10 European countries  
12 partners from across Europe, each of which leading or supporting the Action Planning work on one or more species

- UPDATE AND REVISE 6 action plans for birds with continuous population declines and/or those in need of coordinated conservation efforts at international level;
- Develop NEW action plans for two species of threatened birds, in accordance with the latest IUCN Red List assessment;
- Respond to an EXPRESSED NEED BY THE EUROPEAN COMMISSION to develop and test/apply a methodology for multi-species action plans for a group of species, based on commonalities in their habitat needs;
- Put in place a SYSTEM FOR COORDINATION among the main actors involved in the development and implementation of species action plans. The system will lead to improved information flow, transparency and effectiveness of consultations

Partners	Action plans coordination
BirdLife International	Overall coordination
NABU	Multi Species Action Plan - European lowland grassland waders
RSPB	European Turtle Dove
SPEA	Monteiro's Storm-petrel
LOD	Velvet Scoter
SEO/BirdLife	White Headed Duck + Bearded Vulture
LPO	Yelkouan Shearwater
VCF	Bearded Vulture + Black Vulture
HOS	Dalmatian Pelican
FACE	Stakeholder and advisor
AEWA	Stakeholder and advisor

# Strategic opportunity

## ➤ **Develop new Species Action Plans (SAPs) (3 species)**

- ❖ European Turtle Dove
- ❖ Yelkouan Shearwater
- ❖ Monteiro's Storm-petrel

## ➤ **Review and update existing SAPs**

- ❖ Velvet Scoter
- ❖ White-headed Duck
- ❖ Cinereous Vulture
- ❖ Bearded Vulture
- ❖ Dalmatian Pelican

