

**CMS**

## **2025 CMS National Report**

**Deadline for submission of the National Reports: : 30 September 2025**

**Reporting period: from May 2023 to February 2025**

Parties are encouraged to respond to all questions and are also requested to provide comprehensive answers, when required.

National Report format is available through the CMS Family Online Reporting System (ORS), which has been successfully implemented and used by CMS, AEWA, IOSEA and Sharks MOU in collaboration with UNEP-WCMC.

Through Resolution 12.5 (Rev. COP14) and Decisions 14.27, 14.25 National Reports and 14.2 Samarkand Strategic Plan for Migratory Species, the Standing Committee and the Secretariat were tasked with developing a new format for National Reports that aligns with the SPMS. However, given that the indicators of the SPMS are not yet in place, and due to the time constraints caused by the exceptionally short intersessional period before COP15, there is insufficient time to substantially amend the National Report format to fully align it with the SPMS.

The Standing Committee therefore agreed to develop a new format for the reporting period after COP15, and to use the previous National Report format for the current reporting period, with only minor adjustments. These adjustments would include a limited number of additional questions on topics that COP14 specifically requested to be reported through National Reports.

Additionally, it was agreed not to attach the full list of species in Appendices I and II for verification by Parties, as this information was collected during previous reporting cycles but could not be fully assessed and reflected in the National Reports format due to a lack of resources. Instead, the Standing Committee agreed to collect information on Range States for species listed in the Annex to Resolution 14.19 during this reporting cycle, in accordance with Decision 14.234.

A proposal of the National Reports format was circulated by the Secretariat to the Standing Committee members on 13 December and it was agreed through communication procedure, in line with Rule 5 of the Rules of Procedure.

This online version of the format strictly follows the one adopted by Standing Committee through communication procedure. In addition, as was also the case for reporting prior to COP14, it incorporates pre-filled information, notably in Sections II and III, based on data available at the Secretariat from the previous reporting cycles.

Please note that guidance is available for a number of questions throughout the national report as both in-text guidance and as tool tips (displayed via the information 'i' icon).

For any question, please contact Mr. Aydin Bahramlouian, Public Information Officer, [aydin.bahramlouian@un.org](mailto:aydin.bahramlouian@un.org)

**NOTICE:** Before clicking on the hyperlinks in this questionnaire, please keep pressing the **Ctrl button** on your keyboard to open the link in a new tab.

RESOURCES FOR THE CMS NATIONAL REPORT FROM OTHER RELEVANT INTERGOVERNMENTAL PROCESSES

Convention/Agreement/Process

Information source

Convention on Biological Diversity (CBD)

National Reports

Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES)

Annual trade reports, Annual illegal trade reports, Implementation reports

Convention on Wetlands of International Importance especially as Waterfowl Habitat

National Reports, Ramsar Information Sheets

Food and Agriculture Organization of the United Nations (FAO)

Country reports

United Nations Convention to Combat Desertification (UNCCD)

National Reports

United Nations Forum on Forests (UNFF)

National Reports

United Nations Framework Convention on Climate Change (UNFCCC)

National Communications, Biennial Reports, Update Reports

Various CMS Family Agreements and Memorandums of Understanding (MOUs)

National Reports

2030 Agenda for Sustainable Development and the Sustainable Development Goals

National Reports

Note: These reporting processes of other relevant intergovernmental frameworks are examples of information resources to be used when filling out this national report, which may assist in identification and strengthening of synergies among these processes. This list is **not** exhaustive. There are many other sources of information that may also be of relevance for migratory species, their habitats and migrations systems.

## High-level summary of key messages

### In your country, during the reporting period, what does this report reveal about:

Guidance:

This section invites you to summarise the most important positive aspects of CMS implementation in your country and the areas of greatest concern. Please limit this specifically to the current reporting period only.

Your answers should be based on the information contained in the body of the report: the intention is for this section to distil the technical information in the report into “high level” messages for decision-makers and wider audiences.

Please try also to be specific or provide specific examples where you can, e.g. “New wildlife legislation enacted in 2024 doubled penalties for poisoning wild birds” rather than “stronger laws”; “50% shortfall in match-funding for GEF project on gazelles” rather than just “lack of funding”.

The most successful aspects of implementation of the Convention? (List up to five items):

>>> A new Biodiversity Action Plan 2030+ was adopted by the government.

The new forest strategy was also adopted and is currently being implemented, as is the new agricultural policy report.

You have attached the following documents to this answer.

[Aktionsplan Biodiversität 2030 -en.pdf](#) - Aktionsplan Biodiversität 2030+

You have attached the following Web links/URLs to this answer.

[Aktionsplan Biodiversität 2030+](#)

The greatest difficulties in implementing the Convention? (List up to five items):

>>> Increasing urban sprawl, fragmentation of the landscape, climate change, the spread of alien species and the fertilisation of poor habitats by nitrogen input from the air are currently the greatest challenges.

The main priorities for future implementation of the Convention? (List up to five items):

>>> Implementation of the new biodiversity action plan based on CBD COP 15 targets (Kunming-Montreal target framework), with which will also benefit CMS habitats and species.

## **I. Administrative Information**

Name of the Party

>>> Liechtenstein

Date of entry into force of the Convention in your country (DDMMYY)

>>> 01111997

Any territories which are excluded from the application of the Convention

>>> None

### **Report compiler**

Name and title

>>> Mr. Oliver Müller

Full name of institution

>>> Office of Environment

Gerberweg 5

P. O. Box 684

9490 Vaduz

Liechtenstein

Telephone

>>> 00423 236 64 00

Email

>>> oliver.mueller@llv.li

### **Designated CMS National Focal Point**

Name and title of designated Focal Point

>>> Mr. Oliver Müller, Section Nature and Landscape

Full name of institution

>>> Office of Environment, Department Forest and Landscape

Mailing address

Western African Aquatic Mammals	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

### III. Species on the Convention Appendices

III.1 Please confirm that the Excel file “Res. 14.19 species per Party” linked below correctly identifies the **Appendix II** species listed in Resolution 14.19 Guidance on the treatment of species included within aggregated families listed under Appendix II for which your country is a Range State.

