each table as appropriate, providing information in summary form. Where appropriate, please cross-reference to information already provided in national reports that have been submitted under other conventions (e.g. Convention on Biological Diversity, Ramsar Convention, CITES). (Attach annexes as necessary.)

<i>Species Chelonia mydas</i> – Common Name(s) Green Turtle	
1	Is your country a Range State for this species? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
2	Please provide published distribution reference: 1. Hirth, H.F., 1971 – Synopsis of biological data on the green turtle <i>Chelonia mydas</i> (Linnaeus, 1758). FAO Fisheries

3	<p>Summarise information on population size, trends and distribution (if known):</p> <p>Loggerhead turtles are non breeding visitors to portuguese waters. However Portuguese waters are obligate developmental habitat for a probably large proportion of North Atlantic loggerhead sea turtles .Individuals observed in Portuguese waters are mainly juveniles. The EEZs of the Azores and Madeira harbour mainly US-born animals (Atlantic population). Population size seems to be increasing slightly. The origin and status of the Algarve (southern Portugal) population is unknown: animals can originate from the Atlantic (US), from Cape Verde or from the Mediterranean populations and are probably a mixture, with predominant Atlantic (US) origin.</p>
4	Indicate (with an 'X') and briefly describe any activities that have been carried out in favour of this species in the

<p>reporting period. (Please provide the title of the project and contact details, where available.)</p> <p><input checked="" type="checkbox"/> Research</p> <p><u>At Madeira:</u></p> <p>2001-2005 “Diving behaviour in juvenile pelagic stage loggerhead sea turtles and its relation to the black-scabbard longline fishery in Madeiran waters” Portuguese Science Foundation n° PDCTM/PP/MAR/15248/99</p> <p>1999-2003 “Trophic ecology and population structure of juvenile pelagic stage loggerhead sea turtles (<i>Caretta caretta</i>) in the North Atlantic Ocean” Portuguese Science Foundation funding n° Praxis/P/BIA/11310/1998</p> <p>1997-2001 “Conservation support project for North Atlantic <i>Caretta caretta</i>* sea turtles”, funded by the EU-DG XI Life-Nature-program, contract n° B4-3200/96/541</p> <p><b>Contact:</b> Dr. Thomas Dellinger, Estação de Biologia Marinha do Funchal, Cais de Carvão - Promenade da Orla Marítima, 9000-107 Funchal, Madeira (<a href="mailto:thd@uma.pt">thd@uma.pt</a>)</p> <p><u>At the Azores:</u></p> <p>Research on the by-catch and movements of <i>C. caretta</i> in the Azores is currently been conducted in cooperation with the Archie Carr Center of the Univ. of Florida and the Dep. 4	If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?
5	Describe any future activities that are planned for this species?

Miscellaneous information or comments on Appendix I marine turtles in general:

## 4 TERRESTRIAL MAMMALS (OTHER THAN BATS)

### 4.1 General questions on Appendix I terrestrial mammals (other than bats)

1	Identify the Ministry, agency/department, or organisation responsible for leading actions relating to Appendix I listed terrestrial mammals (other than bats):  Portugal is not a range state for Appendix I terrestrial mammals species (other than bats)
2	Is the taking of all Appendix I terrestrial mammals (other than bats) prohibited by the national implementing legislation cited in Table I(a) (General Information)? <span style="float: right;"><input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</span> If <i>other</i> legislation is relevant, please provide details:
2a	If the taking of Appendix I terrestrial mammals (other than bats) is prohibited by law, have any exceptions been granted to the prohibition? <span style="float: right;"><input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</span> If Yes, please provide details (Include the date on which the exception was notified to the CMS Secretariat pursuant to CMS Article III(7)):
3	Identify any obstacles to migration that exist in relation to Appendix I terrestrial mammals (other than bats):
3a	What actions are being undertaken to overcome these obstacles?
3b	What assistance, if any, does your country require in order to overcome these obstacles?
4	What actions have been taken to prevent, reduce or control factors that are endangering or are likely to further endanger species of terrestrial mammal (other than bats), including strictly controlling the introduction of, or controlling or eliminating, already introduced exotic species (Article III(4)(c))?
4a	Describe any factors which limit action being taken in this regard:
4b	What assistance, if any, does your country require to overcome these factors?

