

2017 - NATIONAL REPORT OF PARTIES ON THE IMPLEMENTATION OF THE CONVENTION ON THE CONSERVATION OF MIGRATORY SPECIES OF WILD ANIMALS

The deadline for submission of the reports is 24 April 2017. The reporting period is from May 2014 to April 2017.

Parties are encouraged to respond to all questions. Parties are also requested to provide comprehensive answers, including, where appropriate, a summary of activities, information on factors limiting action and details of any assistance required.

The reporting format was agreed by the Standing Committee at its 40th Meeting (Bonn, November 2012) for mandatory use by Parties, for reports submitted to the Eleventh Meeting of the Conference of the Parties (COP11). The 45th meeting of the Standing Committee recommended the use of the same format for reports submitted to COP12, with necessary adjustments to take into account relevant COP11 decisions, in particular amendments to the Appendices and resolutions.

COP Resolution 9.4 adopted at Rome called upon the Secretariats and Parties of CMS Agreements to collaborate in the implementation and harmonization of online reporting implementation. The CMS Family Online Reporting System (ORS) has been successfully implemented and used by AEWA in their last Meeting of the Parties (MOP 5, 2012) reporting cycle. CMS now offers the Convention's Parties to use the ORS for submitting their national reports for the COP11 (2014) reporting cycle.

Please enter here the name of your country
> Slovenia

Which agency has been primarily responsible for the preparation of this report?
> Ministry for the Environment and Spatial Planning

Please list any other agencies that have provided input
> Institute of the Republic of Slovenia for Nature Conservation

I(a). General Information

Please enter the required information in the table below:

Party

Date of entry into force of the Convention in your country
> 1.2.1999

Period covered
> 2014-16

Territories to which the Convention applies
> whole country

Designated National Focal Point

Full name of the institution
> Ministry for the Environment and Spatial Planning

Name and title of designated Focal Point
> Mr. Andrej Bibič

Mailing address
> Dunajska 48, SI-1000 Ljubljana, Slovenia

Telephone
> +386 1 478 7475

Fax
> +386 1 478 7420

E-mail
> andrej.bibic@gov.si

Appointment to the Scientific Council

Full name of the institution
> Institute of the Republic of Slovenia for Nature Conservation

Name and title of contact officer
> Mr. Damjan Vrčec

Mailing address
> Tobačna ulica 5, SI-1000 Ljubljana, Slovenia

Telephone
> +386 1 230 95 00

Fax
> +386 1 230 95 40

E-mail
> damjan.vrcek@zrsvn.si

Submission

Name and Signature of officer responsible for submitting national report

Name:
> Mr. Andrej Bibič

Address:
> Dunajska 48, SI-1000 Ljubljana, Slovenia

Tel.:
> +386 1 478 7475

Fax:
> +386 1 478 7420

E-mail:
> andrej.bibic@gov.si

Date of submission
> 12.5.2017

Membership of the Standing Committee (if applicable):

Name:

Implementation

Competent Authority:
> Ministry for the Environment and Spatial Planning

Relevant implemented legislation:
> Nature Conservation Act, Wild Game and Hunting Act, Decree on the protection of wild animal species, Decree on the management and the protection methods in trade in animal and plant species, Decree on special conservation areas (Natura 2000 areas), Decree on ecologically important areas, EC Regulation 337/98

Other relevant Conventions/ Agreements (apart from CMS) to which your country is a Party:
> Convention on Biological Diversity, CITES, International Convention for the Regulation of Whaling, Ramsar Convention, Bern Convention, Barcelona Convention, Alpine Convention

National policy instruments (e.g. national biodiversity conservation strategy, etc.):
> Resolution on National Environmental Action Plan 2005-2012 (for Nature Conservation valid to 2016). Natura 2000 Management Programme (2015 - 2020).

CMS Agreements/MoU

Please indicate whether your country is part of the following Agreements/MoU. If so, please indicate the competent national institution

Involvement of other government departments/NGOs/private sector

1. Which other government departments are involved in activities/initiatives for the conservation of migratory species in your country? (Please list.)

> Ministry of Agriculture, Food and Forestry
Slovenian Forestry Service
Fisheries Research Institute of Slovenia
Chamber of Agriculture and Forestry of Slovenia

2. If more than one government department is involved, describe the interaction/relationship between these government departments:

> Interaction is through governmental consultation procedures and partnership in project implementation.