The list of Resolution 14.19 species per Parties is available **here**.

**Notice:** Before clicking on the above hyperlink, please keep pressing the **Ctrl button** on your keyboard to open the link in a new tab.

#### **GUIDANCE TIP:**

During the last two reporting cycles, information has been collected on Appendix I and Appendix II species, and the information received still needs to be analyzed. Therefore, this reporting cycle only focuses on bird species identified under Resolution 14.19. This Resolution invites Parties to consider the list of Species in its Annex when preparing National Reports. This question aims at collecting information on Range States of species listed in the Annex to Resolution 14.19. Parties are therefore invited to review the Range State data which are available in the excel spreadsheet “Res. 14.19 species per Party”. Please confirm that the list is correct, or if amendments are needed, create a line for each species for which you wish to indicate different information from that shown in the Excel spreadsheet. Where possible, please also provide supporting evidence, such as a reference to a scientific paper. A more detailed spreadsheet with Data per countries and territories is available here as background information. The data used for these spreadsheets are based on the CMS standard references for non-passerine and passerine species, as determined by Resolution 12.27(Rev.COP14) Taxonomy and Nomenclature, using its online version HBW-BirdLife Version 9.0 (October 2024)..

Yes, the list is correct

You have attached the following documents to this answer.

[Section III Appendix II Liechtenstein.xlsx](#) - Appendix\_II\_Liechtenstein

## IV. Legal Prohibition of the Taking of Appendix I Species

IV.1. Is the taking of Appendix I species prohibited by national or territorial legislation in accordance with CMS Article III(5)?

Yes for all Appendix I species

Please identify any change in the legal statute(s) concerned that has been introduced since the last reporting:

Please provide links and clearly identify the relevant statute(s) by providing the title, date, etc.

>>> Law on the protection of nature and landscape (Gesetz zum Schutz von Natur und Landschaft, LGBl. 1996, Nr. 117)

Regulation on specifically protected plant and animal species

(Verordnung über spezifisch geschützte Pflanzen- und Tierarten, LGBl. 2017, Nr. 444)

Regulation on the nature watch (Verordnung über die Naturwacht, LGBl. 2010, Nr. 198)

Game law (Jagdgesetz, LGBl. 1962, Nr. 4)

IV.2 **Exceptions:** Where the taking of Appendix I species **is** prohibited by national legislation, have any exceptions been granted to the prohibition during the reporting period?

No

IV.4. Are any vessels flagged to your country engaged in the intentional taking of Appendix I species outside of your country's national jurisdictional limits (consistent with the definition of "Range State" in Article I of the Convention)?

No

## V. Awareness

V.1. Please indicate the actions that have been taken by your country during the reporting period to increase people's awareness of the values of migratory species, their habitats and migration systems (note that answers given in section XVIII may also be relevant).  
(select all that apply)

### **GUIDANCE TIP:**

Awareness raising may include actions, steps, programmes, initiatives and/or activities described in various CMS documents, such as Resolution, Res. **11.9 (Rev.COP13)** (World Migratory Bird Day), as well as a number of other resolutions and decisions which include specific provisions about awareness raising, including Resolutions Res. **13.6** (Insect Decline), Res. **14.18** (Avian Influenza), Res. **14.17** (Communities and livelihoods), Res. **14.16** (Ecological Connectivity), Res. **14.15** (Action Plan to address aquatic Wild Meat Harvests), Res. **14.14** (CMS Jaguar Initiative), Res. **14.13** (Initiative for Central Asian Flyway), Res. **14.12** (Single Species Action Plan for the Angelshark (*Squatina squatina*) in the Mediterranean Sea), Res. **14.10** (Single Species Action Plan for the Atlantic Humpback Dolphin (*Sousa teuszii*), Res. **14.8** (Conservation and sustainable management of seagrass ecosystems), Res. **14.5** (Reducing the risk of vessel strikes for marine megafauna), Res. **14.1** (Samarkand Strategic Plan for migratory species 2024 - 2032), Res. **12.6 (Rev.COP14)** (Wildlife health and migratory species), Res. **12.11 (Rev.COP14)** (Flyways), Res. **12.17** (Conservation and Management of Whales and their Habitats in the South Atlantic Region), Res. **12.19 (Rev.COP14)** (Endorsement of the African Elephant Action Plan), Res. **12.20** (Management of Marine Debris), Res. **12.21 (Rev.COP14)** (Climate Change and Migratory Species), Res. **12.25** (Promoting Conservation of Critical Intertidal and Other Coastal Habitats for Migratory Species), Res. **11.16 (Rev.COP14)** (The Prevention of Illegal Killing, Taking and Trade of Migratory Birds), Res. **11.17 (Rev.COP14)** (Action Plan for Migratory Landbirds in the African-Eurasian Region), Res. **11.24 (Rev.COP13)** (Central Asian Mammal Initiative), Res. **11.31 (Rev.COP14)** (Illegal and unsustainable taking of wildlife), Res. **8.12 (Rev.COP12)** (Improving the Conservation Status of Raptors and Owls in the African-Eurasian Region), and Decision 14.194 (Ecological Connectivity), Decision 14.54 (Marine Wildlife Watching) and Decision 14.223 (Impacts of Plastic Pollution on Aquatic, Terrestrial and Avian Species).

No actions taken

## VI. Mainstreaming Migratory Species in Other Sectors and Processes

VI.1. Does the conservation of migratory species currently feature in any national or local strategies and/or planning processes in your country relating to development, poverty reduction and/or livelihoods?

No

VI.2. Does your country integrate the 'values of migratory species and their habitats' in any other national reporting processes?

E.g. Agenda 2030, reporting for International Whaling Commission, CBD, EU Nature Directives, etc.

### GUIDANCE TIP:

Responses to this question should be focused on the reporting processes of the country rather than on plans and regulations within the country. This question intends to understand if the values of migratory species and habitats are featured in other national reporting that your country participates in, such as reporting to other biodiversity MEAs, the International Whaling Commission, European Commission etc.

