

2017 - NATIONAL REPORT OF PARTIES ON THE IMPLEMENTATION OF THE CONVENTION ON THE CONSERVATION OF MIGRATORY SPECIES OF WILD ANIMALS

The deadline for submission of the reports is 24 April 2017. The reporting period is from May 2014 to April 2017.

Parties are encouraged to respond to all questions. Parties are also requested to provide comprehensive answers, including, where appropriate, a summary of activities, information on factors limiting action and details of any assistance required.

The reporting format was agreed by the Standing Committee at its 40th Meeting (Bonn, November 2012) for mandatory use by Parties, for reports submitted to the Eleventh Meeting of the Conference of the Parties (COP11). The 45th meeting of the Standing Committee recommended the use of the same format for reports submitted to COP12, with necessary adjustments to take into account relevant COP11 decisions, in particular amendments to the Appendices and resolutions.

COP Resolution 9.4 adopted at Rome called upon the Secretariats and Parties of CMS Agreements to collaborate in the implementation and harmonization of online reporting implementation. The CMS Family Online Reporting System (ORS) has been successfully implemented and used by AEWA in their last Meeting of the Parties (MOP 5, 2012) reporting cycle. CMS now offers the Convention's Parties to use the ORS for submitting their national reports for the COP11 (2014) reporting cycle.

Please enter here the name of your country

› ERITREA

Which agency has been primarily responsible for the preparation of this report?

› Regulatory Services Department, Ministry of Agriculture

Please list any other agencies that have provided input

› Ministry of Marine Resources

I(a). General Information

Please enter the required information in the table below:

Party

Date of entry into force of the Convention in your country

› 1 February 2005

Period covered

› 2005 to 2017

Territories to which the Convention applies

› Eritrea, East Africa Region

Designated National Focal Point

Full name of the institution

› Regulatory Services Department, Ministry of Agriculture

Name and title of designated Focal Point

› Mr. Tekleab Meghena, Director General of Regulatory Services Department of the Ministry of Agriculture of the State of Eritrea

Mailing address

› P.O.Box 1162, Asmara, Eritrea

Telephone

› 291-1-120395, 291-1-120388

Fax

› 291-1-127508

E-mail

Implementation

Competent Authority:

- > - Ministry of Agriculture
- Ministry of Fishery
- College of Marine Science
- Ministry of Land, Water and Environment
- Eritrean Institute of Technology
- Forestry and Wildlife Authority

Relevant implemented legislation:

- > - Forestry and Wildlife Conservation and Development Proclamation No. 155/2006
- Ministry of Fishery Proclamation 1997

Other relevant Conventions/ Agreements (apart from CMS) to which your country is a Party:

- > - CITES
- CBD
- Climate Change
- UNCCD

National policy instruments (e.g. national biodiversity conservation strategy, etc.):

- > National Biodiversity conservation Action Plan 1995

CMS Agreements/MoU

Please indicate whether your country is part of the following Agreements/MoU. If so, please indicate the competent national institution

Involvement of other government departments/NGOs/private sector

1. Which other government departments are involved in activities/initiatives for the conservation of migratory species in your country? (Please list.)

- > - Ministry of Fishery
- Ministry of Land, Water and Environment
- Forestry and Wildlife Authority
- College of Marine science
- Eritrean Institute of Technology

2. If more than one government department is involved, describe the interaction/relationship between these government departments:

- › - The Ministry of Land Water and Environment has a coordinating function
- Ministry of Agriculture, is responsible for terrestrial wildlife species and plants
- Ministry of Fishery and College of Marine science is responsible for aquatic animals including corals
- Eritrean Institute of Technology is responsible for Terrestrial wildlife species (Reptiles, amphibians, insects etc) and plants

3. Has a national liaison system or committee been established in your country?

☒ Yes

☒ No

4. List the main non-governmental organizations actively involved in activities/initiatives for the conservation of migratory species in your country, and describe their involvement:

- › We don't have NGOs as such in the country that are involved in the conservation of migratory birds

4a. Please provide detail on any devolved government/overseas territory authorities involved.

- › UNDP is involved in soaring migratory birds activity

EU is also involved

5. Describe any involvement of the private sector in the conservation of migratory species in your country:

- › No private sector involved in the conservation of migratory species

6. Note any interactions between these sectors in the conservation of migratory species in your country:

- › As there are no private sectors, there are no interactions

I(b). Information about involved Authorities

Identify the ministry, agency/department or organization that is responsible for leading actions relating to Appendix I species

1- Birds

- › 1. Regulatory Services Department of the Ministry of Agriculture
- 2. Eritrean Institute of Higher Education
- 3. Ministry of Marine Resource
- 4. Forestry and Wildlife Authority

2- Aquatic Mammals

- › 1. Ministry of Marine Resources
- 2. College of Marine Science

3- Reptiles

- › 1. Regulatory Services Department of the Ministry of Agriculture
- 2. Eritrean Institute of Higher Education
- 3. Ministry of Marine Resource
- 4. Forestry and Wildlife Authority

4- Terrestrial Mammals

- › 1. Regulatory Services Department of the Ministry of Agriculture
- 2. Eritrean Institute of Higher Education
- 3. Forestry and Wildlife Authority

5- Fish

- › 1. Ministry of Marine Resources
- 2. College of Marine Science

II. Appendix I species

1. BIRDS

1.1 General questions on Appendix I bird species

1. Is the taking of all Appendix I bird species prohibited by the national implementing legislation cited in Table I(a) (General Information)?

