

2017 - NATIONAL REPORT OF PARTIES ON THE IMPLEMENTATION OF THE CONVENTION ON THE CONSERVATION OF MIGRATORY SPECIES OF WILD ANIMALS [Party: A

2019 - NATIONAL REPORT OF PARTIES ON THE IMPLEMENTATION OF THE CONVENTION ON THE CONSERVATION OF MIGRATORY SPECIES OF WILD ANIMALS [Party: A

2019 - NATIONAL REPORT OF PARTIES ON THE IMPLEMENTATION OF THE CONVENTION ON THE CONSERVATION OF MIGRATORY SPECIES OF WILD ANIMALS [Party: A

2019 - NATIONAL REPORT OF PARTIES ON THE IMPLEMENTATION OF THE CONVENTION ON THE CONSERVATION OF MIGRATORY SPECIES OF WILD ANIMALS

The deadline for submission of the reports is 17 August 2019. The reporting period is from April 2017 to August 2019.

Parties are encouraged to respond to all questions. Parties are also requested to provide comprehensive answers, including, where appropriate, a summary of activities, information on factors limiting action and details of any assistance required.

The reporting format was agreed by the Standing Committee at its 40th Meeting (Bonn, November 2012) for mandatory use by Parties, for reports submitted to the Eleventh Meeting of the Conference of the Parties (COP11). The 45th meeting of the Standing Committee recommended the use of the same format for reports submitted to COP12, with necessary adjustments to take into account relevant COP11 decisions, in particular amendments to the Appendices and resolutions.

COP Resolution 9.4 adopted at Rome called upon the Secretariats and Parties of CMS Agreements to collaborate in the implementation and harmonization of online reporting implementation. The CMS Family Online Reporting System (ORS) has been successfully implemented and used by AEWA in their last Meeting of the Parties (MOP 5, 2012) reporting cycle. CMS now offers the Convention's Parties to use the ORS for submitting their national reports for the COP11 (2014) reporting cycle.

Implementation

Competent Authority:

› Directorate of Development Programmes on Environment
General Directorate of Environmental Policies and Programmes
Ministry of Tourism and Environment

Relevant implemented legislation:

- Law no. 9587, dated 20. 7.2006 “On biodiversity protection”, being amended in 2014;
- Law no. 10006, dated 23.10.2008 “On the protection of wild fauna”;
- Law no.10253, dated 11.4.2010 “On hunting”;
- Law no. 81, dated 6.5.2017 "On protected areas", amended in 2008;
- Law no. 9867, dated 31.1.2008 "On the rules and procedures of international trade of endangered species of wild flora and fauna"
- Law No. 46/2019 “for protection and conservation of wild fauna” some ammendments on the Law No. 10 006/23.10.2008,

and several by-legal acts

Other relevant Conventions/ Agreements (apart from CMS) to which your country is a Party:

- Convention on Biological Diversity (CBD)
- Bern Convention on European Wildlife and Natural Habitats
- Ramsar Convention on Wetlands
- Barcelona Convention on the protection of Mediterranean Sea
- CITES – Convention on International Trade of Endangered Species of Wild Fauna and Flora

National policy instruments (e.g. national biodiversity conservation strategy, etc.):

› NBSAP approved in 2000 - currently being revised and updated

Involvement of other government departments/NGOs/private sector

1. Which other government departments are involved in activities/initiatives for the conservation of migratory species in your country? (Please list.)

› National Environment Agency,

2. If more than one government department is involved, describe the interaction/relationship between these government departments:

N/A

3. Has a national liaison system or committee been established in your country?

No

4. List the main non-governmental organizations actively involved in activities/initiatives for the conservation of migratory species in your country, and describe their involvement:

AOS-Albanian Ornithological Society, main NGO dealing with the conservation of Birds and their critical habitats in Albania

PPNEA – Association for the protection and preservation of the natural environment, engaged in species protection in general

APAWA – Association for the Protection of Aquatic Species, dealing mainly with aquatic species

INCA – Institute for Nature Conservation in Albania

4a. Please provide detail on any devolved government/overseas territory authorities involved.

› N/A

5. Describe any involvement of the private sector in the conservation of migratory species in your country:

› This kind of activity is in its early stages of development. So far, to be mentioned are a couple of private investments that have started in the last couple of years. Cooperation with fishermen on the conservation of sea turtles has been established in Durresi, Vlora, Patok, Shengjini and Saranda.

6. Note any interactions between these sectors in the conservation of migratory species in your country:

› The interactions consist mainly in the promotion and development of a new legal framework that encourages such incentives and the public awareness rising on these issues. Fishermen report on any sea turtle individuals in the bycatch and safely release of the specimens after. They keep contacts with Regional Offices of the Protected Areas and the rescue centers for sea turtles established in Patok (Drini bay) and Radhima (Vlora bay).

I(b). Information about involved Authorities

Identify the ministry, agency/department or organization that is responsible for leading actions relating to

Appendix I species

1- Birds

› Ministry of the Environment in cooperation with AOS-Albanian Ornithological Society and the National Centre for Flora and Fauna Research at the Faculty of Natural Sciences of University of Tirana

2- Aquatic Mammals

› Ministry of the Environment in cooperation with the National Centre for Flora and Fauna Research and the Department of Biology at the Faculty of Natural Sciences of University of Tirana

3- Reptiles

› Ministry of the Environment in cooperation with the National Centre for Flora and Fauna Research

4- Terrestrial Mammals

› Ministry of the Environment in cooperation with the Department of Biology at the Faculty of Natural Sciences of University of Tirana and PPNEA

5- Fish

› Fisheries Directorate at the Ministry of Agriculture, Rural Development and Water Administration

II. Appendix I species

1. BIRDS

1.1 General questions on Appendix I bird species

1. Is the taking of all Appendix I bird species prohibited by the national implementing legislation cited in

Table I(a) (General Information)?

