PARANYS

The image shows a building with a green roof, where the roof is completely covered with a dense layer of low-lying, silvery-green plants. A stone chimney rises from the right side of the building. On the roof ridge, there is a small, white, windmill-like structure. The building is situated at the base of a steep, forested hill. The overall scene is a mix of natural greenery and man-made structures.

paranys

A partir del 2013 el SEPRONA de Castellón se ha comprometido con grande profesionalidad en la lucha contra la ilegalidad del parany denunciando a decenas de paranyers y respondiendo a todas nuestras llamadas. Como resultado el número de paranys ha bajado sensiblemente en los últimos dos años.

CASE STUDY 3 - MALTA

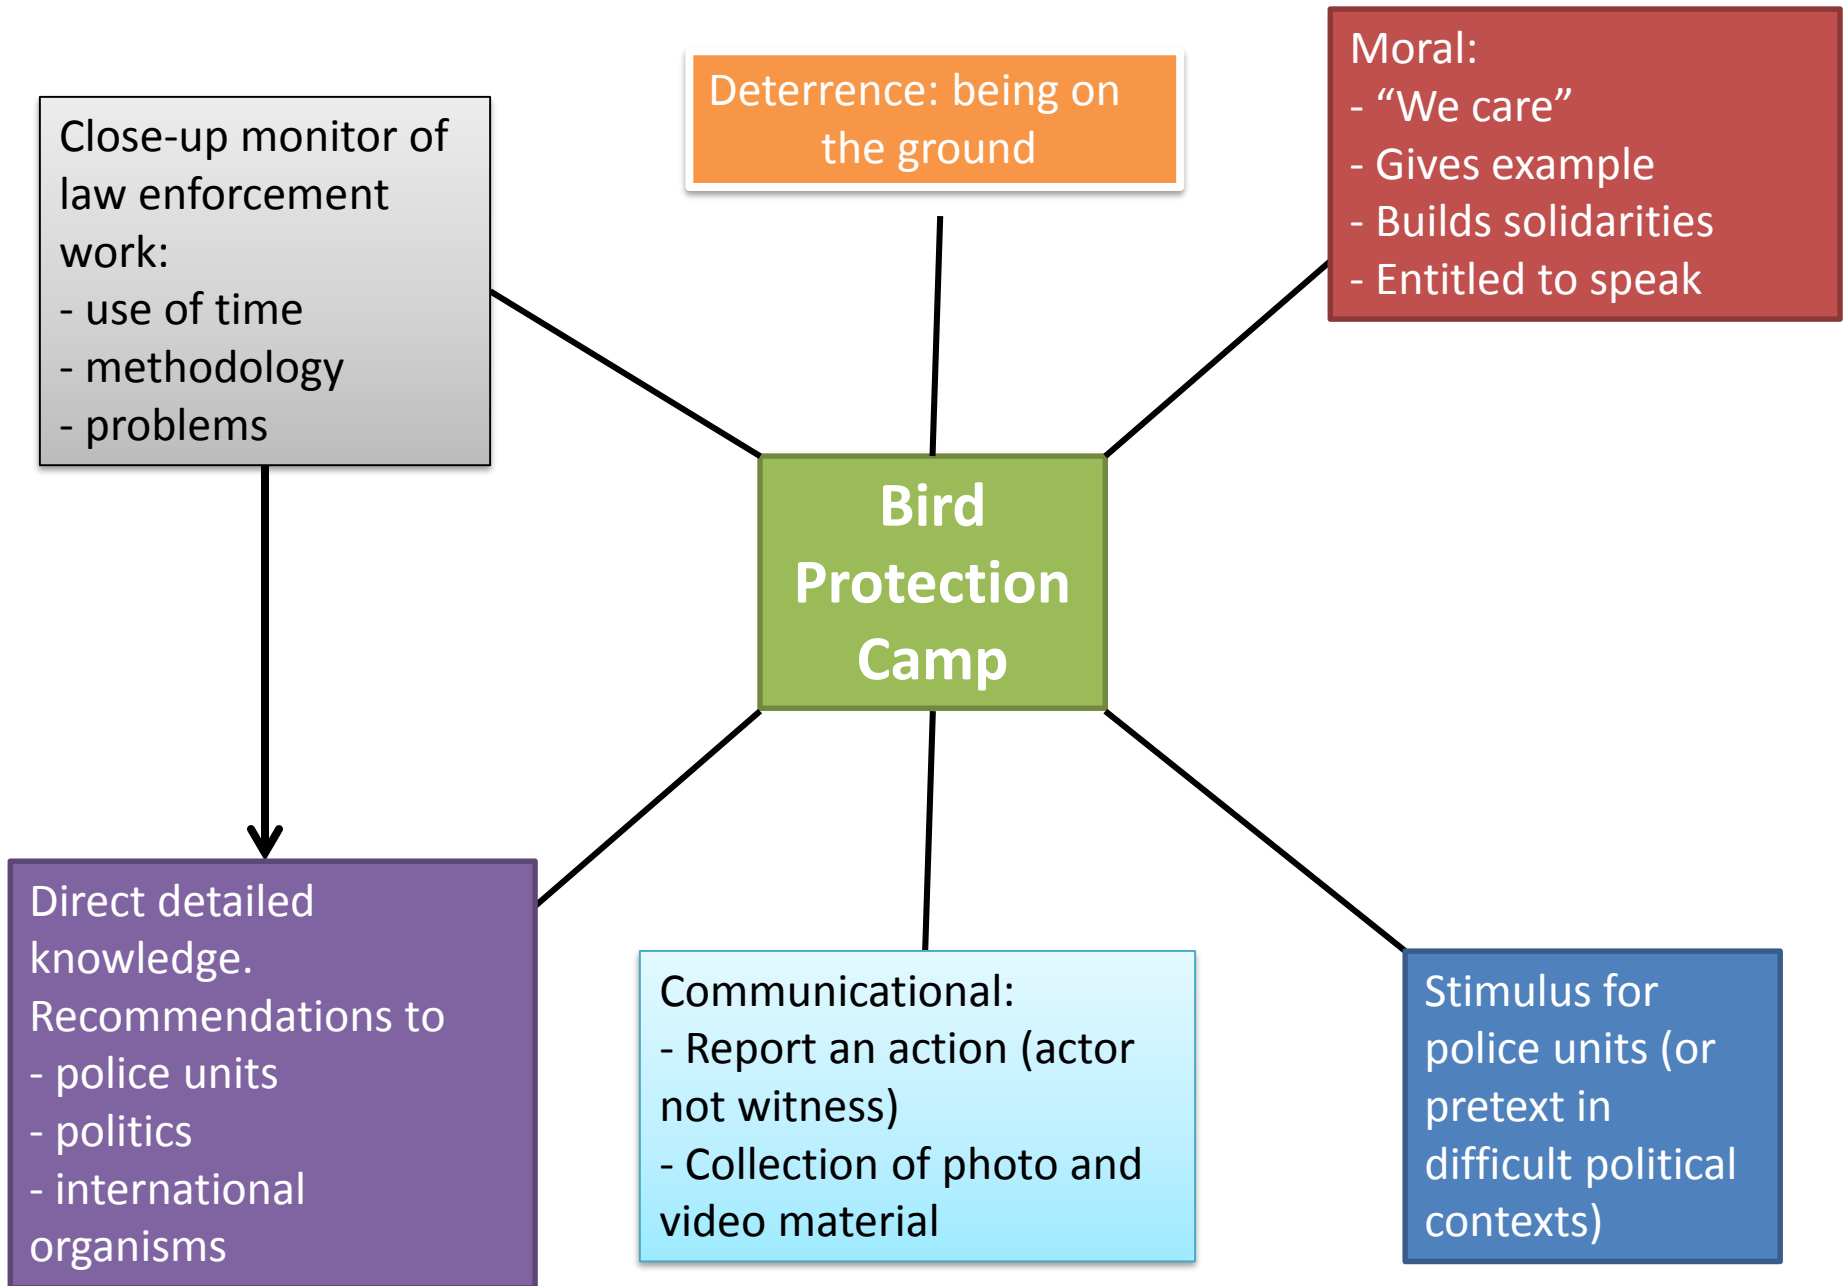

The key concept: the Bird Protection Camp

1. Be on the ground with volunteers during the peak poaching season disrupting/disturbing poaching activity
2. Achieve a perfect knowledge of the territory
3. Achieve knowledge of poaching methods, poaching patterns, poaching areas (database, systematization of information, reports)
4. Seek and provide cooperation with/to law enforcement agencies

A simple tool: google earth database