☒ Yes

If other legislation is relevant, please provide details:

- › 1. Forestry and Wildlife Conservation and Development Proclamation No.155/2006
- 2. Draft National CITES Legislation

1a. If the taking of Appendix I bird species is prohibited by law, have any exceptions been granted to the prohibition?

☒ No

2. Identify any obstacles to migration that exist in relation to Appendix I bird species:

- ☒ Electrocution
- ☒ Habitat destruction
- ☒ Pollution

2a. What actions are being undertaken to overcome these obstacles?

- › Awareness raising and rehabilitation

2b. Please report on the progress / success of the actions taken.

- › More efforts are required

2c. What assistance, if any, does your country require in order to overcome these obstacles?

- › Institutional strengthening and technical and financial assistance

3. What are the major pressures to Appendix I bird species (transcending mere obstacles to migration)?

☒ Other

- › We assume that pesticide application and waste management could be the major threats

3a. What actions have been taken to prevent, reduce or control factors that are endangering or are likely to further endanger bird species beyond actions to prevent disruption to migrating behaviour?

- › So far only awareness raising program is conducted

3b. Please report on the progress / success of the actions taken.

- › There is no that much progress to be reported

3c. Describe any factors that may limit action being taken in this regard:

- › Capacity building, equipment and financial support

3d. What assistance, if any, does your country require to overcome these factors?

- › Institutional strengthening, technical and financial support

1.2 Questions on specific Appendix I bird species

In the following section, using the table format below, please fill in each Appendix I bird species for which your country is considered to be a Range State. Please complete each table as appropriate, providing information in summary form. Where appropriate, please cross-reference to information already provided in national reports that have been submitted under other conventions (e.g. Convention on Biological Diversity, Ramsar Convention, CITES). (Attach annexes as necessary.)

Species name: *Aquila clanga*

1. Please provide published distribution reference:

- › Eritrean biodiversity stocktaking assessment report prepared by the Department of environment Ministry of Land Water and Environment MoLWE) Asmara May 1999

2a. Summarise information on population size (if known):

☒ stable

2b. Summarise information on distribution (if known):

☒ stable

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

☒ Research

> Wings of the Red Sea

☒ Identification and establishment of protected areas

☒ Education/awareness rising

☒ Species protection

☒ Habitat restoration

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

> Technical and financial problems

5. Describe any future activities that are planned for this species:

> Habitat restoration, awareness

Species name: *Aquila heliaca*

1. Please provide published distribution reference:

> Eritrean biodiversity stocktaking assessment report prepared by the Department of environment Ministry of land water and environment MoLW&E) Asmara May 1999

2a. Summarise information on population size (if known):

☒ not known

2b. Summarise information on distribution (if known):

☒ not known

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

☒ Education/awareness rising

☒ Habitat restoration

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

> Shortage of staffs

5. Describe any future activities that are planned for this species:

> Habitat restoration

Species name: *Aythya nyroca*

1. Please provide published distribution reference:

> - Nikolai Petkov, Baz Hughes & Umberto Gallo-Orsi 2002 Ferruginous Duck from research to conservation series No. 6

-2. Eritrean biodiversity stocktaking assessment report prepared by the Department of Environment Ministry of Land Water and Environment MoLWE) Asmara May 1999

2a. Summarise information on population size (if known):

☒ not known

2b. Summarise information on distribution (if known):

☒ not known

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

☒ Research

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

> Communication gap with the people who did the research

5. Describe any future activities that are planned for this species:

› Like other water birds there is a plan to restore their habitat

Species name: Falco naumanni

1. Please provide published distribution reference:

› Eritrean biodiversity stocktaking assessment report prepared by the Department of environment Ministry of land water and environment MoLW&E) Asmara May 1999

2a. Summarise information on population size (if known):

☒ stable

2b. Summarise information on distribution (if known):

☒ stable

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

☒ Education/awareness rising

☒ Species restoration

☒ Habitat protection

☒ Habitat restoration

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

› Problem of finance and technique

5. Describe any future activities that are planned for this species:

› Habitat protection, awareness and habitat restoration

Species name: Geronticus eremita

1. Please provide published distribution reference:

› Not found in the country

2a. Summarise information on population size (if known):

☒ not known

2b. Summarise information on distribution (if known):

☒ not known

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

› It is not found in the country

5. Describe any future activities that are planned for this species:

› No future activity

Species name: Larus leucophthalmus

1. Please provide published distribution reference:

› Dr. Chris Hillmans personal report 1992. Reported to be found all over the coasts of the Red Sea

2a. Summarise information on population size (if known):

☒ stable

2b. Summarise information on distribution (if known):