Yes

If other legislation is relevant, please provide details:

› Order No. 1280 of the Minister of Environment, dated 20.11.2013 “On the approval of red list of wild flora and fauna”.

Decision of Council of Ministers No. 546, dated 07.07.2010 “On the approval of the list of fauna species part of the hunting bag”

1a. If the taking of Appendix I bird species is prohibited by law, have any exceptions been granted to the prohibition?

Yes

If Yes, please provide details (Include the date on which the exception was notified to the CMS Secretariat pursuant to CMS Article III(7):

› Yes, just for research purposes only.

2. Identify any obstacles to migration that exist in relation to Appendix I bird species:

Habitat destruction

Pollution

Other (poisoning)

› Illegal hunting activities and related disturbance

› Direct and indirect poisoning of wildlife

› Bird trapping and trafficking

› Human disturbance

2a. What actions are being undertaken to overcome these obstacles?

› In the reporting period actions undertaken to minimize the effect of habitat destruction and illegal hunting consist on the:

➤ Measures taken to reduce the level of pollution, especially in the coastal areas of the country which serve as the main habitat for migratory species and some efforts on the restoration of most important coastal wetlands as well as reforestation.

➤ A hunting ban for another 5 years (until 2021) was approved by the Parliament in an effort to recover wild fauna species populations

➤ An anti-poisoning roadmap has been drafted and currently under discussion

➤ The law on fauna was amended in July 2019 to include provisions against wildlife poisoning

➤ Better wardening systems in Protected Areas

➤ Awareness activities undertaken by NGOs for the protection of migratory birds including conservation activities (for White Storks, Egyptian Vulture, Events organized for World Migratory Bird Days, Wetlands Day, Flight for Survival Campaign, etc.

2b. Please report on the progress / success of the actions taken.

- The hunting ban has reduced poaching pressure from foreign hunters. Small migratory birds are the first to profit from hunting ban.
- The hunting ban has helped in unifying institutions reaction against poaching in protected areas.
- An anti-poisoning campaign has started and it is expected to expand further.
- Awareness on wildlife poisoning is increasing.
- Awareness for the protection of migratory birds is increasing.
- Better protection of Appendix I species

Other progress has been achieved in the four Ramsar sites of Shkodra Lake and Velipoja wetland complex, Narta Lagoon, Butrinti wetland complex and Prespa Lake area.

2c. What assistance, if any, does your country require in order to overcome these obstacles?

- Better protection of coastal wetlands especially for habitat restoration and pollution prevention and control.
- Sustainable livelihood models and experiences
- Capacity strengthening in general
- Capacity strengthening against wildlife crime
- Infrastructural/logistics support
- Raising awareness on the risks from electrocution and collision with energy infrastructure.

3. What are the major pressures to Appendix I bird species (transcending mere obstacles to migration)?

- Habitat loss and degradation
- Human disturbance
- Poaching
- Poisoning
- Bird trapping
- Trafficking
- Electrocution and collision

3a. What actions have been taken to prevent, reduce or control factors that are endangering or are likely to further endanger bird species beyond actions to prevent disruption to migrating behaviour?

- The GEF UNDP project “Ecosystem based Adaptation Measures in Kune-Vaine lagoon system” was implemented in the area to minimize the effects of climate change.
- Furthermore the enacted new legislation has for the first time ensured provisions that prohibit hunting in all coastal wetlands and areas designated as Important Bird Areas for Albania.
- Anti-poisoning measure are now part of the legislation through the amendments of the law on fauna
- An anti-poisoning roadmap drafted and discussed
- Awareness campaigns organized for the protection of coastal wetlands from unsustainable developments
- Wintering waterbird monitoring (IWC implemented since 1993)
- Breeding birds monitoring (European Breeding bird Atlas developed in Albania by AOS)

- Conservation activities for Appendix I species (Conservation of the Dalmatian Pelican, Conservation of Egyptian Vulture)

3b. Please report on the progress / success of the actions taken.

- The hunting ban has reduced poaching pressure from foreign hunters. Small migratory birds are the first to profit from hunting ban.
- The hunting ban has helped in unifying institutions reaction against poaching in protected areas.
- An anti-poisoning campaign has started and it is expected to expand further.
- Awareness on wildlife poisoning is increasing.
- Awareness for the protection of migratory birds is increasing.
- Better protection of Appendix I species
- Some measures have been implemented. Other measures will be enforced in the coming period. The state of the dalmatian pelican (*Pelecanus crispus*) population is one of the success stories for the country.

3c. Describe any factors that may limit action being taken in this regard:

- › Enforcement of the national legal framework by the control bodies in charge: State Inspectorate of Environment, Forests and Waters and the staff of Protected Areas administrations.

3d. What assistance, if any, does your country require to overcome these factors?

- Capacity building activities and study visits in EU member states to get the experience on the law enforcement on issues related to migratory species.
- Sustainable livelihood models and experiences
- Capacity strengthening in general
- Capacity strengthening against wildlife crime
- Infrastructural/logistics support
- Raising awareness on the risks from electrocution and collision with energy infrastructure.

1.2 Questions on specific Appendix I bird species

In the following section, using the table format below, please fill in each Appendix I bird species for which your country is considered to be a Range State. Please complete each table as appropriate, providing information in summary form. Where appropriate, please cross-reference to information already provided in national reports that have been submitted under other conventions (e.g. Convention on Biological Diversity, Ramsar Convention, CITES). (Attach annexes as necessary.)

Species name: *Anser erythropus*

1. Please provide published distribution reference:

Bino et al. 2006.

2a. Summarise information on population size (if known):

decreasing

2b. Summarise information on distribution (if known):

decreasing

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

Habitat protection

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

› Financial and human resources constraints

5. Describe any future activities that are planned for this species:

› Inventory and monitoring

Species name: *Aythya nyroca*

1. Please provide published distribution reference:

Bino et al. 2006.

