Section 12(2): amended, on 9 September 1999, by section 7(2) of the Fisheries Act 1996 Amendment Act 1999 (1999 No 101).

13 Total allowable catch

- (1) Subject to this section, the Minister shall, by notice in the *Gazette*, set in respect of the quota management area relating to each quota management stock a total allowable catch for that stock, and that total allowable catch shall continue to apply in each fishing year for that stock unless varied under this section, or until an alteration of the quota management area for that stock takes effect in accordance with sections 25 and 26.
- (2) The Minister shall set a total allowable catch that—
 - (a) maintains the stock at or above a level that can produce the maximum sustainable yield, having regard to the interdependence of stocks; or
 - (b) enables the level of any stock whose current level is below that which can produce the maximum sustainable yield to be altered—
 - (i) in a way and at a rate that will result in the stock being restored to or above a level that can produce the maximum sustainable yield, having regard to the interdependence of stocks; and
 - (ii) within a period appropriate to the stock, having regard to the biological characteristics of the stock and any environmental conditions affecting the stock; or
 - (c) enables the level of any stock whose current level is above that which can produce the maximum sustainable yield to be altered in a way and at a rate that will result in the stock moving towards or above a level that can produce the maximum sustainable yield, having regard to the interdependence of stocks.
- (2A) For the purposes of setting a total allowable catch under this section, if the Minister considers that the current level of the stock or the level of the stock that can produce the maximum sustainable yield is not able to be estimated reliably using the best available information, the Minister must—
 - (a) not use the absence of, or any uncertainty in, that information as a reason for postponing or failing to set a total allowable catch for the stock; and
 - (b) have regard to the interdependence of stocks, the biological characteristics of the stock, and any environmental conditions affecting the stock; and
 - (c) set a total allowable catch—

- (i) using the best available information; and
 - (ii) that is not inconsistent with the objective of maintaining the stock at or above, or moving the stock towards or above, a level that can produce the maximum sustainable yield.
- (3) In considering the way in which and rate at which a stock is moved towards or above a level that can produce maximum sustainable yield under subsection (2)(b) or (c), or (2A) (if applicable), the Minister shall have regard to such social, cultural, and economic factors as he or she considers relevant.
- (4) The Minister may from time to time, by notice in the *Gazette*, vary any total allowable catch set for any quota management stock under this section by increasing or reducing the total allowable catch. When considering any variation, the Minister is to have regard to the matters specified in subsections (2), (2A) (if applicable), and (3).
- (5) Without limiting subsection (1) or subsection (4), the Minister may set or vary any total allowable catch at, or to, zero.
- (6) Except as provided in subsection (7), every setting or variation of a total allowable catch shall have effect on and from the first day of the next fishing year for the stock concerned.
- (7) After considering information about the abundance during the current fishing year of any stock listed in Schedule 2, and after having regard to the matters specified in subsections (2), (2A) (if applicable), and (3), the Minister may, by notice in the *Gazette*, increase the total allowable catch for the stock with effect from such date in the fishing year in which the notice is published as may be stated in the notice.
- (8) If a total allowable catch for any stock has been increased during any fishing year under subsection (7), the total allowable catch for that stock shall, at the close of that fishing year, revert to the total allowable catch that applied to that stock at the beginning of that fishing year; but this subsection does not prevent a variation under subsection (4) of the total allowable catch that applied at the beginning of that fishing year.
- (9) The Governor-General may from time to time, by Order in Council, omit the name of any stock from Schedule 2 or add to that schedule the name of any stock whose abundance is highly variable from year to year.
- (10) Subsection (1) does not require the Minister to set an initial total allowable catch for any quota management area and stock unless the Minister also proposes to set or vary a total allowable commercial catch for that area and stock under section 20.

14 Alternative total allowable catch for stock specified in Schedule 3

- (1) Notwithstanding anything in section 13, if satisfied, in the case of any quota management stock listed in Schedule 3, that the purpose of this Act would be better achieved by setting a total allowable catch otherwise than in accordance with subsection (2) of that section, the Minister may at any time, by notice in the *Gazette*, set in respect of the quota management area relating to the quota management stock a total allowable catch for that stock that he or she considers appropriate to achieve the purpose of this Act.
- (2) Every total allowable catch set under subsection (1) for any stock shall continue to apply in each fishing year for the stock unless varied under subsection (3).
- (3) The Minister may from time to time, by notice in the *Gazette*, vary any total allowable catch set under subsection (1) for any stock by increasing or reducing the total allowable catch.
- (4) Without limiting subsection (1) or subsection (3), the Minister may set or vary any total allowable catch at, or to, zero.
- (5) Except as provided in subsection (6), every setting or variation of a total allowable catch shall have effect on and from the first day of the next fishing year for the stock concerned.
- (6) After considering information about the abundance during the current fishing year of any stock listed in Schedule 3, the Minister may, by notice in the *Gazette*, increase the total allowable catch for the stock with effect from such date in the fishing year in which the notice is published as may be stated in the notice.

- (7) If a total allowable catch for any stock has been increased during any fishing year under subsection (6), the total allowable catch for that stock shall, at the close of that fishing year, revert to the total allowable catch that applied to that stock at the beginning of that fishing year; but this subsection does not prevent a variation under subsection (3) of the total allowable catch that applied at the beginning of that fishing year.
- (8) The Governor-General may from time to time, by Order in Council,—
- (a) omit the name of any stock from Schedule 3:
 - (b) add to that schedule the name of any stock if—
 - (i) it is not possible, because of the biological characteristics of the species, to estimate maximum sustainable yield; or
 - (ii) a national allocation for New Zealand has been determined as part of an international agreement; or
 - (iii) the stock is managed on a rotational or enhanced basis; or
 - (iv) the stock comprises 1 or more highly migratory species.

Section 14(8)(b)(ii): amended, on 1 October 2004, by section 4(1) of the Fisheries Amendment Act (No 3) 2004 (2004 No 76).

Section 14(8)(b)(iii): amended, on 1 October 2004, by section 4(2) of the Fisheries Amendment Act (No 3) 2004 (2004 No 76).

Section 14(8)(b)(iv): added, on 1 October 2004, by section 4(2) of the Fisheries Amendment Act (No 3) 2004 (2004 No 76).

14A Alternative total allowable catch for stocks specified by Order in Council

- (1) The Governor-General may from time to time, by Order in Council made on the recommendation of the Minister with the concurrence of the Minister responsible for the administration of the Environment Act 1986, apply section 14B to the quota management stock or stocks specified in the order.
- (2) No recommendation relating to any stock may be made under subsection (1) unless quota owners (**proposers**) who hold in the aggregate at least 95 000 000 quota shares in that stock propose to the Minister that he or she recommend the making of an Order in Council under subsection (1).
- (3) A proposal made under subsection (2) must—
 - (a) specify the concerns (if any) of the quota owners who do not support the proposal; and
 - (b) specify what arrangements are in place to address those concerns; and
 - (c) address the matters specified in subsection (4).
- (4) In considering making a recommendation under subsection (1), the Minister must have regard to the following:
 - (a) the need to commission appropriate research to assess the impact of the order on the stock; and

- (b) the need to implement measures to improve the quality of information about the stock; and
 - (c) whether it is appropriate to close areas to commercial fishing to reduce any sustainability risk to that stock; and
 - (d) the need to avoid any significant adverse effects on the aquatic environment of which the stock is a component.
- (5) No recommendation may be made under subsection (1) in relation to a proposal made under subsection (2) unless the Minister is satisfied that—
- (a) the stock is taken primarily as an incidental catch during the taking of 1 or more other stocks and is only a small proportion of the combined catch of the stock and other stock or stocks; and
 - (b) the total benefits of managing the stock at a level other than that permitted under section 13 outweigh the total costs; and
 - (c) managing the stock at a level other than that permitted under section 13 will have no detrimental effects on non-commercial fishing interests in that stock; and
 - (d) the stock is able to be maintained above a level that ensures its long-term viability; and
 - (e) the purpose of the Act would be better achieved by setting a total allowable catch otherwise than in accordance with section 13.

Section 14A: inserted, on 9 September 1999, by section 8 of the Fisheries Act 1996 Amendment Act 1999 (1999 No 101).

14B Alternative total allowable catch for certain stocks

- (1) Despite section 13, in the case of any quota management stock to which this section applies, the Minister must, by notice in the *Gazette*, set a total allowable catch for that stock in accordance with this section.
- (2) Subject to subsection (3), the Minister must set a total allowable catch under subsection (1) that is no greater than a level that will allow the taking of another stock or stocks in accordance with the total allowable catch and the total allowable commercial catch set for that other stock or stocks.
- (3) The Minister must set a total allowable catch that maintains the stock above a level that ensures its long-term viability.
- (4) When setting a total allowable catch under subsection (1), the Minister must be satisfied that quota owners have taken, and will continue to take, all reasonable steps (including, but not limited to, modifying fishing methods, fishing areas, and times of fishing) to minimise take of the stock.
- (5) Every total allowable catch set under subsection (1) for any stock continues to apply in each fishing year for the stock unless varied under subsection (6).

- (6) The Minister may from time to time, by notice in the *Gazette*, vary any total allowable catch set under subsection (1) for any stock by increasing or reducing the total allowable catch.
- (7) Without limiting subsection (1) or subsection (6), the Minister may set or vary any total allowable catch at, or to, zero.
- (8) The setting or variation of a total allowable catch under this section has effect on and from the first day of the next fishing year for the stock concerned.

Section 14B: inserted, on 9 September 1999, by section 8 of the Fisheries Act 1996 Amendment Act 1999 (1999 No 101).

14C Stock may be declared no longer subject to section 14B

- (1) The Governor-General may from time to time, by Order in Council made on the recommendation of the Minister, declare that section 14B no longer applies to the stock specified in the order.
- (2) If an order under subsection (1) is made in respect of any stock, the total allowable catch for the stock must be set under section 13 or section 14, as the case may require.

Section 14C: inserted, on 9 September 1999, by section 8 of the Fisheries Act 1996 Amendment Act 1999 (1999 No 101).

15 Fishing-related mortality of marine mammals or other wildlife

- (1) If a population management plan has been approved under section 14F of the Wildlife Act 1953 or section 3E of the Marine Mammals Protection Act 1978, the Minister—
 - (a) shall take all reasonable steps to ensure that the maximum allowable fishing-related mortality level set by the relevant population management plan is not exceeded:
 - (b) may take such other measures as he or she considers necessary to further avoid, remedy, or mitigate any adverse effects of fishing on the relevant protected species.
- (2) In the absence of a population management plan, the Minister may, after consultation with the Minister of Conservation, take such measures as he or she considers are necessary to avoid, remedy, or mitigate the effect of fishing-related mortality on any protected species, and such measures may include setting a limit on fishing-related mortality.
- (3) The Minister may require, or authorise the chief executive to require, any person or class of persons listed in section 189 to give to the Minister or the chief executive such information relating to fishing-related mortality as the Minister or chief executive, as the case may be, considers necessary, and may require, or authorise the chief executive to require, such information to be given in the approved manner and form.

- (4) The Minister may recommend the making of such regulations under section 298 as the Minister considers necessary or expedient for the purpose of implementing any measures referred to in subsection (1) or subsection (2) or subsection (3).
- (5) The Minister may, by notice in the *Gazette*, prohibit all or any fishing or fishing methods in an area either—
 - (a) under subsection (1)(a), for the purpose of ensuring the maximum allowable fishing-related mortality level set by the relevant population management plan is not exceeded; or
 - (b) under subsection (2), for the purpose of ensuring that any limit on fishing-related mortality is not exceeded.
- (6) Every person commits an offence and is liable to the penalty set out in section 252(5) who fails to comply with any notice given under subsection (5).

16 Emergency measures

- (1) If satisfied that there is or has been—
 - (a) an outbreak of disease; or
 - (b) a serious decline in the abundance or reproductive potential of 1 or more stocks or species; or
 - (c) a significant adverse change in the aquatic environment,—

the Minister may, by notice in the *Gazette*, impose such emergency measures in respect of any stocks or areas affected, or both, as the Minister considers necessary or expedient in the circumstances.
- (2) Before giving notice under subsection (1), the Minister shall, to the extent reasonably practicable in the circumstances, consult such persons or organisations as the Minister considers are representative of the classes of persons having an interest in the stock or area affected, including Maori, environmental, commercial, and recreational interests.
- (3) An emergency measure under this section may be in force for a period not exceeding 3 months and, after consultation by the Minister with such persons or organisations as the Minister considers are representative of those classes of persons having an interest in any stock or area affected, including Maori, environmental, commercial, and recreational interests, may be renewed once only for a further period not exceeding 9 months.
- (4) This section does not empower the Minister to reduce or cause to be reduced during the fishing year to which it relates any total allowable catch set under section 13 or section 14.
- (5) The Minister shall ensure that all emergency measures imposed under this section are publicly notified.
- (6) Every person commits an offence and is liable to the penalty set out in section 252(5) who contravenes any emergency measure imposed under this section.

- (7) For the purposes of this section, the term **emergency measures** means 1 or more of the following:
- (a) closing any area by prohibiting the harvesting of all or any fish, aquatic life, or seaweed in that area:
 - (b) restricting the methods that may be used to take any fish, aquatic life, or seaweed in any area:
 - (c) restricting the taking of any fish, aquatic life, or seaweed in any area by reference to the size, sex, or biological state of that fish, aquatic life, or seaweed and, for that purpose, setting or altering limits in respect of the size, sex, or biological state of any fish, aquatic life, or seaweed:
 - (d) setting or altering the fishing season for any stock in any area:
 - (e) imposing reporting requirements for any stock, area, or fishing method that are additional to reporting requirements for the time being in force under any other provision of this Act:
 - (f) requiring the disposal of any fish, aquatic life, or seaweed in a specified manner.

Part 4

Quota management system

Application of this Part

Heading: substituted, on 1 October 2004, by section 5 of the Fisheries Amendment Act (No 3) 2004 (2004 No 76).

17 Application of Part generally

- (1) This Part applies to every stock made subject to the quota management system by—
- (a) a declaration by the Minister by notice under section 18 (whether made before or after the commencement of section 5 of the Fisheries Amendment Act (No 3) 2004); or
 - (b) any provision of this Act or any other Act.
- (2) This Part does not apply to fishing authorised by a foreign fishing licence issued under Part 5.
- (3) For the purposes of subsection (1) and this Part, every species or class of fish, aquatic life or seaweed that was, immediately before the commencement of this Part, subject to Part 2A of the Fisheries Act 1983 is deemed to have been declared by the Minister by notice under section 18 to be subject to the quota management system.

Section 17: substituted, on 1 October 2004, by section 5 of the Fisheries Amendment Act (No 3) 2004 (2004 No 76).

17A Highly migratory species taken outside New Zealand fisheries waters

- (1) This section applies in relation to any stock of a highly migratory species (the **relevant stock**) that—
 - (a) is subject to the quota management system in any area outside New Zealand fisheries waters; and
 - (b) is taken in that area by an operator who is a New Zealand national using a New Zealand ship outside New Zealand fisheries waters.
- (2) Except as otherwise expressly provided in subsection (3) or elsewhere in this Part, this Part applies in relation to any relevant stock as if the area outside New Zealand fisheries waters in which it was taken were in fact within New Zealand fisheries waters.
- (3) This section does not apply to fish taken from a relevant stock if the commercial fisher concerned can prove to the satisfaction of the chief executive that the amount of fish concerned was taken under the authority of, and, where national allocations for the species exist, against the national allocation of, another State that has agreed to comply with all international fisheries organisation management measures for the species concerned to which New Zealand has agreed.
- (4) In any case where New Zealand law conflicts with the laws of a State in whose jurisdiction any relevant stock was taken, the laws of that other State prevail over New Zealand law.
- (5) Subsection (4) does not abrogate the obligations of the commercial fisher under this Part and Part 10.

Declaration of quota management system

Heading: inserted, on 1 October 2004, by section 5 of the Fisheries Amendment Act (No 3) 2004 (2004 No 76).

17B Determination that stock or species be subject to quota management system

- (1) The Minister must make a determination under subsection (2) if satisfied that the current management of a stock or species—
 - (a) is not ensuring the sustainability of the stock or species; or
 - (b) is not providing for the utilisation of the stock or species.
- (2) The Minister must determine to make the stock or species concerned subject to the quota management system, unless he or she determines that the purpose of this Act would be better met by setting 1 or more sustainability measures under section 11 (other than a total allowable catch set under section 13 or section 14).