3. Has a national liaison system or committee been established in your country?

Yes

> there is a liaison body for Birds and Habitats Directive, covering CMS species

4. List the main non-governmental organizations actively involved in activities/initiatives for the conservation of migratory species in your country, and describe their involvement:

> The monitoring, collection of data and research is being carried primarily by Center za kartografijo favne in flore (Centre for Cartography of Fauna and flora; CKFF), as well as by members of Slovensko društvo za proučevanje in varstvo netopirjev (Slovenian Association for Bat Research and Conservation - SDPVN), which are also actively involved in raising public awareness on importance of bats in Slovenia and are involved in activities and initiatives for the conservation of bats and monitoring of bat populations
Morigenos - društvo za raziskovanje in zaščito morskih sesalcev (Society for the study and protection of marine mammals), Društvo Jadranski projekt (Adriatic Project Society), Vivamar - društvo za trajnostni razvoj morja (Vivamar - Society for sustainable development for the sea) - all three societies are actively involved in raising public awareness on importance of marine mammals in Slovenian sea and in activities and initiatives for the conservation of marine mammals, Morigenos also performs research on *Tursiops truncatus*
Društvo za opazovanje in proučevanje ptic Slovenije (DOPPS - BirdLife Slovenia), collects data on distribution and population size of bird species in Slovenia, monitors bird populations, is actively involved in raising public awareness on importance of birds in Slovenia, involved in activities and initiatives for the conservation of birds)
Inštitut za biologijo - Morska biološka postaja and Aquarium Piran (collecting data on specimens of *Caretta caretta* caught in nets, rehabilitation of turtles, tagging of turtles)

5. Describe any involvement of the private sector in the conservation of migratory species in your country:

> Private sector, mostly energy, insurance or telecommunication companies, are often involved in different actions regarding conservation of species (also migratory species) mostly as sponsors.

I(b). Information about involved Authorities

Identify the ministry, agency/department or organization that is responsible for leading actions relating to Appendix I species

1- Birds

> Ministry for the Environment and Spatial Planning (legal basis for actions, and financing), Institute of the Republic of Slovenia for Nature Conservation and protected area authorities (for implementing actions)

2- Aquatic Mammals

> Ministry for the Environment and Spatial Planning (legal basis for actions, and financing), Institute of the Republic of Slovenia for Nature Conservation and protected area authorities (for implementing actions)

3- Reptiles

> Ministry for the Environment and Spatial Planning (legal basis for actions, and financing), Institute of the Republic of Slovenia for Nature Conservation and protected area authorities (for implementing actions)

4- Terrestrial Mammals

> Ministry for the Environment and Spatial Planning (legal basis for actions, and financing), Institute of the Republic of Slovenia for Nature Conservation and protected area authorities (for implementing actions)

5- Fish

> Ministry for the Environment and Spatial Planning, Ministry of Agriculture, Forestry and Food, Institute of the Republic of Slovenia for Nature Conservation, Fisheries Research Institute of Slovenia

II. Appendix I species

1. BIRDS

1.1 General questions on Appendix I bird species

1. Is the taking of all Appendix I bird species prohibited by the national implementing legislation cited in Table I(a) (General Information)?

Yes

1a. If the taking of Appendix I bird species is prohibited by law, have any exceptions been granted to the prohibition?

No

2. Identify any obstacles to migration that exist in relation to Appendix I bird species:

Habitat destruction

Pollution

2a. What actions are being undertaken to overcome these obstacles?

> In 2016 artificial perches and nesting boxes have been set in one site.

2b. Please report on the progress / success of the actions taken.

> Increase of population of Ferruginous Duck, nesting of White-tailed Eagle.

3. What are the major pressures to Appendix I bird species (transcending mere obstacles to migration)?

3a. What actions have been taken to prevent, reduce or control factors that are endangering or are likely to further endanger bird species beyond actions to prevent disruption to migrating behaviour?

> Regular checking of known nests during the breeding season is being carried out for the White-tailed Eagle. There has been designation of sites for Ferruginous Duck (Natura 2000) and there have been measures undertaken in spatial planning procedures to conserve breeding habitat of Lesser Kestrel and Ferruginous Duck.

3d. What assistance, if any, does your country require to overcome these factors?

> Lack of human and financial resources.

1.2 Questions on specific Appendix I bird species

In the following section, using the table format below, please fill in each Appendix I bird species for which your country is considered to be a Range State. Please complete each table as appropriate, providing information in summary form. Where appropriate, please cross-reference to information already provided in national reports that have been submitted under other conventions (e.g. Convention on Biological Diversity, Ramsar Convention, CITES). (Attach annexes as necessary.)

Species name: *Acrocephalus paludicola*

1. Please provide published distribution reference:

> There is no distribution map because the species only migrates through Slovenia, but its occurrence in Slovenia is confirmed in Božič, L. (2001b): A list of birds confirmed in Slovenia with an overview of rare species. *Acrocephalus* 22 (106-107): 115-120.

2a. Summarise information on population size (if known):

not known

2b. Summarise information on distribution (if known):

not known

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

> The species is occurring very rarely on migration and therefore none of the above mentioned actions were considered needed.

5. Describe any future activities that are planned for this species:

> None.

Species name: Aythya nyroca

1. Please provide published distribution reference:

> revised IBA inventory

2a. Summarise information on population size (if known):

increasing

> 15-30

2b. Summarise information on distribution (if known):

increasing

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

Identification and establishment of protected areas

> New Natura 2000 sites designated

Monitoring

> International Waterbird Census 2011, 2012, 2013, additional monitoring of breeding in 2010-2013

Species name: Haliaeetus albicilla

1. Please provide published distribution reference:

> Revised IBA inventory

2a. Summarise information on population size (if known):

increasing

> 8-11

2b. Summarise information on distribution (if known):

increasing

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

Identification and establishment of protected areas

Habitat protection

5. Describe any future activities that are planned for this species:

> There is a dedicated LIFE+ project starting.