2a. Summarise information on population size (if known):

stable

2b. Summarise information on distribution (if known):

stable

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

- Monitoring
- Control hunting / poaching
- Habitat protection

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

› Limitations in human and financial resources

5. Describe any future activities that are planned for this species:

› Inventory and monitoring

Species name: Falco naumanni

1. Please provide published distribution reference:

Topi & Nikolov 2014

2a. Summarise information on population size (if known):

- stable

2b. Summarise information on distribution (if known):

- stable

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

- Monitoring
- Species protection
- Control hunting / poaching
- Protection of roosting sites

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

› Limitations in human and financial resources

5. Describe any future activities that are planned for this species:

- Monitoring of potential breeding sites
- Monitoring of roosting sites
- Protection of habitats

Species name: Haliaeetus albicilla

1. Please provide published distribution reference:

Bino et al. 2006

2a. Summarise information on population size (if known):

- decreasing

2b. Summarise information on distribution (if known):

- decreasing

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

- Identification and establishment of protected areas
- Monitoring
- Species protection
- Control hunting / poaching
- Habitat protection

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

› N/A

5. Describe any future activities that are planned for this species:

› Monitoring, control of hunting and habitat protection

Species name: *Larus audouinii*

1. Please provide published distribution reference:

› Peja et al. 1995

2a. Summarise information on population size (if known):

decreasing

2b. Summarise information on distribution (if known):

stable

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

- Species protection
- Control hunting / poaching

4. If no activities have been carried out for this species in the reporting period, what has prevented such

action being taken?

› Limitations in human and financial resources

5. Describe any future activities that are planned for this species:

› Habitat protection

Species name: Numenius tenuirostris

1. Please provide published distribution reference:

› Bino et al.2001

2a. Summarise information on population size (if known):

decreasing

2b. Summarise information on distribution (if known):

stable

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

Research

Species protection

Habitat protection

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

› N/A

5. Describe any future activities that are planned for this species:

› Monitoring

Species name: Oxyura leucocephala

1. Please provide published distribution reference:

› BirdLife International (2004) Birds in Europe: population estimates,trends and conservation status. Cambridge, UK: BirdLife International. (BirdLife Conservation Series No. 12).

2a. Summarise information on population size (if known):

decreasing

2b. Summarise information on distribution (if known):

decreasing

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

Monitoring

Control hunting / poaching

Habitat protection

Other

› N/A

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

› Budget allocated for species monitoring is very low

5. Describe any future activities that are planned for this species:

› Inventory of population status

Species name: *Pelecanus crispus*

1. Please provide published distribution reference:

Bino et al. 2015

2a. Summarise information on population size (if known):

increasing

2b. Summarise information on distribution (if known):

increasing

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

Identification and establishment of protected areas

Monitoring

Education/awareness rising

Species protection

Control hunting / poaching

Habitat protection

Habitat restoration

Other

› Protected species listed in the Red List of Wild Fauna of Albania (2nd edition, December 2013).

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

› Human and financial resources constraints

5. Describe any future activities that are planned for this species:

➤ Habitat restoration

➤ Awareness raising

➤ Species protection through specific measures

➤ Monitoring of wintering and breeding birds

Species name: *Pelecanus onocrotalus* (only Palearctic populations)

1. Please provide published distribution reference:

› BirdLife International. (BirdLife Conservation Series No. 12).

2a. Summarise information on population size (if known):

increasing

2b. Summarise information on distribution (if known):

increasing

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

Species protection

Control hunting / poaching

Identification and establishment of protected areas

Monitoring

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

› very limited human and financial resources

5. Describe any future activities that are planned for this species:

› N/A

Species name: *Neophron percnopterus*

1. Please provide published distribution reference:

Bino et al. 2018 (in prep.)

2a. Summarise information on population size (if known):

decreasing

2b. Summarise information on distribution (if known):

decreasing

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

Identification and establishment of protected areas

Monitoring

Education/awareness rising

Species protection

Control hunting / poaching

Habitat protection

Habitat restoration

Other

› Protected species listed in the Red List of Wild Fauna of Albania (2nd edition, December 2013).

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

› N/A

5. Describe any future activities that are planned for this species:

› Species action plan

Species name: *Aquila clanga*

1. Please provide published distribution reference:

› Bino T. 2011, Bino et al. 2016

2a. Summarise information on population size (if known):

decreasing

2b. Summarise information on distribution (if known):

decreasing

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

Monitoring

Control poaching

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

› N/A

5. Describe any future activities that are planned for this species:

› Research and monitoring

Species name: Falco vespertinus

1. Please provide published distribution reference:

› Bino et al. 2001

2a. Summarise information on population size (if known):

stable

2b. Summarise information on distribution (if known):

stable

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

Species protection

Control hunting / poaching

Habitat protection

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

› N/A

5. Describe any future activities that are planned for this species:

› Species conservation measures

Species name: Otis tarda (Middle-European population)

1. Please provide published distribution reference:

› Bino 2004. Albania – National Report on Great Bustard Otis tarda

2a. Summarise information on population size (if known):

decreasing

2b. Summarise information on distribution (if known):

stable

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

Species protection

Control hunting / poaching

Habitat protection

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

› Limited human capacities and extremely limited financial resources

5. Describe any future activities that are planned for this species:

› Monitoring

Miscellaneous information or comments on Appendix I birds in general:

› Protected species

2. AQUATIC MAMMALS

2.1 General questions on Appendix I aquatic mammals

1. Is the taking of all Appendix I aquatic mammals species prohibited by the national implementing legislation cited in Table I(a) (General Information)?

Yes

If other legislation is relevant, please provide details:

› N/A

1a. If the taking of Appendix I aquatic mammals species is prohibited by law, have any exceptions been granted to the prohibition?