☒ stable

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

☒ Research

☒ Education/awareness rising

☒ Species protection

☒ Habitat protection

☒ Habitat restoration

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

› Technical and financial problems

Species name: *Sarothrura ayresi*

1. Please provide published distribution reference:

› Eritrea is not a range state of the species

2a. Summarise information on population size (if known):

☒ not known

2b. Summarise information on distribution (if known):

☒ not known

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

› Not found in the country

5. Describe any future activities that are planned for this species:

› No future plan

Species name: *Vanellus gregarius*

1. Please provide published distribution reference:

› Ministry of Agriculture survey reports. It is found all over the country

2a. Summarise information on population size (if known):

☒ stable

2b. Summarise information on distribution (if known):

☒ stable

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

☒ Education/awareness rising

☒ Habitat protection

☒ Habitat restoration

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

› Shortage of manpower

5. Describe any future activities that are planned for this species:

› Habitat protection and restoration and awareness raising

Species name: *Neophron percnopterus*

1. Please provide published distribution reference:

› Not present in Eritrea

2a. Summarise information on population size (if known):

☒ not known

2b. Summarise information on distribution (if known):

☒ not known

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

› Eritrea is not a range state for this species

5. Describe any future activities that are planned for this species:

› No plan

2. AQUATIC MAMMALS

2.1 General questions on Appendix I aquatic mammals

1. Is the taking of all Appendix I aquatic mammals species prohibited by the national implementing legislation cited in Table I(a) (General Information)?

☒ Yes

If other legislation is relevant, please provide details:

› Ministry of Fishery Legislation 1997

1a. If the taking of Appendix I aquatic mammals species is prohibited by law, have any exceptions been granted to the prohibition?

☒ Yes

If Yes, please provide details (Include the date on which the exception was notified to the CMS Secretariat pursuant to CMS Article III(7):

› Few species were allowed for exhibition purpose

2. Identify any obstacles to migration that exist in relation to Appendix I aquatic mammals:

☒ By-catch

☒ Illegal hunting

2a. What actions are being undertaken to overcome these obstacles?

› Under the GEF fund management plan of the coastal areas prepared and tried to implement it

2b. Please report on the progress / success of the actions taken.

› It was not sustainable after the project

2c. What assistance, if any, does your country require in order to overcome these obstacles?

› Capacity building on field works and purchase of equipment

3. What are the major pressures to Appendix I aquatic mammals species (transcending mere obstacles to migration)?

☒ By-catch

3a. What actions have been taken to prevent, reduce or control factors that are endangering or are likely to further endanger aquatic mammals species beyond actions to prevent disruption to migrating behaviour?

› Awareness raising to local fishermen

3b. Please report on the progress / success of the actions taken.

› Not that much

3c. Describe any factors that may limit action being taken in this regard:

› Lack of capacity and knowledge

3d. What assistance, if any, does your country require to overcome these factors?

› Technical and financial assistance

2.2 Questions on specific Appendix I aquatic mammals

In the following section, using the table format below, please fill in each Appendix I aquatic mammals species for which your country is considered to be a Range State. Please complete each table as appropriate, providing information in summary form. Where appropriate, please cross-reference to information already provided in national reports that have been submitted under other conventions (e.g. Convention on Biological Diversity, Ramsar Convention, CITES). (Attach annexes as necessary.)

Species name: *Balaenoptera musculus*

1. Please provide published distribution reference:

› Eritrean biodiversity stocktaking assessment report prepared by the Department of environment Ministry of land water and environment MoLW&E) Asmara May 1999

2a. Summarise information on population size (if known):

☒ not known

2b. Summarise information on distribution (if known):

☒ not known

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

› No information

5. Describe any future activities that are planned for this species:

› No plan

Species name: *Physeter macrocephalus*

1. Please provide published distribution reference:

› No reference as there is no information on the species

2a. Summarise information on population size (if known):

☒ not known

2b. Summarise information on distribution (if known):

☒ not known

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

› Lack of information

5. Describe any future activities that are planned for this species:

› No future plan

Miscellaneous information or comments on Appendix I marine mammals in general:

› Our knowledge on Appendix I marine mammals is so limited

3. REPTILES

3.1 General questions on Appendix I reptiles

1. Is the taking of all Appendix I reptiles species prohibited by the national implementing legislation cited in Table I(a) (General Information)?

☒ Yes

If other legislation is relevant, please provide details:

› No

1a. If the taking of Appendix I reptiles species is prohibited by law, have any exceptions been granted to the prohibition?

☒ No

2. Identify any obstacles to migration that exist in relation to Appendix I reptiles species:

☒ By-catch

☒ Other

› Lack of awareness, , so little is known about the species richness, population status and distribution, they are suffering "benign neglect")

2a. What actions are being undertaken to overcome these obstacles?

› Awareness raising

2b. Please report on the progress / success of the actions taken.

› There is still problems

2c. What assistance, if any, does your country require in order to overcome these obstacles?

