

**CRP 6.3.1.2  
In-Session Version**

**CONSERVATION AND MANAGEMENT OF THE CHEETAH (*ACINONYX JUBATUS*) AND  
AFRICAN WILD DOG (*LYCAON PICTUS*)**

**UNEP/ScC-SC5/Doc.6.3.1.2**

During the discussion of document UNEP/CMS/ScC-SC5/Doc.6.3.1.2 on the Conservation and Management of the Cheetah (*Acinonyx jubatus*) and African Wild Dog (*Lycaon pictus*), the Terrestrial Working Group concluded that an intersessional Working Group be established.

This intersessional Working Group is mandated to review the conservation status of Cheetah populations of Botswana, Namibia and Zimbabwe and their potential inclusion in Appendix I of CMS and to report to the Sessional Committee at its 6th meeting on its findings and to inform a decision at COP14.

The intersessional Working Group should consist of representatives of the Range States concerned, as well as African regional representatives of the Sessional Committee, experts from the IUCN SSC Cat Specialist Group, and any other experts invited by the Secretariat.