## ➤ **Developing and pilot Multi Species Action Plan for European lowland grassland breeding waders**

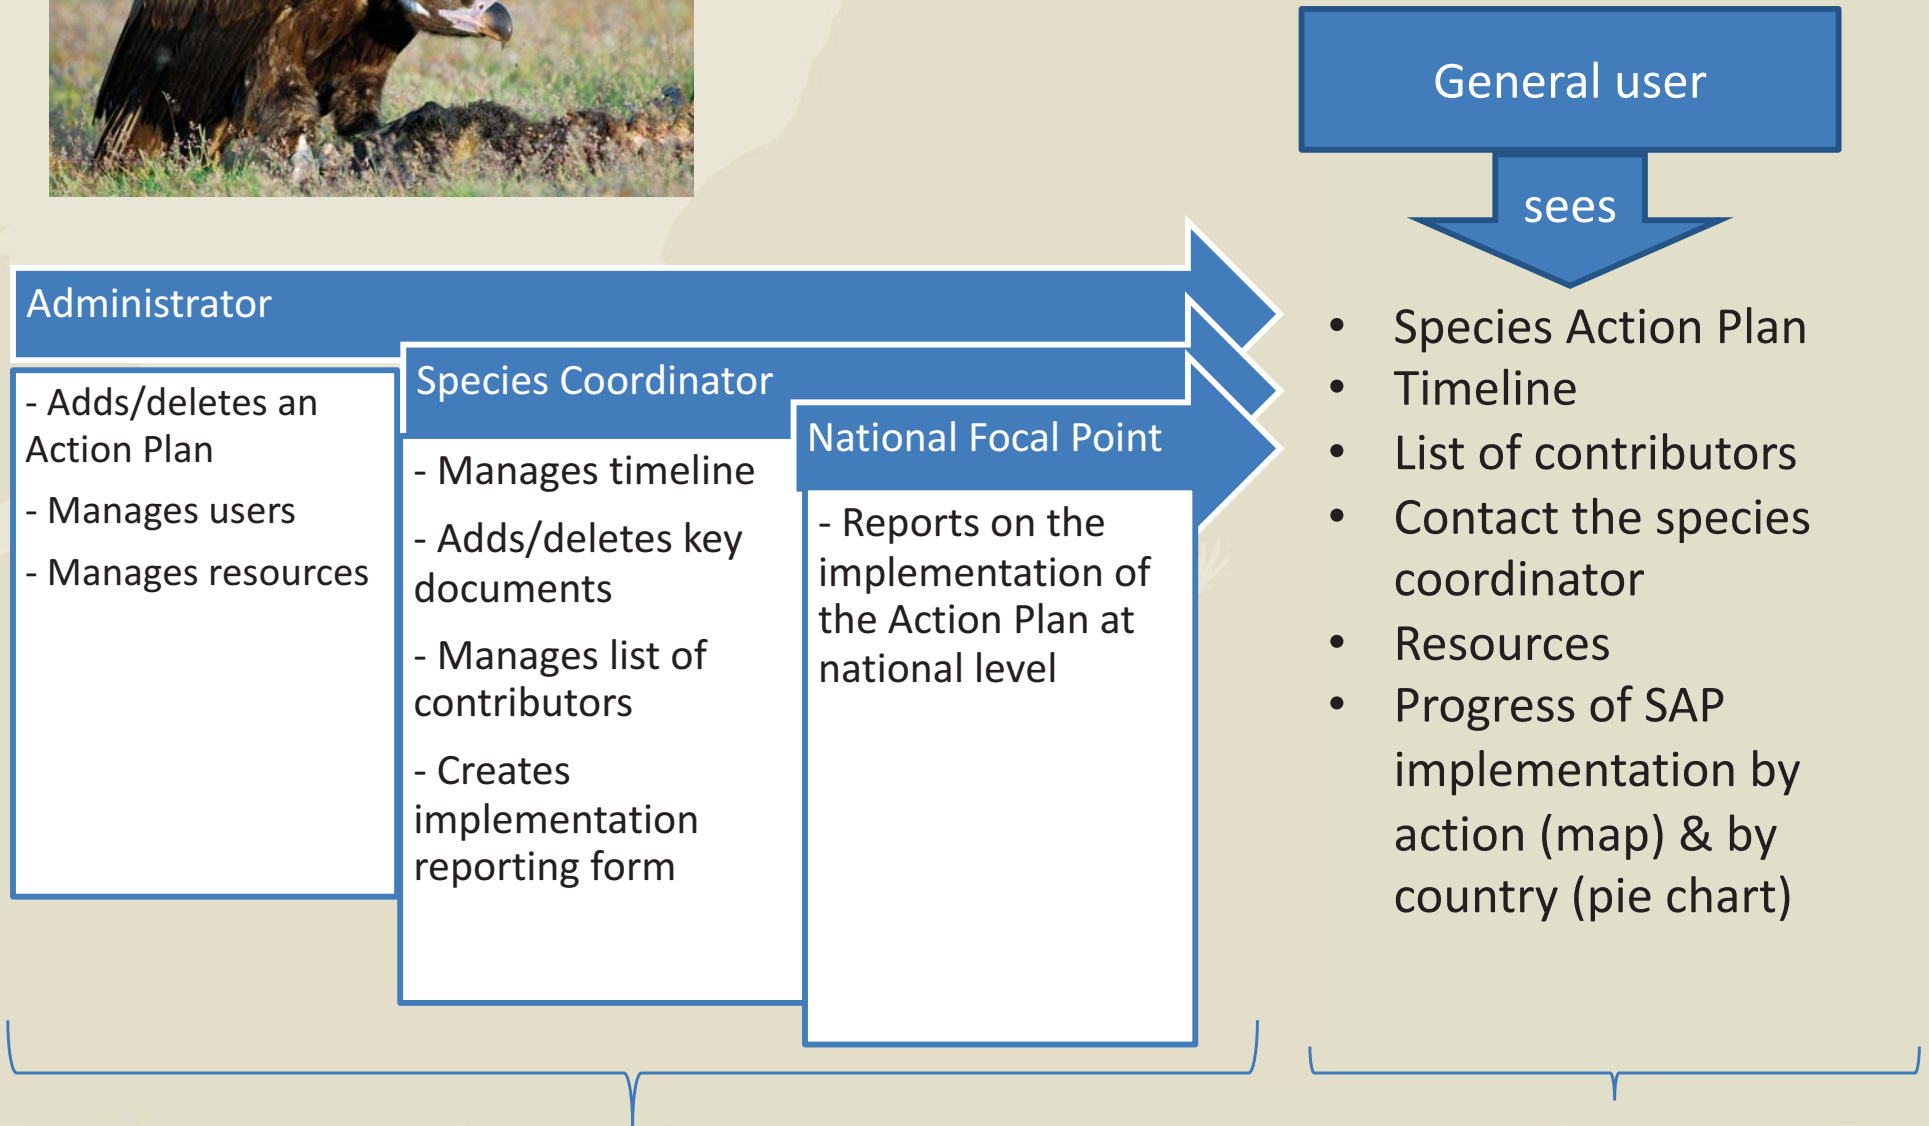

- ❖ Eurasian Oystercatcher, European Lapwing, 'Baltic' Dunlin, Ruff, Common Snipe, Eurasian Curlew, Black-tailed Godwit and Common Redshank

## ➤ **Support and enhance links with similar initiatives, Vulture MsAP!**

# SAP track tool:

Looks complex, it is not!

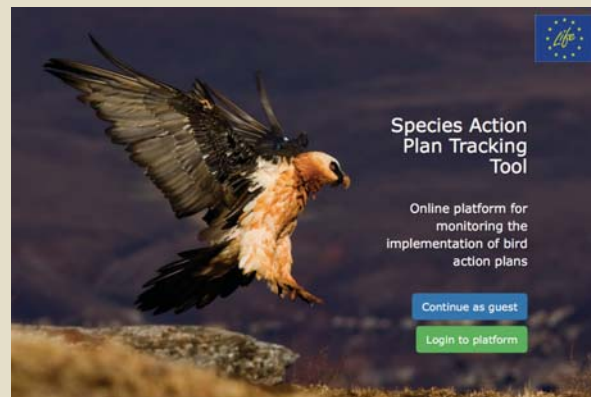

log in required

no log in

# CURRENT STATE OF INFORMATION AVAILABLE

- Currently only LIFE EuroSAP Species Action Plans are uploaded, but any other bird SAP can be added
- 4 of the species profiles/timelines contain false data, which will be deleted after this workshop and replaced by the actual data
- Resource tab: key documents, data sources, conservation project - all these are being updated and contributions are welcomed
- SAP template: currently only AEWA template available
- links to the DataZone species profiles and IBA lists available from each species page

## Species Action Plan Tracking Tool

Online platform for  
monitoring the  
implementation of bird  
action plans

# SPECIES ACTION PLAN TRACKING TOOL

## STEP-BY-STEP GENERAL USER GUIDE

Landing page → Continue as guest

Home page → click on your species and then click on “Go to timeline”

The screenshot shows a web browser window displaying the 'Species Action Plan Tracking Tool'. The browser's address bar shows 'localhost/SAPTT/'. The website header includes navigation links: Home, Resources, FAQ, LIFE EuroSAP, Admin, Logout, and a welcome message for Sofia Capellan. The main title is 'Species Action Plan Tracking Tool' with the subtitle 'Online platform for monitoring the implementation of bird action plans'. The central content area features a large image of a Monteiro's Storm-Petrel on a rock. Below this image, the text reads 'Action Plan under implementation' and 'Monteiro's Storm-Petrel (Hydrobates monteiroi)'. A 'Go to timeline' button is located at the bottom right of this section. To the right of the main image is a grid of smaller species images, each with a label: Monteiro's Storm-Petrel, White-headed Duck, European Turtle-Dove, MSAP for European waders, Yelkouan Shearwater, Velvet Scoter, Cinereous Vulture, Bearded Vulture, and Dalmatian Pelican. The Windows taskbar at the bottom shows the Start button, several application icons, and the system tray with the date and time: 1:42 PM, 9/8/2016.