### 4.2 Questions on specific Appendix I terrestrial mammals (other than bats)

**If you have information indicating that your country should be considered a Range State for any terrestrial mammal species (other than bats) that is listed in CMS Appendix I, please complete a table (provided below) for each species.**

<i>Species name, Common name(s):</i>	
1	Please provide published distribution reference:
2	Summarise information on population size, trends and distribution (if known):
3	Indicate (with an 'X') and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):  <input type="checkbox"/> Research <input type="checkbox"/> Monitoring <input type="checkbox"/> Species protection <input type="checkbox"/> Species restoration

	<input type="checkbox"/> Habitat protection <input type="checkbox"/> Habitat restoration <input type="checkbox"/> Other
4	If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?
5	Describe any future activities that are planned for this species:

Miscellaneous information or comments on Appendix I terrestrial mammals (other than bats) in general:

## 5 BATS

### 5.1 General questions on Appendix I bats

1	Identify the Ministry, agency/department, or organisation responsible for leading actions relating to Appendix I listed bats: Portugal is not a range state for Appendix I bat species
2	Is the taking of all Appendix I bats prohibited by the national implementing Legislation cited in Table I(a) (General Information)? <span style="float: right;"><input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</span> If <i>other</i> legislation is relevant, please provide details:
2a	If the taking of Appendix I bats is prohibited by law, have any exceptions Been granted to the prohibition? <span style="float: right;"><input type="checkbox"/> Yes <input type="checkbox"/> No</span> If Yes, please provide details (Include the date on which the exception was notified to the CMS Secretariat pursuant to CMS Article III(7)):
3	Identify any obstacles to migration that exist in relation to Appendix I bats:
3a	What actions are being undertaken to overcome these obstacles?
3b	What assistance, if any, does your country require in order to overcome these obstacles?
4	What actions have been taken to prevent, reduce or control factors that are endangering or are likely to further endanger species of bats, including strictly controlling the introduction of, or controlling or eliminating, already introduced exotic species (Article III(4)(c))?
4a	Describe any factors that may limit action being taken in this regard:
4b	What assistance, if any, does your country require to overcome these factors?

### 5.2 Questions on specific Appendix I bat species

**If you have information indicating that your country should be considered a Range State for any bat species that is listed in CMS Appendix I, please complete a table (provided below) for each species.**

<i>Species name, Common name(s):</i>	
1	Please provide published distribution reference:
2	Summarise information on population size, trends and distribution (if known):
3	Indicate (with an 'X') and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available): <input type="checkbox"/> Research <input type="checkbox"/> Monitoring <input type="checkbox"/> Species protection <input type="checkbox"/> Species restoration

	<input type="checkbox"/> Habitat protection <input type="checkbox"/> Habitat restoration <input type="checkbox"/> Other
4	If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?
5	Describe any future activities that are planned for this species?

Miscellaneous information or comments on Appendix I bats in general:

## 6 OTHER TAXA

### 6.1 General questions on Appendix I species belonging to other taxa

1	Identify the Ministry, agency/department, or organisation responsible for leading actions relating to Appendix I listed species belonging to taxa not included in sections 1-5 above:
2	Is the taking of all Appendix I species belonging to taxa not included in sections 1-5 above, prohibited by the national legislation listed as being implementing legislation in Table I(a) (General Information)? <span style="float: right;"><input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</span> If <i>other</i> legislation is relevant, please provide details:
2a	If the taking of Appendix I species belonging to taxa not included in sections 1-5 above is prohibited by law, have any exceptions been granted to the prohibition? <span style="float: right;"><input type="checkbox"/> Yes <input type="checkbox"/> No</span> If Yes, please provide details (Include the date on which the exception was notified to the CMS Secretariat pursuant to CMS Article III(7)):
3	Identify any obstacles to migration that exist in relation to Appendix I species belonging to taxa not included in sections 1-5 above:
3a	What actions are being undertaken to overcome these obstacles?
3b	What assistance, if any, does your country require in order to overcome these obstacles?
4	What actions have been taken to prevent, reduce or control factors that are endangering or are likely to further endanger species belonging to taxa not included in section 1-5 above, including strictly controlling the introduction of, or controlling or eliminating, already introduced exotic species (Article III(4)(c))?
4a	Describe any factors that may limit action being taken in this regard:
4b	What assistance, if any, does your country require to overcome these factors?