- (3) Before determining whether the criteria in subsection (1)(a) or (b) have been satisfied, and before making a determination under subsection (2), the Minister must consult those persons or organisations considered by the Minister to be representative of the classes of persons who have an interest in the relevant determination.
- (4) As soon as practicable after making a determination under subsection (2), the Minister must give his or her reasons for the determination in writing to any persons or organisations consulted under subsection (3).
- (5) In the case of a stock or species listed in Schedule 4C,—
 - (a) the Minister may make a determination under subsection (2), regardless of whether or not the Minister is satisfied of the matters specified in subsection (1); and
 - (b) if the Minister determines not to make the stock or species concerned subject to the quota management system,—
 - (i) the Minister must notify that fact in the *Gazette*; and
 - (ii) the moratorium on the issue of fishing permits for that stock or species under section 93 ceases to apply with effect on and from the first day of the fishing year for that stock or species that follows the date of that notification; and
 - (iii) the stock or species concerned must be removed from Schedule 4C from the first day of that fishing year following the date of the notification, and the notice must amend Schedule 4C (including any appropriate consequential amendments) accordingly.
- (6) Despite subsection (2), the Minister may not determine under that subsection to make subject to the quota management system any stock of highly migratory species outside New Zealand fisheries waters except to give effect to—
 - (a) a national allocation to New Zealand by an international fisheries organisation in relation to that stock; or
 - (b) any other management measures to which New Zealand has agreed, made by an international fisheries organisation in relation to that stock.
- (7) The Minister must consult the Minister of Conservation before making a determination under this section in respect of any stock or species that is both—
 - (a) listed in Schedule 4C; and
 - (b) listed in any of the appendices to the Convention on International Trade in Endangered Species of Wild Flora and Fauna.

18 Declaration that new stock subject to quota management system

If the Minister determines under section 17B to make a stock subject to the quota management system, the Minister must, by notice in the *Gazette*, declare the stock to be subject to the quota management system on and from the first day of the fishing year stated in the notice.

Section 18: substituted, on 1 October 2004, by section 5 of the Fisheries Amendment Act (No 3) 2004 (2004 No 76).

19 Matters to be included in notice under section 18

- (1) Any notice given under section 18 of this Act shall—
 - (a) define the quota management area to which the notice relates by reference to an area or areas defined in Schedule 1 or in any other manner;
 - (b) state the fishing year in respect of the stock, which year shall be a 12-month period commencing on either 1 April or 1 October;
 - (c) state whether, for the stock concerned, the total allowable commercial catch is, and annual catch entitlements are, to be expressed in meat-weight or greenweight;
 - (d) make provision for such other matters as may be contemplated by this Act.
- (2) In defining the quota management area, the Minister shall, as far as practicable, maintain the same quota management areas for different species.
- (2A) In the case of a stock or species listed in Schedule 4C, the notice must amend that schedule by removing the stock or species concerned (and may make any amendments consequential on that removal) with effect on and from the date on which the stock becomes subject to the quota management system.
- (3) If the Minister is satisfied that any species in the waters around the Chatham Islands can, for fisheries management purposes, be managed effectively as a unit, a notice under section 18 may create around the Chatham Islands a separate quota management area for that species.
- (4) Subject to subsections (5), (5A), and (6),—
 - (a) no declaration made under section 18 shall be revoked; and
 - (b) no species or class of fish, aquatic life, or seaweed that was immediately before the commencement of this Part, subject to Part 2A of the Fisheries Act 1983, may be removed from the quota management system; and
 - (c) no quota management area shall be altered—
except by Act of Parliament.
- (5) Subsection (4) does not prevent—
 - (a) the Minister varying, by notice in the *Gazette*, any date set under section 18, if the variation is published before that date; or
 - (b) any alteration under section 25; or

- (c) any amendment to a notice under section 18 that involves a minor or technical correction only.
- (5A) Without limiting subsection (5)(c), the Minister may amend a declaration under section 18 at any time before the allocation of provisional catch history under section 36, if the declaration was made on the basis of incorrect or misleading information, or as a result of a mistake.
- (6) A provision in a regulation made under this Act, or in a notice given under section 15 or section 16 or a regulation made under section 186(2)(b), shall not be construed as altering a quota management area merely because it prohibits, limits, or restricts fishing in the quota management area.
- (7) Before making a declaration under section 18 or amending a declaration under subsection (5A), the Minister must consult the persons or organisations considered by the Minister to be representative of those classes of persons having an interest in the matters referred to in subsection (1).

20 Setting and variation of total allowable commercial catch

- (1) Subject to this section, the Minister shall, by notice in the *Gazette*, set in respect of the quota management area relating to each quota management stock a total allowable commercial catch for that stock, and that total allowable commercial catch shall continue to apply in each fishing year for that stock unless varied under this section, or until an alteration of the quota management area for that stock takes effect in accordance with sections 25 and 26.
- (2) The Minister may from time to time, by notice in the *Gazette*, vary any total allowable commercial catch set for any quota management stock by increasing or reducing that total allowable commercial catch.

- (3) Without limiting the generality of subsections (1) and (2), the Minister may set or vary a total allowable commercial catch at, or to, zero.
- (4) Every total allowable commercial catch set or varied under this section shall have effect on and from the first day of the next fishing year for the quota management stock concerned.
- (5) A total allowable commercial catch for any quota management stock shall not—
 - (a) be set unless the total allowable catch for that stock has been set under section 13 or section 14; or
 - (b) be greater than the total allowable catch set for that stock.

Compare: 1983 No 14 s 28C; 1990 No 29 s 5(1)

Section 20(1): amended, on 1 October 2001, by section 5 of the Fisheries (Remedial Issues) Amendment Act 1998 (1998 No 67).

21 Matters to be taken into account in setting or varying any total allowable commercial catch

- (1) In setting or varying any total allowable commercial catch for any quota management stock, the Minister shall have regard to the total allowable catch for that stock and shall allow for—
 - (a) the following non-commercial fishing interests in that stock, namely—
 - (i) Maori customary non-commercial fishing interests; and
 - (ii) recreational interests; and
 - (b) all other mortality to that stock caused by fishing.
- (2) Before setting or varying a total allowable commercial catch for any quota management stock, the Minister shall consult such persons and organisations as the Minister considers are representative of those classes of persons having an interest in this section, including Maori, environmental, commercial, and recreational interests.

where—

- a is the number of quota shares for the stock held by the person immediately before the reduction in the total allowable commercial catch for the stock takes effect; and
- b is the number of unencumbered quota shares for the stock owned by the Crown immediately before the reduction in the total allowable commercial catch for the stock takes effect; and

- (1) If the total allowable commercial catch for any stock has been increased under section 20 and any person (in this section called an **eligible person**) holds preferential allocation rights for that stock, the chief executive shall deduct from every person owning quota for that stock as at the date the increase takes effect the number of quota shares calculated in accordance with the following formula:

$$a \times \{1 - [b \div (b + c)]\} = d$$

where—

- a is the number of quota shares for the stock owned by any person immediately before the increase in the total allowable commercial catch takes effect; and
- b is the total allowable commercial catch for the stock (in kilogrammes) applying immediately before the increase takes effect; and

- b is the total of all preferential allocation rights for the stock (in kilogrammes); and
- c is the lesser of—
- (a) the amount of the increase in the total allowable commercial catch for the stock (in kilogrammes);
 - (b) the total of all preferential allocation rights for the stock (in kilogrammes); and

- (a) shall have effect only while that person continues to be registered on the Quota Register as the owner of shares for that stock, and those shares have been continuously owned by that person since the commencement of this section; and
 - (b) is personal to the eligible person who holds the right and is not transferable in any circumstances.
- (4) The amount of an eligible person's preferential allocation right must be reduced in accordance with the following formula:

 - b is the total of all preferential allocation rights for the stock (in kilogrammes)
 - c is the lesser of—
 - (a) the amount of the increase in the total allowable commercial catch for the stock (in kilogrammes);

- (4A) An eligible person's preferential allocation right expires if the amount of that right equals zero.
- (4B) An eligible person is not entitled to receive, in the aggregate under subsection (2), quota shares whose quota weight equivalent (calculated at the time of transfer of the relevant shares to the eligible person) exceeds the amount of preferential allocation right held by that person on the commencement of this section or on the date of allocation of quota to that person under section 337, as the case may be.
- (5) If the total allowable commercial catch for any stock is increased but there are no eligible persons in relation to that stock, no deductions or transfers of quota shall be made under this section.
- (6) The chief executive shall, as soon as practicable after any increase in the total allowable commercial catch for any stock takes effect, cause every quota owner affected by the increase to be notified of—

- (3) Subject to section 54, at the close of the last day of a fishing year in which a person's provisional catch history has been finally determined other than by the transfer of provisional catch history, the chief executive shall—

- (d) if any appeals result in persons being entitled to less individual transferable quota than the amount of provisional individual transferable quota that was transferred to the Crown under paragraph (a) and quota for that stock was allocated under section 47(1)(b), from the amount of quota remaining after making all allocations required under paragraph (c),—
- (i) calculate, on a pro rata basis, for all persons (other than persons subject to the appeals and Te Ohu Kai Moana Trustee Limited) who received an allocation under section 47(1)(b), the amount of additional quota to which each person is entitled up to the amount each person would receive under section 53(1); and

 - (ii) if the Crown does not have sufficient unencumbered provisional individual transferable quota to satisfy the person's entitlement to individual transferable quota for the stock, deduct from all quota owners (including the Crown in respect of its encumbered quota and unencumbered individual transferable quota) on a pro rata basis sufficient quota so that, after adding the quota so obtained to the Crown's unencumbered provisional individual transferable quota holdings, the Crown has sufficient unencumbered provisional individual transferable quota to satisfy the person's entitlement to quota for the stock, and then transfer to the person in the form of individual transferable quota such amount of quota as is sufficient to satisfy that entitlement.

67A Allocation of additional annual catch entitlement in case of underfishing

- (1) As soon as practicable after the 15th day after the end of the fishing year for each stock (**the first fishing year**), the chief executive must, for each person who, as at that date, owns annual catch entitlement for the first fishing year for that stock, compare—
 - (a) the annual catch entitlement for that stock (other than annual catch entitlement created under section 68) for the first fishing year owned by the person as at the close of the 15th day after the end of that fishing year; and
 - (b) the reported catch (if any) for that stock, calculated in accordance with regulations made for that purpose under section 297, taken by that person during the first fishing year.
- (2) If the amount of annual catch entitlement referred to in subsection (1)(a) is greater than the reported catch referred to in subsection (1)(b), the chief executive must—
 - (a) calculate the difference between that annual catch entitlement and that reported catch; and
 - (b) subject to subsection (5), allocate to the person an amount of annual catch entitlement for the stock for the fishing year after the first fishing year (**the second fishing year**) that is the lesser of the following:
 - (i) the amount calculated under paragraph (a);
 - (ii) 10% of the amount of annual catch entitlement referred to in subsection (1)(a).
- (3) This section does not apply to—
 - (a) a stock listed in Schedule 5A; or
 - (b) a stock for which the total allowable commercial catch at the beginning of the second fishing year is less than the total allowable commercial catch applying at the close of the first fishing year.
- (4) The chief executive must allocate annual catch entitlement under this section as soon as practicable after the 15th day after the end of the first fishing year.
- (5) The amount of annual catch entitlement allocated under subsection (2) must be rounded up or rounded down by the chief executive to the nearest kilogramme or, in the case of Foveaux Strait dredge oysters, to the nearest whole number of oysters.
- (6) Any annual catch entitlement allocated under subsection (2)—
 - (a) is in addition to any annual catch entitlement generated under section 66 or created under section 68; and
 - (b) has effect for all purposes under this Act on and from the date of the allocation.

- (7) The chief executive must, as soon as practicable after allocating any annual catch entitlement under subsection (2),—
- (a) notify every person to whom annual catch entitlement has been allocated under this section of the amount of annual catch entitlement allocated to that person; and
 - (b) ensure that the amount of annual catch entitlement allocated is registered on the Annual Catch Entitlement Register.

Section 67A: inserted, on 1 October 2001, by section 24 of the Fisheries Act 1996 Amendment Act 1999 (1999 No 101).

67B Amendments to Schedule 5A

- (1) The Governor-General may from time to time, by Order in Council made on the recommendation of the Minister, amend Schedule 5A by—
- (a) adding 1 or more stocks to that schedule;
 - (b) omitting 1 or more stocks from that schedule.
- (2) An Order in Council made under subsection (1) takes effect on and from the first day of the next fishing year for the stocks concerned.
- (3) Before recommending the making of an Order in Council under subsection (1), the Minister must consult with such persons or organisations as the Minister considers are representative of those classes of persons having an interest in the stocks subject to the order.

Section 67B: inserted, on 1 October 2000, by section 24 of the Fisheries Act 1996 Amendment Act 1999 (1999 No 101).

68 Minister to create additional annual catch entitlement if total allowable catch increased during fishing year

- (1) If—
- (a) the total allowable catch in respect of any stock is increased during a fishing year in accordance with section 13(7) or section 14(6); and
 - (b) the Minister believes that, after considering the matters referred to in section 21(1), he or she would have increased the total allowable commercial catch but for section 20(4),—

the Minister shall create an additional amount of annual catch entitlement for the stock that equals the amount by which he or she would have increased the total allowable commercial catch.

- (2) Subject to subsections (2A), (2B), and (3), the chief executive shall allocate to every person owning quota for the stock an amount of the annual catch entitlement created by the Minister under subsection (1) calculated in accordance with the following formula:

$$(a \div 100\,000\,000) \times b = c$$

where—

- a is the number of quota shares held by the quota owner on the date the increase in the total allowable catch takes effect; and
 - b is the amount (expressed in kilogrammes) of annual catch entitlement created by the Minister under subsection (1); and
 - c is the amount (expressed in kilogrammes) of annual catch entitlement to be allocated under this section to the quota owner.
- (2A) Where—
- (a) an increase in the total allowable catch for a highly migratory species is a result of an agreement, consistent with the rules or procedures established by the relevant international fisheries organisation, between New Zealand and another member of the international fisheries organisation; and
 - (b) the Minister is satisfied that the basis for the increase in the total allowable catch justifies a different allocation mechanism,—
- the Minister may determine how the additional annual catch entitlement is to be allocated in a manner different to that specified in subsection (2), taking into account the nature and basis of the agreement between New Zealand and the other member of the international fisheries organisation.
- (2B) The chief executive must allocate the additional catch entitlement in accordance with any determination of the Minister under subsection (2A).
- (3) Any annual catch entitlement calculated under subsection (2) or subsections (2A) and (2B) that any quota owner is entitled to be allocated under this section shall be rounded up or rounded down by the chief executive to ensure that—
- (a) the sum of all annual catch entitlements allocated under this section equals the amount of the increase that would have been made to the total allowable commercial catch but for section 20(4); and
 - (b) no quota owner holds part of a kilogramme of annual catch entitlement consequent upon such allocation.
- (4) The chief executive shall, after any rounding under subsection (3), notify every quota owner of the amount of annual catch entitlement allocated to that quota owner under this section.
- (5) Any annual catch entitlement so allocated shall have effect on and from the date of allocation and shall have the same characteristics as any annual catch entitlement allocated under section 67.
- (6) The chief executive shall, as soon as practicable after allocating annual catch entitlements in accordance with this section, notify the relevant Registrar of Annual Catch Entitlement of the amount of annual catch entitlement allocated to each quota owner.

72 Dumping of fish prohibited

- (1) No commercial fisher shall return to or abandon in the sea or any other waters any fish, aquatic life, or seaweed of legal size, or for which no legal size is set, that is subject to the quota management system.
- (2) Subsection (1) does not apply if the stock is listed in Schedule 6 and the commercial fisher complies with the requirements set out in that schedule.
- (3) Any commercial fisher who takes any fish, aquatic life, or seaweed subject to the quota management system that is not of legal size shall immediately return that fish, aquatic life, or seaweed, whether alive or dead, to the sea or waters from which the fish, aquatic life, or seaweed was taken.
- (4) Every person commits an offence and is liable to the penalty set out in section 252(3) who contravenes subsection (1) or subsection (3).