No

VI.3. Provide some examples of significant involvements (if any) of non-governmental organizations and/or civil society in the conservation of migratory species in your country.

>>> The Liechtenstein Society for Environmental Protection and the Liechtenstein Botanical Zoological Society do a lot in the field of environmental education and also offer excursions in protected areas.

VI.4. Provide some examples of significant involvements (if any) of the private sector in the conservation of migratory species in your country.

>>> Private persons are not involved

VI.5. Are legislation and regulations in your country concerning Environmental Impact Assessments (EIA) and Strategic Environmental Assessments (SEA) considering the possible impediments to migration, transboundary effects on migratory species, and of impacts on migratory patterns and migratory ranges?

### GUIDANCE TIP:

Please refer to Resolution **7.2 (Rev.COP14)** (Impact Assessment and Migratory Species).

Yes

Please describe any hindrances and challenges to the application of EIA and SEAs with respect to migratory species, lessons learned, and needs for further capacity development.

>>> In Liechtenstein, there have been no projects in recent times that would have had migration obstacles or other impacts on migratory species, such as wind farms or high-voltage power lines. We have therefore not been able to gather any experience.

VI.6. To what extent have biodiversity and migratory species considerations been specifically integrated into national energy and climate policy and legislation?

### GUIDANCE TIP

Please refer to Resolutions **12.21 (Rev.COP14)** (Climate Change and Migratory Species), Res. **11.27 (Rev.COP13)** (Renewable Energy and Migratory Species), Res. **10.11 (Rev.COP13)** (Power Lines and Migratory Birds), and Decision **14.207** (Renewable Energy and Migratory Species) for more information.

>>> These were not specifically included in the considerations because there are no wind turbines or other migration obstacles. However, this is considered in the biodiversity strategy, as the expansion of renewable energies is currently being strongly pushed.

Please provide any examples related to such policy and legislation.

>>> We are in the process of defining, via negative planning, where renewable energies may not be built outside of construction zones in order to protect biodiversity and the landscape.

## VII. Governance, Policy and Legislative Coherence

(SPMS Target 3: National, regional and international governance arrangements and agreements affecting migratory species and their migration systems have improved significantly, making relevant policy, legislative and implementation processes more coherent, accountable, transparent, participatory, equitable and inclusive.)

VII.1. Have any governance arrangements and agreements affecting migratory species and their migration systems in your country, or in which your country participates, resulted in improvements during the reporting period?

### GUIDANCE TIP:

This question is intended to understand improvements in governance arrangements in your country, which may potentially include improvements in policy, legislation, governance processes, plans etc. Please also consider the guidance below in VII.2.

No, because existing arrangements are considered to be sufficient

VII.2. Has any committee or other arrangement for liaison between different government agencies/ministries, sectors or groups been established at a national and/or subnational level in your country that addresses CMS implementation issues?

### GUIDANCE TIP:

There is no fixed model for what these arrangements may involve, and it is for each Contracting Party to decide what best suits its own circumstances. Examples could include a steering group that includes representatives of territorial administration authorities, a coordination committee that involves the lead government department (e.g. environment) working with other departments (e.g. agriculture, industry); a forum that brings together government and NGOs; a liaison group that links with business and private sector interests; a stakeholder forum involving representatives of indigenous and local communities; a coordination team that brings together the National Focal Points for each of the biodiversity-related MEAs to which the country is a Party (see also question VII.3); or any other appropriate mechanism.

These mechanisms may be specifically focused on migratory species issues, or they may address CMS implementation in conjunction with related processes such as NBSAP coordination, a National Ramsar Committee, etc.

**The Manual for National Focal Points for CMS and its Instruments** may be helpful in giving further context.

No

VII.3. Does collaboration between the focal points of CMS and other relevant global or regional Conventions take place in your country to develop the coordinated and synergistic approaches described in paragraphs 29, 30 and 32 of **Res. 11.10 (Rev.COP14)** (Synergies and partnerships) and in paragraph 7 of **Res. 14.3** (Engagement in CBD processes including the Global Biodiversity Framework) ?

### GUIDANCE TIP:

Relevant Conventions may include other global agreements such as biodiversity-related Conventions and Agreements, UNFCCC, UNCCD, as well as regional agreements, including CMS Agreements. Such collaboration may also be relevant to aligning efforts related to the Kunming-Montreal Global Biodiversity Framework, the 2030 Agenda for Sustainable Development, the United Nations Decade on Ecosystem Restoration 2021-2030, and NBSAPs as described in **Dec. 14.6** (CMS Engagement in CBD Processes Including Global Biodiversity Framework) and **Res.8.18 (Rev.COP12)** (Integration of Migratory Species into NBSAPs and into On-going and Future Programmes of Work under CBD). Guidance documents for integrating considerations relevant to Migratory Species in NBSAPs are available at CMS website.

Yes

Please provide details:

>>> A regular exchange takes place between the responsible national focal points of the CMS, CBD, Bern Convention, CITES, Alpine Convention and Ramsar.

VII.4. Has your country or any jurisdictional subdivision within your country adopted legislation, policies, initiatives or action plans during the reporting period that promote community involvement in conservation of CMS-listed species?

No

## VIII. Incentives

VIII.1. Has there been any elimination, phasing out or reforming of harmful incentives in your country during the reporting period resulting in benefits for migratory species?

No, because no such incentives have existed

VIII.2. Has there been development and/or application of positive incentives in your country during the reporting period, resulting in benefits for migratory species?

No, because there is no scope to do so

## IX. Sustainable Production and Consumption

IX.1. During the reporting period, has your country implemented plans or taken other steps concerning sustainable production and consumption which are relevant for conservation of migratory species?

Yes

Please describe the measures that have been planned, developed or implemented

>>> see linked reports

You have attached the following documents to this answer.

[Aktionsplan\\_Biodiversität\\_2030\\_-en.pdf](#) - Aktionsplan Biodiversität 2030+

Please describe what evidence exists to show that the intended results of these measures are being achieved.