No

If Yes, please provide details (Include the date on which the exception was notified to the CMS Secretariat pursuant to CMS Article III(7):

› N/A

2. Identify any obstacles to migration that exist in relation to Appendix I aquatic mammals:

By-catch

2a. What actions are being undertaken to overcome these obstacles?

› Training of fishing and environmental inspectorates

2b. Please report on the progress / success of the actions taken.

› Illegal fishing reduced

2c. What assistance, if any, does your country require in order to overcome these obstacles?

› Capacity building programmes, especially with other Mediterranean countries that are at the same time EU

countries, with the emphasis on law enforcement in practice.

3. What are the major pressures to Appendix I aquatic mammals species (transcending mere obstacles to migration)?

Pollution

By-catch

3a. What actions have been taken to prevent, reduce or control factors that are endangering or are likely to further endanger aquatic mammals species beyond actions to prevent disruption to migrating behaviour?

› The enacting of new legislation and its implementation in the last couple of years will contribute to pollution reduction

3b. Please report on the progress / success of the actions taken.

› Monitoring programmes are being updated in order to have more reliable data on the pollution assessment

3c. Describe any factors that may limit action being taken in this regard:

› Limitation in human and financial resources

3d. What assistance, if any, does your country require to overcome these factors?

› Technical assistance programmes would be beneficiary

2.2 Questions on specific Appendix I aquatic mammals

In the following section, using the table format below, please fill in each Appendix I aquatic mammals species for which your country is considered to be a Range State. Please complete each table as appropriate, providing information in summary form. Where appropriate, please cross-reference to information already provided in national reports that have been submitted under other conventions (e.g. Convention on Biological Diversity, Ramsar Convention, CITES). (Attach annexes as necessary.)

Species name: Monachus monachus

1. Please provide published distribution reference:

› Bego personal comments

2a. Summarise information on population size (if known):

unknown, occasional data

2b. Summarise information on distribution (if known):

unknown, occasional data

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

Research

Monitoring

Species protection in Karaburun and Sazani Marine National Park area, the only place where an subadult individual has been recently sighted during spring and summer 2019.

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

› Lack of funding for research and monitoring activities

5. Describe any future activities that are planned for this species:

› Research and monitoring

Species name: Delphinus delphis (Mediterranean population)

1. Please provide published distribution reference:

› Bego pers. Communication

Holcer, D. and C. M. Fortuna (2015). Atlas of Cetacean and sea turtle distribution in the Adriatic Sea. Veli Lošinj, Blue World Institute: 24.

Holcer, D., C. M. Fortuna and P. C. Mackelworth (2014). Important areas for conservation of cetaceans, sea turtles and giant devil rays in the Adriatic Sea: summary of existing knowledge.

2a. Summarise information on population size (if known):

unknown. Species is believed to be extinct in Albania's territorial sea waters

2b. Summarise information on distribution (if known):

unknown. Species is believed to be extinct in Albania's territorial sea waters

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

Research

Monitoring

Species protection

Habitat protection

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

› N/A

5. Describe any future activities that are planned for this species:

› Research and monitoring

Miscellaneous information or comments on Appendix I marine mammals in general:

› Reliable data still to be produced

3. REPTILES

3.1 General questions on Appendix I reptiles

1. Is the taking of all Appendix I reptiles species prohibited by the national implementing legislation cited in

Table I(a) (General Information)?

Yes

If other legislation is relevant, please provide details:

› Red List of the Albanian wild fauna species

1a. If the taking of Appendix I reptiles species is prohibited by law, have any exceptions been granted to the prohibition?

No

If Yes, please provide details (Include the date on which the exception was notified to the CMS Secretariat pursuant to CMS Article III(7):

› N/A

2. Identify any obstacles to migration that exist in relation to Appendix I reptiles species:

By-catch

Pollution

2a. What actions are being undertaken to overcome these obstacles?

› A CEPF conservation project is being implemented in Patoku wetland area. As part of a first aid center for the sea turtles was created in Patoku. Recently, a GEF-UNDP project is being implemented in Vlora bay and a rescue center for sea turtles has been established in Radhima, south of Vlora bay. However, none of the rescue centers can provide assistance to specimens they require more specialized interventions.

2b. Please report on the progress / success of the actions taken.

› However, some progress has been achieved. Many individuals of sea turtles (mainly *Caretta caretta*) has been brought to the rescue centers (in Patoku and Radhima) and safely released after first aid provided. Awareness raising campaigns with fishermen have been implemented successfully in main harbors of the country, such as Durresi, Vlora, Saranda and Shengjini.

2c. What assistance, if any, does your country require in order to overcome these obstacles?

› Technical assistance and training of professional staff to properly manage the rescue centers and able to run interventions to specimens that are brought for rescue.

3. What are the major pressures to Appendix I reptiles species (transcending mere obstacles to migration)?

Destruction of nesting beaches

3a. What actions have been taken to prevent, reduce or control factors that are endangering or are likely to further endanger reptiles species beyond actions to prevent disruption to migrating behaviour?

› Designation and/or enlargement of Protected Areas

-Control of recreational activities along the sandy beaches that are potential breeding sites for sea turtles

3b. Please report on the progress / success of the actions taken.

› The implementation of Management Plans will give significant results on this issue

-Drone surveys along the sandy beaches of Adriatic coast to identify the potential breeding sites for sea turtles. This activity is supported by Medasset.

3c. Describe any factors that may limit action being taken in this regard:

› Limited human and financial capacities

3d. What assistance, if any, does your country require to overcome these factors?

› Experience exchange especially from EU countries

-Financial support to research and monitoring programme related to sea turtles

3.2 Questions on specific Appendix I reptiles

In the following section, using the table format below, please fill in each Appendix I reptiles species for which your country is considered to be a Range State. Please complete each table as appropriate, providing information in summary form. Where appropriate, please cross-reference to information already provided in national reports that have been submitted under other conventions (e.g. Convention on Biological Diversity, Ramsar Convention, CITES). (Attach annexes as necessary.)

