

Concluding thoughts

Resolution 10.28

- Global Action Plan
- Management
- Monitoring

Global Action Plan

- Key document
- Focus on actions
- Be concise
- Be realistic (and aspirational)
- Funding
- Need for action – quick wins
- Review – keep active

Key issues: monitoring

- Population (sampling)
- Trends
- Taking

Key issues: threats

- Electrocution
- Across range
- Engage with power companies
- Issue for next CMS CoP – multiple species

Key issues: threats

- Collision risk
- Developing problem
- Especially in some parts of the range

Key issues: threats

- Habitat change and climate change
- Growing problem
- Link to human wellbeing

Key issues: Management

- Sustainable Use
- Link breeding, migration and wintering ranges
- Benefit to local people and communities
- Legal system is best
- Monitoring of taking
- Trade – series of issues
- Develop “best practice” guidelines

Best practice guidelines

- Breeding area monitoring and conservation action, e.g. population enhancement
- Engaging local communities
- Trade – role for falcon hospitals – accreditation
- Managing “taking”- biological modelling
- Release of birds

Key issue: awareness

- Stakeholders value the Saker falcon
- Build awareness in other groups related to threats – e.g. development companies
- Awareness of our plans in other range states
- Awareness in other CMS Parties

Opportunities: the way forward

- Working together – positive spirit
- Saker Task Force will develop GAP and related governance and funding
- 2014 Key time for the work
- CMS CoP is key event
- Plan for implementation now

Governance

- Role for the Task Force
- Up to CMS CoP
- Implementation Phase

The way forward: the next step

- Second draft GAP
- Need your continued involvement
- Draft note of meeting to follow

Thank you

- Secretariat and volunteers
- Nick and team
- Andras
- Boris
- All funders for the initiative