>>> see linked report

You have attached the following documents to this answer.

[Aktionsplan\\_Biodiversität\\_2030\\_-en.pdf](#) - Aktionsplan Biodiversität 2030+

## X. Threats and Pressures Affecting Migratory Species; Including Obstacles to Migration

### Which of the following pressures on migratory species or their habitats are having an adverse impact in your country on migratory species included in the CMS Appendices?

Guidance: This question asks you to identify the important pressures that are reliably known to be having an actual adverse impact on CMS-listed migratory species at present. Please avoid including speculative information about pressures that may be of some potential concern but whose impacts have not yet been demonstrated.

Please note that, consistent with the terms of the Convention, “in your country” may in certain circumstances include areas outside national jurisdictional limits where the activities of any vessels flagged to your country are involved.

#### Intentional Taking

##### GUIDANCE TIP:

Please note that as per Article 1(i) of the Convention, “Taking” means taking, hunting, fishing, capturing, harassing, deliberate killing, or attempting to engage in such conduct.

	Species/species groups affected (please provide names and indicate whether Appendix I and/or Appendix II); and any other details	Overall relative severity of impact 1 = severe 2 = moderate 3 = low
Legal hunting	All CMS ssp.	3
Illegal hunting	All CMS ssp.	3
Other harvesting and take	All CMS ssp.	3
Illegal trade	All CMS ssp.	3
Deliberate poisoning	All CMS ssp.	3

What are the most significant advances that have been made since the previous report in addressing intentional taking?

>>> In Liechtenstein we do not have illegal intentional taking.

What are the most significant negative trends since the previous report concerning intentional taking?

##### GUIDANCE TIP:

Significant advances may include efforts, actions, steps, programmes, initiatives and/or activities described in CMS documentation, such as Resolutions **14.9** (Conservation Priorities for Cetaceans), Res. **14.15** (Action Plan to Address Aquatic Wild Meat Harvests in West Africa), Res. **13.3** (Chondrichthyan Species), Res. **13.4** (African Carnivore initiative), Res. **12.10 (Rev.COP14)** (Conservation of African-Eurasian Vultures), Res. **12.11 (Rev.COP14)** (Flyways), Res. **12.12 (Rev.COP14)** (Action Plans for Birds), Res. **12.15** (Aquatic Wild Meat), Res. **12.17** (Conservation and Management of Whales and their Habitats in the South Atlantic Region), Res. **12.19 (Rev.COP14)** (Endorsement of the African Elephant Action Plan), Res. **11.15 (Rev.COP14)** (Preventing Poisoning of Migratory Birds), Res. **11.16 (Rev.COP14)** (The prevention of Illegal Killing, Taking and Trade of Migratory Birds), Res. **11.17 (Rev.COP14)** (Action Plan for Migratory Landbirds in the African-Eurasian Region), Res. **11.18 (Rev.COP14)** (Saker Falcon Global Action Plan), Res. **11.21 (Rev.COP12)** (Single Species Action Plan for the Loggerhead Turtle in the South Pacific Ocean), Res. **11.22 (Rev.COP12)** (Live Capture of Cetaceans from the Wild for Commercial Purposes), Res. **11.24 (Rev.COP13)** (Central Asian Mammal Initiative), Res. **11.31 (Rev.COP14)** (Illegal and unsustainable taking of wildlife), and Decisions 14.148-14.150 (Conservation of African-Eurasian Vultures), 14.119-14.121 (Task Force on Illegal Killing, Taking and Trade of Migratory Birds in the Mediterranean), 14.125 (Asia Pacific Illegal Taking of Migratory Birds Intergovernmental Task Force), Decision 14.126 (South-West Asia Illegal Taking of Migratory Birds Intergovernmental Task Force).

>>> In Liechtenstein we do not have illegal intentional taking.

#### Unintentional Taking

	Overall relative severity of impact 1 = severe 2 = moderate 3 = low	Species/species groups affected (please provide names and indicate whether Appendix I and/or Appendix II); and any other details
Bycatch	3	All CMS ssp.
Catch in Abandoned, Lost or otherwise Discarded Fishing Gear (ALDFG)	3	All CMS ssp.
Other forms of unintentional taking	3	All CMS ssp.

What are the most significant advances that have been made since the previous report in addressing bycatch or catch in ALDFG?

**GUIDANCE TIP:**

Significant advances may include efforts, actions, steps, programmes, initiatives and/or activities described in CMS documentation, such as Resolutions **12.22**(Bycatch), Res. **12.20** (Management of Marine Debris), Res. **11.21** (Single Species Action Plan for the Loggerhead Turtle in the South Pacific Ocean), Res. **14.9** (Conservation Priorities for Cetaceans), and Res. **13.3** (Chondrichthyan species) and Dec. 14.31 b) and c). Parties are encouraged to report on the implementation of the recommendation included in Drynan and Baker 2023 “Technical mitigation techniques to reduce bycatch of sharks” provided in Annex 1 to UNEP/CMS/COP14/Doc.27.1.1/Rev.1.

>>> Liechtenstein is a landlocked country without access to the sea and also without large lakes or other bodies of water. By-catches therefore do not occur. Non-selective traps are prohibited by law and by the Bern Convention in Liechtenstein anyway.

What are the most significant negative trends since the previous report concerning bycatch?

**GUIDANCE TIP:**

Please provide information on any significant trend in bycatch of CMS-listed species, notably those listed on App. I. Related to the guidance given on the overarching part of Question X.1, this is a key example where you are encouraged to think about activities outside national jurisdictional limits of any vessels flagged to your country (in addition to any other circumstances in which bycatch is a noteworthy pressure on relevant species).

>>> Liechtenstein is a landlocked country without access to the sea and also without large lakes or other bodies of water. By-catches therefore do not occur. Non-selective traps are prohibited by law and by the Bern Convention in Liechtenstein anyway.