Species name: *Caretta caretta*

1. Please provide published distribution reference:

› Fromhold, E. 1959: Als Tiergärtner und Herpetologe in Albanien;

Haxhiu, I. 1985: Result of the studies for the turtles in Albania (Rezultate te studimit te breshkave te Shqiperise). BSHN No 2. Tirane;

Michael White, Liza Boura, and Lily Venizelos (2013) Population Structure for Sea Turtles at Drini Bay: An Important Nearshore Foraging and Developmental Habitat in Albania. Chelonian Conservation and Biology: December 2013, Vol. 12, No. 2, pp. 283-292.

2a. Summarise information on population size (if known):

stable

2b. Summarise information on distribution (if known):

stable

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

Research

Monitoring

Species protection

Habitat protection

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

› Not applicable

5. Describe any future activities that are planned for this species:

› Inventory and monitoring

Species name: Dermochelys coriacea

1. Please provide published distribution reference:

› Zeko, I., Puzanov, V. 1960. One marine turtles in our coastal area (Nje breshke oqeanike ne bregdetin tone). BSHN No.4.

2a. Summarise information on population size (if known):

unknown. Only occasional visitor

2b. Summarise information on distribution (if known):

unknown. Only occasional visitor

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

Species protection

Control hunting / poaching

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

› Not applicable

5. Describe any future activities that are planned for this species:

› Research and monitoring

Miscellaneous information or comments on Appendix I marine turtles in general:

› All marine turtles are protected species in Albania. A management plan for marine turtles was drafted and approved in cooperation with Medasset in November 2012. A national monitoring programme for sea turtles is being developed under GEF-Adriatic Project, with technical assistance of RAC/SPA and PAP-RAC. Medasset will continue to support any research and monitoring activity on sea turtles in Albania.

5. FISH

5.1 General questions on Appendix I fish species

1. Is the taking of all Appendix I fish species prohibited by the national legislation listed as being implementing legislation in Table I(a) (General Information)?

Yes

If other legislation is relevant, please provide details:

› N/A

1a. If the taking of Appendix I fish species is prohibited by law, have any exceptions been granted to the prohibition?

No

If Yes, please provide details (Include the date on which the exception was notified to the CMS Secretariat pursuant to CMS Article III(7):

› N/A

2. Identify any obstacles to migration that exist in relation to Appendix I fish species:

Other

› Law enforcement needs to be improved

2a. What actions are being undertaken to overcome these obstacles?

› Capacity building workshops

2b. Please report on the progress / success of the actions taken.

› Management plan started to be implemented

2c. What assistance, if any, does your country require in order to overcome these obstacles?

› Technical assistance and experience exchange

3. What are the major threats to Appendix I fish species (transcending mere obstacles to migration)?

Other

› Illegal fishing

3a. What actions have been taken to prevent, reduce or control factors that are endangering or are likely to further endanger fish species beyond actions to prevent disruption to migrating behaviour?

› Fisheries management plans

3b. Please report on the progress / success of the actions taken.

› Still at early stages of implementation

3c. Describe any factors that may limit action being taken in this regard:

› Full implementation of management plans

3d. What assistance, if any, does your country require to overcome these factors?

› Technical assistance on integrated fisheries management

5.2 Questions on specific Appendix I fish species

In the following section, using the table format below, please fill in each Appendix I fish species, for which your country is considered to be a Range State. Please complete each table as appropriate, providing information in summary form. Where appropriate, please cross-reference to information already provided in national reports that have been submitted under other conventions (e.g. Convention on Biological Diversity, Ramsar Convention, CITES). (Attach annexes as necessary.)

Species name: *Acipenser sturio*

1. Please provide published distribution reference:

› ACCOBAMS

2a. Summarise information on population size (if known):

unclear

2b. Summarise information on distribution (if known):

stable

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

Species protection

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

› Lack of knowledge and research for this species

5. Describe any future activities that are planned for this species:

› Reliable research data

Species name: *Carcharodon carcharias*

1. Please provide published distribution reference:

› FAO, IUCN

2a. Summarise information on population size (if known):

decreasing

2b. Summarise information on distribution (if known):

stable

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

Research

Species protection

Other

› N/A

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

› Lack of knowledge and research on the species

5. Describe any future activities that are planned for this species:

› Reliable monitoring data

Species name: Cetorhinus maximus

1. Please provide published distribution reference:

› FAO, IUCN

2a. Summarise information on population size (if known):

decreasing

2b. Summarise information on distribution (if known):

stable

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

Research

Species protection

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

› Not applicable

5. Describe any future activities that are planned for this species:

› Population dynamics

Miscellaneous information or comments on Appendix I bats in general:

› All Appendix I bat species are protected by national legislation

6. LISTING OF OTHER ENDANGERED MIGRATORY SPECIES IN APPENDIX I

1. Is your country a Range State for any other endangered migratory species currently listed in Appendix I?

(according to the latest IUCN red data list). N.B.: States in which a species occurs as a vagrant (i.e. not "on its normal migration route") should not be treated as Range States. Please refer to Article 1 of the Convention for clarification.

No

If Yes, please provide details:

› Not applicable

1a. Is your country taking any steps to propose listing any of these species?

No

If yes, please provide details:

› Not applicable

1b. What assistance/measures, if any, does your country require to initiate the listing of these species?

› Extended research and monitoring activities

III. Appendix II Species

1. INFORMATION ON APPENDIX II SPECIES

Information pertaining to the conservation of Appendix II species that are the object of CMS Agreements will have been provided in periodic Party reports to those instruments. It will suffice therefore to reference (below), and preferably append, a copy of the latest report that has been submitted to the Secretariat of each of the Agreement/MoUs to which your country is a Party.