Species name: Aquila clanga

1. Please provide published distribution reference:

> Sovinc, A. (1994): Zimski ornitološki atlas Slovenije (atlas of wintering birds). TZS, Ljubljana

Božič, L. (2001b): A list of birds confirmed in Slovenia with an overview of rare species. *Acrocephalus* 22 (106-107): 115-120.

Hanžel, J. (2013): Rare birds in Slovenia in 2012 - Slovenian Rarities Committee Report. *Acrocephalus* 34 (156/157): 83-91.

2a. Summarise information on population size (if known):

not known

2b. Summarise information on distribution (if known):

not known

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

> The species is occurring very rarely on migration and therefore none of the above mentioned actions were considered needed.

5. Describe any future activities that are planned for this species:

> None.

Species name: Aquila heliaca

1. Please provide published distribution reference:

> There is no distribution map because the species only migrates through Slovenia, but its occurrence in Slovenia is confirmed in Božič, L. (2001b): A list of birds confirmed in Slovenia with an overview of rare species. *Acrocephalus* 22 (106-107): 115-120 and Hanžel, J. (2013): Rare birds in Slovenia in 2012 – Slovenian Rarities Committee Report. *Acrocephalus* 34 (156/157): 83-91.

2a. Summarise information on population size (if known):

not known

2b. Summarise information on distribution (if known):

not known

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

> The species is occurring very rarely on migration and therefore none of the above mentioned actions were considered needed.

5. Describe any future activities that are planned for this species:

> None.

Species name: *Falco naumanni*

1. Please provide published distribution reference:

> Hanžel, J. (2013): Rare birds in Slovenia in 2012 – Slovenian Rarities Committee Report. *Acrocephalus* 34 (156/157): 83-91)

2a. Summarise information on population size (if known):

unclear

> The species became extinct in 1994. Since 1994 several individuals had been regularly observed during spring migration. Data on distribution are collected from reports of birdwatchers (as this is a rare species).

2b. Summarise information on distribution (if known):

unclear

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

- Education/awareness rising
- Species protection
- Habitat protection

> There have been measures undertaken in spatial planning procedures to conserve its breeding habitat.

Species name: *Falco vespertinus*

1. Please provide published distribution reference:

> Revised IBA inventory. Species occurs in Slovenia mainly during spring migration.

2a. Summarise information on population size (if known):

not known

2b. Summarise information on distribution (if known):

stable

> this refers to occurrence during spring migration

3. Indicate and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):

- Identification and establishment of protected areas

> Included under Natura 2000 protection on two sites with regular spring migration

Species name: *Otis tarda* (Middle-European population)

1. Please provide published distribution reference:

> There is no distribution map because the species is a rare vagrant to Slovenia, but its occurrence is confirmed in Božič, L. (2001b): A list of birds confirmed in Slovenia with an overview of rare species. *Acrocephalus* 22 (106-107): 115-120.

2a. Summarise information on population size (if known):

not known

2b. Summarise information on distribution (if known):

not known

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

> The species is occurring very rarely on migration and therefore none of the above mentioned actions were considered needed.

5. Describe any future activities that are planned for this species:

> None.

2. AQUATIC MAMMALS

2.1 General questions on Appendix I aquatic mammals

1. Is the taking of all Appendix I aquatic mammals species prohibited by the national implementing legislation cited in Table I(a) (General Information)?

Yes

1a. If the taking of Appendix I aquatic mammals species is prohibited by law, have any exceptions been granted to the prohibition?

No

2a. What actions are being undertaken to overcome these obstacles?

> Aquatic mammals, listed in Appendix 1 rarely occur in sea under Slovenian jurisdiction.

2b. Please report on the progress / success of the actions taken.

> not relevant

2c. What assistance, if any, does your country require in order to overcome these obstacles?

> not relevant

3. What are the major pressures to Appendix I aquatic mammals species (transcending mere obstacles to migration)?

Other

> not relevant

3a. What actions have been taken to prevent, reduce or control factors that are endangering or are likely to further endanger aquatic mammals species beyond actions to prevent disruption to migrating behaviour?

> not relevant

3b. Please report on the progress / success of the actions taken.

> not relevant

2.2 Questions on specific Appendix I aquatic mammals

In the following section, using the table format below, please fill in each Appendix I aquatic mammals species for which your country is considered to be a Range State. Please complete each table as appropriate, providing information in summary form. Where appropriate, please cross-reference to information already provided in national reports that have been submitted under other conventions (e.g. Convention on Biological Diversity, Ramsar Convention, CITES). (Attach annexes as necessary.)