### 6.2 Questions on specific Appendix I species belonging to other taxa

The following section contains a table for each Appendix I species belonging to taxa not included in sections 1-5 above, for which your country is considered to be a Range State. Please complete each table as appropriate, providing information in summary form. Where appropriate, please cross-reference to information already provided in national reports that have been submitted under other conventions (e.g. Convention on Biological Diversity, Ramsar Convention, CITES). (Attach annexes as necessary.)

<i>Species Carcharodon carcharias</i> – Common Name(s) Great White Shark	
1	Is your country a Range State for this species? <span style="float: right;"><input checked="" type="checkbox"/> Yes <input type="checkbox"/> No</span>
2	Please provide published distribution reference:  Brum, J.M. 1992 - Note on the presence of the great white shark <i>Carcharodon carcharias</i> (Linnaeus, 1758) in the waters of São Miguel, Azores. <i>Açoreana</i> 7 (3), 517-521 pp.

3	Summarise information on population size, trends and distribution (if known): The occurrence of <i>C. carcharias</i> in the Azores archipelago is thought to be rare based on a few catch records in S. Miguel Island. Distribution patterns and population parameters unknown.
4	Indicate (with an 'X') and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available): <input type="checkbox"/> Research <input type="checkbox"/> Monitoring <input type="checkbox"/> Species protection <input type="checkbox"/> Species restoration <input type="checkbox"/> Habitat protection <input type="checkbox"/> Habitat restoration <input type="checkbox"/> Other
5	If no activities have been carried out for this species in the reporting period, what has prevented such action being taken? The species is rare.
6	Describe any future activities that are planned for this species:

**If you have information indicating that your country should be considered a Range State for any other Appendix I listed species that belongs to taxa not included in sections 1-5 above, please complete a table (provided below) for each species.**

<i>Species name, Common name(s):</i>	
1	Please provide published distribution reference:
2	Summarise information on population size, trends and distribution (if known):
3	Indicate (with an 'X') and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available): <input type="checkbox"/> Research <input type="checkbox"/> Monitoring <input type="checkbox"/> Species protection <input type="checkbox"/> Species restoration <input type="checkbox"/> Habitat protection <input type="checkbox"/> Habitat restoration <input type="checkbox"/> Other
4	If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?
5	Describe any future activities that are planned for this species?

Miscellaneous information or comments on Appendix I species that belong to taxa not included in sections 1-5 above:

## 7 LISTING OF OTHER ENDANGERED MIGRATORY SPECIES IN APPENDIX I

1	Is your country a Range State for any other endangered migratory species not currently listed in Appendix I? If Yes, please provide details:	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
1a	Is your country taking any steps to propose listing any of these species? If Yes, please provide details:	<input type="checkbox"/> Yes <input type="checkbox"/> No
1b	What assistance, if any, does your country require to initiate the listing of these species?	

### III. Appendix II Species

#### 1. INFORMATION ON APPENDIX II SPECIES

Information pertaining to the conservation of Appendix II species that are the object of CMS Agreements will have been provided in periodic Party reports to those instruments. It will suffice therefore to reference (below), and preferably append, a copy of the latest report that has been submitted to the secretariat each of the Agreement/MoUs to which your country is a Party.

<b>ACCOBAMS (2001)</b>	
Date of last report: November 2004	Period covered: 2001 – 2004
<b>EUROBATS (1994)</b>	
Date of last report: March 2005	Period covered: March 2004 – February 2005
<b>MARINE TURTLES – AFRICA MoU (1999)</b>	
Date of last report:	Period covered:
<b>AEWA (1999)</b>	
Date of last report:	Period covered:
<b>ALBATROSSES AND PETRELS (2001)</b>	
Date of last report:	Period covered:

#### 2. QUESTIONS ON CMS AGREEMENTS

##### 2.1 Questions on the development of new CMS Agreements relating to birds

1	In the current reporting period, has your country <b>initiated</b> the development of any CMS Agreements, including Memoranda of Understanding, to address the conservation needs of Appendix II bird species? If Yes, what is the current state of development?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
2	In the current reporting period, has your country <b>participated</b> in the development of any CMS Agreements, including Memoranda of Understanding, which address the conservation needs of Appendix II bird species? If Yes, please provide details:	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
3	If your country has initiated or is participating in the development of an Agreement or Memorandum of Understanding, what assistance, if any, does your country require in order to initiate or participate in the instrument's development?	
4	Is the development of any CMS Agreement for birds, including Memoranda of Understanding, planned by your country in the foreseeable future? If Yes, please provide details:	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