 - (b) the fish, aquatic life, or seaweed was returned or abandoned to ensure the safety of the vessel or any crew member; or

- (c) the following provisions were complied with, namely,—
- (i) a fishery officer or observer was present when the fish, aquatic life, or seaweed was taken; and
 - (ii) the fishery officer or observer authorised the return or abandonment of the fish, aquatic life, or seaweed; and
 - (iii) the commercial fisher returned or abandoned the fish, aquatic life, or seaweed under the supervision of the fishery officer or observer, and complied with any directions of the fishery officer or observer; and
 - (iv) the amount of fish, aquatic life, or seaweed was included in the returns for the appropriate period that are required to be made by the commercial fisher under this Act.

73 Offence to transfer used annual catch entitlement

[Repealed]

Section 73: repealed (without coming into force), on 9 September 1999, by section 85(d) of the Fisheries Act 1996 Amendment Act 1999 (1999 No 101).

74 Minimum holdings of annual catch entitlement

- (1) No commercial fisher may take any stock listed in Schedule 8 unless the fisher holds, at the time of the taking, the minimum amount of annual catch entitlement that is specified in that schedule in relation to that stock.
- (2) If,—
- (a) following the allocation of quota under section 44 or section 47 or section 52, the amount of quota owned by a commercial fisher does not generate an annual catch entitlement sufficient to satisfy the requirements of subsection (1); or
 - (b) following a reduction in the total allowable commercial catch, the amount of quota owned by a commercial fisher, as at the beginning of the fishing year in which the reduction takes effect, does not generate an annual catch entitlement sufficient to satisfy the requirements of subsection (1); or
 - (c) following an alteration of a quota management area under section 25, quota is allocated under section 26 to a commercial fisher and that quota

does not generate an annual catch entitlement sufficient to satisfy the requirements of subsection (1); or

- (d) following an increase in the amount of annual catch entitlement required to be held by virtue of an Order in Council under subsection (7), the amount of relevant quota owned by a commercial fisher, as at the beginning of the fishing year in which the increase takes effect, does not generate an annual catch entitlement sufficient to satisfy that requirement; or
- (e) following a deduction of quota shares from any person by the chief executive under section 52, the amount of relevant quota owned by a commercial fisher, as at the beginning of the fishing year immediately following the year in which the deduction occurs, does not generate an annual catch entitlement sufficient to satisfy the requirements of subsection (1),—

then the requirements of subsection (1) shall apply as if the minimum amount of annual catch entitlement required to be held was the amount of annual catch entitlement actually generated by the commercial fisher's relevant quota, and the commercial fisher may continue to take stock in each fishing year under the authority of the lesser amount of annual catch entitlement held by the commercial fisher unless the commercial fisher, in any particular fishing year, transfers any annual catch entitlement and thereby reduces the commercial fisher's annual catch entitlement holding for that fishing year to an amount lower than the holding generated by the commercial fisher's quota at the commencement of that year.

- (2A) As soon as is reasonably practicable after Te Ohu Kai Moana Trustee Limited has notified the chief executive of the entities that it has approved under section 34 of the Maori Fisheries Act 2004, the chief executive must identify the approved entities on the Annual Catch Entitlement Register.
- (2B) In the case of a quota holding that includes settlement quota, if the annual catch entitlement from that quota is transferred in full to a commercial fisher that is registered as an approved entity under subsection (2A), the annual catch entitlement must be treated as if it were not less than the minimum amount required under subsection (1).
- (3) Subsection (2) does not apply to a commercial fisher referred to in paragraph (b) or paragraph (c) or paragraph (d) or paragraph (e) of that subsection unless, immediately before becoming a person referred to in any of those paragraphs, the commercial fisher owned a number of quota shares that would generate an amount of annual catch entitlement sufficient to satisfy the relevant requirements of subsection (1).
- (4) If any commercial fisher is or becomes subject to subsection (2), that subsection shall continue to apply for only so long as the commercial fisher does not sell any of the relevant quota, however obtained.

- (5) If any commercial fisher is or becomes subject to subsection (2) and the commercial fisher subsequently purchases any relevant quota, the requirements of subsection (1) apply on and from the commencement of the next fishing year as if the minimum amount of annual catch entitlement required to be held was the amount of annual catch entitlement actually generated by the commercial fisher's quota (including such purchased quota) unless that amount exceeds the applicable amount specified in subsection (1); and subsection (2) shall cease to apply to that commercial fisher.
- (6) *[Repealed]*
- (7) Subject to subsections (8) and (9), the Governor-General may from time to time, by Order in Council, amend Schedule 8 by—
- (a) adding 1 or more stocks to that schedule:
 - (b) omitting 1 or more stocks from that schedule:
 - (c) specifying a minimum holding of annual catch entitlement for any stocks being added to that schedule:
 - (d) increasing or reducing a minimum holding of annual catch entitlement for any stocks listed in that schedule.
- (8) An Order in Council made under subsection (7) takes effect on the commencement of the following fishing year for the stocks concerned.
- (9) No Order in Council may be made under subsection (7) except on the recommendation of the Minister following consultation by the Minister with such persons or organisations as the Minister considers are representative of those classes of persons having an interest in the stocks subject to the order.
- (9A) The Minister may make a recommendation under subsection (9)—
- (a) on the Minister's own initiative; or
 - (b) on request by quota owners who hold in the aggregate at least 75 000 000 quota shares in that stock.
- (9B) A request under subsection (9A)(b) must—
- (a) specify the concerns (if any) of the quota owners who do not support the proposal; and
 - (b) specify what arrangements are in place to address those concerns.
- (10) *[Repealed]*
- (11) *[Repealed]*
- (12) If a person contravenes subsection (1) or subsection (2), the person commits an offence and is liable to the penalty set out in section 252(5).

Deemed values

75 Minister to set deemed value rates

- (1) For each quota management stock, the Minister must, by notice in the *Gazette*, set an interim deemed value rate and an annual deemed value rate for that

- stock, and those rates continue to apply in each fishing year for that stock unless varied under this section.
- (2) In setting an interim deemed value rate or an annual deemed value rate, the Minister—
- (a) must take into account the need to provide an incentive for every commercial fisher to acquire or maintain sufficient annual catch entitlement in respect of each fishing year that is not less than the total catch of that stock taken by that commercial fisher; and
 - (b) may have regard to—
 - (i) the desirability of commercial fishers landing catch for which they do not have annual catch entitlement; and
 - (ii) the market value of the annual catch entitlement for the stock; and
 - (iii) the market value of the stock; and
 - (iv) the economic benefits obtained by the most efficient commercial fisher, licensed fish receiver, retailer, or any other person from the taking, processing, or sale of the fish, aquatic life, or seaweed, or of any other fish, aquatic life, or seaweed that is commonly taken in association with the fish, aquatic life, or seaweed; and
 - (v) the extent to which catch of that stock has exceeded or is likely to exceed the total allowable commercial catch for the stock in any year; and
 - (vi) any other matters that the Minister considers relevant.
- (3) The Minister must set annual deemed value rates for a stock that are greater than interim deemed value rates set for that stock.
- (4) The Minister may set different annual deemed value rates in respect of the same stock which apply to different levels of catch in excess of annual catch entitlement.
- (5) The Minister may set an interim deemed value rate and an annual deemed value rate in respect of fish, aquatic life, or seaweed landed and received by a licensed fish receiver in the Chatham Islands that is different from the deemed value rate set in respect of fish, aquatic life, or seaweed of the same stock landed and received by a licensed fish receiver elsewhere.
- (6) The Minister must not—
- (a) have regard to the personal circumstances of any individual or class of person liable to pay the deemed value of any fish, aquatic life, or seaweed; or
 - (b) set separate deemed value rates in individual cases—
when setting an interim deemed value rate or an annual deemed value rate.
- (7) Any interim or annual deemed value rate set under this section may be varied by the Minister in the same manner, and any rate set or varied under this sec-

tion takes effect on the first day of the next fishing year for the stock concerned.

Section 75: substituted, on 1 May 2001, by section 26 of the Fisheries Act 1996 Amendment Act 1999 (1999 No 101).

Section 75(1): amended, on 1 October 2004, by section 29 of the Fisheries Amendment Act (No 3) 2004 (2004 No 76).

75A Requirement to consult in relation to deemed values

Before setting any interim deemed value rate or annual deemed value rate under section 75, the Minister must, if practicable, consult persons or organisations that the Minister considers represent classes of persons who have an interest in the stock, including Maori, recreational, commercial, and environmental interests.

Section 75A: inserted, on 1 May 2001, by section 26 of the Fisheries Act 1996 Amendment Act 1999 (1999 No 101).

75B Limitation period for challenges to deemed values

- (1) A court must not hear or determine, and no person may make or commence, an application or other proceeding in respect of a decision or purported decision of the Minister to set an interim deemed value rate or an annual deemed value rate unless the application is, or the proceedings are, made or commenced within 3 months after the date on which the decision, or purported decision, is notified in the *Gazette*.
- (2) This section applies despite any other enactment or rule of law.

Section 75B: inserted, on 1 May 2001, by section 26 of the Fisheries Act 1996 Amendment Act 1999 (1999 No 101).

76 Catch to be counted against annual catch entitlement

- (1) In this section and sections 76A, 78, 79, and 80, unless the context otherwise requires, **commercial fisher** means any person who, at any time during the relevant fishing year,—
 - (a) held a fishing permit or a high seas fishing permit; or
 - (b) was a person using a New Zealand ship who, in the judgment of the chief executive, held a valid authority to fish against New Zealand's national allocation of highly migratory species in the national fisheries jurisdiction of a foreign country.
- (1A) As soon as practicable after the 15th day of each month (other than the first month) of every fishing year, the chief executive must, in accordance with regulations made for that purpose under section 297, in respect of every commercial fisher,—
 - (a) compare—

- (i) the annual catch entitlement for each stock (if any) for the fishing year owned by that commercial fisher as at the close of the 15th day of that month; and
 - (ii) the reported catch for that stock (in kilogrammes) calculated in accordance with regulations made for that purpose under section 297, taken by that commercial fisher during the fishing year up to the end of the preceding month; and
 - (b) calculate, in respect of each stock, whether that commercial fisher's annual catch entitlement referred to in paragraph (a)(i) exceeds that commercial fisher's reported catch referred to in paragraph (a)(ii).
- (1B) As soon as practicable after the 15th day after the end of the fishing year for each stock, the chief executive must, in accordance with regulations made for that purpose under section 297, in respect of every commercial fisher,—
 - (a) compare—
 - (i) the annual catch entitlement for each stock (if any) for the relevant fishing year owned by that commercial fisher as at the close of the 15th day after the end of the fishing year; and
 - (ii) the reported catch for that stock (in kilogrammes), calculated in accordance with regulations made for that purpose under section 297, taken by that commercial fisher during the fishing year up to the end of the fishing year; and
 - (b) calculate, in respect of each stock, whether that commercial fisher's annual catch entitlement referred to in paragraph (a)(i) exceeds that commercial fisher's reported catch referred to in paragraph (a)(ii).
- (2) Following the calculation referred to in subsection (1A), the chief executive shall calculate the amount of interim deemed value that is to be demanded from, or remitted to, that commercial fisher in accordance with regulations made for the purpose under section 297 and thereafter shall demand or remit the amount, as the case may be.
- (2A) Subject to subsection (2B), following the calculation referred to in subsection (1B), the chief executive must calculate the amount of annual deemed value (if any) that is to be demanded from the commercial fisher in accordance with regulations made for the purpose under section 297, and must demand the amount.
- (2B) In calculating the amount of annual deemed value to be demanded from a commercial fisher, the chief executive must credit the commercial fisher with interim deemed value amounts demanded in respect of the relevant stock in the relevant fishing year (other than demanded amounts that have been remitted under subsection (2)).
- (2C) For the sole purpose of determining an appropriate annual deemed value under this section, if a fisher to whom subsection (1B) applies holds no annual catch

- entitlement for a stock in respect of which the Minister has set different deemed value rates under section 75(4), that fisher is deemed to hold 1 kilogramme of annual catch entitlement for that stock.
- (3) A demand for an amount of interim deemed value made by the chief executive under this section may be satisfied by—
- (a) payment of the sum of money so demanded; or
 - (b) acquiring, for the relevant fishing year and within the time limit specified in section 134, annual catch entitlement for the relevant stock; or
 - (c) *[Repealed]*
 - (d) any combination of those options.
- (3A) A demand for an amount of annual deemed value made by the chief executive under this section must be satisfied by payment of the sum of money so demanded.
- (4) Every person who is liable to satisfy any deemed value amount demanded under this section is required to satisfy the demand whether or not an offence has been committed against this Act.
- (5) All deemed value amounts are to be satisfied within 20 days after the demand is made and, if being satisfied by payment of money, the amount is payable to the chief executive and shall be held by the Crown on trust for the commercial fisher until the trust ends in accordance with this section or the deemed value amount is remitted to the commercial fisher.
- (6) Any deemed value amount paid to the chief executive under this section in respect of fish, aquatic life, or seaweed taken in any fishing year shall cease to be held on trust and become the property of the Crown on the later of—
- (a) the close of the 15th day of the third month after the end of the fishing year; or
 - (ab) 5 working days after the chief executive gives written notice to a commercial fisher under section 76A(6) of the chief executive's decision to grant or refuse catch balancing relief; or
 - (b) 5 working days after the final determination of any request for a review by a commercial fisher of a notification under section 80.
- (7) Notwithstanding section 69 of the Public Finance Act 1989, no interest is payable in respect of any amount that is held on trust under this section, whether remitted to any commercial fisher or not.

76A Application for catch balancing relief

- (1) In this section and section 76B,—

close of registration, in relation to a stock, means the close of the 15th day after the end of the fishing year for the stock

original owner means the person who, at the close of registration, owned the specific amount of annual catch entitlement for which the chief executive grants catch balancing relief under this section

specific amount means the specific amount of annual catch entitlement for which the chief executive grants relief.

- (2) A commercial fisher may, at any time before the close of the 15th day of the third month after the end of a fishing year, apply to the chief executive for catch balancing relief for any amount of annual catch entitlement for a stock for the fishing year.
- (3) The chief executive may grant an applicant catch balancing relief for any specific amount of annual catch entitlement that is equal to or less than the amount for which the applicant applied.
- (4) The chief executive may grant catch balancing relief for a specific amount of annual catch entitlement only if he or she is satisfied that—
- (a) the applicant has received written notice from the chief executive that, at the close of registration, the applicant's reported catch for the stock for

- the fishing year exceeded the applicant's annual catch entitlement for the stock for the fishing year by at least the specific amount; and
- (b) at the close of registration, the original owner owned at least the specific amount of annual catch entitlement; and
 - (c) either—
 - (i) the applicant believed on reasonable grounds that at least the specific amount of annual catch entitlement had been transferred to the applicant before the close of registration; or
 - (ii) at least the specific amount of annual catch entitlement would have been transferred to, or owned by, the applicant before the close of registration, if not for a mistake made by the applicant or any other person; and
 - (d) at the close of registration, the original owner's annual catch entitlement for the stock for the fishing year exceeded the original owner's reported catch for the stock for the fishing year by at least the specific amount; and
 - (e) the original owner has consented in writing to the applicant being treated as the owner of at least the specific amount of annual catch entitlement on and from the close of registration; and
 - (f) it would be unjust to refuse to grant the applicant catch balancing relief for the specific amount of annual catch entitlement; and
 - (g) if an amount of additional annual catch entitlement has been allocated to the original owner under section 67A, but would not have been allocated if the original owner had not owned the specific amount of annual catch entitlement on the close of registration, adequate arrangements have been made to transfer that amount of additional annual catch entitlement to the Crown.
- (5) In considering whether to grant an applicant catch balancing relief, the chief executive may request and consider any information that he or she thinks relevant, such as—
- (a) information about transfers of annual catch entitlement to or from the applicant or the original owner, or about other transactions involving the applicant or the original owner;
 - (b) information about the applicant's usual arrangements for acquiring annual catch entitlement to balance the applicant's reported catch;
 - (c) any submissions by the applicant that it would be unjust to refuse catch balancing relief.
- (6) The chief executive must give written notice, to the applicant and the original owner, of the chief executive's decision to grant or refuse catch balancing relief.

- (7) Any deemed value amount demanded by the chief executive that may be affected by an application for catch balancing relief remains payable despite the application having been made.

Section 76A: inserted, on 20 April 2010, by section 5 of the Fisheries Amendment Act 2010 (2010 No 16).