Species name: Balaenoptera physalus

2a. Summarise information on population size (if known):

not known

2b. Summarise information on distribution (if known):

not known

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

> The species is only occasionally present in Slovenian sea. Last record is from 2003, when a dead young

female was washed up. Thus, none of the above mentioned actions were needed.

5. Describe any future activities that are planned for this species:

> None.

Species name: Megaptera novaeangliae

2a. Summarise information on population size (if known):

not known

2b. Summarise information on distribution (if known):

not known

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

> The species is occurring very rarely on migration and therefore none of the above mentioned actions were considered needed.

5. Describe any future activities that are planned for this species:

> None.

Species name: Delphinus delphis (Mediterranean population)

1. Please provide published distribution reference:

> GENOV T. 2011. Cetaceans in the north Adriatic (in Slovene). In: Fin whale, Balaenoptera physalus, in the Slovenian Museum of Natural History. Božič I., Genov T., Jernejc Kodrič M., Križnar M., Kryštufek B., Mikuž V. Ljubljana, Slovenian Museum of Natural History. 72 pp (in Slovene).

2a. Summarise information on population size (if known):

not known

2b. Summarise information on distribution (if known):

not known

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

> Species occurs in the sea under Slovenian jurisdiction very rarely, therefore above actions were not needed.

5. Describe any future activities that are planned for this species:

> None.

3. REPTILES

3.1 General questions on Appendix I reptiles

1. Is the taking of all Appendix I reptiles species prohibited by the national implementing legislation cited in Table I(a) (General Information)?

Yes

1a. If the taking of Appendix I reptiles species is prohibited by law, have any exceptions been granted to the prohibition?

No

2. Identify any obstacles to migration that exist in relation to Appendix I reptiles species:

By-catch

Pollution

2a. What actions are being undertaken to overcome these obstacles?

> Several projects, including NETCET.

2b. Please report on the progress / success of the actions taken.

> Occurrence of Caretta caretta in the sea under Slovenian jurisdiction os better known.

2c. What assistance, if any, does your country require in order to overcome these obstacles?

> not relevant

3. What are the major pressures to Appendix I reptiles species (transcending mere obstacles to migration)?

Other

> not relevant at the moment

3a. What actions have been taken to prevent, reduce or control factors that are endangering or are likely to further endanger reptiles species beyond actions to prevent disruption to migrating behaviour?

> not relevant at the moment

3b. Please report on the progress / success of the actions taken.

> not relevant at the moment

3c. Describe any factors that may limit action being taken in this regard:

> not relevant at the moment

3d. What assistance, if any, does your country require to overcome these factors?

> not relevant at the moment

3.2 Questions on specific Appendix I reptiles

In the following section, using the table format below, please fill in each Appendix I reptiles species for which your country is considered to be a Range State. Please complete each table as appropriate, providing information in summary form. Where appropriate, please cross-reference to information already provided in national reports that have been submitted under other conventions (e.g. Convention on Biological Diversity, Ramsar Convention, CITES). (Attach annexes as necessary.)

Species name: *Caretta caretta*

2a. Summarise information on population size (if known):

unclear

2b. Summarise information on distribution (if known):

unclear

4. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

> Fiscal Balance Measures in public sector and nature conservation as response to financial crisis have narrowed priority nature conservation activities.

III. Appendix II Species

1. INFORMATION ON APPENDIX II SPECIES

Information pertaining to the conservation of Appendix II species that are the object of CMS Agreements will have been provided in periodic Party reports to those instruments. It will suffice therefore to reference (below), and preferably append, a copy of the latest report that has been submitted to the Secretariat of each of the Agreement/MoUs to which your country is a Party.

AEWA (1999)

Date of last report:
> 2014

ACCOBAMS (2001)

Date of last report:
> 2016

Period covered:
> 2013-2016

2. QUESTIONS ON CMS AGREEMENTS

Questions on the development of new CMS Agreements relating to Bird Species

1. In the current reporting period, has your country **initiated** the development of any CMS Agreements, including Memoranda of Understanding, to address the needs of Appendix II Bird Species ?

No

2. In the current reporting period, has your country **participated** in the development of any new CMS Agreements, including Memoranda of Understanding, which address the conservation needs of Appendix II Bird Species ?

No

4. Is the development of any CMS Agreement for Bird Species, including Memoranda of Understanding, planned by your country in the foreseeable future?

No

Questions on the development of new CMS Agreements relating to Marine Mammal Species

1. In the current reporting period, has your country **initiated** the development of any CMS Agreements, including Memoranda of Understanding, to address the needs of Appendix II Marine Mammal Species ?

No

2. In the current reporting period, has your country **participated** in the development of any new CMS Agreements, including Memoranda of Understanding, which address the conservation needs of Appendix II Marine Mammal Species ?

No

4. Is the development of any CMS Agreement for Marine Mammal Species, including Memoranda of Understanding, planned by your country in the foreseeable future?

No

Questions on the development of new CMS Agreements relating to Marine Turtle Species

1. In the current reporting period, has your country **initiated** the development of any CMS Agreements, including Memoranda of Understanding, to address the needs of Appendix II Marine Turtle Species ?