**Timeline page** → click on “Expand all” to see the different events and documents.

The screenshot shows a web browser window displaying the 'Species Action Plan Tracking Tool'. The page title is 'Species Action Plan Tracking Tool' and the subtitle is 'Online platform for monitoring the implementation of bird action plans'. The main content area features a timeline for the 'Single Species Action Plan for Monteiro's Storm-petrel'. The timeline is a vertical list of events, each with a date and a description. The events are color-coded: green for 'Done', orange for 'Ongoing', and blue for 'Upcoming'. A legend on the right side of the timeline explains the color coding. The 'Expand all' button is circled in red, indicating that it should be clicked to view all events. The background of the page is a photograph of a Monteiro's Storm-petrel.

Single Species Action Plan for Monteiro's Storm-petrel

Timeline

- 31 July 2016: Status report
- 08 September 2016: Workshop
- 30 November 2016: Draft action plan
- 28 February 2017: Species action plan
- 19 August 2027: First reporting
- 19 August 2030: Second reporting
- 19 August 2033: Evaluation/update

Done  
Ongoing  
Upcoming

Start 1:45 PM 9/6/2016

After expanding, you will see the dates and description of the events: **Status report, workshop, draft action plan and species action plan.**

Click on the “book icon” to visualize and/or download the documents in PDF.

The legend shows if the action is “done”, “ongoing” or “upcoming”.

The screenshot displays the Species Action Plan Tracking Tool interface. The browser address bar shows the URL `localhost/SAPTT/sapTimeline/1`. The page title is "Species Action Plan Tracking Tool" and the subtitle is "Online platform for monitoring the implementation of bird action plans". The main content area features a "Single Species Action Plan for Monteiro's Storm-petrel" with a "Timeline" section. The timeline includes the following events:

- 08 September 2016: Workshop** (Done): Technical document that compiles information about the habitat, population numbers and the conservation and legal status of the species. It also identifies the threats, stakeholders and conservation actions needed. It is the basis of the Species Action Plan and the main document to be discussed during the workshop.
- 30 November 2016: Draft action plan** (Done): Document that contains the contributions of the different stakeholders and that it will be the basis for a second consultation.
- 28 February 2017: Species action plan** (Done): Document that provides information about the status, ecology and the threats against species. They describe key actions that are required to improve their conservation status in Europe.
- 19 August 2027: First reporting** (Ongoing): After the adoption of the plan, the reporting on the implementation of the conservation actions will be done every x years, as established in the SAP. National focal points will be appointed for each plan; officials from the relevant authority in the Member State or their role can be delegated to an interested organisation or expert that can provide such expertise externally. The national focal points will be the primary point of contact regarding the development, review and implementation of the plans.
- 19 August 2030: Second reporting** (Upcoming)

A legend on the right side of the timeline indicates the status of the actions: Done (green), Ongoing (orange), and Upcoming (blue). The background of the page shows a close-up of a bird's head.

Implementation phase: after the **adoption of the plan**, the reporting on the implementation of the conservation actions will be done every **x** years, as established in the SAP. **National focal points** will be appointed for each plan and they will report in SAP TT the level of implementation of the priority conservation actions.

The screenshot displays the Species Action Plan Tracking Tool interface. The browser address bar shows the URL `localhost/SAPTT/sapTimeline/1`. The page title is "Species Action Plan Tracking Tool" and the subtitle is "Online platform for monitoring the implementation of bird action plans". The main content area shows a "Single Species Action Plan for Monteiro's Storm-petrel" with a "Timeline" section. The timeline includes the following entries:

- 30 November 2016: Draft action plan** (Done): Two-day meeting that will gather the most relevant stakeholders for the species. Document that contains the contributions of the different stakeholders and that it will be the basis for a second consultation.
- 28 February 2017: Species action plan** (Done): Document that provides information about the status, ecology and the threats against species. They describe key actions that are required to improve their conservation status in Europe.
- 19 August 2027: First reporting** (Ongoing): After the adoption of the plan, the reporting on the implementation of the conservation actions will be done every **x** years, as established in the SAP. National focal points will be appointed for each plan, **omciss** from the relevant authority in the Member State, or their role can be delegated to an interested organisation or expert that can provide such expertise externally. The national focal points will be the primary point of contact regarding the development, review and implementation of the plans.
- 19 August 2030: Second reporting** (Upcoming)
- 19 August 2033: Evaluator/update** (Upcoming)

A red circle highlights the text "omciss" in the "First reporting" entry. A legend on the right side of the timeline indicates the status of each entry: Done (green), Ongoing (orange), and Upcoming (blue). The background of the timeline is a photograph of a bird's head.