› Capacity building technical and financial assistance

3. What are the major pressures to Appendix I reptiles species (transcending mere obstacles to migration)?

☒ Collection of eggs

☒ Destruction of nesting beaches

3a. What actions have been taken to prevent, reduce or control factors that are endangering or are likely to further endanger reptiles species beyond actions to prevent disruption to migrating behaviour?

› Awareness

3b. Please report on the progress / success of the actions taken.

› Not much

3c. Describe any factors that may limit action being taken in this regard:

› Ignorance

3d. What assistance, if any, does your country require to overcome these factors?

› Financial and technical

3.2 Questions on specific Appendix I reptiles

In the following section, using the table format below, please fill in each Appendix I reptiles species for which your country is considered to be a Range State. Please complete each table as appropriate, providing information in summary form. Where appropriate, please cross-reference to information already provided in national reports that have been submitted under other conventions (e.g. Convention on Biological Diversity, Ramsar Convention, CITES). (Attach annexes as necessary.)

Species name: *Caretta caretta*

1. Please provide published distribution reference:

› -Eritrean Biodiversity stocktaking assessment report

Chris Hillman personal reports

Ministry of Fishery survey reports

-Hillman and Techlegorgis 1992

2a. Summarise information on population size (if known):

☒ not known

2b. Summarise information on distribution (if known):

☒ not known

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

☒ Education/awareness rising

☒ Habitat restoration

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

› Shortage of manpower and capacity

5. Describe any future activities that are planned for this species:

› To implement the coastal management plan produced, conduct awareness , rehabilitate degraded habitats and ensure that in future fishing boats will use Turtle Exclusion Devices (TEDS) wherever significant risk to turtle is likely.

Species name: *Chelonia mydas*

1. Please provide published distribution reference:

› Eritrean Biodiversity stocktaking assessment report

Chris Hillman personal reports

Ministry of Fishery survey reports

2a. Summarise information on population size (if known):

☒ not known

2b. Summarise information on distribution (if known):

☒ not known

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

☒ Education/awareness rising

☒ Habitat restoration

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

› Shortage of manpower and capacity

5. Describe any future activities that are planned for this species:

› Develop policies of use of TEDs and awareness for local fishermen

Species name: Dermochelys coriacea

1. Please provide published distribution reference:

› Eritrean Biodiversity stocktaking assessment report

Ministry of Fishery survey reports

-Hillman and Techlegorgis 1992

2a. Summarise information on population size (if known):

☒ not known

2b. Summarise information on distribution (if known):

☒ not known

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

☒ Education/awareness rising

☒ Habitat restoration

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

› Shortage of manpower and capacity

5. Describe any future activities that are planned for this species:

› To implement the coastal management plan produced, conduct awareness , rehabilitate degraded habitats and ensure that in future fishing boats will use Turtle Exclusion Devices (TEDS) wherever significant risk to turtle is likely

Species name: Eretmochelys imbricata

1. Please provide published distribution reference:

› -Eritrean Biodiversity stocktaking assessment report

Chris Hillman personal reports

Ministry of Fishery survey reports

-Hillman and Techlegorgis 1992

2a. Summarise information on population size (if known):

☒ not known

2b. Summarise information on distribution (if known):

☒ not known

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

☒ Education/awareness rising

☒ Habitat restoration

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

› Shortage of manpower and capacity

5. Describe any future activities that are planned for this species:

› To implement the coastal management plan produced, conduct awareness , rehabilitate degraded habitats and ensure that in future fishing boats will use Turtle Exclusion Devices (TEDS) wherever significant risk to turtle is likely

Species name: Lepidochelys olivacea

1. Please provide published distribution reference:

› -Eritrean Biodiversity stocktaking assessment report

Ministry of Fishery survey reports

-Hillman and Techlegorgis 1992

2a. Summarise information on population size (if known):

☒ not known

2b. Summarise information on distribution (if known):

☒ not known

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

☒ Education/awareness rising

☒ Habitat protection

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

› Shortage of manpower and capacity

5. Describe any future activities that are planned for this species:

› To implement the coastal management plan produced, conduct awareness , rehabilitate degraded habitats and ensure that in future fishing boats will use Turtle Exclusion Devices (TEDS) wherever significant risk to turtle is likely

Miscellaneous information or comments on Appendix I marine turtles in general:

› Few demographic information

4. TERRESTRIAL MAMMALS

4.1 General questions on Appendix I terrestrial mammals

1. Is the taking of all Appendix I terrestrial mammals species prohibited by the national implementing legislation cited in Table I(a) (General Information)?

☒ Yes

If other legislation is relevant, please provide details:

› Draft National CITES Legislation

1a. If the taking of Appendix I terrestrial mammals species is prohibited by law, have any exceptions been granted to the prohibition?

☒ Yes

2. Identify any obstacles to migration that exist in relation to Appendix I terrestrial mammals species:

☒ Habitat fragmentation

☒ Lack of trans-boundary management

☒ Insufficient legislation

☒ Poor communication amongst Range States

2a. What actions are being undertaken to overcome these obstacles?

› Proclamation promulgated

Habitat restoration and protection

Improved communication with Range States

2b. Please report on the progress / success of the actions taken.