No

4. Is the development of any CMS Agreement for Marine Turtle Species, including Memoranda of Understanding, planned by your country in the foreseeable future?

No

Questions on the development of new CMS Agreements relating to Terrestrial Mammal (other than bats) Species

1. In the current reporting period, has your country **initiated** the development of any CMS Agreements, including Memoranda of Understanding, to address the needs of Appendix II Terrestrial Mammal (other than bats) Species ?

No

2. In the current reporting period, has your country **participated** in the development of any new CMS Agreements, including Memoranda of Understanding, which address the conservation needs of Appendix II Terrestrial Mammal (other than bats) Species ?

No

4. Is the development of any CMS Agreement for Terrestrial Mammal (other than bats) Species, including Memoranda of Understanding, planned by your country in the foreseeable future?

No

Questions on the development of new CMS Agreements relating to Bat Species

1. In the current reporting period, has your country **initiated** the development of any CMS Agreements, including Memoranda of Understanding, to address the needs of Appendix II Bat Species ?

No

2. In the current reporting period, has your country **participated** in the development of any new CMS Agreements, including Memoranda of Understanding, which address the conservation needs of Appendix II Bat Species ?

No

4. Is the development of any CMS Agreement for Bat Species, including Memoranda of Understanding, planned by your country in the foreseeable future?

No

Questions on the development of new CMS Agreements relating to Fish

1. In the current reporting period, has your country **initiated** the development of any CMS Agreements, including Memoranda of Understanding, to address the needs of Appendix II Fish ?

No

2. In the current reporting period, has your country **participated** in the development of any new CMS Agreements, including Memoranda of Understanding, which address the conservation needs of Appendix II Fish ?

No

4. Is the development of any CMS Agreement for Fish, including Memoranda of Understanding, planned by your country in the foreseeable future?

No

IV. National and Regional Priorities

1. What priority does your country assign to the conservation and, where applicable, sustainable use of migratory species in comparison to other biodiversity-related issues

Medium

2. Are migratory species and their habitats addressed by your country's national biodiversity strategy or action plan?

Yes

2.1. If Yes, please indicate and briefly describe the extent to which it addresses the following issues:

Conservation, sustainable use and/or restoration of migratory species

> It addresses all of these issues:

http://www.natura2000.si/fileadmin/user_upload/C5_Ann61ObjectMeasures_2.xlsx

Conservation, sustainable use and/or restoration of the habitats of migratory species, including protected areas

> It addresses all of these issues:

http://www.natura2000.si/fileadmin/user_upload/C5_Ann61ObjectMeasures_2.xlsx

Actions to prevent, reduce or control factors that are endangering or are likely to further endanger migratory species (e.g. alien invasive species or by-catch)

> It addresses all of these issues:

http://www.natura2000.si/fileadmin/user_upload/C5_Ann61ObjectMeasures_2.xlsx

Minimizing or eliminating barriers or obstacles to migration

> It addresses these issues:

http://www.natura2000.si/fileadmin/user_upload/C5_Ann61ObjectMeasures_2.xlsx

Research and monitoring of migratory species

> It addresses both:

http://www.natura2000.si/fileadmin/user_upload/C5_Ann65MonRese_2.xlsx

3. Does the conservation of migratory species currently feature in any other national or regional policies/plans (apart from CMS Agreements)

Yes

3.1. If Yes, please provide details:

> Natura 2000 network, protected species

3a. Do these policies/plans cover the following areas?

Exploitation of natural resources (e.g. fisheries, hunting, etc.)

Yes

If Yes, please provide details

> Taking of specimens of protected species is forbidden, could be allowed if it is non-detrimental to the conservation status of the species, hunting plans must incorporate demands of protected species (enough prey, suitable habitat and it's protection etc.)

Economic development

No

Land-use planning

Yes

If Yes, please provide details

> Land-use planning: Planning of new development sites (industry, residential areas etc.) must incorporate demands and goals of protected areas.

Pollution control

No

Designation and development of protected areas

Yes

If Yes, please provide details

> Designation and development of protected areas: Protected areas have incorporated also important habitats

for migratory birds. Planning of new development sites (industry, residential areas etc.) must incorporate demands and goals of protected areas.

Development of ecological networks

Yes

If Yes, please provide details

> Some of the new Natura 2000 sites, designated in 2013, were designated for CMS App. I species.

Planning of power lines

Yes

If Yes, please provide details

> Planning of new development sites (industry, residential areas etc.) must incorporate demands and goals of protected areas.

Planning of fences

No

Planning of dams

Yes

If Yes, please provide details

> Planning of dams: Planning of new development sites (industry, residential areas etc.) must incorporate demands and goals of protected areas.

4. Results - please describe the positive outcomes of any actions taken

> Most of the development sites are outside protected areas. If they are in protected area they are not detrimental to the site. Without consideration of protected species and protected sites no plan for use of natural resources is accepted nor can be implemented.

V. Protected Areas

1. Are migratory species taken into account in the selection, establishment and management of protected areas in your country?

