

CMS

2025 CMS National Report

Deadline for submission of the National Reports: : 30 September 2025

Reporting period: from May 2023 to February 2025

Parties are encouraged to respond to all questions and are also requested to provide comprehensive answers, when required.

National Report format is available through the CMS Family Online Reporting System (ORS), which has been successfully implemented and used by CMS, AEWA, IOSEA and Sharks MOU in collaboration with UNEP-WCMC.

Through Resolution 12.5 (Rev. COP14) and Decisions 14.27, 14.25 National Reports and 14.2 Samarkand Strategic Plan for Migratory Species, the Standing Committee and the Secretariat were tasked with developing a new format for National Reports that aligns with the SPMS. However, given that the indicators of the SPMS are not yet in place, and due to the time constraints caused by the exceptionally short intersessional period before COP15, there is insufficient time to substantially amend the National Report format to fully align it with the SPMS.

The Standing Committee therefore agreed to develop a new format for the reporting period after COP15, and to use the previous National Report format for the current reporting period, with only minor adjustments. These adjustments would include a limited number of additional questions on topics that COP14 specifically requested to be reported through National Reports.

Additionally, it was agreed not to attach the full list of species in Appendices I and II for verification by Parties, as this information was collected during previous reporting cycles but could not be fully assessed and reflected in the National Reports format due to a lack of resources. Instead, the Standing Committee agreed to collect information on Range States for species listed in the Annex to Resolution 14.19 during this reporting cycle, in accordance with Decision 14.234.

A proposal of the National Reports format was circulated by the Secretariat to the Standing Committee members on 13 December and it was agreed through communication procedure, in line with Rule 5 of the Rules of Procedure.

This online version of the format strictly follows the one adopted by Standing Committee through communication procedure. In addition, as was also the case for reporting prior to COP14, it incorporates pre-filled information, notably in Sections II and III, based on data available at the Secretariat from the previous reporting cycles.

Please note that guidance is available for a number of questions throughout the national report as both in-text guidance and as tool tips (displayed via the information 'i' icon).

For any question, please contact Mr. Aydin Bahramlouian, Public Information Officer, aydin.bahramlouian@un.org

NOTICE: Before clicking on the hyperlinks in this questionnaire, please keep pressing the **Ctrl button** on your keyboard to open the link in a new tab.

RESOURCES FOR THE CMS NATIONAL REPORT FROM OTHER RELEVANT INTERGOVERNMENTAL PROCESSES

Convention/Agreement/Process

Information source

Convention on Biological Diversity (CBD)

National Reports

Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES)

Annual trade reports, Annual illegal trade reports, Implementation reports

Convention on Wetlands of International Importance especially as Waterfowl Habitat

National Reports, Ramsar Information Sheets

Food and Agriculture Organization of the United Nations (FAO)

Country reports

United Nations Convention to Combat Desertification (UNCCD)

National Reports

United Nations Forum on Forests (UNFF)

National Reports

United Nations Framework Convention on Climate Change (UNFCCC)

National Communications, Biennial Reports, Update Reports

Various CMS Family Agreements and Memorandums of Understanding (MOUs)

National Reports

2030 Agenda for Sustainable Development and the Sustainable Development Goals

National Reports

Note: These reporting processes of other relevant intergovernmental frameworks are examples of information resources to be used when filling out this national report, which may assist in identification and strengthening of synergies among these processes. This list is **not** exhaustive. There are many other sources of information that may also be of relevance for migratory species, their habitats and migrations systems.

High-level summary of key messages

In your country, during the reporting period, what does this report reveal about:

Guidance:

This section invites you to summarise the most important positive aspects of CMS implementation in your country and the areas of greatest concern. Please limit this specifically to the current reporting period only.

Your answers should be based on the information contained in the body of the report: the intention is for this section to distil the technical information in the report into “high level” messages for decision-makers and wider audiences.

Please try also to be specific or provide specific examples where you can, e.g. “New wildlife legislation enacted in 2024 doubled penalties for poisoning wild birds” rather than “stronger laws”; “50% shortfall in match-funding for GEF project on gazelles” rather than just “lack of funding”.

The most successful aspects of implementation of the Convention? (List up to five items):

>>> Control and eradication measures for invasive alien species in place

Consolidation of areas appointed as wildlife reserves to protect shorenesting birds.