**Collisions and electrocution**

	Species/species groups affected (please provide names and indicate whether Appendix I and/or Appendix II); and any other details	Overall relative severity of impact 1 = severe 2 = moderate 3 = low
Wind turbines	All CMS ssp.	3
Other collisions	All CMS ssp.	3
Electrocution	All CMS ssp.	3
Vessel strikes		

What are the most significant advances that have been made since the previous report in addressing collisions and electrocution?

>>> In Liechtenstein, there are no wind turbines and almost no overhead power lines. The lines that still exist are to be laid in the ground in the next few years.

What are the most significant negative trends since the previous report concerning collisions and electrocution?

**GUIDANCE TIP:**

Significant advances may include efforts, actions, steps, programmes, initiatives and/or activities described in CMS documentation, such as Resolution **7.4** (Electrocution of Migratory Birds), **7.5 (Rev.COP12)**(Wind Turbines and Migratory Species, **10.11 (Rev. COP13)** (Power Lines and Migratory Birds), **11.17 (Rev.COP14)** (Action Plan for Migratory Landbirds in the African Eurasian Region), **11.27 (Rev.COP13)** (Renewable Energy and Migratory Species), **12.10 (Rev.COP14)** (Conservation of African Eurasian Vultures), Res. **14.5** (Reducing the risk of vessel strikes for marine megafauna), Res. **14.9** (Conservation Priorities for Cetaceans) and Decision 14.48.

>>> In Liechtenstein, there are no wind turbines and almost no overhead power lines. The lines that still exist are to be laid in the ground in the next few years.

## Other mortality

	Overall relative severity of impact 1 = severe 2 = moderate 3 = low	Species/species groups affected (please provide names and indicate whether Appendix I and/or Appendix II); and any other details
Disease, including highly pathogenic avian influenza (HPAI)	3	All CMS ssp.
Unexplained stranding events	3	All CMS ssp.
Accidental/indirect poisoning	3	All CMS ssp.
Disease	3	All CMS ssp.

What are the most significant advances that have been made since the previous report in countering other mortality?

>>> We have no problems in these sectors. The most likely thing that could cause problems is a disease such as bird flu. So far, however, this has not occurred in Liechtenstein.

What are the most significant negative trends since the previous report concerning other mortality?

### GUIDANCE TIP:

Significant advances may include efforts, actions, steps, programmes, initiatives and/or activities described in CMS documentation, such as Resolutions **11.15 (Rev.COP14)** (Preventing Poisoning of Migratory Species), Res. **12.6** (Rev.COP14) (Wildlife health and migratory species), Res. **13.4** (African Carnivore initiative), Res. **13.6** (Insect Decline), Res. **14.9** (Conservation Priorities for Cetaceans), Res. 14.18 Avian influenza and Decisions 14.148-14.150 (Conservation of African-Eurasian Vultures).

>>> We have no problems in these sectors. The most likely thing that could cause problems is a disease such as bird flu. So far, however, this has not occurred in Liechtenstein.

## Alien and/or invasive species

	Species/species groups affected (please provide names and indicate whether Appendix I and/or Appendix II); and any other details	Overall relative severity of impact 1 = severe 2 = moderate 3 = low
Alien and/or invasive species	All CMS ssp.	3

What are the most significant advances that have been made since the previous report in addressing alien and/or invasive species?

>>> A pilot rewetting project was implemented in the country's largest nature reserve, a wetland. It is hoped that this will also help to drive back neophytes such as Canada goldenrod.

What are the most significant negative trends since the previous report concerning alien and/or invasive species?

### GUIDANCE TIP:

Significant advances may include efforts, actions, steps, programmes, initiatives and/or activities described in CMS documentation, such as Resolution **11.28** (Future CMS Activities related to Invasive Alien Species).

>>> New species are still being introduced to Liechtenstein. The entry points are known but a complete containment has not been achieved.

## Disturbance and disruption

	Species/species groups affected (please provide names and indicate whether Appendix I and/or Appendix II); and any other details	Overall relative severity of impact 1 = severe 2 = moderate 3 = low
Disturbance	All CMS ssp.	2

What are the most significant advances that have been made since the previous report in addressing disturbance & disruption?

>>> Disturbances and interruptions were a bigger problem, especially during Corona, as people had more free time and were moving around in all corners of nature. Since the Corona restrictions have been lifted again, the situation has calmed down.

What are the most significant negative trends since the previous report concerning disturbance and disruption?

**GUIDANCE TIP:**

Significant advances may include efforts, actions, steps, programmes, initiatives and/or activities described in CMS documentation, such as Resolutions **14.9** (Conservation Priorities for Cetaceans), Res. **12.16** (Rev.COP14) (Recreational In-Water Interaction with Aquatic Mammals), Res. **11.29 (Rev.COP12)** (Sustainable Boat-based Wildlife Watching), Res. **13.4** (African Carnivore initiative) and measures to mitigate threats to Important Shark and Ray Ares under Decision **14.61**.

>>> Disturbances and interruptions were a bigger problem, especially during Corona, as people had more free time and were moving around in all corners of nature. Since the Corona restrictions have been lifted again, the situation has calmed down.

**Pollution**

	Species/species groups affected (provide names and indicate whether Appendix I and/or Appendix II); and any other details	Overall relative severity of impact 1 = severe 2 = moderate 3 = low
Marine debris (including plastics)	All CMS ssp.	3
Light pollution	All CMS ssp.	3
Underwater noise	All CMS ssp.	3
Other pollution	All CMS ssp.	3
Fish aggregating devices (FADs)		

What are the most significant advances that have been made since the previous report in addressing pollution?

>>> Liechtenstein is a landlocked country without access to the sea and also without large lakes or other bodies of water. The only problem, therefore, is light pollution, which is, however, limited. In the case of new buildings, requirements are imposed to reduce light pollution.

What are the most significant negative trends since the previous report concerning pollution?