76B Effect of granting catch balancing relief

- (1) If the chief executive decides to grant an applicant catch balancing relief for a specific amount of annual catch entitlement under section 76A, the chief executive must—
- (a) recalculate the annual deemed value amount (if any) for which the applicant is liable, by performing the comparison and calculations referred to in section 76(1B) and (2A) as if the applicant had owned the specific amount of annual catch entitlement at the close of registration; and
 - (b) include in the written notice given to the applicant under section 76A(6) notice of the annual deemed value amount, recalculated under paragraph (a), for which the applicant is liable; and
 - (c) remit to the applicant the difference between the annual deemed value amount previously calculated and the amount recalculated under paragraph (a).
- (2) For the purpose of section 79(1),—
- (a) any reduction in the annual deemed value amount owed by an applicant that results from the recalculation under subsection (1)(a) takes effect on the date that written notice of the recalculated amount is given under subsection (1)(b); and
 - (b) if a fishing permit ceases to be suspended because of the recalculation, the suspension ends no earlier than the date the written notice of the recalculated amount is given.

Section 76B: inserted, on 20 April 2010, by section 5 of the Fisheries Amendment Act 2010 (2010 No 16).

77 Over-fishing thresholds

- (1) The Governor-General may from time to time, by Order in Council made on the recommendation of the Minister,—
- (a) specify quota management stocks to which over-fishing thresholds apply;
 - (b) set over-fishing thresholds for those stocks;
 - (c) specify, for each of those stocks, whether a tolerance level applies and, if so, specify the tolerance level.
- (2) An over-fishing threshold for a stock—
- (a) is a specified percentage in excess of the annual catch entitlement held by a commercial fisher for the stock to which it relates:

- (b) takes effect on the first day of the fishing year that commences next after the relevant order under subsection (1) is made.
- (3) An order made under subsection (1) may set different over-fishing thresholds for different stocks.
- (4) A tolerance level for a stock—
 - (a) is a specified amount or an amount calculated in accordance with a formula set out in the order:
 - (b) takes effect on the first day of the fishing year that commences next after the relevant order under subsection (1) is made.
- (5) An order made under subsection (1) may set different tolerance levels for different stocks.
- (6) Before making a recommendation under subsection (1), the Minister must consult with such persons or organisations as the Minister considers are representative of those classes of persons having an interest in the over-fishing thresholds to which the recommendation relates.

Section 77: substituted, on 1 August 2001, by section 28(1) of the Fisheries Act 1996 Amendment Act 1999 (1999 No 101).

77A Matters to be taken into account when recommending over-fishing thresholds

Before making a recommendation under section 77(1), the Minister may have regard to—

- (a) the effectiveness of deemed values in encouraging commercial fishers to acquire or maintain sufficient annual catch entitlement to cover their total catch; and
- (b) the particular need, in relation to target stocks, to encourage commercial fishers to acquire or maintain sufficient annual catch entitlement to cover their total catch; and
- (c) actual or potential risks to the sustainability of the stock; and
- (d) any other matters that the Minister considers relevant.

Section 77A: inserted, on 1 August 2001, by section 28(1) of the Fisheries Act 1996 Amendment Act 1999 (1999 No 101).

78 Catch in excess of over-fishing thresholds

- (1) This section applies where, following the calculation referred to in section 76(1A),—
 - (a) a commercial fisher's reported catch for a stock exceeds the commercial fisher's annual catch entitlement for the stock; and
 - (b) that excess is equal to or greater than the over-fishing threshold for the stock, and, where a tolerance level applies to the stock, is greater than that tolerance level.

- (2) In such a case the current fishing permit of the commercial fisher and of any person included with the commercial fisher under subsection (11), and also any permit subsequently issued to the commercial fisher or included person, are each to be treated as containing a condition prohibiting the taking of any fish, aquatic life, or seaweed in the geographic area that is the quota management area for the stock concerned.
- (3) The condition takes effect as from the close of the month in which the calculation referred to in section 76(1A) is done.
- (4) The chief executive must—
 - (a) notify the imposition of the condition under subsection (2) to the commercial fisher concerned and any included person of whom the chief executive is aware; and
 - (b) record on the Permit Register details of the imposition of the condition,—but any delay or failure to give that notification or make that record does not affect the imposition of the condition.
- (5) A commercial fisher who has requested a review under section 80(2) or lodged an appeal under section 80(6) may, pending determination of the review or appeal, apply to the District Court for an order removing or amending a condition imposed under this section, and the court may make such an order subject to such sureties and conditions as the court may specify.
- (6) Despite subsection (2), the chief executive may—
 - (a) approve the taking of fish, aquatic life, or seaweed in an area by a person who would otherwise be subject to the condition imposed by subsection (2); and
 - (b) impose as part of the approval any conditions that he or she considers necessary to reduce the risk of the person taking the stock for which the over-fishing threshold was exceeded.
- (7) Conditions imposed under subsection (6) may relate to stocks, area, quantities, methods, the use or non-use of vessels, the specific vessel or types of vessels that may be used, and types and amounts of fishing gear, or otherwise.
- (8) No person may take any fish, aquatic life, or seaweed in contravention of a condition imposed by subsection (2) unless—
 - (a) the person has obtained the prior approval of the chief executive to take fish, aquatic life, or seaweed in that area; and
 - (b) the taking is in accordance with any conditions imposed by the chief executive.
- (9) Conditions imposed by subsection (2) or under subsection (6) cease to apply—
 - (a) when the commercial fisher referred to in subsection (1) owns an amount of annual catch entitlement for the stock equal to or greater than

- the commercial fisher's total reported catch of that stock in the fishing year; or
- (b) at the close of the relevant fishing year,—
whichever happens first.
- (10) If a person takes any fish, aquatic life, or seaweed in contravention of any conditions imposed by subsection (2) or under subsection (6), the person commits an offence and is liable to the penalty set out in section 252(3).
- (11) For the purposes of subsection (2), a person or entity is to be treated as a person included with the commercial fisher if the person or entity is—
- (a) a subsidiary of the commercial fisher within the meaning of section 5 of the Companies Act 1993; or
- (b) a company of which the commercial fisher is a subsidiary within the meaning of section 5 of the Companies Act 1993; or
- (c) a partnership or unincorporated joint venture that would be a subsidiary of the commercial fisher, or of which the commercial fisher would be a subsidiary, if the partnership or joint venture were incorporated as a company with shareholdings corresponding to the interests, including returns, of the partners in the partnership or participants in the joint venture.
- (12) Despite subsection (11),—
- (a) Te Ohu Kai Moana Trustee Limited, a mandated iwi organisation, or members of an iwi, are not to be regarded as being included with any other person, whether or not that person is a mandated iwi organisation, merely because any of them has the status of being—
- (i) a beneficiary or income shareholder of Aotearoa Fisheries Limited; or
- (ii) a beneficiary of—
- (A) Te Putea Whakatupu Trust; or
- (B) Te Wai Maori Trust; or
- (C) Te Ohu Kai Moana; and
- (ab) Aotearoa Fisheries Limited is not to be regarded as being included with any other person merely because the other person holds, or benefits from, income shares in Aotearoa Fisheries Limited; and
- (b) no person is regarded as being included with another person merely because either or both of those persons would be included with Te Ohu Kai Moana Trustee Limited but for paragraph (a); and
- (c) no bank registered under the Reserve Bank of New Zealand Act 1989 is to be regarded as being included with any other person merely because the bank has, in the ordinary course of its business as a financier, been granted any interest in quota owned by that person.

78A Other persons may be subjected to same conditions as commercial fisher with catch in excess

- (1) Where a fishing permit of a person (**person A**) is treated as being subject to a condition under section 78(2), the chief executive may impose the same condition on any fishing permit held by or subsequently issued to another person (**person B**) if the chief executive believes, on reasonable grounds specified on oath in writing, that—
 - (a) person B is, in respect of commercial fishing, in substance person A; or
 - (b) person B has, in substance, control of the commercial fishing of person A that led to the condition being imposed under section 78(2); or
 - (c) person B is allowing person A to conduct commercial fishing under person B's permit for the purpose of assisting person A to fish despite the condition treated as being contained in person A's permit.
- (2) Without limiting subsection (1), in forming the belief referred to in that subsection, the chief executive may have regard to the following matters:
 - (a) shareholdings in, debentures over, or directorships of, any company that has an interest (whether direct or indirect) in person B or person A;
 - (b) any trust that has a relationship to person B or person A;
 - (c) family, domestic, and business relationships between—
 - (i) person B and person A; and
 - (ii) persons having an interest in person B or person A or in companies or trusts of the kind referred to in paragraph (a) or paragraph (b);
 - (d) whether person B is accustomed to following the instructions of person A;
 - (e) whether person B is accustomed to acting in a manner consistent with advancing the interests of person A.

- (3) Whether any of paragraphs (a), (b), and (c) of subsection (1) apply may be determined without regard to the form of the persons or entities comprising persons A and B.
- (4) The chief executive must—
 - (a) give notice to person B of the condition imposed under subsection (1) and a copy of the grounds for imposing the condition as given on oath; and
 - (b) record on the Permit Register details of the imposition of the condition.
- (5) Any condition imposed under subsection (1) takes effect from the date of notification.
- (6) Subsections (6), (7), (8), and (10) of section 78 apply to person B and person B's fishing permit as if the condition had been imposed on person B under subsection (2) of that section (and conditions imposed on person B under this section or section 78(6)(b) are not affected by decisions under section 78(6) in relation to person A).
- (7) Any conditions imposed on person B under this section or section 78(6) cease to apply—
 - (a) when the commercial fisher referred to in section 78(1) complies with section 78(9)(a); or
 - (b) at the close of the relevant fishing year,—whichever happens first.
- (8) If—
 - (a) a person (**person B**) is, in respect of commercial fishing, in substance the same person as a person (**person A**) who has had a condition imposed on their fishing permit by section 78(2); and
 - (b) person B, knowing that the condition exists, conducts commercial fishing that would be a breach of the condition imposed on person A's fishing permit,—then each of person A and person B commits an offence and is liable to the penalty set out in section 252(3).
- (9) If a person (**person B**) knowingly allows another person (**person A**) to conduct commercial fishing under person B's permit for the purpose of assisting person A to fish despite the condition treated by section 78(2) as being contained in person A's permit, and person A does so, then each of person A and person B commits an offence and is liable to the penalty set out in section 252(3).

Section 78A: inserted, on 1 October 2001, by section 14(1) of the Fisheries Amendment Act 2001 (2001 No 65).

78B Removal of conditions on other persons

- (1) A person who has had a condition imposed on his or her fishing permit under section 78(2) in their capacity as a person included with a commercial fisher

under section 78(11), or a person who has had a condition imposed under section 78A(1), may apply to the District Court to have the condition removed either permanently or pending final determination of the application on the grounds that the situation relied upon under section 78(2) and (11) or section 78A(1) never existed or no longer exists.

- (2) In determining an application under subsection (1) totally or partially in favour of the applicant, the District Court may remove or amend the condition either totally or partially and on such sureties or conditions as the court considers appropriate.

Section 78B: inserted, on 1 October 2001, by section 14(1) of the Fisheries Amendment Act 2001 (2001 No 65).

Section 78B(1): amended, on 1 March 2017, by section 261 of the District Court Act 2016 (2016 No 49).

79 Suspension of permit for non-payment of deemed value

- (1) If the total amount of deemed values owed by any commercial fisher exceeds \$1,000 and has not been satisfied within the time limit specified in section 76(5), the current fishing permit of the commercial fisher and any person included with the commercial fisher under subsection (5), and any permit subsequently issued to the commercial fisher or included person, are, on the expiration of that time limit, to be treated as being suspended until the total amount of all outstanding deemed values owed by the commercial fisher is \$1,000 or less.

- (2) The chief executive must—

- (a) notify every suspension or cessation of suspension of a fishing permit under subsection (1) to the commercial fisher concerned and any included person of whom the chief executive is aware; and
- (b) record on the Permit Register details of any suspension or cessation of suspension of a fishing permit under subsection (1);—

but any delay or failure to give that notification or make that record does not affect the suspension or cessation.

- (3) A fishing permit suspended under this section does not authorise any person to take any fish, aquatic life, or seaweed under the authority of that permit, but all other provisions of this Act continue to apply as if the fishing permit had not been suspended.
- (4) A commercial fisher who has requested a review under section 80(2) or lodged an appeal under section 80(6) may, pending determination of the review or appeal, apply to the District Court for an order lifting any suspension imposed under this section, and the court may make such an order subject to such sureties and conditions as the court may specify.
- (5) For the purposes of subsections (1) and (2), a person or entity is to be treated as a person included with the commercial fisher if the person or entity is—

- (a) a subsidiary of the commercial fisher within the meaning of section 5 of the Companies Act 1993; or
 - (b) a company of which the commercial fisher is a subsidiary within the meaning of section 5 of the Companies Act 1993; or
 - (c) a partnership or unincorporated joint venture that would be a subsidiary of the commercial fisher, or of which the commercial fisher would be a subsidiary, if the partnership or joint venture were incorporated as a company with shareholdings corresponding to the interests, including returns, of the partners in the partnership or participants in the joint venture.
- (6) Despite subsection (5),—
- (a) Te Ohu Kai Moana Trustee Limited, a mandated iwi organisation, or members of an iwi are not to be regarded as being included with another person (whether or not that person is a mandated iwi organisation), merely because any of them is—
 - (i) a beneficiary or income shareholder of Aotearoa Fisheries Limited; or
 - (ii) a beneficiary of—
 - (A) Te Ohu Kai Moana;
 - (B) Te Putea Whakatupu Trust;
 - (C) Te Wai Maori Trust; and
 - (b) Aotearoa Fisheries Limited is not to be regarded as being included with another person merely because the other person holds, or benefits from, income shares in Aotearoa Fisheries Limited; and
 - (c) no bank registered under the Reserve Bank of New Zealand Act 1989 is to be regarded as being included with any other person merely because the bank has, in the ordinary course of its business as a financier, been granted any interest in quota owned by that person.

Section 79(6)(b): substituted, on 29 November 2004, by section 214 of the Maori Fisheries Act 2004 (2004 No 78).

79A Suspension of fishing permit of other persons

- (1) Where a fishing permit of a person (**person A**) is suspended under section 79(1), the chief executive may suspend the fishing permit of another person (**person B**) if the chief executive believes, on reasonable grounds specified on oath in writing, that—

- (a) person B is, in respect of commercial fishing, in substance person A; or
 - (b) person B has, in substance, control of person A in respect of person A's obligations under any of subsections (3), (3A), and (5) of section 76; or
 - (c) person B is allowing person A to conduct commercial fishing under person B's permit, for the purpose of assisting person A to fish despite the suspension of person A's fishing permit.
- (2) Without limiting subsection (1), in forming the belief referred to in that subsection, the chief executive may have regard to the following matters:
- (a) shareholdings in, debentures over, or directorships of, any company that has an interest (whether direct or indirect) in person B or person A;
 - (b) any trust that has a relationship to person B or person A;
 - (c) family, domestic, and business relationships between—
 - (i) person B and person A; and
 - (ii) persons having an interest in person B or person A or in companies or trusts of the kind referred to in paragraph (a) or paragraph (b):
 - (d) whether person B is accustomed to following the instructions of person A;
 - (e) whether person B is accustomed to acting in a manner consistent with advancing the interests of person A.
- (3) Whether any of paragraphs (a), (b), and (c) of subsection (1) apply may be determined without regard to the form of the persons or entities comprising persons A and B.
- (4) The chief executive must—
- (a) give notice to person B of the suspension of a fishing permit under subsection (1), and a copy of the grounds of suspension as given on oath; and
 - (b) record on the Permit Register details of the suspension under subsection (1).
- (5) The suspension imposed under subsection (1) takes effect from the date of notification.
- (6) A fishing permit suspended under this section does not authorise any person to take any fish, aquatic life, or seaweed under the authority of that permit, but all other provisions of this Act continue to apply as if the fishing permit had not been suspended.
- (7) A suspension of a fishing permit under subsection (1) ceases to be of effect once the total amount of all outstanding deemed values owed by the person who incurred the deemed value liability referred to in section 79(1) is \$1,000 or less.

- (8) If—
- (a) a person (**person B**) is, in respect of commercial fishing, in substance the same person as a person (**person A**) whose fishing permit is suspended under section 79(1); and
 - (b) person B, knowing of the suspension, is conducting commercial fishing,—
- then each of person A and person B commits an offence and is liable to the penalty set out in section 252(3).
- (9) If a person (**person B**) knowingly allows another person (**person A**) to conduct commercial fishing under person B's permit for the purpose of assisting person A to fish despite the suspension of person A's permit under section 79(1), and person A does so, then each of person A and person B commits an offence and is liable to the penalty set out in section 252(3).