##### 2.2 Questions on the development of new CMS Agreements relating to marine mammals

1	In the current reporting period, has your country <b>initiated</b> the development of any CMS Agreements, including Memoranda of Understanding, to address the conservation needs of Appendix II marine mammal species? If Yes, what is the current state of development?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
2	In the current reporting period, has your country <b>participated</b> in the development of any CMS Agreements, including Memoranda of Understanding, which address the conservation needs of Appendix II marine mammal species?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

	If Yes, please provide details:	
3	If your country has initiated or is participating in the development of an Agreement or Memorandum of Understanding, what assistance, if any, does your country require in order to initiate or participate in the instrument's development?	
4	Is the development of any CMS Agreement for marine mammals, including Memoranda of Understanding, planned by your country in the foreseeable future? If Yes, please provide details:	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

### 2.3 Questions on the development of new CMS Agreements relating to marine turtles

1	In the current reporting period, has your country <b>initiated</b> the development of any CMS Agreements, including Memoranda of Understanding, to address the conservation needs of Appendix II marine turtles? If Yes, what is the current state of development?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
2	In the current reporting period, has your country <b>participated</b> in the development of any CMS Agreements, including Memoranda of Understanding, which address the conservation needs of Appendix II marine turtles? If Yes, please provide details:	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
3	If your country has initiated or is participating in the development of an Agreement or Memorandum of Understanding, what assistance, if any, does your country require in order to initiate or participate in the instrument's development?	
4	Is the development of any CMS Agreement for marine turtles, including Memoranda of Understanding, planned by your country in the foreseeable future? If Yes, please provide details:	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

### 2.4 Questions on the development of new CMS Agreements relating to terrestrial mammals (other than bats)

1	In the current reporting period, has your country <b>initiated</b> the development of any CMS Agreements, including Memoranda of Understanding, to address the conservation needs of Appendix II terrestrial mammal species (other than bats)? If Yes, what is the current state of development?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
2	In the current reporting period, has your country <b>participated</b> in the development of any CMS Agreements, including Memoranda of Understanding, which address the conservation needs of Appendix II terrestrial mammal species (other than bats)? If Yes, please provide details:	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
3	If your country has initiated or is participating in the development of an Agreement or Memorandum of Understanding, what assistance, if any, does your country require in order to initiate or participate in the instrument's development?	
4	Is the development of any CMS Agreement for terrestrial mammals (other than bats), Including Memoranda of Understanding, planned by your country in the foreseeable future? If Yes, please provide details:	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

### 2.5 Questions on the development of new CMS Agreements relating to bats

1	In the current reporting period, has your country <b>initiated</b> the development of any CMS Agreements, including Memoranda of Understanding, to address the conservation needs of Appendix II bat species? If Yes, what is the current state of development?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
2	In the current reporting period, has your country <b>participated</b> in the development of any CMS Agreements, including Memoranda of Understanding, which address the conservation needs of Appendix II bat species? If Yes, please provide details:	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
3	If your country has initiated or is participating in the development of an Agreement or Memorandum of Understanding, what assistance, if any, does your country require in order to initiate or participate in the instrument's development?	
4	Is the development of any CMS Agreement for bats, including Memoranda of Understanding, planned by your country in the future? If Yes, please provide details:	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

## 2.6 Questions on the development of new CMS Agreements relating to other taxa

1	In the current reporting period, has your country <b>initiated</b> the development of any CMS Agreements, including Memoranda of Understanding, to address the conservation needs of Appendix II species belonging to taxa not included in sections 1-6 above? If Yes, what is the current state of development?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
2	In the current reporting period, has your country <b>participated</b> in the development of any CMS Agreements, including Memoranda of Understanding, which address the conservation needs of species belonging to taxa not included in sections 1-6 above? If Yes, please provide details:	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
3	If your country has initiated or is participating in the development of an Agreement or Memorandum of Understanding, what assistance, if any, does your country require in order to initiate or participate in the instrument's development?	
4	Is the development of any CMS Agreement for other taxa, including Memoranda of Understanding, planned by your country in the foreseeable future? If Yes, please provide details:	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

## 3. LISTING OF MIGRATORY SPECIES IN APPENDIX II

1	Is your country a Range State for any migratory species that has an unfavourable conservation status, but is <u>not</u> currently listed in Appendix II and could benefit from the conclusion of an Agreement for its conservation? If Yes, please provide details:	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
1a	Is your country taking any steps to propose the listing of this/these species in Appendix II? If Yes, please provide details:	<input type="checkbox"/> Yes <input type="checkbox"/> No
1b	What assistance, if any, does your country require to initiate the listing of this/these species?	