**GUIDANCE TIP:**

Significant advances may include efforts, actions, steps, programmes, initiatives and/or activities described in CMS documentation, such as Resolutions **14.9** (Conservation Priorities for Cetaceans), Res. **13.5 (Rev.COP14)** (CMS international light pollution guidelines for migratory species), Res. **12.14** (Adverse Impacts of Anthropogenic Noise on Cetaceans and Other Migratory species), Res. **12.17** (Action Plan for the Protection and Conservation of south Atlantic Whales), Res. **12.20** (Management of Marine Debris), Res. **7.3 (Rev.COP12)** (Oil Pollution and Migratory species), and Decision **14.223** (Impacts of Plastic Pollution on Aquatic, Terrestrial and Avian Species).

>>> The only problem, therefore, is light pollution, which is, however, limited. In the case of new buildings, requirements are imposed to reduce light pollution.

**Habitat destruction/degradation**

	<b>Species/species groups affected (please provide names and indicate whether Appendix I and/or Appendix II); and any other details</b>	<b>Overall relative severity of impact 1 = severe 2 = moderate 3 = low</b>
Landscape fragmentation/loss of ecological connectivity, physical barriers	All CMS ssp.	2
Habitat degradation	All CMS ssp.	2
Mineral exploration/extraction	All CMS ssp.	2
Unsustainable land/resource use	All CMS ssp.	2
Urbanization	All CMS ssp.	3
Mineral exploration/extraction, incl. deep-seabed mineral exploitation	All CMS ssp.	3
Fire	All CMS ssp.	2
Physical barriers	All CMS ssp.	2

What are the most significant advances that have been made since the previous report in addressing habitat destruction/degradation?

>>> The settlements in Liechtenstein are spreading more and more and every few years a new road is built. This leads to the loss of habitat and the fragmentation of the landscape. Climate change is increasingly causing dry periods, which put pressure on wetlands. Therefore a pilot rewetting project was implemented in the country's largest nature reserve.

What are the most significant negative trends since the previous report concerning habitat destruction/degradation?

**GUIDANCE TIP:**

Significant advances may include efforts, actions, steps, programmes, initiatives and/or activities described in CMS documentation, such as Resolutions **14.6** (Deep-seabed mineral exploitation activities and migratory species) **14.9** (Conservation Priorities for Cetaceans), Res. **13.3** (Chondrichthyan species), Res. **13.6** (Insect Decline), Res. **12.11 (Rev.COP14)** (Flyways), Res. **12.12 (Rev.COP14)**(Action Plans for Birds), Res. **12.13** (Important Marine Mammal Areas), Res. **12.17** (Conservation and Management of Whales and their Habitats in the South Atlantic Region), Res. **12.19 (Rev.COP14)** (Endorsement of the African Elephant Action Plan), Res. **12.24**(Promoting Marine Protected Areas Networks in the ASEAN Regions), Res. **12.25** (Promoting Conservation of Critical Intertidal and Other Habitats for Migratory species), Res. **11.17 (Rev.COP14)** (Action Plan for Migratory Landbirds in the African-Eurasian Region), Res. **11.18 (Rev.COP14)** (Saker Falcon Global Action Plan), Res. **11.21** (Single Species Action Plan for the Loggerhead Turtle in the South Pacific Ocean), Res. **11.24 (Rev.COP13)** (Central Asian Mammal Initiative), Res. **14.16** (Ecological Connectivity), and Decisions **14.148-14.150** (Conservation of African-Eurasian Vultures).

>>> The settlements in Liechtenstein are spreading more and more and every few years a new road is built. This leads to the loss of habitat and the fragmentation of the landscape. Climate change is increasingly causing dry periods, which put pressure on wetlands. Therefore a pilot rewetting project was implemented in the country's largest nature reserve.

**Climate change**

	<b>Overall relative severity of impact 1 = severe 2 = moderate 3 = low</b>	<b>Species/species groups affected (please provide names and indicate whether Appendix I and/or Appendix II); and any other details</b>
Climate change	2	All CMS ssp.

What are the most significant advances that have been made since the previous report concerning climate change?

>>> Climate change is increasingly causing dry periods, which put pressure on wetlands. Therefore a pilot rewetting project was implemented in the country's largest nature reserve.

What are the most significant negative trends since the previous report concerning climate change?

**GUIDANCE TIP:**

Significant advances may include efforts, actions, steps, programmes, initiatives and/or activities described in CMS documentation, such as Decision **14.211** (Climate change and Migratory Species).

>>> Climate change is increasingly causing dry periods, which put pressure on wetlands. Therefore a pilot rewetting project was implemented in the country's largest nature reserve.

**Levels of knowledge, awareness, legislation, management etc.**

	Overall relative severity of impact 1 = severe 2 = moderate 3 = low	Species/species groups affected (please provide names and indicate whether Appendix I and/or Appendix II); and any other details
Inadequate transboundary management	3	All CMS ssp.
Inadequate legislation	3	All CMS ssp.
Lack of knowledge	3	All CMS ssp.
Inadequate enforcement of legislation	3	All CMS ssp.

What are the most significant advances that have been made since the previous report in levels of knowledge, awareness, legislation, management etc?

>>> No great progress has been made in this regard during the current period. Progress should be made here with the new biodiversity strategy currently being drawn up. The strategy is also to be incorporated into spatial planning and in part influence legislation.

What are the most significant negative trends since the previous report concerning levels of knowledge, awareness, legislation, management etc.?

>>> No great progress has been made in this regard during the current period. Progress should be made here with the new biodiversity strategy currently being drawn up. The strategy is also to be incorporated into spatial planning and in part influence legislation.

**Other (please specify)**

	Overall relative severity of impact 1 = severe 2 = moderate 3 = low	Species/species groups affected (please provide names and indicate whether Appendix I and/or Appendix II); and any other details

What are the most significant advances that have been made since the previous report in other pressures?

>>> The pilot project to rewet the wetland is starting to have an impact and new water birds have been observed.

What are the most significant negative trends since the previous report concerning other pressures?

>>> Climate change and the spread of invasive neobiota continue to progress.

During the reporting period, has your country adopted new legislation or other domestic measures in response to CMS Article III(4) (b) specifically addressing obstacles to migration?

CMS Article III(4)(b) states 'Parties that are Range States of a migratory species listed in Appendix I shall endeavor...to prevent, remove, compensate for or minimize, as appropriate, the adverse effects of activities or obstacles that seriously impede or prevent the migration of the species.'