 - (b) whose permit has been suspended under section 79A(1); or
 - (c) who has been refused a permit under section 91(6)(c).
- (2) Such a person may apply to the District Court to—
- (a) direct that the suspension be removed, either permanently or pending the final determination of the application; or
 - (b) direct that the permit be issued,—
- on the grounds that the situation relied upon under section 79(1) and (5) or section 79A(1) never existed or no longer exists.
- (3) In determining an application under subsection (1) totally or partially in favour of the applicant, the District Court may—
- (a) remove the suspension either totally or partially;
 - (b) direct the removal of the suspension, or the issue of the permit, on such sureties or conditions as the court considers appropriate.

- (3) Subsection (2) does not prevent any person making an application under section 164 for a correction of a register.
- (4) *[Repealed]*
- (5) The chief executive shall, if satisfied that a valid request for review has been received and sufficient information has been provided, conduct a review of the notification and, as soon as practicable, determine the matters that are the subject of the review and issue a new notification containing all matters specified in subsection (1) and incorporating the results of that determination.
- (6) Any commercial fisher who is dissatisfied with any new notification issued by the chief executive under subsection (5) may, within 20 working days after the date specified for the purpose in the notification of the decision, appeal to the District Court against the decision (which appeal may relate to any matters that were the subject of the commercial fisher's request for review) and the following provisions apply in relation to every such appeal:

Part 5

Foreign licensed access

81 Calculation of foreign allowable catch

- (1) The Minister shall from time to time determine—
 - (a) the portion of the total allowable commercial catch for a quota management stock that may be taken within the exclusive economic zone; and
 - (b) the portion of the total catch limit (if any) for any stock not subject to the quota management system (including any highly migratory stock) that may be taken within the exclusive economic zone; and
 - (c) the foreign allowable catch for a stock in the exclusive economic zone.
- (2) The foreign allowable catch for any quota management stock shall be the lesser of—
 - (a) the portion of the total allowable commercial catch for the time being determined for the stock under subsection (1)(a);
 - (b) the Crown's available annual catch entitlement for the stock.
- (3) For the purposes of subsection (2)(b), the Crown's available annual catch entitlement for a stock is the Crown's holding of annual catch entitlement for the stock that—
 - (a) is generated from unencumbered quota held by the Crown; and
 - (b) remains unsold after the Crown has offered the annual catch entitlement for sale to persons entitled to own quota.
- (4) The foreign allowable catch for any stock not subject to the quota management system shall be the lesser of—
 - (a) the portion of the total catch limit (if any) for the time being determined under subsection (1)(b);
 - (b) a catch that is sustainable after taking into account the total catch limit (if any) for, and the domestic harvesting capacity of, the stock.
- (5) For the purposes of this section, the term **domestic harvesting capacity**, in relation to any stock not subject to the quota management system, means the total domestic commercial catch reported as having been taken in the previous fishing year for the stock by New Zealand fishing vessels within New Zealand fisheries waters, with an appropriate adjustment to allow for—
 - (a) any changes in the harvesting capacity of the domestic commercial fishing fleet due to—
 - (i) recent investment in fishing vessels and fishing equipment; and
 - (ii) catch trends; and
 - (b) non-commercial take and scientific take.

- (6) If the foreign allowable catch for any quota management stock has been determined under subsection (1)(c) in accordance with subsection (2), the Minister shall set aside an amount of the Crown's holding of annual catch entitlement for the stock that is equivalent to the amount of the foreign allowable catch, and such annual catch entitlement shall not be used for fishing.
- (7) Nothing in this section applies in relation to any highly migratory species.

82 Apportionment of foreign allowable catch for foreign fishing vessels

- (1) The Minister may from time to time apportion, among countries other than New Zealand, the foreign allowable catch in respect of any stock (other than any highly migratory species) within the exclusive economic zone.
- (2) In making an apportionment under subsection (1), the Minister shall have regard to—
- (a) the degree to which fishing vessels of countries other than New Zealand have engaged in fishing within the exclusive economic zone; and
 - (b) the degree to which such countries have co-operated with New Zealand in fisheries research and in the identification of fish stocks within the exclusive economic zone; and
 - (c) the degree to which such countries have co-operated with New Zealand in the conservation and management of fisheries resources within the exclusive economic zone, and in the enforcement of New Zealand law relating to such resources; and

 - (ii) the positions and activities of the vessel:
 - (k) management controls regarding fishing-related mortality of protected species:

No exercise or purported exercise by the Minister of any power conferred on the Minister by section 83(6) or section 86(2) shall be liable to be challenged, reviewed, quashed, or called into question in any court on the ground that the conditions for the exercise of the power by the Minister had not arisen or had ceased.

 - (a) no further proceedings shall be taken under this section by the Minister:
 - (b) nothing in this section shall be construed to prevent the subsequent filing of any charging document in respect of the alleged offence, or the conviction of the person of the offence by a court, or the imposition of any penalty under any enactment or forfeiture under this Act on such a conviction.

 - (b) the number of quota shares to be mortgaged is not subject to any caveat or other mortgage registered under this Act.
- (5) A mortgage under this Act shall have effect as a security, but shall not operate as a transfer of the quota shares charged.

Section 136(1A): inserted, on 29 November 2004, by section 214 of the Maori Fisheries Act 2004 (2004 No 78).

Section 136(4): amended, on 9 September 1999, pursuant to section 90(2) of the Fisheries Act 1996 Amendment Act 1999 (1999 No 101).

137 Mortgages of annual catch entitlement prohibited

No annual catch entitlement shall be subject to a mortgage and no mortgage over any annual catch entitlement has any effect for the purpose of this Act.

138 Variation of terms of mortgage by endorsement

The number of quota shares in any stock secured by a mortgage under this Act may be increased or reduced by a memorandum of variation in the approved form.

Compare: 1989 No 148 s 75

138A Assignment of mortgages

A mortgagee may assign to another person the mortgagee's rights, interests, and obligations under that mortgage by a memorandum of assignment in the approved form.

Section 138A: inserted, on 1 October 2001, by section 15 of the Fisheries (Remedial Issues) Amendment Act 2001 (2001 No 33).

139 Rights of mortgagee

- (1) Without limiting the covenants, conditions, and powers that may, by agreement between the mortgagor and the mortgagee, be contained in a mortgage of quota shares, a mortgage of quota shares shall confer on the mortgagee, in the event of default by the mortgagor in the performance or observance of any covenant contained or implied in the mortgage, the power to sell in whole or in part the number of quota shares subject to the mortgage.
- (2) A power of sale under this section is subject to the following provisions:

- (a) a mortgagee's power of sale over any provisional individual transferable quota shares is not exercisable until the provisional individual transferable quota shares become individual transferable quota shares:
- (b) a mortgagee's power of sale over any quota shares is not exercisable if the quota is subject to a Crown caveat under section 58 or section 61 or section 214:
- (c) the restrictions on a mortgagee's power of sale defined in section 140A.

Compare: 1989 No 148 s 78

Section 139(2)(c): added, on 29 November 2004, by section 214 of the Maori Fisheries Act 2004 (2004 No 78).

140 Restriction on exercise of power of sale

- (1) No power conferred by any mortgage to sell any quota shares shall, subject to section 141, become or be deemed to have become exercisable because of—
 - (a) any default in the payment of any money secured by any mortgage of any quota shares; or
 - (b) any default in the performance or observance of any other covenant expressed or implied in the mortgage,—

unless and until the mortgagee serves on the mortgagor a notice that complies with the requirements of this section, and (in any case if the default complained of is capable of remedy) the mortgagor fails to remedy the default before the date stated in the notice.
- (2) Every notice under subsection (1) shall inform the mortgagor of—
 - (a) the nature and extent of the default complained of; and
 - (b) the date by which the mortgagor is required to remedy the default (if it is capable of remedy); and
 - (c) the rights that the mortgagee will be entitled to exercise if the default is not remedied within the stated period.
- (3) Any notice given under subsection (1) that does not comply with subsection (2) shall be void unless the failure does not materially prejudice the interests of the mortgagor.
- (4) The date to be stated in the notice shall be not earlier than 1 month from the service of the notice.
- (5) In addition to giving the notice under subsection (1), if any of the quota shares are subject to a caveat registered under this Act and the mortgagee has actual notice of the name and address of the caveator, the mortgagee shall forthwith, after serving notice on the quota owner, serve a copy of the notice on the caveator; but failure to comply with this subsection does not in itself prevent any of the powers referred to in subsection (1) from becoming or being deemed to have become exercisable and does not prevent any money secured by a mortgage from becoming or being deemed to have become payable.

- (5A) In addition to giving the notice under subsection (1), if any of the quota shares are subject to a settlement quota interest registered under section 152A, the mortgagee must, after serving notice on the quota owner, immediately serve a copy of the notice on Te Ohu Kai Moana Trustee Limited; however, failure to comply with this subsection does not in itself prevent money secured by a mortgage from being payable, or being deemed to have become payable.
- (6) For the purposes of subsection (1), the entering into of a contract to sell or the granting of an option to purchase quota shares shall not be regarded as the exercise of a power of sale if the contract or option is conditional (either solely or together with other conditions) on the failure by the owner to remedy a default specified in a notice under this section served either before or after the contract is entered into or the option is granted, as the case may be.
- (7) A mortgagee who exercises a power of sale of quota shares owes a duty to the mortgagor to take reasonable care to obtain the best price reasonably obtainable as at the time of sale.
- (8) Notwithstanding any enactment or rule of law or anything contained in any deed or instrument by or under which the power of sale is conferred,—
- (a) it is not a defence to proceedings against a mortgagee for a breach of the duty imposed by subsection (7) that the mortgagee was acting as the mortgagor's agent or under a power of attorney from the mortgagor;
 - (b) a mortgagee is not entitled to compensation or indemnity from the mortgaged quota shares or the mortgagor in respect of any liability incurred by the mortgagee arising from a breach of the duty imposed by subsection (7).

Section 140(5A): inserted, on 29 November 2004, by section 214 of the Maori Fisheries Act 2004 (2004 No 78).

140A Restriction on transfer by mortgagee

- (1) Despite sections 139 and 140, if a mortgagee exercises a power of sale over settlement quota, the mortgagee must transfer the settlement quota in accordance with sections 161 (except subsection (2)) and 163 of the Maori Fisheries Act 2004 as if the mortgagee were a mandated iwi organisation.
- (2) Despite section 145(1), the transfer of quota under subsection (1) does not remove the settlement quota interest.

Section 140A: inserted, on 29 November 2004, by section 214 of the Maori Fisheries Act 2004 (2004 No 78).

141 Court may permit mortgagee to exercise power before period expired

- (1) Any court may, on the application of a mortgagee made *ex parte* or otherwise as the court thinks fit, grant leave to the mortgagee to exercise any of the powers of the owner of the quota shares concerned at any time before the date specified in the notice given under section 140.

- (2) Leave may be granted under subsection (1) either unconditionally or upon and subject to such conditions as the court thinks fit.

Compare: 1952 No 51 ss 92(1AA), 103A, 103B; 1989 No 148 s 81

142 Restriction on action to recover deficiency

- (1) If at any time the mortgagee exercises the power of sale and the amount realised is less than the amount owing under the covenant to repay expressed or implied in the mortgage, no action to recover the amount of the deficiency, or any part of the deficiency, shall be commenced by the mortgagee against any person (other than the mortgagor of the quota at the time of the exercise of the power of sale) unless the mortgagee, at least 1 month before the exercise of the power of sale, serves on that person notice of the mortgagee's intention to exercise the power of sale and to commence action against that person to recover the amount of the deficiency in the event of the amount realised being less than the amount owing under the covenant to repay.
- (2) A court may, on the application of a mortgagee made *ex parte* or otherwise as the court thinks fit, waive wholly or in part the 1 month period referred to in subsection (1).

Compare: 1989 No 148 s 82

143 No contracting out

Sections 139 to 142 shall have effect notwithstanding any provision to the contrary in any mortgage or other agreement.

Compare: 1989 No 148 s 83

144 Application of purchase money

The purchase money from the sale by the mortgagee of any quota shares shall be applied as follows:

- (a) first, in payment of the expenses occasioned by the sale:
- (b) secondly, in payment of the money then due or owing to the mortgagee:
- (c) thirdly, to the Crown in payment of any levies under Part 14 that are the subject of a caveat registered over the quota:
- (d) fourthly, the surplus (if any) shall be paid to the mortgagor.

Compare: 1989 No 148 s 84

145 Transfer by mortgagee

- (1) Notwithstanding section 148, upon the registration of any transfer executed by a mortgagee for the purpose of the sale of any quota shares by the mortgagee, ownership of the quota shares passes to and vests in the purchaser, freed and discharged from all liability on account of the mortgage.
- (1A) Subsection (1) does not limit section 152B(3) and (4).

- (2) Upon registration of such a transfer, every caveat over the quota shares being transferred lapses in respect of those shares, and the interests of the mortgagor expressed in that transfer to be transferred pass to and vest in the purchaser, freed and discharged of the interest claimed by the caveator.
- (3) The chief executive shall make on the register any entry necessary to show that the mortgage has been discharged and that all caveats over the quota have lapsed, in respect of the shares so transferred.
- (4) If a mortgagee gives a receipt in writing in respect of any money arising under an exercise of the power of sale conferred by this Part, or any money or securities comprised in the mortgagee's mortgage or arising under the mortgage, the receipt is a sufficient discharge for that money or those securities, and a person paying or transferring the money or securities to the mortgagee shall not be concerned to inquire whether any money remains due under the mortgage or to see to the application of the money or securities so paid or transferred.

146 Discharge of mortgage

- (1) If the sum secured by a mortgage has been paid off either wholly or in part, or if for any other reason the mortgagee has become bound to discharge the mortgage, the mortgagee must execute a memorandum of discharge in the approved form.
- (2) A memorandum of discharge, when registered under this Act, discharges the quota shares from the mortgage to the extent specified in that memorandum.

Caveats

147 Types of caveats

A caveat may, subject to section 149(2), be registered over any quota shares or any annual catch entitlement—

- (a) at the request of any person with the consent of the owner of those quota shares or that annual catch entitlement;
- (b) at the direction of the chief executive under section 58 or section 61 or section 214 or section 268;

Section 147(b): amended, on 1 October 2001, by section 43 of the Fisheries Act 1996 Amendment Act 1999 (1999 No 101).

148 Effect of caveat

- (1) While a caveat remains in force, the chief executive shall not make any entry on a register having the effect of mortgaging or transferring the quota shares, or transferring the annual catch entitlement, to which the caveat relates.
- (2) Subsection (1) does not prevent the chief executive from making any entry if the caveator consents to the making of that entry, and the consent is in the approved form and relates to—
 - (a) a transfer of the caveated quota shares or annual catch entitlement, and constitutes a withdrawal of the caveat in respect of the quota shares or annual catch entitlement transferred; or
 - (b) a mortgage of the caveated quota shares.

 - (a) the owner of the quota shares or annual catch entitlement concerned and any other person jointly lodge a caveat in the approved form with the chief executive; or
 - (b) a court directs or orders that a caveat be lodged; or
 - (c) the chief executive directs that a caveat be lodged under section 58 or section 61 or section 214 or section 268,—the chief executive shall register under section 159 that caveat against the quota or annual catch entitlement if the caveat meets all the requirements of this Act for registration.
- (2) Except as otherwise provided by this Act, the chief executive shall register under section 159 a caveat over quota shares or annual catch entitlement, as the case may be, only if—
 - (a) the person whose quota shares or annual catch entitlement is being caveated owns a number of quota shares or an amount of annual catch entitlement, as the case may be, in the relevant stock equal to or greater than the number of quota shares or amount of annual catch entitlement over which the caveat is to be registered; and
 - (b) in the case of a caveat lodged under subsection (1)(a), the quota shares or annual catch entitlement to be the subject of the caveat are not already subject to any other caveat registered under this Act.

150 Caveat may be withdrawn

- (1) Any caveat may, either as to the whole or any part of the quota or annual catch entitlement protected by the caveat, be withdrawn by the person whose interests are protected by the caveat or by the person's attorney or agent under a written authority.
- (2) Every withdrawal of a caveat shall be in the approved form.
- (3) If a caveat has been registered for a stated period, the caveat shall lapse at the close of that period.