## IV. National and Regional Priorities

1	What priority does your country assign to the conservation and, where applicable, sustainable use of migratory species in comparison to other biodiversity-related issues?	<input type="checkbox"/> Low <input checked="" type="checkbox"/> Medium <input type="checkbox"/> High																																	
2	Are migratory species and their habitats addressed by your country's national biodiversity strategy or action plan?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No																																	
	If Yes, please indicate and briefly describe the extent to which it addresses the following issues:																																		
	<input checked="" type="checkbox"/> Conservation, sustainable use and/or restoration of migratory species (Ex: A captive breeding programme for <i>Aquila chrysaetus</i> is running at Peneda-Gerês National Park; see information provided for <i>F. naumanni</i> )																																		
	<input checked="" type="checkbox"/> Conservation, sustainable use and/or restoration of the habitats of migratory species, including protected areas																																		
	<input checked="" type="checkbox"/> Actions to prevent, reduce or control factors that are endangering or are likely to further endanger migratory species (e.g. alien invasive species or by-catch)																																		
	<input checked="" type="checkbox"/> Minimising or eliminating barriers or obstacles to migration																																		
	<input checked="" type="checkbox"/> Research and monitoring of migratory species																																		
	<input checked="" type="checkbox"/> Transboundary co-operation																																		
	The National Strategy for the Conservation of Nature and Biodiversity addresses all these issues.																																		
3	Does the conservation of migratory species currently feature in any other national or regional policies/plans (apart from CMS Agreements)?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No																																	
	If Yes, please provide details:																																		
	Hunting legislation, some agro-forestry measures and plans, EIA developed in all major projects, power lines typology, water quality, territory management / land-use planning, fisheries policies (bycatch), the development of projects or activities in classified areas that may have a negative impact on species or habitats must have a special permit from the Ministry responsible for the Environment.																																		
3a	Do these policies/plans cover the following areas (if Yes, please provide details):																																		
	<table style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 10%; text-align: left;">Yes</th> <th style="width: 10%; text-align: left;">No</th> <th></th> </tr> </thead> <tbody> <tr> <td><input checked="" type="checkbox"/></td> <td><input type="checkbox"/></td> <td>Exploitation of natural resources (e.g. fisheries, hunting, etc.)</td> </tr> <tr> <td><input checked="" type="checkbox"/></td> <td><input type="checkbox"/></td> <td>Economic development</td> </tr> <tr> <td><input checked="" type="checkbox"/></td> <td><input type="checkbox"/></td> <td>Land-use planning</td> </tr> <tr> <td><input checked="" type="checkbox"/></td> <td><input type="checkbox"/></td> <td>Pollution control</td> </tr> <tr> <td><input checked="" type="checkbox"/></td> <td><input type="checkbox"/></td> <td>Designation and development of protected areas</td> </tr> <tr> <td><input checked="" type="checkbox"/></td> <td><input type="checkbox"/></td> <td>Development of ecological networks</td> </tr> <tr> <td><input checked="" type="checkbox"/></td> <td><input type="checkbox"/></td> <td>Planning of powerlines</td> </tr> <tr> <td><input type="checkbox"/></td> <td><input type="checkbox"/></td> <td>Planning of fences</td> </tr> <tr> <td><input checked="" type="checkbox"/></td> <td><input type="checkbox"/></td> <td>Planning of dams</td> </tr> <tr> <td><input type="checkbox"/></td> <td><input type="checkbox"/></td> <td>Other</td> </tr> </tbody> </table>	Yes	No		<input checked="" type="checkbox"/>	<input type="checkbox"/>	Exploitation of natural resources (e.g. fisheries, hunting, etc.)	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Economic development	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Land-use planning	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Pollution control	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Designation and development of protected areas	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Development of ecological networks	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Planning of powerlines	<input type="checkbox"/>	<input type="checkbox"/>	Planning of fences	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Planning of dams	<input type="checkbox"/>	<input type="checkbox"/>	Other	
Yes	No																																		
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Exploitation of natural resources (e.g. fisheries, hunting, etc.)																																	
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Economic development																																	
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Land-use planning																																	
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Pollution control																																	
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Designation and development of protected areas																																	
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Development of ecological networks																																	
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Planning of powerlines																																	
<input type="checkbox"/>	<input type="checkbox"/>	Planning of fences																																	
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Planning of dams																																	
<input type="checkbox"/>	<input type="checkbox"/>	Other																																	