The results of the report will be visualized in two ways:

a) **See results by action:** the drop down menu shows the priority conservation actions defined in the SAP and the colours show the progress achieved: **no progress, some progress, significant progress and completed.**

The screenshot displays the 'Species Action Plan Tracking Tool' interface. The browser address bar shows 'localhost/SAPTT/speciesMap/view?idTimeline=5'. The page title is 'Species Action Plan Tracking Tool' and the subtitle is 'Online platform for monitoring the implementation of bird action plans'. The main content area is titled 'Single Species Action Plan for Monteiro's Storm-petrel'. A dropdown menu is open, showing a list of conservation actions: 'A.2 To install artificial nest boxes on Baixo Islet', 'A.1 To obtain up-to-date population estimates', 'A.2 To install artificial nest boxes on Baixo Islet', and 'A.3 To reduce potential impacts of rodents'. A legend at the bottom of the map indicates the progress status: 'No progress' (red), 'Some progress' (orange), 'Significant progress' (blue), and 'Completed' (green). The map shows a green marker over the Iberian Peninsula, indicating the location of the species. The text 'Implementation by conservation action' is circled in red.

## b) See implementation scores by country

The screenshot displays the 'Species Action Plan Tracking Tool' interface. The main header reads 'Species Action Plan Tracking Tool' and 'Online platform for monitoring the implementation of bird action plans'. The page title is 'Single Species Action Plan for Monteiro's Storm-petrel'. A red circle highlights the text 'Implementation scores by country'.

An 'IMPLEMENTATION BY ACTION' modal window is open, showing a table with the following data:

Country	Percentage of the population
Portugal	100

A red circle highlights a 'VIEW CHART' button in the modal window.

Below the modal, a pie chart titled 'Implementation scores in Portugal' shows the distribution of scores for three actions:

- A.1 - 37.50 % (Green)
- A.2 - 50.00 % (Orange)
- A.3 - 12.50 % (Yellow)

The modal window also contains a detailed table of actions:

Code	Action	Priority	Score	Description
A.1	To obtain up-to-date population estimates	High	Significant progress	ssssssssssssssss
A.2	To install artificial nest boxes on Baixo Islet	Medium	Completed	ssssssssssssssssssssssss
A.3	To reduce potential impacts of rodents	Low	No progress	ssssssssssssssssssss

The Windows taskbar at the bottom shows the Start button, taskbar icons, and system tray with the date and time: 8:24 AM, 9/7/2016.

## Top right bar

The screenshot shows a web browser window displaying the 'Species Action Plan Tracking Tool'. The browser's address bar shows 'localhost/SAPTT/sapTimeline/1'. The website's navigation bar includes links for 'Home', 'Resources', 'FAQ', 'LIFE EuroSAP', and 'Login'. The main header features the title 'Species Action Plan Tracking Tool' and a subtitle 'Online platform for monitoring the implementation of bird action plans'. A red circle highlights the top right navigation menu, which contains the links 'Contributors', 'Contact coordinator', and 'About the species'. The main content area displays a 'Single Species Action Plan for Montelro's Storm-petrel' with a 'Timeline' section. The timeline includes the following entries:

- 31 July 2016: Status report** (Done): Technical document that compiles information about the habitat, population numbers and the conservation and legal status of the species. It also identifies the threats, stakeholders and conservation actions needed. It is the basis of the Species Action Plan and the main document to be discussed during the workshop.
- 08 September 2016: Workshop** (Done): Two-day meeting that will gather the most relevant stakeholders for the species.
- 30 November 2016: Draft action plan** (Done): Document that contains the contributions of the different stakeholders and that it will be the basis for a second consultation.
- 28 February 2017: Species action plan** (Done): Document that provides information about the status, ecology and the threats against species. They describe key actions that are required to improve their conservation status in Europe.
- 19 August 2027: First reporting** (Ongoing): After the adoption of the plan, the reporting on the implementation of the conservation actions will be done every x years, as established in the SAP. National focal points will be appointed for each plan; officials from the relevant authority in the Member State or their role can be delegated to an interested organisation or expert that can provide such expertise externally. The national focal points will be the primary point of contact regarding the implementation of the plan.

A legend on the right side of the timeline indicates the status of each entry: Done (green), Ongoing (orange), and Upcoming (blue). The background of the page features a close-up image of a bird's head. The Windows taskbar at the bottom shows the Start button, several application icons, and the system tray with the date '1:51 PM 9/6/2016'.

a) “Contributors” will show you the name of the Species Coordinator and the name of the people that are contributing to the development of the action plan.

The screenshot shows a web browser window displaying the 'Species Action Plan Tracking Tool'. The page title is 'Species Action Plan Tracking Tool' and the subtitle is 'Online platform for monitoring the implementation of bird action plans'. The main content area features a large image of a Monteiro's Storm-petrel. On the left side, there is a navigation menu with the text 'Single Species Action Plan for Monteiro's Storm-petrel' and a button labeled 'Contributors' which is circled in yellow. A modal window is open in the center, titled 'BACK TO TIMELINE', displaying a table of contributors.

Role	Name	Organization	Country
Contributor	Marguerite Tarzia	BL	Australia
Species leader	Nuno Oliveira	Sociedade Portuguesa para o Estudo das Aves	Portugal
Contributor	Ivan Ramirez	BL	Spain
Contributor	Sofia Capellan	BL	Spain
Contributor	KKM	IUI	Afghanistan

At the bottom of the modal window, there is a pagination control showing '1 - 5 of 5 Items'.

b) “Contact coordinator”: general users can use this option to share data, ask questions to the Species Coordinator, etc.