The establishment of the AEWA european goose management platform has improved transparency, coherence and participation in implementation of international action and management plans

The main priorities for future implementation of the Convention? (List up to five items):

>>> Continuous coordination between the various international conventions and initiatives in the field of nature focus on synergies.

I. Administrative Information

Name of the Party

>>> Denmark

Date of entry into force of the Convention in your country (DDMMYY)

>>> 011183

Report compiler

Name and title

>>> Peter Lyhne Højberg

Full name of institution

>>> Agency for Green Transition and Aquatic Environment, Ministry of Green Transition

Telephone

>>> +4522738104

Email

>>> petlh@sgav.dk

Designated CMS National Focal Point

Name and title of designated Focal Point

>>> Mr. Peter Lyhne Højberg, head of section

Full name of institution

>>> Species and Nature, Agency for Green Transition and Aquatic Environment, Ministry of Green Transition

Mailing address

>>> Lerchesgade 35, 5000 Odense, Denmark

Telephone

>>> +4533958000

Email

>>> mail@sgav.dk

II. Accession/Ratification of CMS Agreements/MOUs

Please confirm the status of your country's participation in the following Agreements/MOUs, and indicate any updates or corrections required:

Yes, the lists are correct and up to date

Country participation in Agreements/MOUs:

Please select only one per line

	Range State, but not a Party/Signatory	Not applicable (= not a Range State)	Party/Signatory
Aquatic Warbler	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
ACAP	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
ACCOBAMS	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
AEWA	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
ASCOBANS	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Atlantic Turtles	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Birds of Prey (Raptors)	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Western African Aquatic Mammals	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

III. Species on the Convention Appendices

III.1 Please confirm that the Excel file “Res. 14.19 species per Party” linked below correctly identifies the **Appendix II** species listed in Resolution 14.19 Guidance on the treatment of species included within aggregated families listed under Appendix II for which your country is a Range State.

The list of Resolution 14.19 species per Parties is available **here**.

Notice: Before clicking on the above hyperlink, please keep pressing the **Ctrl button** on your keyboard to open the link in a new tab.

GUIDANCE TIP:

During the last two reporting cycles, information has been collected on Appendix I and Appendix II species, and the information received still needs to be analyzed. Therefore, this reporting cycle only focuses on bird species identified under Resolution 14.19. This Resolution invites Parties to consider the list of Species in its Annex when preparing National Reports. This question aims at collecting information on Range States of species listed in the Annex to Resolution 14.19. Parties are therefore invited to review the Range State data which are available in the excel spreadsheet “Res. 14.19 species per Party”. Please confirm that the list is correct, or if amendments are needed, create a line for each species for which you wish to indicate different information from that shown in the Excel spreadsheet. Where possible, please also provide supporting evidence, such as a reference to a scientific paper. A more detailed spreadsheet with Data per countries and territories is available here as background information. The data used for these spreadsheets are based on the CMS standard references for non-passerine and passerine species, as determined by Resolution 12.27(Rev.COP14) Taxonomy and Nomenclature, using its online version HBW-BirdLife Version 9.0 (October 2024)..

Yes, the list is correct

You have attached the following documents to this answer.

[Kopi af Section III Appendix II Denmark.xlsx](#) - Amendments to appendix II

IV. Legal Prohibition of the Taking of Appendix I Species

IV.1. Is the taking of Appendix I species prohibited by national or territorial legislation in accordance with CMS Article III(5)?

Yes for all Appendix I species

Please identify any change in the legal statute(s) concerned that has been introduced since the last reporting:

Please provide links and clearly identify the relevant statute(s) by providing the title, date, etc.

>>> Secondary act on species protection

Act on hunting and game management

IV.2 **Exceptions:** Where the taking of Appendix I species **is** prohibited by national legislation, have any exceptions been granted to the prohibition during the reporting period?

No

IV.4. Are any vessels flagged to your country engaged in the intentional taking of Appendix I species outside of your country's national jurisdictional limits (consistent with the definition of "Range State" in Article I of the Convention)?