› No satisfactory

2c. What assistance, if any, does your country require in order to overcome these obstacles?

› Technical and financial assistance

3. What are the major pressures to Appendix I terrestrial mammals species (transcending mere obstacles to migration)?

☒ Habitat fragmentation

☒ Insufficient legislation

3a. What actions have been taken to prevent, reduce or control factors that are endangering or are likely to further endanger terrestrial mammals species beyond actions to prevent disruption to migrating behaviour?

› We have started creating protected areas

3b. Please report on the progress / success of the actions taken.

› Still progressing

3c. Describe any factors that may limit action being taken in this regard:

› Financial and capacity

3d. What assistance, if any, does your country require to overcome these factors?

› Technical and financial

4.2 Questions on specific Appendix I terrestrial mammals

In the following section, using the table format below, please fill in each Appendix I terrestrial mammal species for which your country is considered to be a Range State. Please complete each table as appropriate, providing information in summary form. Where appropriate, please cross-reference to information already provided in national reports that have been submitted under other conventions (e.g. Convention on Biological Diversity, Ramsar Convention, CITES). (Attach annexes as necessary.)

Species name: *Equus grevyi*

1. Please provide published distribution reference:

› Eritrea is not a Range State of the species

2a. Summarise information on population size (if known):

☒ not known

2b. Summarise information on distribution (if known):

☒ not known

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

› No present in the country

5. Describe any future activities that are planned for this species:

› No plan

Species name: *Gazella dorcas* (Northwest African populations)

1. Please provide published distribution reference:

› Ministry of Agriculture survey reports

2a. Summarise information on population size (if known):

☒ stable

2b. Summarise information on distribution (if known):

☒ stable

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

☒ Identification and establishment of protected areas

☒ Education/awareness rising

☒ Species protection

☒ Control hunting / poaching

☒ Habitat protection

☒ Habitat restoration

5. Describe any future activities that are planned for this species:

› Create protected areas for the species

Miscellaneous information or comments on Appendix I terrestrial mammals in general:

› Need to have a protected area

5. FISH

5.1 General questions on Appendix I fish species

1. Is the taking of all Appendix I fish species prohibited by the national legislation listed as being implementing legislation in Table I(a) (General Information)?

☒ Yes

If other legislation is relevant, please provide details:

> Ministry of Fishery legislation 1997

1a. If the taking of Appendix I fish species is prohibited by law, have any exceptions been granted to the prohibition?

☒ Yes

If Yes, please provide details (Include the date on which the exception was notified to the CMS Secretariat pursuant to CMS Article III(7):

> For exhibition

2. Identify any obstacles to migration that exist in relation to Appendix I fish species:

☒ Other

> By-catch

2a. What actions are being undertaken to overcome these obstacles?

> Awareness

2b. Please report on the progress / success of the actions taken.

> No that much

2c. What assistance, if any, does your country require in order to overcome these obstacles?

> Technical and capacity assistance and equipment for catching and storing

3. What are the major threats to Appendix I fish species (transcending mere obstacles to migration)?

☒ Other

> By-catch

3a. What actions have been taken to prevent, reduce or control factors that are endangering or are likely to further endanger fish species beyond actions to prevent disruption to migrating behaviour?

> Awareness to local fishermen

3b. Please report on the progress / success of the actions taken.

> Not that much

3c. Describe any factors that may limit action being taken in this regard:

> Lack of knowledge and finance

3d. What assistance, if any, does your country require to overcome these factors?

> Technical and capacity development

5.2 Questions on specific Appendix I fish species

In the following section, using the table format below, please fill in each Appendix I fish species, for which your country is considered to be a Range State. Please complete each table as appropriate, providing information in summary form. Where appropriate, please cross-reference to information already provided in national reports that have been submitted under other conventions (e.g. Convention on Biological Diversity, Ramsar Convention, CITES). (Attach annexes as necessary.)

Species name: *Carcharodon carcharias*

1. Please provide published distribution reference:

> No information is available

2a. Summarise information on population size (if known):

☒ not known

2b. Summarise information on distribution (if known):

☒ not known

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

> No information

5. Describe any future activities that are planned for this species:

› No plan

Miscellaneous information or comments on Appendix I bats in general:

› Our knowledge on fish species is limited

6. LISTING OF OTHER ENDANGERED MIGRATORY SPECIES IN APPENDIX I

1. Is your country a Range State for any other endangered migratory species currently listed in Appendix I?

(according to the latest IUCN red data list). N.B.: States in which a species occurs as a vagrant (i.e. not "on its normal migration route") should not be treated as Range States. Please refer to Article 1 of the Convention for clarification.

☒ Yes

If Yes, please provide details:

› African wild ass

1a. Is your country taking any steps to propose listing any of these species?

☒ Yes

If yes, please provide details:

› We are planning to propose for the next CMS COP meeting to be held in November 2017

1b. What assistance/measures, if any, does your country require to initiate the listing of these species?