Compare: 1989 No 148 ss 94, 96

151 Procedure for removal of caveat

- (1) The owner of quota or annual catch entitlement against which a caveat has been lodged may apply to any court for an order that the caveat be removed.
- (2) The court, upon proof that notice of the application has been served on the caveator or the person on whose behalf the caveat has been lodged, may—

 - (c) impose such sureties and conditions as it thinks fit:
 - (d) make such other orders in respect of the caveat as it thinks fit.

Settlement quota interests

Heading: inserted, on 29 November 2004, by section 214 of the Maori Fisheries Act 2004 (2004 No 78).

152A Registration

The chief executive must register a settlement quota interest against the quota shares notified by Te Ohu Kai Moana Trustee Limited as soon as reasonably practicable after receiving—

- (a) a request in accordance with section 160(2) of the Maori Fisheries Act 2004; and
- (b) payment by Te Ohu Kai Moana Trustee Limited of the prescribed fee.

Section 152A: inserted, on 29 November 2004, by section 214 of the Maori Fisheries Act 2004 (2004 No 78).

152B Effect of registering settlement quota interest against quota shares

- (1) Between the appointed day and the time when a settlement quota interest is registered against the quota specified by Te Ohu Kai Moana Trustee Limited, there must be no dealings with the quota shares listed in Schedule 1 of the Maori Fisheries Act 2004, except for their transfer to Te Ohu Kai Moana Trustee Limited.
- (2) While there is a settlement quota interest registered against quota, no transfer of that quota may be registered unless—
 - (a) the transfer is—
 - (i) authorised by Te Ohu Kai Moana Trustee Limited and the owner under section 160 of the Maori Fisheries Act 2004; or
 - (ii) ordered by the court; or
 - (b) the settlement quota is forfeit to the Crown under section 61 or sections 255 to 255E.
- (3) To avoid doubt, a settlement quota interest remains in force if settlement quota is transferred, unless the settlement quota interest is removed in accordance with section 160 of the Maori Fisheries Act 2004.
- (4) However, the fact that a settlement quota interest is registered against the quota does not exclude the quota from being subject to a mortgage or caveat under this Act.
- (5) Subsection (2) overrides section 145(1).

Section 152B: inserted, on 29 November 2004, by section 214 of the Maori Fisheries Act 2004 (2004 No 78).

*Effect of decrease in or cancellation of quota***153 Effect of decrease in quota shares**

- (1) This section applies where—

- (a) either—
 - (i) a transfer of quota shares in any stock to any person holding preferential allocation rights under section 23 necessitates a deduction of quota shares under that section from any quota owner; or
 - (ii) any determination of an appeal under section 51 necessitates a deduction of quota shares under section 52 from any quota owner (other than the quota owner involved in the appeal); and
 - (b) as a result of the deduction, the number of quota shares in that stock held by the owner is less than the total number of quota shares in that stock subject to a mortgage or caveat immediately before the deduction.
- (2) Where a deduction referred to in subsection (1)(a)(i) is required and there are 1 or more mortgages or caveats registered over the quota shares owned by the quota owner, then the number of shares secured by any 1 or more of those mortgages or caveats must be reduced in the manner prescribed by regulations made under this Act in accordance with the quota share reduction principles set out in subsection (4).
- (3) If any quota owner, or the chief executive, has appealed under section 51 in relation to any stock, then, when the appeal is finally determined,—
- (a) all provisional individual transferable quota for the relevant stock owned by that quota owner must, at the chief executive's direction, be transferred to the Crown in accordance with section 52; and
 - (b) if any provisional individual transferable quota shares so transferred were subject to a mortgage or caveat, the mortgage or caveat ceases to apply to the transferred provisional individual transferable quota shares, and instead applies to the same number of individual transferable quota shares transferred to that quota owner under section 52 (if possible); and
 - (c) if, as a result of such transfers, the number of individual transferable quota shares in the relevant stock owned by the quota owner is less than the number of provisional individual transferable quota shares that were subject to the mortgage or caveat and there are 1 or more mortgages or caveats registered over the provisional individual transferable quota shares owned by the quota owner, then the number of shares secured by any 1 or more of those mortgages or caveats must be reduced in the manner prescribed by regulations made under this Act in accordance with the quota share reduction principles set out in subsection (4).
- (4) The quota share reduction principles referred to in subsections (2) and (3)(c) are as follows:
- (a) the total number of shares subject to any individual caveat may not exceed the total number of shares owned by the quota owner concerned:
 - (b) the total number of shares subject to all caveats may exceed the total number of shares owned by the quota owner:

- (c) where quota shares subject to caveats must be reduced, they must be reduced to equal the number of shares owned by the quota owner:
 - (d) the total number of shares subject to all mortgages may not exceed the total number of shares owned by the quota owner concerned:
 - (e) the total number of shares subject to all mortgages and caveats that were registered prior to the last registered mortgage may not exceed the total number of shares owned by the quota owner:
 - (f) where quota shares subject to mortgages must be reduced, the shares subject to the most recently registered mortgage must be reduced first, and the shares subject to any earlier registered mortgage may only be reduced after the first-mentioned mortgage has had its security eliminated completely by the reduction.
- (5) The chief executive must make on the register any entry necessary to show that the quota has been transferred in accordance with section 23 or section 52, and alter any relevant mortgage or caveat accordingly.

Section 153: substituted, on 1 October 2004, by section 42 of the Fisheries Amendment Act (No 3) 2004 (2004 No 76).

154 Effect of alteration of quota management area

- (1) If 1 or more quota management areas are altered under section 25,—
- (a) any mortgage or caveat over any quota that is cancelled as a result of the alteration shall cease to apply to the cancelled quota and shall instead apply to the new quota allocated to the quota owner concerned as a result of that alteration; and
 - (b) the number of new quota shares to be charged or caveated shall bear the same proportion to the quota owner's total shareholding of those shares as the number of shares charged or caveated immediately before the alteration bore to the quota owner's total shareholding for the areas affected by the alteration.
- (2) The chief executive shall make on the register any entry necessary to show that the quota has been transferred in accordance with section 26, and alter any relevant mortgage or caveat accordingly.
- (3) Subject to subsections (1) and (2), an alteration of 1 or more quota management areas does not affect any rights under a caveat or mortgage of quota shares.

Section 154(2): amended, on 9 September 1999, pursuant to section 90(2) of the Fisheries Act 1996 Amendment Act 1999 (1999 No 101).

- (b) the need to maintain adequate deterrents against the commission of such offences.

255 Interpretation—forfeiture provisions

associated quota, in relation to a person convicted of an offence (the **offender**), means—

- (a) all quota owned by any person that is a subsidiary of the offender within the meaning of section 5 of the Companies Act 1993;
- (b) if the offender has, in the fishing year in which the offence was committed or the immediately preceding fishing year,—
 - (i) gained any benefit from any quota of a stock (**stock A**), including annual catch entitlement generated from that quota; and
 - (ii) that quota is owned by any company of which the offender is a subsidiary (the **holding company**) or any other subsidiary of the holding company,—

all quota of every stock of the species or group of species comprised in stock A owned by the holding company or any subsidiary of the holding company at the date the offence was committed:

- (c) any other quota not owned by the holding company or any subsidiary of the offender or any subsidiary of the holding company, but over which the offender had effective control at the date the offence was committed

property used in the commission of the offence—

- (a) means any vessel, vehicle or other conveyance, fishing gear, implement, appliance, material, container, goods, equipment, or thing used in respect of the commission of the offence (whether or not seized under section 207); but
- (b) does not include any quota, associated quota, or annual catch entitlement

quota—

- (a) in relation to a person convicted of an offence (the **offender**), means the number of quota shares or amount of provisional catch history for each stock that is equivalent to the number or amount owned by the offender for the stock at the date of the commission of the offence; and
- (b) in relation to any other person, means the number of quota shares for each stock that is equivalent to the number owned by the person for the stock at the date the offender committed the offence

serious non-commercial offence means any offence specified as such in regulations made under section 297.

- (2) For the purposes of paragraph (c) of the definition of associated quota, a person may have had effective control of quota whether or not the person had—
 - (a) any legal or equitable interest in the quota; or
 - (b) any right, power, or privilege in connection with the quota,—and those interests, rights, powers, or privileges may be determined without regard to the form of any entities in which they are owned or held.
- (3) Without limiting the generality of paragraph (c) of the definition of associated quota, in determining whether an offender had effective control over quota, regard may be had to the following matters:
 - (a) shareholdings in, debentures over, or directorships of, any company that had an interest (whether direct or indirect) in the quota:
 - (b) any trust that had a relationship to the quota:

- (4) No quota owned by Te Ohu Kai Moana Trustee Limited is associated quota for the purposes of this Act.
- (5) No quota owned by any person is associated quota merely because of any relationship between that person and Te Ohu Kai Moana Trustee Limited or any other person and Te Ohu Kai Moana Trustee Limited.
- (6) No quota owned by any bank registered under the Reserve Bank of New Zealand Act 1989 is to be regarded as associated quota merely because the bank has in the ordinary course of its business as a financier become the owner of that quota.
- (7) No quota owned by any licensed NBDT (within the meaning of section 4(1) of the Non-bank Deposit Takers Act 2013) is to be regarded as associated quota merely because the licensed NBDT has in the ordinary course of its business as a financier become the owner of that quota.

265 Under-recovery and over-recovery of costs

Without limiting anything in section 264, but subject to section 265A, the Minister must, in recommending the making of an order under section 264, have regard to the costs of any conservation services or fisheries services incurred by the Crown in a previous financial year that—

- (a) were either—
 - (i) not recovered or not recoverable, in whole or in part, by a fee, charge, or levy relating to such services that was previously imposed under this Act or the Fisheries Act 1983; or
 - (ii) over-recovered or over-recoverable, in whole or in part, by a fee, charge, or levy relating to such services that was previously imposed under this Act or the Fisheries Act 1983; and
- (b) the Minister has not previously had regard to under this section.

Section 265: substituted, on 19 March 2004, by section 9 of the Fisheries Amendment Act 2004 (2004 No 6).

265A Recommendation for levies payable in year commencing 1 October 2003 and subsequent years

- (1) In making a recommendation under section 264 in respect of levies payable in the year commencing on 1 October 2003, the Minister must—
 - (a) first calculate the amount for each stock or other grouping that it would be appropriate to recover by way of levy as if there had been no under-recovery or over-recovery of costs in respect of the period 1 October 1994 to 30 September 2002 (both dates inclusive); and
 - (b) then—

- (i) in the case of a stock or other grouping listed in Part 1 of Schedule 9A, reduce that amount by the relevant settlement sum allocated to that stock or other grouping in that schedule (or by so much of that settlement sum as would reduce the amount to zero):
 - (ii) in the case of a stock listed in Part 2 of Schedule 9A, increase that amount by the relevant settlement sum allocated to that stock in that schedule.
- (2) In making a recommendation under section 264 in respect of levies payable in the year commencing on 1 October 2004 or in any subsequent year, the Minister must, after calculating the amount that it would be appropriate to recover by way of levy under this Part for any stock or other grouping listed in Part 1 of Schedule 9A, reduce that amount by the remaining balance (if any) of the relevant settlement sum allocated to that stock or other grouping in that schedule (or by so much of the remaining balance as would reduce the amount to zero).
- (3) Where the Minister makes a recommendation under section 264 that results in an order amending a levy already fixed for any stock or other grouping for the relevant year, the Minister must, where appropriate,—
 - (a) adjust the remaining balance of the settlement sum for the stock or other grouping to reflect the effect of the amendment when taken together with the effect of the original levy order; and
 - (b) notify the adjusted remaining balance in accordance with subsection (5).
- (4) For the purposes of subsections (2) and (3) and section 265, in determining the amount that it would be appropriate to recover by way of levy under this Part before the need (if any) to reduce that amount by any settlement sum,—
 - (a) no regard is to be had to the costs of any conservation services or fisheries services incurred by the Crown in any financial year ending on or before 30 September 2002, except where those costs arise from conservation services or fisheries services initiated but not completed on or before 30 September 2002; and
 - (b) any previous reduction in the amount of costs recovered or recoverable by virtue of the application of any settlement sum under this section must be disregarded.
- (5) The Minister must, as soon as practicable after making any recommendation under section 264 that has required an adjustment under subsection (1)(b)(i) or subsection (2) or subsection (3), state the remaining balance for each affected stock or grouping by notice in the *Gazette*.
- (6) In this section, **remaining balance** means the relevant settlement sum allocated to a stock or grouping under Part 1 of Schedule 9A less all previous adjustments made by the Minister under subsection (1)(b)(i) or subsection (2), and less or plus (as the case may require) any adjustments made by the Minister under subsection (3).

Schedule 1A

Agreement for the implementation of the provisions of the United Nations Convention on the Law of the Sea of 10 December 1982 relating to the conservation and management of straddling fish stocks and highly migratory fish stocks

s 2(1)

Schedule 1A: inserted, on 1 May 2001, by section 34 of the Fisheries Act 1996 Amendment Act (No 2) 1999 (1999 No 103).

The States Parties to this Agreement,

Recalling the relevant provisions of the United Nations Convention on the Law of the Sea of 10 December 1982,

Determined to ensure the long-term conservation and sustainable use of straddling fish stocks and highly migratory fish stocks,

Resolved to improve cooperation between States to that end,

Calling for more effective enforcement by flag States, port States and coastal States of the conservation and management measures adopted for such stocks,

Seeking to address in particular the problems identified in chapter 17, programme area C, of Agenda 21 adopted by the United Nations Conference on Environment and Development, namely, that the management of high seas fisheries is inadequate in many areas and that some resources are overutilized; noting that there are problems of unregulated fishing, over-capitalization, excessive fleet size, vessel reflagging to escape controls, insufficiently selective gear, unreliable databases and lack of sufficient cooperation between States,

Committing themselves to responsible fisheries,

Conscious of the need to avoid adverse impacts on the marine environment, preserve biodiversity, maintain the integrity of marine ecosystems and minimize the risk of long-term or irreversible effects of fishing operations,

Recognizing the need for specific assistance, including financial, scientific and technological assistance, in order that developing States can participate effectively in the conservation, management and sustainable use of straddling fish stocks and highly migratory fish stocks,

Convinced that an agreement for the implementation of the relevant provisions of the Convention would best serve these purposes and contribute to the maintenance of international peace and security,

Affirming that matters not regulated by the Convention or by this Agreement continue to be governed by the rules and principles of general international law,

Have agreed as follows:

Part I

Part II

Conservation and management of straddling fish stocks and highly migratory fish stocks

Article 5—General principles

In order to conserve and manage straddling fish stocks and highly migratory fish stocks, coastal States and States fishing on the high seas shall, in giving effect to their duty to cooperate in accordance with the Convention:

- (a) adopt measures to ensure long-term sustainability of straddling fish stocks and highly migratory fish stocks and promote the objective of their optimum utilization;
- (b) ensure that such measures are based on the best scientific evidence available and are designed to maintain or restore stocks at levels capable of producing maximum sustainable yield, as qualified by relevant environmental and economic factors, including the special requirements of developing States, and taking into account fishing patterns, the interdependence of stocks and any generally recommended international minimum standards, whether subregional, regional or global;
- (c) apply the precautionary approach in accordance with article 6;
- (d) assess the impacts of fishing, other human activities and environmental factors on target stocks and species belonging to the same ecosystem or associated with or dependent upon the target stocks;

- (e) adopt, where necessary, conservation and management measures for species belonging to the same ecosystem or associated with or dependent upon the target stocks, with a view to maintaining or restoring populations of such species above levels at which their reproduction may become seriously threatened;
- (f) minimize pollution, waste, discards, catch by lost or abandoned gear, catch of non-target species, both fish and non-fish species, (hereinafter referred to as non-target species) and impacts on associated or dependent species, in particular endangered species, through measures including, to the extent practicable, the development and use of selective, environmentally safe and cost-effective fishing gear and techniques;
- (g) protect biodiversity in the marine environment;
- (h) take measures to prevent or eliminate overfishing and excess fishing capacity and to ensure that levels of fishing effort do not exceed those commensurate with the sustainable use of fishery resources;
- (i) take into account the interests of artisanal and subsistence fishers;
- (j) collect and share, in a timely manner, complete and accurate data concerning fishing activities on, inter alia, vessel position, catch of target and non-target species and fishing effort, as set out in Annex I, as well as information from national and international research programmes;
- (k) promote and conduct scientific research and develop appropriate technologies in support of fishery conservation and management; and
- (l) implement and enforce conservation and management measures through effective monitoring, control and surveillance.