No

V. Awareness

V.1. Please indicate the actions that have been taken by your country during the reporting period to increase people's awareness of the values of migratory species, their habitats and migration systems (note that answers given in section XVIII may also be relevant).
(select all that apply)

GUIDANCE TIP:

Awareness raising may include actions, steps, programmes, initiatives and/or activities described in various CMS documents, such as Resolution, Res. **11.9 (Rev.COP13)** (World Migratory Bird Day), as well as a number of other resolutions and decisions which include specific provisions about awareness raising, including Resolutions Res. **13.6** (Insect Decline), Res. **14.18** (Avian Influenza), Res. **14.17** (Communities and livelihoods), Res. **14.16** (Ecological Connectivity), Res. **14.15** (Action Plan to address aquatic Wild Meat Harvests), Res. **14.14** (CMS Jaguar Initiative), Res. **14.13** (Initiative for Central Asian Flyway), Res. **14.12** (Single Species Action Plan for the Angelshark (*Squatina squatina*) in the Mediterranean Sea), Res. **14.10** (Single Species Action Plan for the Atlantic Humpback Dolphin (*Sousa teuszii*), Res. **14.8** (Conservation and sustainable management of seagrass ecosystems), Res. **14.5** (Reducing the risk of vessel strikes for marine megafauna), Res. **14.1** (Samarkand Strategic Plan for migratory species 2024 - 2032), Res. **12.6 (Rev.COP14)** (Wildlife health and migratory species), Res. **12.11 (Rev.COP14)** (Flyways), Res. **12.17** (Conservation and Management of Whales and their Habitats in the South Atlantic Region), Res. **12.19 (Rev.COP14)** (Endorsement of the African Elephant Action Plan), Res. **12.20** (Management of Marine Debris), Res. **12.21 (Rev.COP14)** (Climate Change and Migratory Species), Res. **12.25** (Promoting Conservation of Critical Intertidal and Other Coastal Habitats for Migratory Species), Res. **11.16 (Rev.COP14)** (The Prevention of Illegal Killing, Taking and Trade of Migratory Birds), Res. **11.17 (Rev.COP14)** (Action Plan for Migratory Landbirds in the African-Eurasian Region), Res. **11.24 (Rev.COP13)** (Central Asian Mammal Initiative), Res. **11.31 (Rev.COP14)** (Illegal and unsustainable taking of wildlife), Res. **8.12 (Rev.COP12)** (Improving the Conservation Status of Raptors and Owls in the African-Eurasian Region), and Decision 14.194 (Ecological Connectivity), Decision 14.54 (Marine Wildlife Watching) and Decision 14.223 (Impacts of Plastic Pollution on Aquatic, Terrestrial and Avian Species).

No actions taken

VI. Mainstreaming Migratory Species in Other Sectors and Processes

VI.1. Does the conservation of migratory species currently feature in any national or local strategies and/or planning processes in your country relating to development, poverty reduction and/or livelihoods?

No

VI.2. Does your country integrate the 'values of migratory species and their habitats' in any other national reporting processes?

E.g. Agenda 2030, reporting for International Whaling Commission, CBD, EU Nature Directives, etc.

GUIDANCE TIP:

Responses to this question should be focused on the reporting processes of the country rather than on plans and regulations within the country. This question intends to understand if the values of migratory species and habitats are featured in other national reporting that your country participates in, such as reporting to other biodiversity MEAs, the International Whaling Commission, European Commission etc.

No

VI.3. Provide some examples of significant involvements (if any) of non-governmental organizations and/or civil society in the conservation of migratory species in your country.

>>> The Ministry for Green Transition of Denmark cooperates with a number of NGO's involved in nature conservation. It may be the involvement in developing and implementing action plans to raise awareness amongst the members of the NGO's.

VI.4. Provide some examples of significant involvements (if any) of the private sector in the conservation of migratory species in your country.

>>> Several private Foundations, for instance the Danish Nature Fund, the Aage V. Jensen Foundation, Velux Foundation and the Foundation of 15. juni, are involved in acquiring and conserving important habitats for migratory species, or in projects aiming for conservation.

VI.5. Are legislation and regulations in your country concerning Environmental Impact Assessments (EIA) and Strategic Environmental Assessments (SEA) considering the possible impediments to migration, transboundary effects on migratory species, and of impacts on migratory patterns and migratory ranges?