The screenshot displays a web browser window with the URL `localhost/SAPTT/sapTimeline/contactCoordinator?idSep=1`. The page title is "Species Action Plan Tracking Tool" and the subtitle is "Online platform for monitoring the implementation of bird action plans". The navigation menu includes "Home", "Resources", "FAQ", "LIFE EuroSAP", and "Login". The main content area features a background image of a bird on a nest. On the left, the text "Single Species Action Plan for Monteiro's Storm-petrel" is visible, with a blue circle around the link "Contact coordinator". A modal form is centered on the screen, containing the following fields and elements:

- YOUR EMAIL:** A text input field with the placeholder "e.g. myname@example.net".
- SUBJECT:** A text input field.
- YOUR MESSAGE:** A rich text editor with a toolbar including "Format", bold (B), italic (I), underline (U), bulleted list, numbered list, link, unlink, insert link, insert image, and a grid icon.
- BACK TO TIMELINE:** A button in the top right corner of the form.
- SEND MESSAGE:** A button at the bottom of the form.

The Windows taskbar at the bottom shows the Start button, several application icons, and the system tray with the time "2:17 PM" and date "9/6/2016".

c) "About the species": provides a link to the species profile and to the IBA list in Datazone.

email a friend | printable version

**VU** Monteiro's Storm-petrel *Hydrobates monteiroi*

BirdLife is updating this factsheet for the 2016 Red List. Please email us with any relevant information.

**Justification**  
This species is listed as Vulnerable as it has a very small population which is restricted to breeding on just two islets. It is therefore highly susceptible to stochastic events, and remains at risk of mammalian introductions and avian predators.

**Taxonomic source(s)**  
Bolton, M.; Smith, A. L.; Gómez-Díaz, E.; Friesen, V. L.; Medeiros, R.; Bried, J.; Roscales, J. L.; Furness, R. W. 2008. Monteiro's Storm Petrel *Oceanodroma monteiroi*: a new species from the Azores. *Ibis* 150(4): 717-727.

**Taxonomic note**  
*Hydrobates monteiroi* (del Hoyo and Collar 2014) was previously placed in the genus *Oceanodroma*. *Oceanodroma castro* (Sibley and Monroe 1990, 1993) was previously split into *O. castro* and *O. monteiroi* following Bolton *et al.* (2008).

**Synonym(s)**  
*Oceanodroma monteiroi* Bolton, A.L. Smith, E. Gomez-Diaz, V.L. Friesen, R

**Identification**  
*Oceanodroma monteiroi* is a medium-sized, stocky storm-petrel with quite broad wings and square tail. Feet do not project beyond tail in flight. The species has a more prominent diagonal wing bar than that of the Madeiran Storm-petrel *O. castro* (Robb & Mullamley 2008), although such wing markings in storm-petrels vary with age and season.

**Distribution and population**  
*Oceanodroma monteiroi* breeds on two islets off the island of Graciosa in the Azores, **Portugal**. Breeding is suspected on further islets (including some stacks off Flores and Corvo island) in the Azores, but proof is still lacking (Bolton *et al.* 2008, J. Bried *in litt.* 2010). It is thought to remain in the vicinity of the Azores during the non-breeding season, a suggestion which is supported by the analysis of carbon isotopes (Bolton *et al.* 2008). Although unlikely to occur elsewhere, identification amongst Madeiran Storm-petrel *O. castro* is difficult (W. Bourne *in litt.* 2012). The total population size was estimated at 250-300 pairs in 1999 (Bolton *et al.* 2008). Accounts from the 16th and 17th centuries of a small black and white seabird, which appear to match the breeding cycle of this species, indicate that it may have once been far more abundant (Bolton *et al.* 2008), however there are no recent trend data.

**Population justification**  
The population was estimated at 300 pairs in 1999 (Bolton *et al.* 2008). Although this estimate is now a decade old, the population is not thought to have declined since, and may have actually increased, particularly in response to the installation of artificial nest boxes on Praia islet. Thus, the population is best placed in the band 250-999 mature individuals. This equates to 375-1,499 individuals in total, rounded here to 350-1,500 individuals.

**Trend justification**  
Although there is no trend data, the population is suspected to be stable in the absence of any known threats. The population may have even increased since the last known population estimate in 1999 owing to an increase in annual productivity following the installation of nest boxes (Bolton *et al.* 2008, Bried *et al.* 2009).

**Ecology**  
This species breeds during the 'hot season'; females lay eggs between early May (perhaps late April) and early July, incubating a single egg until as late as early August, with the first chicks hatching in early June and the latest chicks fledging in early October (Bolton *et al.* 2008). Its diet is poorly known, but thought to consist of small fish and squid, and it generally feeds on prey of a higher trophic level than *O. castro* (Bolton *et al.* 2008).

**Key facts**

Current IUCN Red List category	Vulnerable
Family	Hydrobatidae (Northern Storm-petrels)
Species name author	Bolton <i>et al.</i> , 2008
Population size	250-999 mature individuals
Population trend	Stable
Distribution size (breeding/resident)	737,000 km <sup>2</sup>
Country endemic?	Yes

## ADDITIONAL INFORMATION

**Resources:** you will find four different sections.

The screenshot displays the Species Action Plan Tracking Tool interface. The browser address bar shows the URL `localhost/SAPTT/sapTimeline/1`. The navigation menu includes links for Home, Home documents, FAQ, LIFE EuroSAP, and Login. A dropdown menu is open, highlighting four sections: Key documents, Data sources, Conservation projects, and Action plan templates. The main content area features a title "Single Species Action Plan for Monteiro's Storm-petrel" and a "Timeline" section. The timeline consists of seven entries, each with a date and a description, color-coded by status: Done (green), Ongoing (orange), and Upcoming (blue). A legend on the right side of the timeline identifies these colors. The background of the page is a photograph of a bird on a rock. The Windows taskbar at the bottom shows the Start button, several application icons, and the system tray with the date and time (2:28 PM 9/6/2016).

## ADDITIONAL INFORMATION

**Key documents:** this section is the repository where you can find the previous action plan (if existing), the status report, the draft action plan and the species action plan.