Yes

If Yes, please provide details:

> Currently, we have two sites of international importance for waterbird species designated under the Ramsar Convention: Sečovlje salt pans (declared in 1993) and Lake Cerknica (declared in 2006). Slovenia ratified the Paris Protocol and Regina Amendments of this Convention in 2004 (OJ RS MP, 6/04).

Article 4 of EC Wild Birds Directive (79/409/EEC) requires from Member States to establish Special Protection Areas (SPA) where these are an appropriate means of conserving Annex I and/or migratory bird species. This is implemented in the Republic of Slovenia through the Nature Conservation Act (ZON - UPB2, OJ RS 96/04) and governmental Decree on special conservation areas (OJ RS, 49/04). Migratory bird species are therefore taken into account in the selection of SPAs. Habitats Directive requires a similar procedure in establishing Sites of Community Interest (SCI), therefore migratory species other than birds are taken into account in selecting SCIs.

Different levels of protection are given to SPAs and SCIs, depending on needs for protection. They are designated as nature reserves, regional parks or landscape parks. Basis for proactive conservation measures (e.g. agri-environmental schemes) are Ecologically Important Areas (EcoIA).

The Nature Conservation Act (ZON - UPB2, OJ RS, 96/04) gives a framework for drafting management plans of parks (national, regional, landscape). It gives also a framework for the Natura 2000 management programme. Draft management plans for parks are prepared by park authorities (see section 3.5). Operational programme - Natura 2000 management programme was prepared by the Ministry of the Environment and Spatial Planning and adopted by the government in October 2007.

Operational programme - Natura 2000 management programme determines measures and actions aimed at ensuring favourable conservation status of the majority of qualifying species for each SPA and SCI (http://www.natura2000.gov.si/uploads/tx_library/NATURA_2000-ANG-01.pdf). Therefore in management of Natura 2000 sites (SPAs and SCIs) migratory species are taken into account.

Management plans for protected areas - parks (MP) were prepared or are in preparation for some protected areas:

1. Landscape Park Sečovlje salt pans: MP is in the process of adoption by the Government.
2. SPA and Nature Reserve Škocjanski zatok: MP was approved by the Government on 30.8.2007, <http://www.uradni-list.si/1/ulonline.jsp?urlid=200783&dhid=91507>
3. SPA Lake Cerknica: a part of Notranjska regional park, MP in preparation as part of Life project LIFE06NAT/SLO/000069 http://life.notranjski-park.si/cmsfiles/cf_630.pdf
4. Kozjansko Regional Park: MP in preparation by the regional park (<http://www.kozjanski-park.si/>)
5. Triglav National Park: MP in preparation by the national park (<http://www.tnp.si/>)

1a. Please identify the most important national sites for migratory species and their protection status:

> Natura 2000 site Additional protection status

Breginjski Stol Ecologically important area, SPA and SCI site

Cerkniško jezero a part of Notranjska regional park, Ramsar site, SPA and SCI site, Ecologically important area, Natural heritage of national importance

Drava Landscape park, SPA and SCI site, Ecologically important area, Natural heritage of national importance

Dravinjska dolina Ecologically important area, SPA and SCI site, incorporates many sites of Natural heritage of local and national importance

Goričko Ecologically important area, SPA and SAC site, Regional Park, incorporates many sites of Natural heritage of local and national importance

Kozjansko Regional park, SPA site, Ecologically important area, incorporates many sites of Natural heritage of local and international importance

Dobrava - Jovsi Ecologically important area, SPA and SAC site, Jovsi are protected as Natural Monument, incorporates many sites of Natural heritage of local and international importance

Krakovski gozd - Šentjernejsko polje Ecologically important area, SPA and SAC sites, one part is designated as forest reserve, incorporates many sites of Natural heritage of local and international importance

Ljubljansko barje Ecologically important area, SPA and SAC sites, Regional park, Jezero pri Podpeči is protected as Natural Monument, incorporates many sites of Natural heritage of local and international importance

Mura Ecologically important area, SPA and SAC sites, incorporates many sites of Natural heritage of local and international importance

Nanoščica Ecologically important area, SPA and SAC site, Hrašče are protected as Natural Monument, incorporates many sites of Natural heritage of local and international importance

Planinsko polje Ecologically important area, SPA and SAC site, Regional park, incorporates many sites of Natural heritage of local and international importance

Dolina Reke Ecologically important area, SPA and SAC site, Regional park, incorporates many sites of Natural heritage of local and international importance

Sečoveljske soline Landscape Park, SPA and SCI site, Ecologically important area, Ramsar site, Natural heritage

of national importance

Snežnik – Pivka Ecologically important area, SPA and SAC site, part of Notranjska regional park, incorporates many sites of Natural heritage of local and international importance

Škocjanski zatok Nature Reserve, SPA and SCI site, Ecologically important area, Natural heritage of national importance

1b. Do these protected areas cover the following areas?