Wadden Sea Seals (1991)

Date of last report:

2. QUESTIONS ON CMS AGREEMENTS

Questions on the development of new CMS Agreements relating to Bird Species

1. In the current reporting period, has your country **initiated** the development of any CMS Agreements, including Memoranda of Understanding, to address the needs of Appendix II Bird Species ?

No

If Yes, what is the current state of development?

› Not applicable

2. In the current reporting period, has your country **participated** in the development of any new CMS Agreements, including Memoranda of Understanding, which address the conservation needs of Appendix II Bird Species ?

No

If Yes, please provide details:

› Not applicable

3. If your country has initiated or is participating in the development of a new Agreement or Memorandum of Understanding, what assistance, if any, does your country require in order to initiate or participate in the instruments development?

› Not applicable

4. Is the development of any CMS Agreement for Bird Species, including Memoranda of Understanding, planned by your country in the foreseeable future?

No

4.1. If Yes, please provide details:

› Not applicable

Questions on the development of new CMS Agreements relating to Marine Mammal Species

1. In the current reporting period, has your country **initiated** the development of any CMS Agreements, including Memoranda of Understanding, to address the needs of Appendix II Marine Mammal Species ?

No

If Yes, what is the current state of development?

› Not applicable

2. In the current reporting period, has your country **participated** in the development of any new CMS Agreements, including Memoranda of Understanding, which address the conservation needs of Appendix II Marine Mammal Species ?

No

If Yes, please provide details:

› Not applicable

3. If your country has initiated or is participating in the development of a new Agreement or Memorandum of Understanding, what assistance, if any, does your country require in order to initiate or participate in the instruments development?

› Not applicable

4. Is the development of any CMS Agreement for Marine Mammal Species, including Memoranda of

Understanding, planned by your country in the foreseeable future?

No

4.1. If Yes, please provide details:

› Not applicable

Questions on the development of new CMS Agreements relating to Marine Turtle Species

1. In the current reporting period, has your country **initiated** the development of any CMS Agreements, including Memoranda of Understanding, to address the needs of Appendix II Marine Turtle Species ?

No

If Yes, what is the current state of development?

› Not applicable

2. In the current reporting period, has your country **participated** in the development of any new CMS Agreements, including Memoranda of Understanding, which address the conservation needs of Appendix II Marine Turtle Species ?

No

If Yes, please provide details:

› Not applicable

3. If your country has initiated or is participating in the development of a new Agreement or Memorandum of Understanding, what assistance, if any, does your country require in order to initiate or participate in the instrument's development?

› Not applicable

4. Is the development of any CMS Agreement for Marine Turtle Species, including Memoranda of Understanding, planned by your country in the foreseeable future?

No

4.1. If Yes, please provide details:

› Not applicable

Questions on the development of new CMS Agreements relating to Terrestrial Mammal (other than bats) Species

1. In the current reporting period, has your country **initiated** the development of any CMS Agreements, including Memoranda of Understanding, to address the needs of Appendix II Terrestrial Mammal (other than bats) Species ?

No

If Yes, what is the current state of development?

› Not applicable

2. In the current reporting period, has your country **participated** in the development of any new CMS Agreements, including Memoranda of Understanding, which address the conservation needs of Appendix II Terrestrial Mammal (other than bats) Species ?

No

If Yes, please provide details:

› Not applicable

3. If your country has initiated or is participating in the development of a new Agreement or Memorandum of Understanding, what assistance, if any, does your country require in order to initiate or participate in the instrumentâ€™s development?

› Not applicable

4. Is the development of any CMS Agreement for Terrestrial Mammal (other than bats) Species, including

Memoranda of Understanding, planned by your country in the foreseeable future?

No

4.1. If Yes, please provide details:

› Not applicable

Questions on the development of new CMS Agreements relating to Bat Species

1. In the current reporting period, has your country **initiated** the development of any CMS Agreements, including Memoranda of Understanding, to address the needs of Appendix II Bat Species ?

No

If Yes, what is the current state of development?

› Not applicable

2. In the current reporting period, has your country **participated** in the development of any new CMS Agreements, including Memoranda of Understanding, which address the conservation needs of Appendix II Bat Species ?

No

If Yes, please provide details:

› N/A

3. If your country has initiated or is participating in the development of a new Agreement or Memorandum of Understanding, what assistance, if any, does your country require in order to initiate or participate in the instrumentâ€™s development?

› N/A

4. Is the development of any CMS Agreement for Bat Species, including Memoranda of Understanding, planned by your country in the foreseeable future?

No

4.1. If Yes, please provide details:

› N/A

Questions on the development of new CMS Agreements relating to Fish

1. In the current reporting period, has your country **initiated** the development of any CMS Agreements, including Memoranda of Understanding, to address the needs of Appendix II Fish ?

No

If Yes, what is the current state of development?

› N/A

2. In the current reporting period, has your country **participated** in the development of any new CMS Agreements, including Memoranda of Understanding, which address the conservation needs of Appendix II Fish ?

No

If Yes, please provide details:

› N/A

3. If your country has initiated or is participating in the development of a new Agreement or Memorandum of Understanding, what assistance, if any, does your country require in order to initiate or participate in the instrumentâ€™s development?

› N/A

4. Is the development of any CMS Agreement for Fish, including Memoranda of Understanding, planned by your country in the foreseeable future?

No

4.1. If Yes, please provide details:

> N/A

3. LISTING OF MIGRATORY SPECIES IN APPENDIX II

1. Is your country a Range State for any migratory species that has an unfavourable conservation status, but is not currently listed in Appendix II and could benefit from the conclusion of an Agreement for its

conservation?

N.B.: States in which a species occurs as a vagrant (i.e. not "on its normal migration route") should not be treated as

Range States. Please refer to Article 1 of the Convention for clarification.