## V. Protected Areas

1	Are migratory species taken into account in the selection, establishment and management of protected areas in your country?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
	If Yes, please provide details:	
	See information on <i>Falco naumanni</i>	

1a Do these protected areas cover the following areas? (If Yes, please provide details and include the amount of protected areas coverage and the number of protected areas):

Yes      No

      Terrestrial

      Aquatic

      Marine

**Mainland Portugal:**

	Nr.	Total area (ha)	Marine area (ha)	Terrestrial area (ha)
Protected Areas	44	726 833	46 394	680 789
SPAs	29	822 011	77 167	744 844
SACs	60	1 573 931	37 437	1 1535 46

**Madeira:**

	Nr.	Total area (ha)	Marine area (ha)	Terrestrial area (ha)
Protected Areas	5	77 913	16 177	61 736
SPAs	4	37 502	17 431	20 071
SACs	11	46 822	20 670	26 152

**Azores:**

	Nr.	Total area (ha)	Marine area (ha)	Terrestrial area (ha)
Protected Areas	32	53 812	38 586	15 226
SPAs	15	11 825	0	11 825
SACs	23	33 640	8 411	25 229

1b Identify the agency, department or organization responsible for leading on this action in your country:

Mainland Portugal: Instituto da Conservação da Natureza (ICN)

Azores: Regional Directorate for the Environment

Madeira: Regional Secretariat for the Environment and Natural Resources

## VI. Policies on Satellite Telemetry

1 In the current reporting period, has your country undertaken conservation/research projects that use satellite telemetry?  Yes  No

If Yes, please provide details (Indicate *inter alia* the scientific justification for the research, describe briefly the measures taken to ensure that risks to the welfare of individual animals and – in the case of severely depleted populations – to the species are minimised, and summarise the results obtained):

**MAINLAND PORTUGAL:**

Between 2000/2005 several birds of prey were tagged either with radio transmitters and satellite transmitters (PTT): in 2000/2001 four adults of *H. fasciatus* and 3 adults of *A. chrysaetus* were tagged using conventional radio transmitters at Douro SPA; in 2003/2004 a project aiming at studying the dispersion of juvenile birds tagged 3 *A. chrysaetus* using PPTs at Sabor River and Douro SPAs and another 2 juveniles of *H. fasciatus* were tagged with satellite transmitters in the Douro area; in May 2005 another 2 juveniles of *H. fasciatus* were tagged with satellite transmitters at the Tejo Internacional SPA.

**AZORES:**

One specimen of blue-whale (*Balaenoptera musculus*) and three of Sei-whale (*Balaenoptera borealis*) were tagged in the Azores with satellite transmitters in April, 2005, through the Mar-Eco Project (Patterns and Process of the Ecosystems of