› - Developing the action plan and the proposal

III. Appendix II Species

1. INFORMATION ON APPENDIX II SPECIES

Information pertaining to the conservation of Appendix II species that are the object of CMS Agreements will have been provided in periodic Party reports to those instruments. It will suffice therefore to reference (below), and preferably append, a copy of the latest report that has been submitted to the Secretariat of each of the Agreement/MoUs to which your country is a Party.

Wadden Sea Seals (1991)

Date of last report:

2. QUESTIONS ON CMS AGREEMENTS

Questions on the development of new CMS Agreements relating to Bird Species

1. In the current reporting period, has your country **initiated** the development of any CMS Agreements, including Memoranda of Understanding, to address the needs of Appendix II Bird Species ?

☒ No

2. In the current reporting period, has your country **participated** in the development of any new CMS Agreements, including Memoranda of Understanding, which address the conservation needs of Appendix II Bird Species ?

☒ No

3. If your country has initiated or is participating in the development of a new Agreement or Memorandum of Understanding, what assistance, if any, does your country require in order to initiate or participate in the instrument's development?

> No have initiated

4. Is the development of any CMS Agreement for Bird Species, including Memoranda of Understanding, planned by your country in the foreseeable future?

☒ Yes

4.1. If Yes, please provide details:

> Raptors agreement

Questions on the development of new CMS Agreements relating to Marine Mammal Species

1. In the current reporting period, has your country **initiated** the development of any CMS Agreements, including Memoranda of Understanding, to address the needs of Appendix II Marine Mammal Species ?

☒ No

2. In the current reporting period, has your country **participated** in the development of any new CMS Agreements, including Memoranda of Understanding, which address the conservation needs of Appendix II Marine Mammal Species ?

☒ No

3. If your country has initiated or is participating in the development of a new Agreement or Memorandum of Understanding, what assistance, if any, does your country require in order to initiate or participate in the instrument's development?

> Not have initiated

4. Is the development of any CMS Agreement for Marine Mammal Species, including Memoranda of Understanding, planned by your country in the foreseeable future?

☒ No

Questions on the development of new CMS Agreements relating to Marine Turtle Species

1. In the current reporting period, has your country **initiated** the development of any CMS Agreements, including Memoranda of Understanding, to address the needs of Appendix II Marine Turtle Species ?

☒ Yes

2. In the current reporting period, has your country **participated** in the development of any new CMS Agreements, including Memoranda of Understanding, which address the conservation needs of Appendix II Marine Turtle Species ?

☒ Yes

3. If your country has initiated or is participating in the development of a new Agreement or Memorandum

of Understanding, what assistance, if any, does your country require in order to initiate or participate in the instrument's development?

> Not initiated

4. Is the development of any CMS Agreement for Marine Turtle Species, including Memoranda of Understanding, planned by your country in the foreseeable future?

☒ Yes

Questions on the development of new CMS Agreements relating to Terrestrial Mammal (other than bats) Species

1. In the current reporting period, has your country **initiated** the development of any CMS Agreements, including Memoranda of Understanding, to address the needs of Appendix II Terrestrial Mammal (other than bats) Species ?

☒ No

2. In the current reporting period, has your country **participated** in the development of any new CMS Agreements, including Memoranda of Understanding, which address the conservation needs of Appendix II Terrestrial Mammal (other than bats) Species ?

☒ No

3. If your country has initiated or is participating in the development of a new Agreement or Memorandum of Understanding, what assistance, if any, does your country require in order to initiate or participate in the instrument's development?

> Capacity to know the status of the species

4. Is the development of any CMS Agreement for Terrestrial Mammal (other than bats) Species, including Memoranda of Understanding, planned by your country in the foreseeable future?

☒ No

Questions on the development of new CMS Agreements relating to Bat Species

1. In the current reporting period, has your country **initiated** the development of any CMS Agreements, including Memoranda of Understanding, to address the needs of Appendix II Bat Species ?

☒ No

2. In the current reporting period, has your country **participated** in the development of any new CMS Agreements, including Memoranda of Understanding, which address the conservation needs of Appendix II Bat Species ?

☒ No

3. If your country has initiated or is participating in the development of a new Agreement or Memorandum of Understanding, what assistance, if any, does your country require in order to initiate or participate in the instrument's development?

> Capacity and financial assistance

4. Is the development of any CMS Agreement for Bat Species, including Memoranda of Understanding, planned by your country in the foreseeable future?

☒ No

Questions on the development of new CMS Agreements relating to Fish

1. In the current reporting period, has your country **initiated** the development of any CMS Agreements, including Memoranda of Understanding, to address the needs of Appendix II Fish ?

☒ No

2. In the current reporting period, has your country **participated** in the development of any new CMS Agreements, including Memoranda of Understanding, which address the conservation needs of Appendix II Fish ?

☒ No

3. If your country has initiated or is participating in the development of a new Agreement or Memorandum of Understanding, what assistance, if any, does your country require in order to initiate or participate in the instrument's development?

› Capacity building

4. Is the development of any CMS Agreement for Fish, including Memoranda of Understanding, planned by your country in the foreseeable future?