GUIDANCE TIP:

Please refer to Resolution **7.2 (Rev.COP14)** (Impact Assessment and Migratory Species).

Yes

VII. Governance, Policy and Legislative Coherence

(SPMS Target 3: National, regional and international governance arrangements and agreements affecting migratory species and their migration systems have improved significantly, making relevant policy, legislative and implementation processes more coherent, accountable, transparent, participatory, equitable and inclusive.)

VII.1. Have any governance arrangements and agreements affecting migratory species and their migration systems in your country, or in which your country participates, resulted in improvements during the reporting period?

GUIDANCE TIP:

This question is intended to understand improvements in governance arrangements in your country, which may potentially include improvements in policy, legislation, governance processes, plans etc. Please also consider the guidance below in VII.2.

No, because existing arrangements are considered to be sufficient

VII.2. Has any committee or other arrangement for liaison between different government agencies/ministries, sectors or groups been established at a national and/or subnational level in your country that addresses CMS implementation issues?

GUIDANCE TIP:

There is no fixed model for what these arrangements may involve, and it is for each Contracting Party to decide what best suits its own circumstances. Examples could include a steering group that includes representatives of territorial administration authorities, a coordination committee that involves the lead government department (e.g. environment) working with other departments (e.g. agriculture, industry); a forum that brings together government and NGOs; a liaison group that links with business and private sector interests; a stakeholder forum involving representatives of indigenous and local communities; a coordination team that brings together the National Focal Points for each of the biodiversity-related MEAs to which the country is a Party (see also question VII.3); or any other appropriate mechanism.

These mechanisms may be specifically focused on migratory species issues, or they may address CMS implementation in conjunction with related processes such as NBSAP coordination, a National Ramsar Committee, etc.

The Manual for National Focal Points for CMS and its Instruments may be helpful in giving further context.

No

VII.3. Does collaboration between the focal points of CMS and other relevant global or regional Conventions take place in your country to develop the coordinated and synergistic approaches described in paragraphs 29, 30 and 32 of **Res. 11.10 (Rev.COP14)** (Synergies and partnerships) and in paragraph 7 of **Res. 14.3** (Engagement in CBD processes including the Global Biodiversity Framework) ?

GUIDANCE TIP:

Relevant Conventions may include other global agreements such as biodiversity-related Conventions and Agreements, UNFCCC, UNCCD, as well as regional agreements, including CMS Agreements. Such collaboration may also be relevant to aligning efforts related to the Kunming-Montreal Global Biodiversity Framework, the 2030 Agenda for Sustainable Development, the United Nations Decade on Ecosystem Restoration 2021-2030, and NBSAPs as described in **Dec. 14.6** (CMS Engagement in CBD Processes Including Global Biodiversity Framework) and **Res. 8.18 (Rev.COP12)** (Integration of Migratory Species into NBSAPs and into On-going and Future Programmes of Work under CBD).

Guidance documents for integrating considerations relevant to Migratory Species in NBSAPs are available at CMS website.

No

VII.4. Has your country or any jurisdictional subdivision within your country adopted legislation, policies, initiatives or action plans during the reporting period that promote community involvement in conservation of CMS-listed species?

No

VIII. Incentives

VIII.1. Has there been any elimination, phasing out or reforming of harmful incentives in your country during the reporting period resulting in benefits for migratory species?

No, because no such incentives have existed

VIII.2. Has there been development and/or application of positive incentives in your country during the reporting period, resulting in benefits for migratory species?

Yes

Please indicate what measures were implemented and the time-periods concerned.

>>> There are a number of subsidies for conservation vulnerable habitats or restoring habitats ex. untouched forest, biodiversity forest support, contiguous areas in Natura2000. The schemes are undergoing continuous evaluation and improvement. The subsidies are not specifically targeted at migratory species, but the migratory species will benefit from them.

IX. Sustainable Production and Consumption

IX.1. During the reporting period, has your country implemented plans or taken other steps concerning sustainable production and consumption which are relevant for conservation of migratory species?

No

X. Threats and Pressures Affecting Migratory Species; Including Obstacles to Migration

Which of the following pressures on migratory species or their habitats are having an adverse impact in your country on migratory species included in the CMS Appendices?