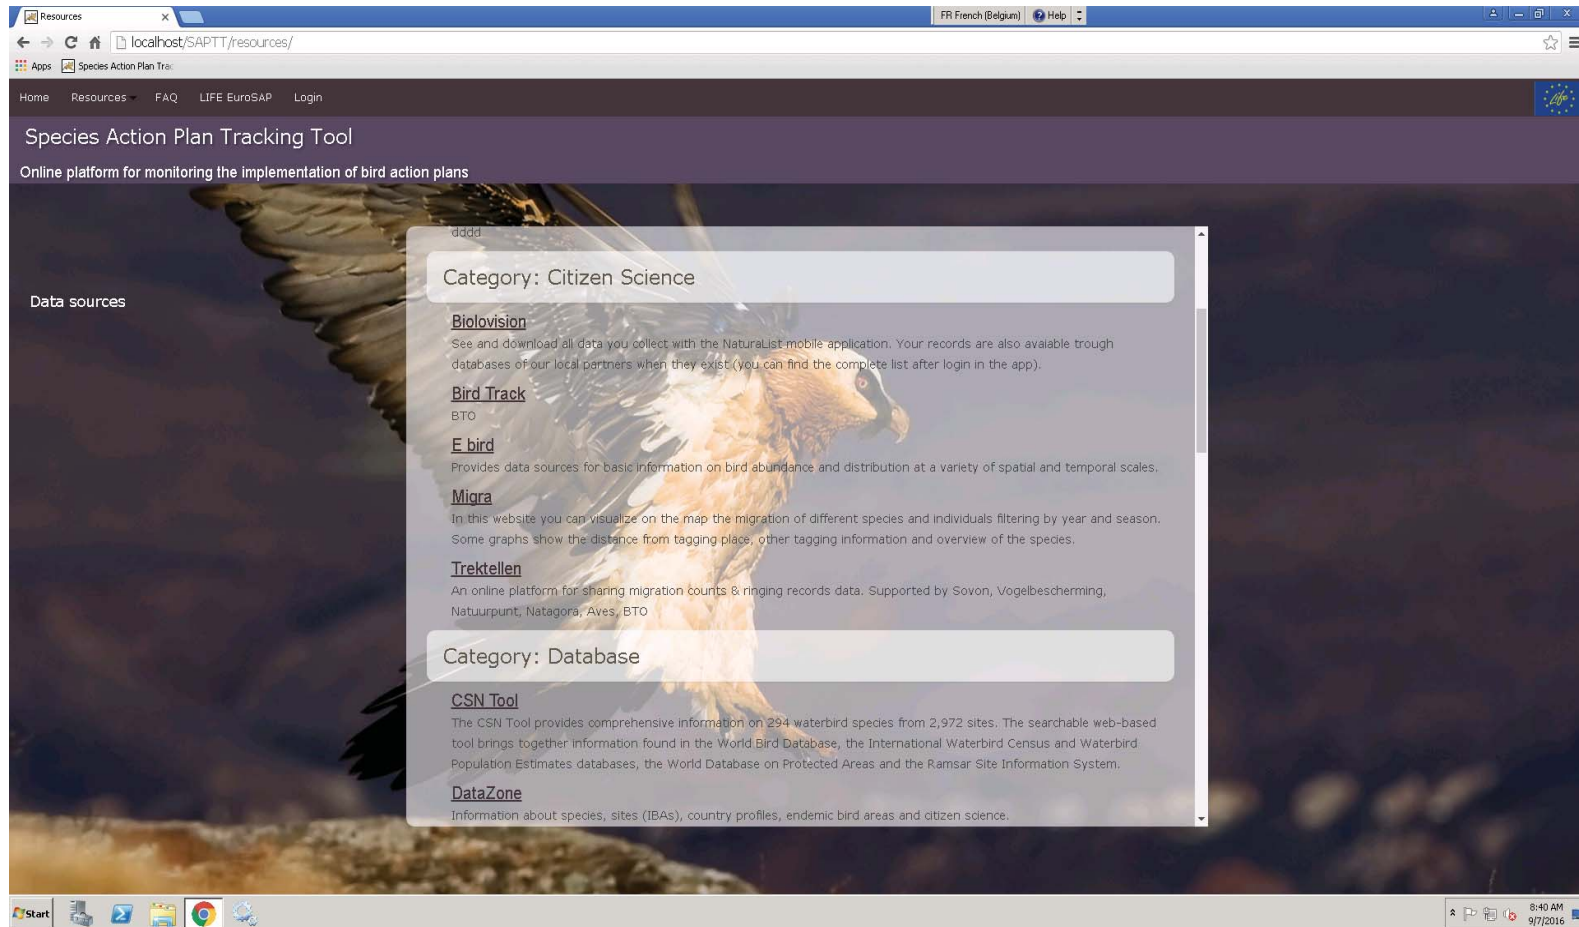

The screenshot shows a web browser window displaying the 'Species Action Plan Tracking Tool' website. The page features a navigation menu with 'Home', 'Resources', 'FAQ', 'LIFE EuroSAP', and 'Login'. The main heading is 'Species Action Plan Tracking Tool' with the subtitle 'Online platform for monitoring the implementation of bird action plans'. A 'Key documents' section is visible on the left. The central content area displays three species-specific action plan entries, each with a title and a list of document types and their publication dates:

- Single Species Action Plan for Monteiro's Storm-petrel**
  - [Status report](#) - Published the 2016-08-31
  - [Draft action plan](#) - Published the 2016-08-31
  - [Species action plan](#) - Published the 2016-08-31
- Single Species Action Plan for Velvet Scoter**
  - [Previous species action plan](#) - Published the 2016-09-02
  - [Status report](#) - Published the 2016-09-02
  - [Draft action plan](#) - Published the 2016-09-02
  - [Species action plan](#) - Published the 2016-09-02
- Single Species Action Plan for Dalmatian Pelican**
  - [Previous species action plan](#) - Published the 2016-08-31
  - [Status report](#) - Published the 2016-08-31
  - [Draft action plan](#) - Published the 2016-08-31
  - [Species action plan](#) - Published the 2016-09-31

The background of the page features a large image of a bird of prey, likely a falcon, perched on a rock. The browser's address bar shows 'localhost/SAPTT/keyDocuments/' and the system tray at the bottom indicates the time is 8:38 AM on 9/7/2016.

