

# Review of the Action Plan to the Raptors MOU (6.1)

*Dave Pritchard*

## **Two parts:**

- **The picture of implementation (successes, challenges, distance to target, lessons to feed back, adaptive management, etc)**
- **Reviewing and (as necessary) updating the Action Plan itself**

**TAG task; and Document TAG3 / Doc.6.1**

# **What do we want to know?**

- **MOU para 7 – overall aim**
- **MOU para 8 – 12 actions for achieving the aim**
- **Action Plan – 3 objectives**
- **Action Plan Section 4 – 9 priority actions**
- **MOU para 12 – raptor conservation strategies**
- **Action Plan Table 2 – 34 activities to deliver the strategies**
- **MOU paras 16-17 – overview of Action Plan implementation**

## **Information on which to base a review**

- **National Reports (on strategies) – no, not yet**
- **Five** previous interim / *ad hoc* information-gathering exercises
- **Initially considered a rapid, targeted questionnaire on some key priority issues**
- **Now considering something more extensive; building on the MOS2 model**

## **A few important differences from the 2015 enquiry**

- **Adding a few “overview” questions, as in the new CMS NRF**
- **Specific time-periods; situation with strategies; sites in Table 3; “any change?” questions for one-off actions, etc.**
- **So – *adapting* the MOS2 questionnaire, not copying it (with your help!)**

## *Review of the Action Plan*

- **Your own implementation data & insights – yes please!**
- **Saker GAP & Vultures MsAP**
- **Implications for analysis, and timetable**
- **(And not forgetting the eventual review of the Action Plan text itself..)**

*Review of the Action Plan*

***Thank you !!***