**GUIDANCE TIP:**

This question is intended to specifically report on any new legislation or domestic measures **addressing obstacles to migration**. Relevant information would not include general conservation measures.

No

## XI. Conservation Status of Migratory Species

**XI.1. What (if any) major changes in the conservation status of migratory species included in the CMS Appendices (e.g. national Red List category changes) have been recorded in your country during the reporting period?**

**“Conservation status” of migratory species is defined in Article I(1)(b) of the Convention as “the sum of the influences acting on the migratory species that may affect its long-term distribution and abundance”; and four conditions for conservation status to be taken as “favourable” are set out in Article I(1)(c).**

**If more rows are required, please upload an Excel file detailing a longer list of species.**

**GUIDANCE TIP:**

The emphasis of this question is on “major changes” during the reporting period. Information is expected to be provided here only where particularly notable shifts in status have occurred, such as those that might be represented by a re-categorisation of national Red List threat status for a given species (or subspecies, where relevant). Please record if any CMS listed species has become extinct or extirpated from your country - or reintroduced/re-established/established - during the reporting period (or before if not previously reported to CMS).

Please note also that you are only being asked about the situation in your country. Information about global trends, and global Red List reclassifications etc, will be communicated to the CMS via other channels outside the national reporting process.

Terrestrial mammals (not including bats)

	Change in status (including time period concerned)	Comments	Source reference	Species/subspecies (indicate CMS Appendix where applicable)
				no changes

Aquatic mammals

	Change in status (including time period concerned)	Comments	Source reference	Species/subspecies (indicate CMS Appendix where applicable)
				no changes

Bats

	Change in status (including time period concerned)	Comments	Source reference	Species/subspecies (indicate CMS Appendix where applicable)
				no changes

Birds

	Change in status (including time period concerned)	Comments	Source reference	Species/subspecies (indicate CMS Appendix where applicable)
				no changes

--	--	--	--	--

Reptiles

	Change in status (including time period concerned)	Comments	Source reference	Species/subspecies (indicate CMS Appendix where applicable)
				no changes

Fish

	Change in status (including time period concerned)	Comments	Source reference	Species/subspecies (indicate CMS Appendix where applicable)
				no changes

Insects

	Change in status (including time period concerned)	Comments	Source reference	Species/subspecies (indicate CMS Appendix where applicable)
				no changes

## XII. Cooperating to Conserve Migration Systems

XII.1 During the reporting period, has your country initiated or participated in the development of any proposals for new CMS Agreements, including Memoranda of Understanding, to address the needs of Appendix II species?

E.g. Developments following the advice in Resolutions **12.8** and **13.7**.

No

XII.2. During the reporting period, have actions been taken by your country to encourage non-Parties to join CMS and its related Agreements?

No

XII.3. During the reporting period, has your country participated in the implementation of Concerted Actions under CMS (as detailed in Resolution **12.28 (Rev.COP14)**) to address the needs of relevant migratory species?

No

XII.4. Have any other steps been taken which have contributed to enhancing cooperation on the conservation of migratory species in ways that fully reflect a migration systems approach?

E.g. steps implementing Resolutions **12.11 (Rev.COP14)** (Flyways) and Res. **12.17** (South Atlantic Whales), and Decisions 14.130 (Action Plan for Migratory Landbirds), 14.137 (Flyways), and 14.207 (Renewable Energy and Migratory Species).

No

XII.5. Has your country mobilized resources and/or taken steps to promote and address ecological connectivity and its functionality in relevant international processes?

E.g., Kunming-Montreal Global Biodiversity Framework, 2030 Agenda for Sustainable Development, United Nations Decade on Ecosystem Restoration 2021-2030, etc.

### **GUIDANCE TIP:**

Please describe initiatives aimed at implementing Decision 14.194.

Yes

Please provide details:

>>> A new Biodiversity Action Plan was adopted in 2024. This serves to implement the Kunming-Montreal goals.

### XIII. Area-Based Conservation Measures

XIII.1. Have critical habitats and sites for migratory species been identified (e.g. by an inventory) in your country?

**GUIDANCE TIP:**

The CMS does not have a formal definition of what constitutes a “critical” site or habitat for migratory species. It is left to report compilers to work with any interpretations which may be in existing use at national level, or to use informed expert judgement.

Helpful reflections on the issue can be found in the Resolution **Res. 14.16** (Ecological Connectivity) and in “**Strategic Review of Aspects of Ecological Networks relating to Migratory Species**” presented to COP11 and the “**Critical Site Network Tool**” developed under the auspices of AEWA and the Ramsar Convention. For sharks and rays please refer to <https://sharkrayareas.org>. For marine mammals, please refer to <https://www.marinemammalhabitat.org/imma-eatlas/>.

Partially - to a large extent

What are the main gaps and priorities to address, if any, in order to achieve full identification of relevant critical habitats and sites?

>>> Liechtenstein has an inventory of priority natural areas and it can be assumed that the areas included in the inventory are also the most important areas for migratory animal species. It is therefore not planned to draw up a separate inventory for migratory species.

XIII.2. Has any assessment been made of the contribution made by the country’s protected areas network specifically to migratory species conservation?

No

XIII.3. Has your country adopted any new legislation or other domestic measures in the reporting period in response to CMS Article III(4) (a) (“Parties that are Range States of a migratory species listed in Appendix I shall endeavor ... to conserve and, where feasible and appropriate, restore those habitats of the species which are of importance in removing the species from danger of extinction”)?

No

XIII.4. In respect of protected areas in your country that are important for migratory species, have any assessments of management effectiveness been undertaken in the reporting period?

No

XIII.5. Beyond Protected Areas, are other effective area-based conservation measures implemented in your country in ways which benefit migratory species?

Yes

Please provide details:

>>> The areas included in the inventory of priority natural areas are not all protected by law, but are protected from negative impacts. Thus, these areas also serve to protect migratory species.

## XIV. Ecosystem Services

XIV.1. Has any assessment of ecosystem services associated with migratory species been undertaken in your country since the last reporting?