Article 6—Application of the precautionary approach

1. States shall apply the precautionary approach widely to conservation, management and exploitation of straddling fish stocks and highly migratory fish stocks in order to protect the living marine resources and preserve the marine environment.
2. States shall be more cautious when information is uncertain, unreliable or inadequate. The absence of adequate scientific information shall not be used as a reason for postponing or failing to take conservation and management measures.
3. In implementing the precautionary approach, States shall:
 - (a) improve decision-making for fishery resource conservation and management by obtaining and sharing the best scientific information available and implementing improved techniques for dealing with risk and uncertainty;
 - (b) apply the guidelines set out in Annex II and determine, on the basis of the best scientific information available, stock-specific reference points and the action to be taken if they are exceeded;

- (c) take into account, inter alia, uncertainties relating to the size and productivity of the stocks, reference points, stock condition in relation to such reference points, levels and distribution of fishing mortality and the impact of fishing activities on non-target and associated or dependent species, as well as existing and predicted oceanic, environmental and socio-economic conditions; and
 - (d) develop data collection and research programmes to assess the impact of fishing on non-target and associated or dependent species and their environment, and adopt plans which are necessary to ensure the conservation of such species and to protect habitats of special concern.
- 4. States shall take measures to ensure that, when reference points are approached, they will not be exceeded. In the event that they are exceeded, States shall, without delay, take the action determined under paragraph 3(b) to restore the stocks.
- 5. Where the status of target stocks or non-target or associated or dependent species is of concern, States shall subject such stocks and species to enhanced monitoring in order to review their status and the efficacy of conservation and management measures. They shall revise those measures regularly in the light of new information.
- 6. For new or exploratory fisheries, States shall adopt as soon as possible cautious conservation and management measures, including, inter alia, catch limits and effort limits. Such measures shall remain in force until there are sufficient data to allow assessment of the impact of the fisheries on the long-term sustainability of the stocks, whereupon conservation and management measures based on that assessment shall be implemented. The latter measures shall, if appropriate, allow for the gradual development of the fisheries.
- 7. If a natural phenomenon has a significant adverse impact on the status of straddling fish stocks or highly migratory fish stocks, States shall adopt conservation and management measures on an emergency basis to ensure that fishing activity does not exacerbate such adverse impact. States shall also adopt such measures on an emergency basis where fishing activity presents a serious threat to the sustainability of such stocks. Measures taken on an emergency basis shall be temporary and shall be based on the best scientific evidence available.

Article 7—Compatibility of conservation and management measures

- 1. Without prejudice to the sovereign rights of coastal States for the purpose of exploring and exploiting, conserving and managing the living marine resources within areas under national jurisdiction as provided for in the Convention, and the right of all States for their nationals to engage in fishing on the high seas in accordance with the Convention:
 - (a) with respect to straddling fish stocks, the relevant coastal States and the States whose nationals fish for such stocks in the adjacent high seas area shall seek, either directly or through the appropriate mechanisms for

- cooperation provided for in Part III, to agree upon the measures necessary for the conservation of these stocks in the adjacent high seas area;
- (b) with respect to highly migratory fish stocks, the relevant coastal States and other States whose nationals fish for such stocks in the region shall cooperate, either directly or through the appropriate mechanisms for cooperation provided for in Part III, with a view to ensuring conservation and promoting the objective of optimum utilization of such stocks throughout the region, both within and beyond the areas under national jurisdiction.
2. Conservation and management measures established for the high seas and those adopted for areas under national jurisdiction shall be compatible in order to ensure conservation and management of the straddling fish stocks and highly migratory fish stocks in their entirety. To this end, coastal States and States fishing on the high seas have a duty to cooperate for the purpose of achieving compatible measures in respect of such stocks. In determining compatible conservation and management measures, States shall:
- (a) take into account the conservation and management measures adopted and applied in accordance with article 61 of the Convention in respect of the same stocks by coastal States within areas under national jurisdiction and ensure that measures established in respect of such stocks for the high seas do not undermine the effectiveness of such measures;
- (b) take into account previously agreed measures established and applied for the high seas in accordance with the Convention in respect of the same stocks by relevant coastal States and States fishing on the high seas;
- (c) take into account previously agreed measures established and applied in accordance with the Convention in respect of the same stocks by a sub-regional or regional fisheries management organization or arrangement;
- (d) take into account the biological unity and other biological characteristics of the stocks and the relationships between the distribution of the stocks, the fisheries and the geographical particularities of the region concerned, including the extent to which the stocks occur and are fished in areas under national jurisdiction;
- (e) take into account the respective dependence of the coastal States and States fishing on the high seas on the stocks concerned; and
- (f) ensure that such measures do not result in harmful impact on the living marine resources as a whole.
3. In giving effect to their duty to cooperate, States shall make every effort to agree on compatible conservation and management measures within a reasonable period of time.
4. If no agreement can be reached within a reasonable period of time, any of the States concerned may invoke the procedures for the settlement of disputes provided for in Part VIII.

5. Pending agreement on compatible conservation and management measures, the States concerned, in a spirit of understanding and cooperation, shall make every effort to enter into provisional arrangements of a practical nature. In the event that they are unable to agree on such arrangements, any of the States concerned may, for the purpose of obtaining provisional measures, submit the dispute to a court or tribunal in accordance with the procedures for the settlement of disputes provided for in Part VIII.
6. Provisional arrangements or measures entered into or prescribed pursuant to paragraph 5 shall take into account the provisions of this Part, shall have due regard to the rights and obligations of all States concerned, shall not jeopardize or hamper the reaching of final agreement on compatible conservation and management measures and shall be without prejudice to the final outcome of any dispute settlement procedure.
7. Coastal States shall regularly inform States fishing on the high seas in the subregion or region, either directly or through appropriate subregional or regional fisheries management organizations or arrangements, or through other appropriate means, of the measures they have adopted for straddling fish stocks and highly migratory fish stocks within areas under their national jurisdiction.
8. States fishing on the high seas shall regularly inform other interested States, either directly or through appropriate subregional or regional fisheries management organizations or arrangements, or through other appropriate means, of the measures they have adopted for regulating the activities of vessels flying their flag which fish for such stocks on the high seas.

Part III

Mechanisms for international cooperation concerning straddling fish stocks and highly migratory fish stocks

Article 8—Cooperation for conservation and management

1. Coastal States and States fishing on the high seas shall, in accordance with the Convention, pursue cooperation in relation to straddling fish stocks and highly migratory fish stocks either directly or through appropriate subregional or regional fisheries management organizations or arrangements, taking into account the specific characteristics of the subregion or region, to ensure effective conservation and management of such stocks.
2. States shall enter into consultations in good faith and without delay, particularly where there is evidence that the straddling fish stocks and highly migratory fish stocks concerned may be under threat of over-exploitation or where a new fishery is being developed for such stocks. To this end, consultations may be initiated at the request of any interested State with a view to establishing appropriate arrangements to ensure conservation and management of the stocks. Pending agreement on such arrangements, States shall observe the pro-

visions of this Agreement and shall act in good faith and with due regard to the rights, interests and duties of other States.

3. Where a subregional or regional fisheries management organization or arrangement has the competence to establish conservation and management measures for particular straddling fish stocks or highly migratory fish stocks, States fishing for the stocks on the high seas and relevant coastal States shall give effect to their duty to cooperate by becoming members of such organization or participants in such arrangement, or by agreeing to apply the conservation and management measures established by such organization or arrangement. States having a real interest in the fisheries concerned may become members of such organization or participants in such arrangement. The terms of participation in such organization or arrangement shall not preclude such States from membership or participation; nor shall they be applied in a manner which discriminates against any State or group of States having a real interest in the fisheries concerned.
4. Only those States which are members of such an organization or participants in such an arrangement, or which agree to apply the conservation and management measures established by such organization or arrangement, shall have access to the fishery resources to which those measures apply.
5. Where there is no subregional or regional fisheries management organization or arrangement to establish conservation and management measures for a particular straddling fish stock or highly migratory fish stock, relevant coastal States and States fishing on the high seas for such stock in the subregion or region shall cooperate to establish such an organization or enter into other appropriate arrangements to ensure conservation and management for such stock and shall participate in the work of the organization or arrangement.
6. Any State intending to propose that action be taken by an intergovernmental organization having competence with respect to living resources should, where such action would have a significant effect on conservation and management measures already established by a competent subregional or regional fisheries management organization or arrangement, consult through that organization or arrangement with its members or participants. To the extent practicable, such consultation should take place prior to the submission of the proposal to the intergovernmental organization.

Article 9—Subregional and regional fisheries management organizations and arrangements

1. In establishing subregional or regional fisheries management organizations or in entering into subregional or regional fisheries management arrangements for straddling fish stocks and highly migratory fish stocks, States shall agree, *inter alia*, on:

- (a) the stocks to which conservation and management measures apply, taking into account the biological characteristics of the stocks concerned and the nature of the fisheries involved;
 - (b) the area of application, taking into account article 7, paragraph 1, and the characteristics of the subregion or region, including socio-economic, geographical and environmental factors;
 - (c) the relationship between the work of the new organization or arrangement and the role, objectives and operations of any relevant existing fisheries management organizations or arrangements; and
 - (d) the mechanisms by which the organization or arrangement will obtain scientific advice and review the status of the stocks, including, where appropriate, the establishment of a scientific advisory body.
2. States cooperating in the formation of a subregional or regional fisheries management organization or arrangement shall inform other States which they are aware have a real interest in the work of the proposed organization or arrangement of such cooperation.

Article 10—Functions of subregional and regional fisheries management organizations and arrangements

In fulfilling their obligation to cooperate through subregional or regional fisheries management organizations or arrangements, States shall:

- (d) obtain and evaluate scientific advice, review the status of the stocks and assess the impact of fishing on non-target and associated or dependent species;
- (e) agree on standards for collection, reporting, verification and exchange of data on fisheries for the stocks;
- (f) compile and disseminate accurate and complete statistical data, as described in Annex I, to ensure that the best scientific evidence is available, while maintaining confidentiality where appropriate;
- (g) promote and conduct scientific assessments of the stocks and relevant research and disseminate the results thereof;
- (h) establish appropriate cooperative mechanisms for effective monitoring, control, surveillance and enforcement;

- (i) agree on means by which the fishing interests of new members of the organization or new participants in the arrangement will be accommodated;
- (j) agree on decision-making procedures which facilitate the adoption of conservation and management measures in a timely and effective manner;
- (k) promote the peaceful settlement of disputes in accordance with Part VIII;
- (l) ensure the full cooperation of their relevant national agencies and industries in implementing the recommendations and decisions of the organization or arrangement; and
- (m) give due publicity to the conservation and management measures established by the organization or arrangement.

Article 11—New members or participants

In determining the nature and extent of participatory rights for new members of a sub-regional or regional fisheries management organization, or for new participants in a subregional or regional fisheries management arrangement, States shall take into account, *inter alia*:

- (a) the status of the straddling fish stocks and highly migratory fish stocks and the existing level of fishing effort in the fishery;
- (b) the respective interests, fishing patterns and fishing practices of new and existing members or participants;
- (c) the respective contributions of new and existing members or participants to conservation and management of the stocks, to the collection and provision of accurate data and to the conduct of scientific research on the stocks;
- (d) the needs of coastal fishing communities which are dependent mainly on fishing for the stocks;
- (e) the needs of coastal States whose economies are overwhelmingly dependent on the exploitation of living marine resources; and

Article 12—Transparency in activities of subregional and regional fisheries management organizations and arrangements

1. States shall provide for transparency in the decision-making process and other activities of subregional and regional fisheries management organizations and arrangements.
2. Representatives from other intergovernmental organizations and representatives from non-governmental organizations concerned with straddling fish stocks and highly migratory fish stocks shall be afforded the opportunity to take part in meetings of subregional and regional fisheries management organizations and arrangements as observers or otherwise, as appropriate, in accordance with the procedures of the organization or arrangement concerned. Such

procedures shall not be unduly restrictive in this respect. Such intergovernmental organizations and non-governmental organizations shall have timely access to the records and reports of such organizations and arrangements, subject to the procedural rules on access to them.

Article 13—Strengthening of existing organizations and arrangements

States shall cooperate to strengthen existing subregional and regional fisheries management organizations and arrangements in order to improve their effectiveness in establishing and implementing conservation and management measures for straddling fish stocks and highly migratory fish stocks.

Article 14—Collection and provision of information and cooperation in scientific research

1. States shall ensure that fishing vessels flying their flag provide such information as may be necessary in order to fulfil their obligations under this Agreement. To this end, States shall in accordance with Annex I:
 - (a) collect and exchange scientific, technical and statistical data with respect to fisheries for straddling fish stocks, and highly migratory fish stocks;
 - (b) ensure that data are collected in sufficient detail to facilitate effective stock assessment and are provided in a timely manner to fulfil the requirements of subregional or regional fisheries management organizations or arrangements; and
 - (c) take appropriate measures to verify the accuracy of such data.
2. States shall cooperate, either directly or through subregional or regional fisheries management organizations or arrangements:
 - (a) to agree on the specification of data and the format in which they are to be provided to such organizations or arrangements, taking into account the nature of the stocks and the fisheries for those stocks; and
 - (b) to develop and share analytical techniques and stock assessment methodologies to improve measures for the conservation and management of straddling fish stocks and highly migratory fish stocks.
3. Consistent with Part XIII of the Convention, States shall cooperate, either directly or through competent international organizations, to strengthen scientific research capacity in the field of fisheries and promote scientific research related to the conservation and management of straddling fish stocks and highly migratory fish stocks for the benefit of all. To this end, a State or the competent international organization conducting such research beyond areas under national jurisdiction shall actively promote the publication and dissemination to any interested States of the results of that research and information relating to its objectives and methods and, to the extent practicable, shall facilitate the participation of scientists from those States in such research.

Article 15—Enclosed and semi-enclosed seas

In implementing this Agreement in an enclosed or semi-enclosed sea, States shall take into account the natural characteristics of that sea and shall also act in a manner consistent with Part IX of the Convention and other relevant provisions thereof.

Article 16—Areas of high seas surrounded entirely by an area under the national jurisdiction of a single State

1. States fishing for straddling fish stocks and highly migratory fish stocks in an area of the high seas surrounded entirely by an area under the national jurisdiction of a single State and the latter State shall cooperate to establish conservation and management measures in respect of those stocks in the high seas area. Having regard to the natural characteristics of the area, States shall pay special attention to the establishment of compatible conservation and management measures for such stocks pursuant to article 7. Measures taken in respect of the high seas shall take into account the rights, duties and interests of the coastal State under the Convention, shall be based on the best scientific evidence available and shall also take into account any conservation and management measures adopted and applied in respect of the same stocks in accordance with article 61 of the Convention by the coastal State in the area under national jurisdiction. States shall also agree on measures for monitoring, control, surveillance and enforcement to ensure compliance with the conservation and management measures in respect of the high seas.
2. Pursuant to article 8, States shall act in good faith and make every effort to agree without delay on conservation and management measures to be applied in the carrying out of fishing operations in the area referred to in paragraph 1. If, within a reasonable period of time, the fishing States concerned and the coastal State are unable to agree on such measures, they shall, having regard to paragraph 1, apply article 7, paragraphs 4, 5 and 6, relating to provisional arrangements or measures. Pending the establishment of such provisional arrangements or measures, the States concerned shall take measures in respect of vessels flying their flag in order that they not engage in fisheries which could undermine the stocks concerned.

Part IV

Non-members and non-participants

Article 17—Non-members of organizations and non-participants in arrangements

1. A State which is not a member of a subregional or regional fisheries management organization or is not a participant in a subregional or regional fisheries management arrangement, and which does not otherwise agree to apply the conservation and management measures established by such organization or

arrangement, is not discharged from the obligation to cooperate, in accordance with the Convention and this Agreement, in the conservation and management of the relevant straddling fish stocks and highly migratory fish stocks.