☒ No

3. LISTING OF MIGRATORY SPECIES IN APPENDIX II

1. Is your country a Range State for any migratory species that has an unfavourable conservation status, but is not currently listed in Appendix II and could benefit from the conclusion of an Agreement for its conservation?

N.B.: States in which a species occurs as a vagrant (i.e. not "on its normal migration route") should not be treated as Range States. Please refer to Article 1 of the Convention for clarification.

☒ No

1a. Is your country taking any steps to propose the listing of this/these species in Appendix II?

☒ No

1b. What assistance, if any, does your country require to initiate the listing of this/these species?

› Capacity and financial assistance

IV. National and Regional Priorities

1. What priority does your country assign to the conservation and, where applicable, sustainable use of migratory species in comparison to other biodiversity-related issues

☒ High

2. Are migratory species and their habitats addressed by your country's national biodiversity strategy or action plan?

☒ Yes

2.1. If Yes, please indicate and briefly describe the extent to which it addresses the following issues:

☒ Conservation, sustainable use and/or restoration of migratory species

☒ Conservation, sustainable use and/or restoration of the habitats of migratory species, including protected areas

> Eritrea's revised national biodiversity strategy or action plan (2015) addressed the most important species which needs high respective conservation, sustainable use in all aspects. It emphasized on endangered and/or critically endangered species to be protected in their habitat striving establishing of the Semenawi and Debubawi Bahri, Buri-Irrori Hawakil Islands as well as Bara-Sole as protected area system in 2013 can be a practical intervention of the Government of the state of Eritrea to ensure conservation of the critical biodiversity resources. The proposed protected areas outstrip both the NBSAP and Aichi Biodiversity Targets in situ conservation. Hence, more than one million hectare of terrestrial and marine ecosystem has been proposed for protected area establishment and that fund is secured from GEF/UNDP and Government expected to be implemented within 7 years. and legislation on protected areas system is being worked. In addition avoiding invasive alien species, overgrazing/over browsing, illegal hunting, deforestation, fire, and initiating research and assessment on migratory species are the most efforts being done. Some of the most endangered species considered are Africa wild ass, African elephant, soemmering's gazelle, green turtle, dugongs, seabirds etc. It is also addressed that there are very important migratory birds, providing migration route and stop-over location for many species. A total of 14 Important Bird Areas (IBA) have been identified for Eritrea.

☒ Actions to prevent, reduce or control factors that are endangering or are likely to further endanger migratory species (e.g. alien invasive species or by-catch)

> Strategic Goal B: Reduce the direct pressures on biodiversity and promote sustainable use

Target 9: By 2020, invasive alien species and pathways are identified and prioritized, priority species are controlled or eradicated, and measures are in place to manage pathways to prevent their introduction and establishment.

(Ministry of Land, Water and Environment, (2014-2020). Revised National Biodiversity Strategy and Action Plan for Eritrea. NBSAB report 160 pp.)

☒ Minimizing or eliminating barriers or obstacles to migration

☒ Research and monitoring of migratory species

☒ Transboundary co-operation

3. Does the conservation of migratory species currently feature in any other national or regional policies/plans (apart from CMS Agreements)

☒ Yes

3.1. If Yes, please provide details:

> As mentioned above the issue of conservation of migratory species is considered in the draft environmental law

3a. Do these policies/plans cover the following areas?

Exploitation of natural resources (e.g. fisheries, hunting, etc.)

☒ Yes

If Yes, please provide details

> The Revised national biodiversity strategy and action plan also consider the over exploitation of marine resource and terrestrial wild lives. The legislation of the marine resources states that illegal fishing and overfishing is prohibited and, the proclamation of Forestry and wild life (2006) addressed illegal hunting and illegal cutting trees and their penalties.

Economic development

☒ Yes

If Yes, please provide details

> There is National Environmental Impact Assessment Procedures and Guidelines that focused on considering conservation of species during any developmental projects such as mining, road and house construction,

expansion of agriculture, tourism, etc through scoping and categorizing project activities as A,B and C. In due course monitoring and evaluation on impacts of projects is the main activity. It also tries to mainstream in the relevant sectors.

Land-use planning

☒ Yes

If Yes, please provide details

› As sustainable use of natural resource is a milestone for conservation of natural resources, Eritrea has practiced land use planning for agriculture, construction and other developments in different parts of the country. In addition, a sustainable land management project (SLM) has been initiated as a model using land use planning.

Pollution control

☒ No

If Yes, please provide details

› The Department of Environment has a mandate to control environments pollution in the country. Therefore many projects has been conducted regarding pollution such as air, water, soil pollution caused by various factors like solid and liquid wastes, industrial, commercial and agricultural chemicals etc. The department has conducted various assessments in industries, households, agriculture etc. There was also an emphasis on persistent organic pollutants, and hazardous wastes .In the past years, a national implementation plan was prepared to mangle pollutions arise from different development activities.

Designation and development of protected areas

☒ Yes

If Yes, please provide details

› Protected areas have a long history in Eritrea. Recently, an integrated Protected area system legal framework that could enable the implementation of three pilot PA's areas is under preparation. Furthermore, different activities such as: biophysical study, socioeconomic study, awareness raising etc... have been conducted in the three pilot areas.