## ADDITIONAL INFORMATION

**Data sources:** list of websites, platforms and tools.

The screenshot shows a web browser window displaying the 'Species Action Plan Tracking Tool' website. The page title is 'Species Action Plan Tracking Tool' and the subtitle is 'Online platform for monitoring the implementation of bird action plans'. The website has a navigation menu with 'Home', 'Resources', 'FAQ', 'LIFE EuroSAP', and 'Login'. A sidebar on the left is titled 'Data sources'. A modal window is open, displaying a list of data sources categorized into 'Citizen Science' and 'Database'.

**Category: Citizen Science**

- BioloVision**  
See and download all data you collect with the Naturalist mobile application. Your records are also available through databases of our local partners when they exist (you can find the complete list after login in the app).
- Bird Track**  
BTO
- E\_bird**  
Provides data sources for basic information on bird abundance and distribution at a variety of spatial and temporal scales.
- Migra**  
In this website you can visualize on the map the migration of different species and individuals filtering by year and season. Some graphs show the distance from tagging place, other tagging information and overview of the species.
- Trektellen**  
An online platform for sharing migration counts & ringing records data. Supported by Sovon, Vogelbescherming, Natuurpunt, Natagora, Aves, BTO

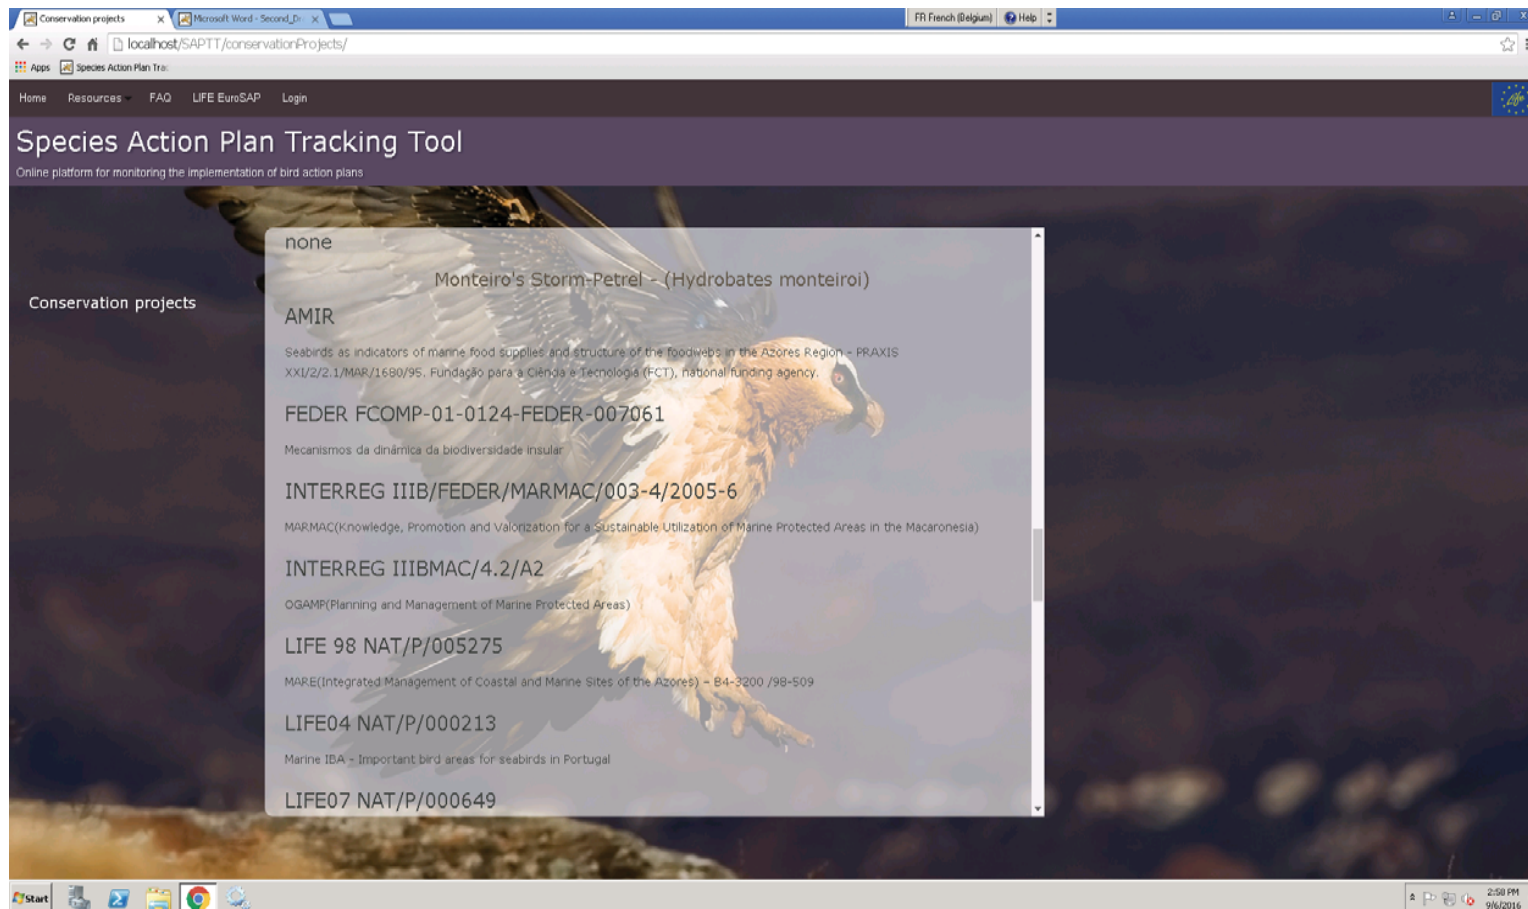

**Category: Database**

- CSN Tool**  
The CSN Tool provides comprehensive information on 294 waterbird species from 2,972 sites. The searchable web-based tool brings together information found in the World Bird Database, the International Waterbird Census and Waterbird Population Estimates databases, the World Database on Protected Areas and the Ramsar Site Information System.
- DataZone**  
Information about species, sites (IBAS), country profiles, endemic bird areas and citizen science.

## ADDITIONAL INFORMATION

**Action Plan Templates** → not available yet, but at the moment there are 2-3 potential templates to be used (BirdLife, AEWA, EC)

**Conservation projects:** list of projects per species.

The screenshot shows a web browser window displaying the 'Species Action Plan Tracking Tool' website. The page title is 'Species Action Plan Tracking Tool' with the subtitle 'Online platform for monitoring the implementation of bird action plans'. The website has a navigation menu with 'Home', 'Resources', 'FAO', 'LIFE EuroSAP', and 'Login'. A sidebar on the left is labeled 'Conservation projects'. The main content area features a large image of a bird in flight, with a semi-transparent overlay box containing the following information:

- none
- Monteiro's Storm-Petrel - (*Hydrobates monteiroi*)
- AMIR
- Seabirds as indicators of marine food supplies and structure of the foodwebs in the Azores Region - PRAXIS XXI/2/2.1/MAR/1690/95. Fundação para a Ciência e Tecnologia (FCT), national funding agency.

Species Action Plan Tracking Tool

Frequently Asked Questions

**What are the species action plans (SAP) and why we need them?** 

Species Action Plans (SAPs) provide information about the status, ecology and the threats against species. They describe key actions that are required to improve their conservation status in Europe.