Terrestrial

Yes

If Yes, please provide details and include the amount of protected areas coverage and the number of protected areas

> 204.712 hectares, Triglav National park, Kozjansko regional park, The Škocjan caves (incl. buffer zone)

Aquatic

Yes

If Yes, please provide details and include the amount of protected areas coverage and the number of protected areas

> 14.960 hectares, The Cerknica Lake and the Drava River

Marine

Yes

If Yes, please provide details and include the amount of protected areas coverage and the number of protected areas

> 445 hectares, Nature reserve Škocjanski zatok and landscape park Sečovelje salt pans

1c. Identify the agency, department or organization responsible for leading on this action in your country:

> Ministry for the Environment and Spatial Planning

2. Results - please describe the positive outcomes of any actions taken

> Management plans that include specific management for migratory species were prepared for Nature reserve Škocjanski zatok and Landscape park Sečovelje salt pans and adopted for Nature reserve Škocjanski zatok. In place is also management plan for The Škocjan caves Regional park.

VI. Policies on Satellite Telemetry

1. In the current reporting period, has your country undertaken conservation/research projects that use satellite telemetry?

Yes

If yes what is the state of those projects

completed

Please provide details

> There were projects running in Slovenia, using telemetry on species listed on Appendixes / Annexes of the CMS or its daughter Agreements: white stork (*Ciconia ciconia*), black stork (*Ciconia nigra*), Mediterranean shag (*Phalacrocorax aristotelis desmarestii*), loggerhead turtle (*Caretta caretta*).

2. Are any future conservation/research projects planned that will use satellite telemetry?

Yes

If Yes, please provide details (including the expected timeframe for these projects):

> There are plans to continue projects on loggerhead turtle (*Caretta caretta*).

If No, please explain any impediments or requirements in this regard:

> /

3. Results - please describe the positive outcomes of any actions taken

> Better focused conservation actions in the field.

VII. Membership

1. Have actions been taken by your country to encourage non- Parties to join CMS and its related Agreements?

No

If Yes, please provide details. (In particular, describe actions taken to recruit the non-Parties that have been identified by the Standing Committee as high priorities for recruitment.)

> No.

1a. Identify the agency, department or organization responsible for leading on this action in your country:

> Not relevant

2. Results - please describe the positive outcomes of any actions taken

> Not relevant

VIII. Global and National Importance of CMS

1. Have actions been taken by your country to increase national, regional and/or global awareness of the relevance of CMS and its global importance in the context of biodiversity conservation?

Yes

If Yes, please provide details:

> Promotion of the World Bird Migratory Day is used to show the connection between implementation of obligations, arising from the EU Wild Birds Directive and the CMS daughter Agreement AEWA.

2. Identify the agency, department or organization responsible for leading on this action in your country:

> Ministry of the Environment and Spatial Planning

3. Results - please describe the positive outcomes of any actions taken

> There is a positive perception among stakeholders and wider public on conservation of migratory birds.

IX. Mobilization of Resources

1. Has your country made financial resources available for conservation activities having direct benefits for migratory species in your country?

Yes

If Yes, please provide details (Indicate the migratory species that have benefited from these activities):

> All Appendix I species listed in chapter II.

2. Has your country made voluntary contributions to the CMS Trust Fund to support requests from developing countries and countries with economies in transition?

No

If Yes, please provide details:

> Not relevant

3. Has your country made other voluntary financial contributions to support conservation activities having direct benefits for migratory species in other countries (particularly developing countries)?

No

If Yes, please provide details (Indicate the migratory species that have benefited from these activities):

> Not relevant

4. Has your country provided technical and/or scientific assistance to developing countries to facilitate initiatives for the benefit of migratory species?

No

If Yes, please provide details (Indicate the migratory species that have benefited from these activities):

> Not relevant

5. Has your country received financial assistance/support from the CMS Trust Fund, via the CMS Secretariat, for national conservation activities having direct benefits for migratory species in your country?

No

If Yes, please provide details (Indicate the migratory species that have benefited from these activities):

> Not relevant

6. Has your country received financial assistance/support from sources other than the CMS Secretariat for conservation activities having direct benefit for migratory species in your country?

No

If Yes, please provide details (Indicate the migratory species that have benefited from these activities):

> Not relevant

X. Implementation of COP Resolutions and Recommendations

Please provide information about measures undertaken by your country relating to recent Resolutions and Recommendations since the last Report. For your convenience please refer to the list of COP Resolutions and Recommendations listed below:

Strategic and Institutional Matters

Capacity Building Strategy (Res. 9.12 / Res. 10.6)

› Because of lack of financial resources there was no financial support for the capacity building strategy.

Strategic Plan for Migratory Species 2015-2023 (Res. 11.2)

› Relevant goals and targets were integrated into Natura 2000 Management Programme 2015-2020.

Financial and Administrative Matters and Terms of Reference for the Administration of the Trust Fund (Res. 11.1)

› Slovenia does its best to fulfil financial obligations each year.