	<p>the Northern Mid-Atlantic). Both species pass through the Azores during the Spring but the length of their stay in the area and migration routes northbound are unknown. Satellite tagging will give some insight on these questions that are very crucial for the conservation of these migratory species. Tagging was done by experienced personell using adequate and tested equipment.</p> <p>Five specimens of Loggerhead sea turtle (<i>Caretta caretta</i>) were tagged in in the Azores during 2004 as part of a collaboration between the Denmark's Aquarium and the Dep. Oceanography and Fisheries of the Univ. Azores, and another 18 in 2000 as part of the collaboration project "Marine Turtles" between the Archie Carr Center of the University of Florida and the Dep. Oceanography and Fisheries of the Un. Azores. Tagging was done by experienced personell using adequate and tested equipment.</p> <p><b><u>MADEIRA:</u></b></p> <p>10 transmitters were deployed on 10 juvenile pelagic loggerhead sea turtles, within the frame of the "Conservation support project for North Atlantic <i>Caretta caretta</i>* sea turtles". Animal welfare was not impacted since the PTTs are glued to the carapace and detach by themselves after an estimated year. Handling of the animals was reduced to a minimum. The project determined that the area north of the Azores untill the Moroccan/Mauritanian coast is used as developmental habitat for <i>Caretta caretta</i>. Thus international efforts are needed to determine possible fishing interactions mainly off Morocco and Mauritania to ensure that conservation measures are active within the whole distribution range of this species developmental habitat.</p>
2	<p>Are any future conservation/research projects planned that will use satellite telemetry? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No</p> <p>If Yes, please provide details (including the expected timeframe for these projects):</p> <p><b><u>AZORES:</u></b></p> <p>Further tagging of rorquals is needed to allow an insight on the migration patterns as well as to determine feeding and calving areas for those whales. New projects are planned to address those questions and they may include the use of satellite telemetry.</p> <p>Further tagging of Loggerhead sea turtle (<i>Caretta caretta</i>) is planned to take place in the Azores during 2005. This work aims to collect further data on the movements and habitat use of this species in the Azores and long range migratory movements outside these waters.</p> <p><b><u>MADEIRA:</u></b></p> <p>Funding is sought to determine pelagic habitat selection and behaviour in greater detail.</p>

## VII. Membership

1	<p>Have actions been taken by your country to encourage non-Parties to join CMS and its related Agreements? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p> <p>If Yes, please provide details. (In particular, describe actions taken to recruit the non-Parties that have been identified by the Standing Committee as high priorities for recruitment.)</p>
1a	<p>Identify the agency, department or organization responsible for leading on this action in your country:</p>

## VIII. Global and National Importance of CMS

1	<p>Have actions been taken by your country to increase national, regional and/or global awareness of the relevance of CMS and its global importance in the context of biodiversity conservation? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p> <p>If Yes, please provide details:</p>
2	<p>Identify the agency, department or organization responsible for leading on this action in your country:</p>

## IX. Mobilization of Resources

1	<p>Has your country made financial resources available for conservation activities having direct benefits for migratory species in your country? <span style="float: right;"><input checked="" type="checkbox"/> Yes <input type="checkbox"/> No</span></p> <p>If Yes, please provide details (Indicate the migratory species that have benefited from these activities):</p> <p>The annual activity planning of the Institute for Nature Conservation includes a budget for activities related to the conservation of species like the black stork, wader and waterfowl species, raptors, crane and bats. Furthermore, every EU LIFE project submitted for funding has to include a national budget allocated to the project.</p> <p>ICN also makes financial contributions to rehabilitation centers run either by local NGOs or by the network of natural parks. Main species targeted by these actions include <i>F. naumanni</i>, <i>A. chrysaetus</i>, and several raptor species.</p>
2	<p>Has your country made voluntary contributions to the CMS Trust Fund to support requests from developing countries and countries with economies in transition? <span style="float: right;"><input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</span></p> <p>If Yes, please provide details:</p>
3	<p>Has your country made other voluntary financial contributions to support conservation activities having direct benefits for migratory species in other countries (particularly developing countries)? <span style="float: right;"><input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</span></p> <p>If Yes, please provide details (Indicate the migratory species that have benefited from these activities):</p>
4	<p>Has your country provided technical and/or scientific assistance to developing countries to facilitate initiatives for the benefit of migratory species? <span style="float: right;"><input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</span></p> <p>If Yes, please provide details (Indicate the migratory species that have benefited from these activities):</p>
5	<p>Has your country received financial assistance/support from the CMS Trust Fund, via the CMS Secretariat, for national conservation activities having direct benefits for migratory species in your country? <span style="float: right;"><input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</span></p> <p>If Yes, please provide details (Indicate the migratory species that have benefited from these activities):</p>
6	<p>Has your country received financial assistance/support from sources other than the CMS Secretariat for conservation activities having direct benefit for migratory species in your country? <span style="float: right;"><input checked="" type="checkbox"/> Yes <input type="checkbox"/> No</span></p> <p>If Yes, please provide details (Indicate the migratory species that have benefited from these activities):</p> <p>Several LIFE EU funded projects have been approved and are still running at this time:</p> <p>i) <b>MARE - Integrated management of coastal and marine areas in the Azores.</b>  Agency responsible: University of the Azores, Dept. of Oceanography and Fisheries  Duration. September 1998 – December 2002  EU LIFE funding: 60%</p> <p>ii) <b>Conservation of cetaceans in Madeira archipelago.</b>  Agency responsible: Machico City Hall (Madeira)  Duration: January 2000 – December 2003  EU LIFE funding: 50%</p> <p>iii) <b>PALUSTRIS – Management of the Paul de Arzila SPA.</b>  Agency responsible: ICN / Paul de Arzila Natural Reserve  Duration: April 2001 – April 2005  EU LIFE funding: 50%</p> <p>iv) <b>Conservation of the bird populations at Sado estuary saltworks.</b>  Agency responsible: ICN / Sado Estuary Natural Reserve  Duration: January 2002 – January 2006  EU LIFE funding: 50%</p> <p>v) <b>Important bird areas for seabirds in Portugal</b>  Agency responsible: SPEA</p>