No

If Yes, please provide details:

› N/A

1a. Is your country taking any steps to propose the listing of this/these species in Appendix II?

No

If Yes, please provide details:

› N/A

1b. What assistance, if any, does your country require to initiate the listing of this/these species?

› N/A

IV. National and Regional Priorities

1. What priority does your country assign to the conservation and, where applicable, sustainable use of migratory species in comparison to other biodiversity-related issues

Medium

2. Are migratory species and their habitats addressed by your country's national biodiversity strategy or action plan?

Yes

2.1. If Yes, please indicate and briefly describe the extent to which it addresses the following issues:

Conservation, sustainable use and/or restoration of migratory species

Conservation, sustainable use and/or restoration of the habitats of migratory species, including protected areas

Actions to prevent, reduce or control factors that are endangering or are likely to further endanger migratory species

(e.g. alien invasive species or by-catch)

Minimizing or eliminating barriers or obstacles to migration

Research and monitoring of migratory species

Transboundary co-operation

3. Does the conservation of migratory species currently feature in any other national or regional policies/plans (apart from CMS Agreements)

Yes

3.1. If Yes, please provide details:

› SPA/BD Protocol of Barcelona Convention

3a. Do these policies/plans cover the following areas?

Exploitation of natural resources (e.g. fisheries, hunting, etc.)

Yes

If Yes, please provide details

› National legislation on wild fauna protection and hunting

Economic development

Yes

If Yes, please provide details

› Hunting activity economical benefits

Land-use planning

Yes

If Yes, please provide details

› Protection of migration routes and IBA-s designation

Pollution control

Yes

If Yes, please provide details

› Barcelona Convention and its Protocols implementation

Designation and development of protected areas

Yes

If Yes, please provide details

› Designation of coastal and marine protected areas

Development of ecological networks

Yes

If Yes, please provide details

› In the process of development for Albania

Planning of power lines

No

If Yes, please provide details

› N/A

Planning of fences

No

If Yes, please provide details

› N/A

Planning of dams

Yes

If Yes, please provide details

› N/A

Other

No

If Yes, please provide details

› N/A

4. Results - please describe the positive outcomes of any actions taken

› Designation of protected areas and wild fauna protection are the ones with better results to be mentioned

V. Protected Areas

1. Are migratory species taken into account in the selection, establishment and management of protected areas in your country?

Yes

If Yes, please provide details:

› There are a lot of Protected Areas in the coastal area of the country identified as important habitat for migratory species, especially migratory birds.

1a. Please identify the most important national sites for migratory species and their protection status:

- All coastal wetlands
- Lake Shkodra, lake Ohrid, lake Prespa
- Vjosa river valley
- Drinos river valley
- Karaburun-Sazan is the first Marine National park in Albania.

1b. Do these protected areas cover the following areas?

Terrestrial

Yes

Aquatic

Yes

Marine

Yes

1c. Identify the agency, department or organization responsible for leading on this action in your country:

› Biodiversity and Protected Areas Directorate in the Ministry of the Environment of Albania

2. Results - please describe the positive outcomes of any actions taken

› The coverage of Protected Areas in the country has increased steadily and actually stands at 18.5 % of the country's territory of **475** thousand hectares. in Albania, The first Marine Protected Area has been designated in April 2010.

VI. Policies on Satellite Telemetry

1. In the current reporting period, has your country undertaken conservation/research projects that use satellite telemetry?

Yes

If yes what is the state of those projects

going on

Please provide details

➤ A GEF funded project on marine turtles has been implemented in 2009-2010 by the Greek Medasset.

➤ Life of Neophron (Eu Life project)

2. Are any future conservation/research projects planned that will use satellite telemetry?

Yes

If Yes, please provide details (including the expected timeframe for these projects):

› Egyptian Vulture New Life (2018-2023)

If No, please explain any impediments or requirements in this regard:

› Limited knowledge and human and financial resources are the main obstacles.

3. Results - please describe the positive outcomes of any actions taken

› N/A

VII. Membership

1. Have actions been taken by your country to encourage non- Parties to join CMS and its related Agreements?

No

If Yes, please provide details. (In particular, describe actions taken to recruit the non-Parties that have been identified by the Standing Committee as high priorities for recruitment.)

› N/A

1a. Identify the agency, department or organization responsible for leading on this action in your country:

› N/A

2. Results - please describe the positive outcomes of any actions taken

› N/A

VIII. Global and National Importance of CMS

1. Have actions been taken by your country to increase national, regional and/or global awareness of the relevance of CMS and its global importance in the context of biodiversity conservation?

Yes

If Yes, please provide details:

› Bat night events have been organized in Albania in recent years

2. Identify the agency, department or organization responsible for leading on this action in your country:

› Department of Biology, FNS, UT.

3. Results - please describe the positive outcomes of any actions taken

› Many people have attended these events. Awareness raising materials produced by EUROBATS and translated into Albanian language have been distributed to attendees, universities and schools.

IX. Mobilization of Resources

1. Has your country made financial resources available for conservation activities having direct benefits for migratory species in your country?

Yes

If Yes, please provide details (Indicate the migratory species that have benefited from these activities):

› Measures for the conservation of the dalmatian pelean population in Karavasta NP area are the most important ones. other activities involve marine turtles and the protection of their habitats in Albania

2. Has your country made voluntary contributions to the CMS Trust Fund to support requests from developing countries and countries with economies in transition?

No

If Yes, please provide details:

› N/A

3. Has your country made other voluntary financial contributions to support conservation activities having direct benefits for migratory species in other countries (particularly developing countries)?

No

If Yes, please provide details (Indicate the migratory species that have benefited from these activities):

› N/A

4. Has your country provided technical and/or scientific assistance to developing countries to facilitate initiatives for the benefit of migratory species?