Relationship between the CMS Family and the Civil Society (Res. 11.11)

› There are very few NGOs in Slovenia, that have a more international perspective in conservation of migratory species. Most of them focus on activities and perspective in the country. These NGOs are supported financially to undertake activities in the country, that help implementing CMS obligations. Their activities are also reported, especially in reports of CMS daughter Agreements.

World Migratory Bird Day (Res. 11.9)

› World Migratory Bird Day is promoted by the Ministry for the Environment and Spatial Planning and BirdLife Slovenia, reaching good media coverage (e.g. in 2016).

Outreach and Communication Issues (Res. 11.8)

› Because of lack of financial resources there was no financial support for implementation of the Resolution 11.8.

Development of CMS Agreements (Res. 11.12)

› Slovenia did not propose development of any new CMS instrument in the reporting period. In the process of accession to CMS instruments where Slovenia is a Range State had to prioritise because of very limited human and financial resources. Slovenia ratified all important CMS instruments, but is at the moment unable to accede to all CMS instruments where listed as a Range State. Because of lack of financial resources there was no financial support for implementation of the Resolution 11.12.

Concerted and Cooperative Actions (Res. 11.13)

› No activity.

Synergies and Partnerships / Cooperation with other Conventions (Res. 11.10)

› Slovenia is implementing this resolution, with all the focal points of biodiversity related conventions working closely together and coordinating efforts on their implementation.

Future strategies of the CMS Family / "Future Shape" (Res. 10.9)

› Because of lack of resources Slovenia did not involve in implementation of this resolution.

Avian Species and Issues

Electrocution of Migratory Birds (Res. 7.04 / Res. 10.11)

› National measures implemented when implementing the European Union legislation on impact assessment and on conservation of wild birds and flora, fauna and habitats, which is fully transposed into Slovenian legislation.

Southern Hemisphere Albatross Conservation (Res. 6.3)

› Not relevant.

Migratory Landbirds in the African Eurasian Region (Res. 11.17)

› National measures implemented when implementing the European Union legislation on conservation of wild birds.

Global Flyway Conservation (Res. 10.10 / Res. 11.14)

› National measures implemented when implementing the European Union legislation on conservation of wild

birds.

Saker Falcon (Res. 11.18)

› Not relevant because species occurs rarely in Slovenia, and falconry is very limited in the country.

Illegal Killing, Taking and Trade of Migratory Birds (Res. 11.16)

› National measures implemented.

Migratory Species and Highly Pathogenic Avian Influenza (Res. 8.27 / Res. 9.8 / Res. 10.22)

› National measures implemented.

Poisoning Migratory Birds (Res. 11.15)

› Not relevant.

Aquatic Species and Issues

Migratory Marine Species (Res. 9.9 / Res. 10.15)

› Slovenia facilitated the implementation by hosting (and supporting) two annual meetings of the Scientific Committee of the IWC, meetings of Conservation Committee and other sub-Committees of the IWC.

Conservation of Migratory Sharks and Rays (Res. 11.20)

› Not relevant.

Live capture of Cetacean from the Wild (Res. 11.22)

› Not relevant, as it is forbidden to keep cetaceans in captivity.

Adverse Anthropogenic Impacts on Cetaceans and other Biota (Res. 9.19 / Res. 10.24)

› First steps undertaken in implementing some parts of these resolutions on the national level.

Loggerhead Turtle in the South Pacific Ocean (Res. 11.21)

› Not relevant.

Conservation Implications of Cetacean Culture (Res. 11.23)

› Not relevant.

Improving the Conservation Status of the Leatherback Turtle (*Dermochelys coriacea*) (Rec. 7.6)

› Not relevant.

Antarctic Minke, Bryde's and Pygmy Right Whales (Res. 7.15)

› Not relevant.

Migratory Freshwater Fish (Res. 10.12)

› National measures implemented when implementing the European Union legislation on impact assessment and on conservation of flora, fauna and habitats, which is fully transposed into Slovenian legislation.

Terrestrial Species and Issues

Sahelo-Saharan Megafauna (Rec. 9.2)

› Not relevant.

Tigers and other Asian Big Cats (Rec. 9.3)

› Not relevant.

Conservation of the African Lion (Res. 11.32)

› Not relevant.

Cross-cutting Issues

Marine Debris (Res. 10.4 / Res. 11.30)

› Some work undertaken on implementation at the national level.

Bycatch (incl. Recommendation) (Res. 6.2 / Rec. 7.2 / Res. 8.14 / Res. 9.18 / Res. 10.14)

› National measures implemented.

Wildlife Crime (Res. 11.31)

› Implemented at national and EU level.

Ecological Networks (Res. 10.3 / Res. 11.25)

> National measures implemented to increase coherence and connectivity of protected areas.

Annex: Updating Data on Appendix II Species

1. The drop-down lists below contain the list of all species listed in Appendix II. Parties which did not submit a National Report in 2014 are requested to complete the entire form. Parties that did submit a report in 2014 are requested to review and update the data (e.g. new published distribution references and details concerning species added to Appendix II at COP11).

Cetacea

Tursiops truncatus (Mediterranean population)