	<p>Duration: 2004 - 2008</p> <p>EU funding: 75%</p> <p><b>vi) Re-establishment of the Lesser Kestrel (<i>Falco naumanni</i>) in Portugal</b></p> <p>Agency responsible: LPN</p> <p>Duration:</p> <p>EU LIFE funding: 50%</p>

## X. Implementation of COP Resolutions and Recommendations

**Please summarize the measures undertaken by your country to implement the substantive, operational Resolutions and Recommendations adopted by the Conference of the Parties, where these have not been mentioned elsewhere in this report, giving particular emphasis to those identified below (as appropriate)**

## **Resolutions**

Resolution 6.2 – By-catch, and Recommendation 7.2 – Implementation of Resolution 6.2 on By-catch:

As a result of Council Regulation (EC) nr. 812/2004 of 26 April 2004 laying down measures concerning incidental catches of cetaceans in fisheries and amending Regulation (EC) nr. 88/98, the General Directorate for Fisheries and Aquaculture, in collaboration with ICN, has submitted a project (pilot observer scheme) to evaluate the bycatches of small cetaceans in gillnet fisheries.

Also the Portuguese Fisheries Institute, in collaboration with ICN, has submitted a project to evaluate the impact of predation by small cetaceans (probably bottlenose dolphins) on the longline fishery for blackscabbard fish.

Resolution 6.3 – Southern Hemisphere Albatross Conservation:

Resolution 7.2 – Impact Assessment and Migratory Species:

Any new projects in protected areas, SPAs or SACs will have to be evaluated through an EIA.

Resolution 7.3 – Oil Pollution and Migratory Species:

Resolution 7.4 – Electrocution of Migratory Birds:

Agreements were signed between ICN, the Portuguese Electricity Company (EDP) and the Portuguese Electrical Network (REN) in order to evaluate and minimize the impacts of electrocution from medium and high-voltage electricity transmission lines on migratory birds.

Resolution 7.5 – Wind Turbines and Migratory Species:

Any new project involving the setting up of wind turbines will have to be evaluated through an EIA.

Resolution 7.9 – Cooperation with Other Bodies and Processes:

Resolution 7.15 – Future Action on the Antarctic Minke, Bryde's and Pygmy Right Whales under the Convention on Migratory Species:

## **Recommendations**

Recommendation 7.5 – Range State Agreement for Dugong (*Dugong dugon*) Conservation:

Recommendation 7.6 – Improving the Conservation Status of the Leatherback Turtle (*Dermochelys coriacea*):

Recommendation 7.7 – America Pacific Flyway Programme:

**Other resolutions/recommendations:**

## **Other remarks:**

## Annex: Questions on specific Appendix II species

The tables below contain the list of all species listed in Appendix II. Boxes have been checked to indicate the species for which your country is considered to be a Range State. Please amend the boxes where appropriate. (If you wish to provide further information on any of these species, please attach as an annex.) Please also provide published distribution references where available.

Species	Range State	Not a Range State	Extinct	No information available	Published distribution reference

All species of each of the Families below are listed in Appendix II. If your country is a Range State for any of the species in these Families, please enter the species name in the first column, under the relevant Family heading. Please indicate (with a 'X') whether your country is a Range State or the species is extinct and, where appropriate, please provide published distribution references. (Space is provided for ten species in each Family. If additional lines are required, please attach the information as an annex.)
