

IFAW is a NGO dedicated to the protection, conservation and humane treatment of animals. We are an international NGO with offices in 14 countries

IFAW has a long history of experience and expertise in international treaties that impact wildlife. We continue to participate as observers at several international conventions including CMS, IWC or CITES we are also a cooperating partner with CMS.

One of IFAW's focus areas is shark conservation. In addition to advocacy at international bodies we work to improve shark conservation policy for example in the Gulf region where we will for example convene a shark conservation workshop together with the Dubai government in two weeks time

We are convinced, that the MoU for sharks can play an important role in shark conservation, and we want to support this as we feel the situation for sharks is globally very critical.

So we would be honoured to associate us with the efforts of the MoU as a cooperating partner