Guidance: This question asks you to identify the important pressures that are reliably known to be having an actual adverse impact on CMS-listed migratory species at present. Please avoid including speculative information about pressures that may be of some potential concern but whose impacts have not yet been demonstrated.

Please note that, consistent with the terms of the Convention, “in your country” may in certain circumstances include areas outside national jurisdictional limits where the activities of any vessels flagged to your country are involved.

Intentional Taking

GUIDANCE TIP:

Please note that as per Article 1(i) of the Convention, “Taking” means taking, hunting, fishing, capturing, harassing, deliberate killing, or attempting to engage in such conduct.

	Species/species groups affected (please provide names and indicate whether Appendix I and/or Appendix II); and any other details	Overall relative severity of impact 1 = severe 2 = moderate 3 = low
Legal hunting		
Illegal hunting		
Other harvesting and take		
Illegal trade		
Deliberate poisoning		

Unintentional Taking

	Overall relative severity of impact 1 = severe 2 = moderate 3 = low	Species/species groups affected (please provide names and indicate whether Appendix I and/or Appendix II); and any other details
Bycatch		
Catch in Abandoned, Lost or otherwise Discarded Fishing Gear (ALDFG)		
Other forms of unintentional taking	2	Appendix II: Halichoerus grypus, Lagenorhynchus albigro, Phocoena phocoena

Collisions and electrocution

	Species/species groups affected (please provide names and indicate whether Appendix I and/or Appendix II); and any other details	Overall relative severity of impact 1 = severe 2 = moderate 3 = low
Wind turbines	Bats (Appendix II)	2
Other collisions		
Electrocution		
Vessel strikes		

Pollution

	Species/species groups affected (provide names and indicate whether Appendix I and/or Appendix II); and any other details	Overall relative severity of impact 1 = severe 2 = moderate 3 = low
Marine debris (including plastics)		
Light pollution	Phocoena phocoena	3
Underwater noise		
Other pollution		
Fish aggregating devices (FADs)		

What are the most significant advances that have been made since the previous report in addressing pollution?

>>> New mitigation guidelines for underwater noise in relation to the construction of offshore wind in Danish waters: (https://ens.dk/sites/ens.dk/files/Vindmoller_hav/energistyrelsens_guidelines_for_underwater_noise_-_installation_of_impact_or_vibratory_driving_piles_2023.pdf)

During the reporting period, has your country adopted new legislation or other domestic measures in response to CMS Article III(4) (b) specifically addressing obstacles to migration?

CMS Article III(4)(b) states 'Parties that are Range States of a migratory species listed in Appendix I shall endeavor...to prevent, remove, compensate for or minimize, as appropriate, the adverse effects of activities or obstacles that seriously impede or prevent the migration of the species.'

GUIDANCE TIP:

This question is intended to specifically report on any new legislation or domestic measures **addressing obstacles to migration**. Relevant information would not include general conservation measures.

No

XI. Conservation Status of Migratory Species

XI.1. What (if any) major changes in the conservation status of migratory species included in the CMS Appendices (e.g. national Red List category changes) have been recorded in your country during the reporting period?

“Conservation status” of migratory species is defined in Article I(1)(b) of the Convention as “the sum of the influences acting on the migratory species that may affect its long-term distribution and abundance”; and four conditions for conservation status to be taken as “favourable” are set out in Article I(1)(c).

If more rows are required, please upload an Excel file detailing a longer list of species.

GUIDANCE TIP:

The emphasis of this question is on “major changes” during the reporting period. Information is expected to be provided here only where particularly notable shifts in status have occurred, such as those that might be represented by a re-categorisation of national Red List threat status for a given species (or subspecies, where relevant). Please record if any CMS listed species has become extinct or extirpated from your country - or reintroduced/re-established/established - during the reporting period (or before if not previously reported to CMS).

Please note also that you are only being asked about the situation in your country. Information about global trends, and global Red List reclassifications etc, will be communicated to the CMS via other channels outside the national reporting process.

