Database of measures on conservation and management of Sharks

A collection of instruments for the conservation and management of sharks

About the database

The database provides a collection of instruments for the **conservation and management** of sharks.

These instruments include **binding and non-binding Conservation and Management Measures, Plans of Action**, and national legislation.

The term "shark" is used in the broad sense of the **FAO International Plan of Action for the Conservation and Management of Sharks** and includes all species of sharks, skates, rays, and chimaeras (Class Chondrichthyes).

This database has been developed in cooperation with the **Convention on International Trade in Endangered Species of Wild Fauna and Flora** and with the support of the **European Union** and the **Government of Japan**.

Autocomplete Search tool

Database of measures on conservation and management of Sharks

The screenshot shows a web interface for a shark database. At the top, there is a navigation bar with a home icon, a 'BROWSE' button, and three filter buttons: 'SPECIES', 'INSTITUTIONS', and 'COUNTRIES'. A search bar contains the text 'cats'. A dropdown menu is open, listing three categories of sharks: 'Deep-water catsharks' (Aristurus spp), 'Blackmouth catshark' (Galeus melastomus), and 'Mouse catshark' (Galeus murinus). Below the search bar, a large image of a shark is displayed with the text 'Bigeye thresher' and its scientific name 'Alopias superciliosus'. At the bottom, there is a grid of small thumbnail images of various shark species.
