#	Question
<b>Section 1: basic information</b>	
1	Have you been closely involved with any raptor reintroduction or reinforcement programme?
2	If yes, pick a programme. What species was/were involved?
3	Was this a reintroduction or reinforcement programme? Or other similar?
4	What was the name of the programme?
5	What was the exact aim of the programme?
6	During what years was the programme in operation?
7	Why did the programme end? (was this programmed or could it not continue due to some external factor, e.g.)
<b>Section 2: the method using</b>	
8	What was the reintroduction/reinforcement methodology used in the project?
9	Why was that methodology opted for?
10	Did that methodology lead to any particular challenges?
11	What was the origin of the animals used in the programme?
<b>Section 3: stakeholders</b>	
12	What countries/agencies/communities were involved in the programme? In what way?
13	What roles did they play?
<b>Section 4: funding</b>	
14	What was the cost of the programme?
15	Who funded the programme?
16	Did any activities continue to take place after the programme came to a close? E.g., monitoring, awareness...

<b>Section 5: outcomes and review</b>	
17	What is the general perception on the success of the programme: was it seen as <b>successful or not</b> ?
18	<b>Why</b> was it seen that way?
19	What were <b>key factors in the success or failure</b> ?
20	What were the main <b>challenges</b> of the programme?
21	<b>How</b> were those challenges <b>addressed</b> ?
22	Were there any spillover/unanticipated <b>side-effects</b> (good or bad)?
23	What are some <b>main lessons</b> learnt that other projects should account for?
24	Are you aware of any national or international <b>regulations</b> or best-practice manuals governing or relevant to raptor reintroduction/reinforcement work?