Bats

	Change in status (including time period concerned)	Comments	Source reference	Species/subspecies (indicate CMS Appendix where applicable)
	Atlantic and Continental zone change from favourable to unfavourable conservation status. Change from 2019 - 2025		Danish article 17 reporting to EU	Myotis dasycneme
	Atlantic zone change from moderate unfavourable to favourable conservation status- Change from 2019 - 2025.		Danish article 17 reporting to EU	Pipistrellus pygmaeus
	Atlantic and Continental zone change from favourable to moderate unfavourable conservation status. From reporting period 2019 - 2025.		Danish article 17 reporting to EU	Myotis daubentonii
	Atlantic zone change from moderate unfavourable conservation status to favourable conservation status. Change from 2019 - 2025.		Danish article 17 reporting to EU	Pipistrellus pipistrellus

XII. Cooperating to Conserve Migration Systems

XII.1 During the reporting period, has your country initiated or participated in the development of any proposals for new CMS Agreements, including Memoranda of Understanding, to address the needs of Appendix II species?

E.g. Developments following the advice in Resolutions **12.8** and **13.7**.

No

XII.2. During the reporting period, have actions been taken by your country to encourage non-Parties to join CMS and its related Agreements?

No

XII.3. During the reporting period, has your country participated in the implementation of Concerted Actions under CMS (as detailed in Resolution **12.28 (Rev.COP14)**) to address the needs of relevant migratory species?

Yes

Please describe the results of these actions achieved so far:

GUIDANCE TIP:

If any progress report on implementation of Concerted Actions has been submitted to the COP and/or the Scientific Council in the period under consideration, Parties can refer to that report rather than restating the same information in replying to this question (please indicate the document number)

>>> Denmark is e.g. participating in the implementation of the international single species action plan for taiga bean goose that is coordinated and implemented between range states

XII.4. Have any other steps been taken which have contributed to enhancing cooperation on the conservation of migratory species in ways that fully reflect a migration systems approach?

E.g. steps implementing Resolutions **12.11 (Rev.COP14)** (Flyways) and Res. **12.17** (South Atlantic Whales), and Decisions 14.130 (Action Plan for Migratory Landbirds), 14.137 (Flyways), and 14.207 (Renewable Energy and Migratory Species).

Yes

Please provide details:

>>> East Atlantic flyway - Wadden Sea flyway Initiative - The aim of the initiative is to strengthen cooperation on conservation, management and research activities between the three Wadden Sea states and other countries along the East Atlantic Flyway which play a significant role in conserving migratory waterbirds along this flyway.

XIII. Area-Based Conservation Measures

XIII.1. Have critical habitats and sites for migratory species been identified (e.g. by an inventory) in your country?

GUIDANCE TIP:

The CMS does not have a formal definition of what constitutes a “critical” site or habitat for migratory species. It is left to report compilers to work with any interpretations which may be in existing use at national level, or to use informed expert judgement.

Helpful reflections on the issue can be found in the Resolution **Res. 14.16** (Ecological Connectivity) and in “**Strategic Review of Aspects of Ecological Networks relating to Migratory Species**” presented to COP11 and the “**Critical Site Network Tool**” developed under the auspices of AEWA and the Ramsar Convention. For sharks and rays please refer to <https://sharkrayareas.org>. For marine mammals, please refer to <https://www.marinemammalhabitat.org/imma-eatlas/>.

Yes, fully

XIII.2. Has any assessment been made of the contribution made by the country’s protected areas network specifically to migratory species conservation?

Yes

Please provide details:

GUIDANCE TIP:

The “contribution” may relate to habitat types, and/or geographical coverage/distribution factors, and/or coverage of particular priority species or species groups, and/or factors concerning functional connectivity, and/or any other factor considered relevant to the conservation of migratory species.

The “contribution” may relate to the use of the identified **Important Marine Mammal Areas (IMMAs)** (www.marinemammalhabitat.org) and support to identification of new **Important Shark and Ray areas (ISRAs)** (<https://sharkrayareas.org>).

Regarding Birds of Prey, the “contribution” may relate to the Internationally Important Raptors Sites (relevant to the range of the Raptors MOU, as sites listed in table 3 of Annex 3 of the Raptors MOU).

(If you have information on assessments of management effectiveness, please do not include that here, but provide it instead in your response to question XIII.4).