No

If Yes, please provide details (Indicate the migratory species that have benefited from these activities):

› N/A

5. Has your country received financial assistance/support from the CMS Trust Fund, via the CMS Secretariat, for national conservation activities having direct benefits for migratory species in your country?

No

If Yes, please provide details (Indicate the migratory species that have benefited from these activities):

› N/A

6. Has your country received financial assistance/support from sources other than the CMS Secretariat for conservation activities having direct benefit for migratory species in your country?

Yes

If Yes, please provide details (Indicate the migratory species that have benefited from these activities):

› MEDASSET project on the conservation of marine turtles and their habitats in Albania. The project prepared in cooperation with the Ministry of the Environment

the action plan for the management of marine turtles and their habitats in the country. GEF-Adriatic project is providing funds for the preparation of the national monitoring programmes for marine fish, turtles, birds and mammals. NaturAL project (IPA-2013) provided funds for conducting consecutive International Water Birds Census for the years 2016-2019 and identification of other roosting sites for bats. NaturAL project provided support for publishing the first atlas on bats in Albania.

Annex: Updating Data on Appendix II Species

1. The drop-down lists below contain the list of all species listed in Appendix II. Parties which did not submit a National Report in 2014 are requested to complete the entire form. Parties that did submit a report in

2014 are requested to review and update the data (e.g. new published distribution references and details concerning species added to Appendix II at COP11).

Chiroptera

Eidolon helvum (African populations)

Please choose the one that applies.

No information available

Miniopterus schreibersii (African populations)

Please choose the one that applies.

Not a Range State

Vespertilionidae spp (European populations)

Please choose the one that applies.

Range State

Otomops martiensseni (African populations)

Please choose the one that applies.

Not a Range State

Tadarida teniotis

Please choose the one that applies.

Carnivora

Lycaon pictus

Please choose the one that applies.

Not a Range State

Arctocephalus australis

Please choose the one that applies.

Not a Range State

Halichoerus grypus (Baltic Sea populations)

Please choose the one that applies.

Not a Range State

Monachus monachus

Please choose the one that applies.

Range State

Phoca vitulina (Baltic and Wadden Sea populations)

Please choose the one that applies.

Not a Range State

Otaria flavescens

Please choose the one that applies.

Not a Range State

Gaviiformes

Gavia arctica arctica

Please choose the one that applies.

Range State

Gavia stellata (W. Palaearctic)

Please choose the one that applies.

Range State

Podicipediformes

Podiceps auritus (W. Palaearctic)

Please choose the one that applies.

Range State

Podiceps grisegena grisegena

Please choose the one that applies.

Range State

Pelecaniformes

Pelecanus crispus

Please choose the one that applies.

Range State

Pelecanus onocrotalus (W. Palearctic)

Please choose the one that applies.

Range State

Phalacrocorax nigrogularis

Please choose the one that applies.

Not a Range State

Phalacrocorax pygmeus

Please choose the one that applies.

Range State

Ciconiiformes

Botaurus stellaris stellaris (W. Palearctic)

Please choose the one that applies.

Range State

Casmerodius albus albus (W. Palearctic)

Please choose the one that applies.

Range State

Ixobrychus minutus minutus (W. Palearctic)

Please choose the one that applies.

Range State

Ciconia ciconia

Please choose the one that applies.

Range State

Ciconia nigra

Please choose the one that applies.

Range State

Platalea leucorodia

Please choose the one that applies.

Range State

Plegadis falcinellus

Please choose the one that applies.

Range State

Falconiformes

Pandion haliaetus

Please choose the one that applies.

Range State

Galliformes

Coturnix coturnix coturnix

Please choose the one that applies.

Range State

Gruiformes

Crex crex

Please choose the one that applies.

Range State

Fulica atra atra (Mediterranean and Black Sea populations)

Please choose the one that applies.

Range State

Porzana parva parva

Please choose the one that applies.

Range State

Porzana porzana (Populations breeding in the W Palaearctic)

Please choose the one that applies.

Range State

Otis tarda

Please choose the one that applies.

Range State

Charadriiformes

Burhinus oedicnemus

Please choose the one that applies.

Range State

Glareola pratincola

Please choose the one that applies.

Range State

Chlidonias niger niger

Please choose the one that applies.

Range State

Larus audouinii

Please choose the one that applies.

Range State

Larus genei

Please choose the one that applies.

Range State

Larus melanocephalus

Please choose the one that applies.

Range State

Sterna albifrons

Please choose the one that applies.

Range State

Sterna caspia (West Eurasian and African populations)

Please choose the one that applies.

Range State

Sterna hirundo hirundo (Populations breeding in the W Palaearctic)

Please choose the one that applies.

Range State

Sterna sandvicensis sandvicensis

Please choose the one that applies.

Range State

Columbiformes

Streptopelia turtur turtur

Please choose the one that applies.

Range State

Psittaciformes

Amazona tucumana

Please choose the one that applies.

Not a Range State

Coraciiformes

Merops apiaster

Please choose the one that applies.

Range State

Coracias garrulus

Please choose the one that applies.

Range State

Testudinata

Podocnemis expansa

Please choose the one that applies.

Not a Range State

Cheloniidae spp

Please choose the one that applies.

Range State

Dermochelyidae spp

Please choose the one that applies.

Range State

Lamniformes

Carcharodon carcharias

Please choose the one that applies.

Range State

Acipenseriformes

Acipenser naccarii

Please choose the one that applies.

Range State

Acipenser sturio

Please choose the one that applies.

Range State

2. All species of each of the Families below are listed in Appendix II. If your country is a Range State for any of the species in these Families, please indicate whether your country is a Range State or the species is extinct and, where appropriate, please provide published distribution references.

Order TESTUDINATA, Family

CHELONIIDAE Caretta caretta

Choose the one that applies.

Range State

Chelonia mydas

Choose the one that applies.

Range State