**GUIDANCE TIP:**

The phrase “associated with” migratory species allows you to report on any assessments that cover ecosystem services of systems, habitats or species assemblages that include migratory species. The question is therefore not expecting you to limit this to assessments focused solely on one or more migratory species.

For a broader biodiversity assessment to be relevant here, the migratory species involved must be making some identifiable contribution to the ecosystem services concerned.

No

## **XV. Safeguarding Genetic Diversity**

XV.1. Are strategies of relevance to migratory species being developed or implemented to minimize genetic erosion of biodiversity in your country?

**GUIDANCE TIP:**

Strategies to be considered under this section do not necessarily have to specifically address migratory species but be of sufficient relevance in relation to the objective of safeguarding the genetic diversity of wild populations.

No

## XVI. National Biodiversity Strategies and Action Plans

XVI.1. Does your country's National Biodiversity Strategy or Action Plan (NBSAP), or other relevant plans or strategies used in your country, explicitly address obligations under CMS, priorities for the conservation and management of migratory species, their habitats and migration systems, and ecological connectivity?

Yes

a. Please provide a link to or attachment of the strategy/action plan

>>> <https://www.llv.li/serviceportal2/amtstellen/amt-fuer-umwelt/wald-natur-landschaft/natur-und-landschaft/aktionsplan-biodiversitaet-2030-en.pdf>

b. Please identify the elements in the plan/strategy that are particularly relevant to migratory species, and highlight any specific references to the CMS/CMS instruments

### **GUIDANCE TIP:**

Specify page numbers, section/paragraph numbers etc., where possible.

>>> Field of Action 1, Target B: Liechtenstein has a green infrastructure. This includes protected areas, other ecologically valuable areas, and connectivity axes.

Field of Action 2, Target A: The objects listed in the inventory of nature priority areas are in a high-quality ecological condition and are protected and maintained on a mandatory basis.

Field of Action 2, Target G: The existing nutrient-poor sites (dry meadows and pastures, fens and spring meadows) are preserved in terms of area and quality, represented in the protected areas, and secured in practice for the long term.

c. Please add comments on the implementation of the strategy or action plan concerned.

>>> Implementation did not start until 2025, as the action plan was adopted at the end of 2024. The highest priority is currently the designation of new protected areas, the expansion of existing protected areas and the designation of buffer zones around existing protected areas.

XVI.2. Please provide information on the progress of implementation of other relevant action plans (single species, species group, etc.), initiatives, task forces, and programmes of work in your country that have not been addressed in previous questions.

E.g. AEMLAP, Great Green Wall, Bonn Challenge, Action Plans for Birds, Action Plan for the Protection and Conservation of South Atlantic Whales, Energy Task Force, Programme of Work on Climate Change and Migratory Species, etc.

>>> The adoption of the EU Restoration Act in Liechtenstein via the European Economic Area (EEA) is currently being examined.

Please describe the monitoring and efficacy of measures taken in regard to these relevant action plans, initiatives, task forces, and programmes of work and their integration into delivery against other relevant international agreements.

### **GUIDANCE TIP:**

In answering this question, compilers can provide link to relevant reports under other agreements.

>>> Monitoring is ensured on the one hand through species monitoring specific to Liechtenstein, but also through international reporting obligations (Bern Convention, CBD, etc.).

## **XVII. Traditional Knowledge, Innovations and Practices of Indigenous and Local Communities**

In the absence of a national definition of 'indigenous and local communities', please refer to the Convention on Biological Diversity document **Compilation of Views Received on Use of the Term "Indigenous Peoples and Local Communities"** for helpful guidance on these terms.

XVII.1. During the reporting period, have actions been taken in your country to foster consideration for the traditional knowledge, innovations and practices of indigenous and local communities that are relevant for the conservation and sustainable use of migratory species, their habitats and migration systems?

Not applicable

XVII.2. During the reporting period, have actions been taken in your country to promote and foster effective participation and involvement of indigenous and local communities in the conservation and sustainable use of migratory species, their habitats and migration systems?

Not applicable

If 'yes' or 'partly/in some areas' to either of the preceding two questions, please select which actions have been taken:

(select all that apply)

Other

>>> -

Please provide details on the implementation of the actions concerned.

### **GUIDANCE TIP**

Responses to these questions may involve actions, steps, programmes, initiatives and/or activities described in CMS documentation, such as Resolution **14.9** (Conservation Priorities for Cetaceans).

>>> -

XVII.3. How would you rank progress since the previous report in your country in the area of traditional knowledge innovations and practices of indigenous and local communities relevant for the conservation and sustainable use of migratory species?

4. Target substantially achieved (traditional knowledge is fully respected and there is effective participation from communities)

Please provide details on the progress made (where applicable).

>>> -

## **XVIII. Knowledge, Data and Capacity-Building**

XVIII.1 During the reporting period, which steps taken in your country have contributed to the achievement of the results defined in the area of knowledge, data and capacity building? (Answers given in Section V may be relevant)

(select all that apply)

No steps have been taken

XVIII.3 What assistance (if any) does your country require in order to build sufficient capacity to implement its obligations under the CMS and relevant Resolutions of the COP?

(select all that apply)

No assistance required

## **XIX. Resource Mobilization**

XIX.1 During the reporting period, has your country made financial or other resources available for conservation activities specifically benefiting migratory species?

**GUIDANCE TIP:**

The “resources” that are relevant here can be financial, human or technical. In addition to funding, “in-kind” forms of support such as staff time or administrative infrastructure could be relevant, as could the loan of equipment, provision of data processing facilities, technology transfer, training or mentoring schemes and other initiatives for capacity building.

No

XIX.2. During the reporting period, has your country received financial or other resources for conservation activities specifically benefiting migratory species?

No

XIX.3. Which are the most important CMS implementation priorities requiring resources and support in your country during future reporting periods?

**GUIDANCE TIP:**

Please consider answers provided in HLS.3 when answering this question where appropriate, as they may be of relevance.

>>> no support is required.