>>> The importance of the SPA's for species conservation is assessed when reporting on the Natura 2000 network to the EU commission

XIII.3. Has your country adopted any new legislation or other domestic measures in the reporting period in response to CMS Article III(4) (a) (“Parties that are Range States of a migratory species listed in Appendix I shall endeavor ... to conserve and, where feasible and appropriate, restore those habitats of the species which are of importance in removing the species from danger of extinction”)?

Yes

Please give the title or other reference (and date) for the measure concerned:

>>> Secondary act on designation and administration of international protected areas and protection of some species

<https://www.retsinformation.dk/Forms/R0710.aspx?id=205996>

XIII.4. In respect of protected areas in your country that are important for migratory species, have any assessments of management effectiveness been undertaken in the reporting period?

In development

XIII.5. Beyond Protected Areas, are other effective area-based conservation measures implemented in your country in ways which benefit migratory species?

Yes

Please provide details:

>>> Any larger projects or constructions have to be assessed according to an environmental impact assessment. Only if it can be documented that the project will have no major negative effects on SPA's, species for which SPA's are designated or protected species according to the EU Habitats or Birds Directive the project is approved.

XIV. Ecosystem Services

XIV.1. Has any assessment of ecosystem services associated with migratory species been undertaken in your country since the last reporting?

GUIDANCE TIP:

The phrase “associated with” migratory species allows you to report on any assessments that cover ecosystem services of systems, habitats or species assemblages that include migratory species. The question is therefore not expecting you to limit this to assessments focused solely on one or more migratory species.

For a broader biodiversity assessment to be relevant here, the migratory species involved must be making some identifiable contribution to the ecosystem services concerned.

No

XV. Safeguarding Genetic Diversity

XV.1. Are strategies of relevance to migratory species being developed or implemented to minimize genetic erosion of biodiversity in your country?

GUIDANCE TIP:

Strategies to be considered under this section do not necessarily have to specifically address migratory species but be of sufficient relevance in relation to the objective of safeguarding the genetic diversity of wild populations.

No

XVI. National Biodiversity Strategies and Action Plans

XVI.1. Does your country's National Biodiversity Strategy or Action Plan (NBSAP), or other relevant plans or strategies used in your country, explicitly address obligations under CMS, priorities for the conservation and management of migratory species, their habitats and migration systems, and ecological connectivity?

No

XVII. Traditional Knowledge, Innovations and Practices of Indigenous and Local Communities

In the absence of a national definition of 'indigenous and local communities', please refer to the Convention on Biological Diversity document **Compilation of Views Received on Use of the Term "Indigenous Peoples and Local Communities"** for helpful guidance on these terms.

XVII.1. During the reporting period, have actions been taken in your country to foster consideration for the traditional knowledge, innovations and practices of indigenous and local communities that are relevant for the conservation and sustainable use of migratory species, their habitats and migration systems?

Not applicable

XVII.2. During the reporting period, have actions been taken in your country to promote and foster effective participation and involvement of indigenous and local communities in the conservation and sustainable use of migratory species, their habitats and migration systems?

Not applicable

XVII.3. How would you rank progress since the previous report in your country in the area of traditional knowledge innovations and practices of indigenous and local communities relevant for the conservation and sustainable use of migratory species?

4. Target substantially achieved (traditional knowledge is fully respected and there is effective participation from communities)

XVIII. Knowledge, Data and Capacity-Building

XVIII.1 During the reporting period, which steps taken in your country have contributed to the achievement of the results defined in the area of knowledge, data and capacity building? (Answers given in Section V may be relevant)

(select all that apply)

- Public awareness campaigns
- Capacity building
- Knowledge and data-sharing initiatives

XIX. Resource Mobilization

XIX.1 During the reporting period, has your country made financial or other resources available for conservation activities specifically benefiting migratory species?

GUIDANCE TIP:

The “resources” that are relevant here can be financial, human or technical. In addition to funding, “in-kind” forms of support such as staff time or administrative infrastructure could be relevant, as could the loan of equipment, provision of data processing facilities, technology transfer, training or mentoring schemes and other initiatives for capacity building.

Yes, made available for activities in one or more other countries

Please indicate whether the overall levels of resourcing concerned are the same or different from those in the previous reporting period:

The same

XIX.2. During the reporting period, has your country received financial or other resources for conservation activities specifically benefiting migratory species?

No