**What are the Species Management Plans (SMPs)?** 

**What species are targeted by LIFE EURO SAP?** 

**Who is the species coordinator?** 

**What are the objectives of LIFE Euro SAP?** 

**How action plans will be developed under LIFE EuroSAP?** 

**Who are the Species Action Plans written for?** 

**Who is responsible for the implementation of an action plan?** 

**Are species action plans mandatory for Governments?** 

**Who reports about the implementation of the SAPs?** 

**What is the ESCG?** 

**What happens after the SAP is adopted?**

## LIFE Euro SAP website

The screenshot shows a web browser window displaying the LIFE EuroSAP website. The browser's address bar shows the URL [www.birdlife.org/europe-and-central-asia/project/life-eurosap](http://www.birdlife.org/europe-and-central-asia/project/life-eurosap). The website header features a green background with the text "Europe and Central Asia" and a "Home" button with a globe icon. Below the header is a dark navigation bar containing the BirdLife International logo, the tagline "Partnership for nature and people", and a search icon. The main navigation menu includes the following items: WHO WE ARE, WHAT WE DO, WHERE WE WORK, SUPPORT US, and MEDIA. The main content area displays the title "LIFE EuroSAP" in large blue letters above a large image of a bird of prey, likely a Golden Eagle, with its wings spread. At the bottom of the page, there is a cookie consent banner that reads: "Like most websites we use cookies. If you're happy with that, just carry on as normal (close this bar) - otherwise click here to find out more." A "Feedback" button is also visible in the bottom right corner of the page content. The Windows taskbar at the bottom shows the Start button, several application icons, and the system tray with the date and time: 3:02 PM, 9/6/2016.

**Login:** you will be directed to the “Landing page” to access to the editable part of SAP TT.  
Only **Species Coordinators** and in the future **National Focal Points** will be able to use this functionality.

The screenshot shows a web browser window displaying the 'Species Action Plan Tracking Tool'. The browser's address bar shows 'localhost/SAPTT/sapTimeline/1'. The website's navigation menu includes 'Home', 'Resources', 'FAQ', 'LIFE EuroSAP', and 'Login' (which is circled in red). The main header reads 'Species Action Plan Tracking Tool' and 'Online platform for monitoring the implementation of bird action plans'. A secondary navigation bar contains 'Contributors', 'Contact coordinator', and 'About the species'. The main content area features a background image of a bird on a rock. On the left, it says 'Single Species Action Plan for Monteiro's Storm-petrel' and 'Timeline'. A central timeline widget lists several events with color-coded status boxes: '31 July 2016: Status report' (green), '08 September 2016: Workshop' (green), '30 November 2016: Draft: action plan' (green), '26 February 2017: Species action plan' (orange), '19 August 2027: First reporting' (blue), '19 August 2030: Second reporting' (blue), and '19 August 2033: Evaluation/update' (blue). A legend on the right identifies the colors: green for 'Done', orange for 'Ongoing', and blue for 'Upcoming'. The browser's taskbar at the bottom shows the Start button, several application icons, and the system tray with the date '9/6/2016' and time '3:04 PM'.