Development of ecological networks

☒ No

Planning of power lines

☒ No

If Yes, please provide details

› The is plan to distribute electricity to each village in the country

Planning of fences

☒ No

If Yes, please provide details

› Electric fence to reduce the human elephant conflicts

Planning of dams

☒ No

If Yes, please provide details

› As there is shortage of water in the country there are on going plan of constructing dams in the country

4. Results - please describe the positive outcomes of any actions taken

› So far as a new nation every thing is developing slowly

V. Protected Areas

1. Are migratory species taken into account in the selection, establishment and management of protected areas in your country?

☒ Yes

If Yes, please provide details:

› During the selection of protected area, due consideration is given to migratory species. In the three pilot protected areas for example, biophysical survey targetting to status, threats and trends of flora and fauna in general and migratory species in particular has been conducted

1a. Please identify the most important national sites for migratory species and their protection status:

› In the selected three protected areas the Semenawi and Debubawi Bahri, Buri-IroriHawakil Islands as well as Bara-sole are the most important sites for migratory species. For purpose of conservation protected area system is being operationalized

1b. Do these protected areas cover the following areas?

Terrestrial

☒ Yes

If Yes, please provide details and include the amount of protected areas coverage and the number of protected areas

› Eritrea is engaged in making operational protected area system on three selected areas that cover a total of 10,098.6 km² out of which one Terrestrial PA that covers 6,492.76km² .

Aquatic

☒ No

Marine

☒ Yes

If Yes, please provide details and include the amount of protected areas coverage and the number of protected areas

› The Buri Peninsula includes the Hawakil Islands

1c. Identify the agency, department or organization responsible for leading on this action in your country:

› Ministry of Land Water and Environment

Forestry and Wildlife Authority

UNDP and GEF

2. Results - please describe the positive outcomes of any actions taken

› Establishment of the protected area operationalizing

VI. Policies on Satellite Telemetry

1. In the current reporting period, has your country undertaken conservation/research projects that use satellite telemetry?

☒ No

If yes what is the state of those projects

☒ completed

Please provide details

› Arabian Bustard Project

2. Are any future conservation/research projects planned that will use satellite telemetry?

☒ Yes

If Yes, please provide details (including the expected timeframe for these projects):

› For the elephants to know their range of distribution and how far they migrate into Ethiopia

If No, please explain any impediments or requirements in this regard:

› Although the need for such project is important for monitoring biological resources of the country, currently due shortage of skilled human resources on this field, it is not anticipated.

3. Results - please describe the positive outcomes of any actions taken

› With the Arabian Bustard Project we did a lot of work we were able to know their range of distribution but the project did not proceed

VII. Membership

1. Have actions been taken by your country to encourage non- Parties to join CMS and its related Agreements?

☒ No

1a. Identify the agency, department or organization responsible for leading on this action in your country:

› Ministry of Land, Water and Environment

2. Results - please describe the positive outcomes of any actions taken

› There is a plan under way to establish protected area system

VIII. Global and National Importance of CMS

1. Have actions been taken by your country to increase national, regional and/or global awareness of the relevance of CMS and its global importance in the context of biodiversity conservation?

☒ Yes

If Yes, please provide details:

› Awareness raising programs are conducted to the community through mass media (TV, Radio and workshops)

2. Identify the agency, department or organization responsible for leading on this action in your country:

› Ministry of Agriculture

Ministry of Marine Resources

Ministry of Land Water and Environment

Forestry and Wildlife Authority

3. Results - please describe the positive outcomes of any actions taken

› Progressing

IX. Mobilization of Resources

1. Has your country made financial resources available for conservation activities having direct benefits for migratory species in your country?

☒ Yes

If Yes, please provide details (Indicate the migratory species that have benefited from these activities):

› There is government contribution for every conservation action taken in the country

2. Has your country made voluntary contributions to the CMS Trust Fund to support requests from developing countries and countries with economies in transition?

☒ No

3. Has your country made other voluntary financial contributions to support conservation activities having direct benefits for migratory species in other countries (particularly developing countries)?

☒ No

4. Has your country provided technical and/or scientific assistance to developing countries to facilitate initiatives for the benefit of migratory species?

☒ No

5. Has your country received financial assistance/support from the CMS Trust Fund, via the CMS Secretariat, for national conservation activities having direct benefits for migratory species in your country?

☒ No

6. Has your country received financial assistance/support from sources other than the CMS Secretariat for conservation activities having direct benefit for migratory species in your country?

☒ Yes

If Yes, please provide details (Indicate the migratory species that have benefited from these activities):

› Financial assistance from GEF for conservation of coastal areas

Annex: Updating Data on Appendix II Species

1. The drop-down lists below contain the list of all species listed in Appendix II. Parties which did not submit a National Report in 2014 are requested to complete the entire form. Parties that did submit a report in 2014 are requested to review and update the data (e.g. new published distribution references and details concerning species added to Appendix II at COP11).