2. Such State shall not authorize vessels flying its flag to engage in fishing operations for the straddling fish stocks or highly migratory fish stocks which are subject to the conservation and management measures established by such organization or arrangement.
3. States which are members of a subregional or regional fisheries management organization or participants in a subregional or regional fisheries management arrangement shall, individually or jointly, request the fishing entities referred to in article 1, paragraph 3, which have fishing vessels in the relevant area to cooperate fully with such organization or arrangement in implementing the conservation and management measures it has established, with a view to having such measures applied de facto as extensively as possible to fishing activities in the relevant area. Such fishing entities shall enjoy benefits from participation in the fishery commensurate with their commitment to comply with conservation and management measures in respect of the stocks.
4. States which are members of such organization or participants in such arrangement shall exchange information with respect to the activities of fishing vessels flying the flags of States which are neither members of the organization nor participants in the arrangement and which are engaged in fishing operations for the relevant stocks. They shall take measures consistent with this Agreement and international law to deter activities of such vessels which undermine the effectiveness of subregional or regional conservation and management measures.

Part V

Duties of the flag State

Article 18—Duties of the flag State

1. A State whose vessels fish on the high seas shall take such measures as may be necessary to ensure that vessels flying its flag comply with subregional and regional conservation and management measures and that such vessels do not engage in any activity which undermines the effectiveness of such measures.
2. A State shall authorize the use of vessels flying its flag for fishing on the high seas only where it is able to exercise effectively its responsibilities in respect of such vessels under the Convention and this Agreement.
3. Measures to be taken by a State in respect of vessels flying its flag shall include:
 - (a) control of such vessels on the high seas by means of fishing licences, authorizations or permits, in accordance with any applicable procedures agreed at the subregional, regional or global level;

- (b) establishment of regulations:
 - (i) to apply terms and conditions to the licence, authorization or permit sufficient to fulfil any subregional, regional or global obligations of the flag State;
 - (ii) to prohibit fishing on the high seas by vessels which are not duly licensed or authorized to fish, or fishing on the high seas by vessels otherwise than in accordance with the terms and conditions of a licence, authorization or permit;
 - (iii) to require vessels fishing on the high seas to carry the licence, authorization or permit on board at all times and to produce it on demand for inspection by a duly authorized person; and
 - (iv) to ensure that vessels flying its flag do not conduct unauthorized fishing within areas under the national jurisdiction of other States;
- (c) establishment of national record of fishing vessels authorized to fish on the high seas and provision of access to the information contained in that record on request by directly interested States, taking into account any national laws of the flag State regarding the release of such information;
- (d) requirements for marking of fishing vessels and fishing gear for identification in accordance with uniform and internationally recognizable vessel and gear marking systems, such as the Food and Agriculture Organization of the United Nations Standard Specifications for the Marking and Identification of Fishing Vessels;
- (e) requirements for recording and timely reporting of vessel position, catch of target and non-target species, fishing effort and other relevant fisheries data in accordance with subregional, regional and global standards for collection of such data;
- (f) requirements for verifying the catch of target and non-target species through such means as observer programmes, inspection schemes, unloading reports, supervision of transshipment and monitoring of landed catches and market statistics;
- (g) monitoring, control and surveillance of such vessels, their fishing operations and related activities by, inter alia:
 - (i) the implementation of national inspection schemes and subregional and regional schemes for cooperation in enforcement pursuant to articles 21 and 22, including requirements for such vessels to permit access by duly authorized inspectors from other States;
 - (ii) the implementation of national observer programmes and subregional and regional observer programmes in which the flag State is a participant, including requirements for such vessels to permit

- access by observers from other States to carry out the functions agreed under the programmes; and
- (iii) the development and implementation of vessel monitoring systems, including, as appropriate, satellite transmitter systems, in accordance with any national programmes and those which have been subregionally, regionally or globally agreed among the States concerned;
 - (h) regulation of transshipment on the high seas to ensure that the effectiveness of conservation and management measures is not undermined; and
 - (i) regulation of fishing activities to ensure compliance with subregional, regional or global measures, including those aimed at minimizing catches of non-target species.
4. Where there is a subregionally, regionally or globally agreed system of monitoring, control and surveillance in effect, States shall ensure that the measures they impose on vessels flying their flag are compatible with that system.

Part VI

Compliance and enforcement

Article 19—Compliance and enforcement by the flag State

1. A State shall ensure compliance by vessels flying its flag with subregional and regional conservation and management measures for straddling fish stocks and highly migratory fish stocks. To this end, that State shall:
- (a) enforce such measures irrespective of where violations occur;
 - (b) investigate immediately and fully any alleged violation of subregional or regional conservation and management measures, which may include the physical inspection of the vessels concerned, and report promptly to the State alleging the violation and the relevant subregional or regional organization or arrangement on the progress and outcome of the investigation;
 - (c) require any vessel flying its flag to give information to the investigating authority regarding vessel position, catches, fishing gear, fishing operations and related activities in the area of an alleged violation;
 - (d) if satisfied that sufficient evidence is available in respect of an alleged violation, refer the case to its authorities with a view to instituting proceedings without delay in accordance with its laws and, where appropriate, detain the vessel concerned; and
 - (e) ensure that, where it has been established, in accordance with its laws, a vessel has been involved in the commission of a serious violation of such measures, the vessel does not engage in fishing operations on the

high seas until such time as all outstanding sanctions imposed by the flag State in respect of the violation have been complied with.

2. All investigations and judicial proceedings shall be carried out expeditiously. Sanctions applicable in respect of violations shall be adequate in severity to be effective in securing compliance and to discourage violations wherever they occur and shall deprive offenders of the benefits accruing from their illegal activities. Measures applicable in respect of masters and other officers of fishing vessels shall include provisions which may permit, inter alia, refusal, withdrawal or suspension of authorizations to serve as masters or officers on such vessels.

Article 20—International cooperation in enforcement

1. States shall cooperate, either directly or through subregional or regional fisheries management organizations or arrangements, to ensure compliance with and enforcement of subregional and regional conservation and management measures for straddling fish stocks and highly migratory fish stocks.
2. A flag State conducting an investigation of an alleged violation of conservation and management measures for straddling fish stocks or highly migratory fish stocks may request the assistance of any other State whose cooperation may be useful in the conduct of that investigation. All States shall endeavour to meet reasonable requests made by a flag State in connection with such investigations.
3. A flag State may undertake such investigations directly, in cooperation with other interested States or through the relevant subregional or regional fisheries management organization or arrangement. Information on the progress and outcome of the investigations shall be provided to all States having an interest in, or affected by, the alleged violation.
4. States shall assist each other in identifying vessels reported to have engaged in activities undermining the effectiveness of subregional, regional or global conservation and management measures.
5. States shall, to the extent permitted by national laws and regulations, establish arrangements for making available to prosecuting authorities in other States evidence relating to alleged violations of such measures.
6. Where there are reasonable grounds for believing that a vessel on the high seas has been engaged in unauthorized fishing within an area under the jurisdiction of a coastal State, the flag State of that vessel, at the request of the coastal State concerned, shall immediately and fully investigate the matter. The flag State shall cooperate with the coastal State in taking appropriate enforcement action in such cases and may authorize the relevant authorities of the coastal State to board and inspect the vessel on the high seas. This paragraph is without prejudice to article 111 of the Convention.

7. States Parties which are members of a subregional or regional fisheries management organization or participants in a subregional or regional fisheries management arrangement may take action in accordance with international law, including through recourse to subregional or regional procedures established for this purpose, to deter vessels which have engaged in activities which undermine the effectiveness of or otherwise violate the conservation and management measures established by that organization or arrangement from fishing on the high seas in the subregion or region until such time as appropriate action is taken by the flag State.

Article 21—Subregional and regional cooperation in enforcement

1. In any high seas area covered by a subregional or regional fisheries management organization or arrangement, a State Party which is a member of such organization or a participant in such arrangement may, through its duly authorized inspectors, board and inspect, in accordance with paragraph 2, fishing vessels flying the flag of another State Party to this Agreement, whether or not such State Party is also a member of the organization or a participant in the arrangement, for the purpose of ensuring compliance with conservation and management measures for straddling fish stocks and highly migratory fish stocks established by that organization or arrangement.
2. States shall establish, through subregional or regional fisheries management organizations or arrangements, procedures for boarding and inspection pursuant to paragraph 1, as well as procedures to implement other provisions of this article. Such procedures shall be consistent with this article and the basic procedures set out in article 22 and shall not discriminate against non-members of the organization or non-participants in the arrangement. Boarding and inspection as well as any subsequent enforcement action shall be conducted in accordance with such procedures. States shall give due publicity to procedures established pursuant to this paragraph.
3. If, within two years of the adoption of this Agreement, any organization or arrangement has not established such procedures, boarding and inspection pursuant to paragraph 1, as well as any subsequent enforcement action, shall, pending the establishment of such procedures, be conducted in accordance with this article and the basic procedures set out in article 22.
4. Prior to taking action under this article, inspecting States shall, either directly or through the relevant subregional or regional fisheries management organization or arrangement, inform all States whose vessels fish on the high seas in the subregion or region of the form of identification issued to their duly authorized inspectors. The vessels used for boarding and inspection shall be clearly marked and identifiable as being on government service. At the time of becoming a Party to this Agreement, a State shall designate an appropriate authority to receive notifications pursuant to this article and shall give due publicity of

- such designation through the relevant subregional or regional fisheries management organization or arrangement.
5. Where, following a boarding and inspection, there are clear grounds for believing that a vessel has engaged in any activity contrary to the conservation and management measures referred to in paragraph 1, the inspecting State shall, where appropriate, secure evidence and shall promptly notify the flag State of the alleged violation.
 6. The flag State shall respond to the notification referred to in paragraph 5 within three working days of its receipt, or such other period as may be prescribed in procedures established in accordance with paragraph 2, and shall either:
 - (a) fulfil, without delay, its obligations under article 19 to investigate and, if evidence so warrants, take enforcement action with respect to the vessel, in which case it shall promptly inform the inspecting State of the results of the investigation and of any enforcement action taken; or
 - (b) authorize the inspecting State to investigate.
 7. Where the flag State authorizes the inspecting State to investigate an alleged violation, the inspecting State shall, without delay, communicate the results of that investigation to the flag State. The flag State shall, if evidence so warrants, fulfil its obligations to take enforcement action with respect to the vessel. Alternatively, the flag State may authorize the inspecting State to take such enforcement action as the flag State may specify with respect to the vessel, consistent with the rights and obligations of the flag State under this Agreement.
 8. Where, following boarding and inspection, there are clear grounds for believing that a vessel has committed a serious violation, and the flag State has either failed to respond or failed to take action as required under paragraphs 6 or 7, the inspectors may remain on board and secure evidence and may require the master to assist in further investigation including, where appropriate, by bringing the vessel without delay to the nearest appropriate port, or to such other port as may be specified in procedures established in accordance with paragraph 2. The inspecting State shall immediately inform the flag State of the name of the port to which the vessel is to proceed. The inspecting State and the flag State and, as appropriate, the port State shall take all necessary steps to ensure the wellbeing of the crew regardless of their nationality.
 9. The inspecting State shall inform the flag State and the relevant organization or the participants in the relevant arrangement of the results of any further investigation.
 10. The inspecting State shall require its inspectors to observe generally accepted international regulations, procedures and practices relating to the safety of the vessel and the crew, minimize interference with fishing operations and, to the extent practicable, avoid action which would adversely affect the quality of the catch on board. The inspecting State shall ensure that boarding and inspection

is not conducted in a manner that would constitute harassment of any fishing vessel.

11. For the purposes of this article, a serious violation means:
 - (a) fishing without a valid licence, authorization or permit issued by the flag State in accordance with article 18, paragraph 3(a);
 - (b) failing to maintain accurate records of catch and catch-related data, as required by the relevant subregional or regional fisheries management organization or arrangement, or serious misreporting of catch, contrary to the catch reporting requirements of such organization or arrangement;
 - (c) fishing in a closed area, fishing during a closed season or fishing without, or after attainment of, a quota established by the relevant subregional or regional fisheries management organization or arrangement;
 - (d) directed fishing for a stock which is subject to a moratorium or for which fishing is prohibited;
 - (e) using prohibited fishing gear;
 - (f) falsifying or concealing the markings, identity or registration of a fishing vessel;
 - (g) concealing, tampering with or disposing of evidence relating to an investigation;
 - (h) multiple violations which together constitute a serious disregard of conservation and management measures; or
 - (i) such other violations as may be specified in procedures established by the relevant subregional or regional fisheries management organization or arrangement.
12. Notwithstanding the other provisions of this article, the flag State may, at any time, take action to fulfil its obligations under article 19 with respect to an alleged violation. Where the vessel is under the direction of the inspecting State, the inspecting State shall, at the request of the flag State, release the vessel to the flag State along with full information on the progress and outcome of its investigation.
13. This article is without prejudice to the right of the flag State to take any measures, including proceedings to impose penalties, according to its laws.
14. This article applies *mutatis mutandis* to boarding and inspection by a State Party which is a member of a subregional or regional fisheries management organization or a participant in a subregional or regional fisheries management arrangement and which has clear grounds for believing that a fishing vessel flying the flag of another State Party has engaged in any activity contrary to relevant conservation and management measures referred to in paragraph 1 in the high seas area covered by such organization or arrangement, and such vessel has subsequently, during the same fishing trip, entered into an area under the national jurisdiction of the inspecting State.

15. Where a subregional or regional fisheries management organization or arrangement has established an alternative mechanism which effectively discharges the obligation under this Agreement of its members or participants to ensure compliance with the conservation and management measures established by the organization or arrangement, members of such organization or participants in such arrangement may agree to limit the application of paragraph 1 as between themselves in respect of the conservation and management measures which have been established in the relevant high seas area.
16. Action taken by States other than the flag State in respect of vessels having engaged in activities contrary to subregional or regional conservation and management measures shall be proportionate to the seriousness of the violation.
17. Where there are reasonable grounds for suspecting that a fishing vessel on the high seas is without nationality, a State may board and inspect the vessel. Where evidence so warrants, the State may take such action as may be appropriate in accordance with international law.
18. States shall be liable for damage or loss attributable to them arising from action taken pursuant to this article when such action is unlawful or exceeds that reasonably required in the light of available information to implement the provisions of this article.

Article 22—Basic procedures for boarding and inspection pursuant to article 21

1. The inspecting State shall ensure that its duly authorized inspectors:
 - (a) present credentials to the master of the vessel and produce a copy of the text of the relevant conservation and management measures or rules and regulations in force in the high seas area in question pursuant to those measures;
 - (b) initiate notice to the flag State at the time of the boarding and inspection;
 - (c) do not interfere with the master's ability to communicate with the authorities of the flag State during the boarding and inspection;
 - (d) provide a copy of a report on the boarding and inspection to the master and to the authorities of the flag State, noting therein any objection or statement which the master wishes to have included in the report;
 - (e) promptly leave the vessel following completion of the inspection if they find no evidence of a serious violation; and
 - (f) avoid the use of force except when and to the degree necessary to ensure the safety of the inspectors and where the inspectors are obstructed in the execution of their duties. The degree of force used shall not exceed that reasonably required in the circumstances.
2. The duly authorized inspectors of an inspecting State shall have the authority to inspect the vessel, its licence, gear, equipment, records, facilities, fish and fish

products and any relevant documents necessary to verify compliance with the relevant conservation and management measures.

3. The flag State shall ensure that vessel masters:
 - (a) accept and facilitate prompt and safe boarding by the inspectors;
 - (b) cooperate with and assist in the inspection of the vessel conducted pursuant to these procedures;
 - (c) do not obstruct, intimidate or interfere with the inspectors in the performance of their duties;
 - (d) allow the inspectors to communicate with the authorities of the flag State and the inspecting State during the boarding and inspection;
 - (e) provide reasonable facilities, including, where appropriate, food and accommodation, to the inspectors; and
 - (f) facilitate safe disembarkation by the inspectors.
4. In the event that the master of a vessel refuses to accept boarding and inspection in accordance with this article and article 21, the flag State shall, except in circumstances where, in accordance with generally accepted international regulations, procedures and practices relating to safety at sea, it is necessary to delay the boarding and inspection, direct the master of the vessel to submit immediately to boarding and inspection and, if the master does not comply with such direction, shall suspend the vessel's authorization to fish and order the vessel to return immediately to port. The flag State shall advise the inspecting State of the action it has taken when the circumstances referred to in this paragraph arise.

Article 23—Measures taken by a port State

1. A port State has the right and the duty to take measures, in accordance with the international law, to promote the effectiveness of subregional, regional and global conservation and management measures. When taking such measures a port State shall not discriminate in form or in fact against the vessels of any State.
2. A port State may, *inter alia*, inspect documents, fishing gear and catch on board fishing vessels, when such vessels are voluntarily in its ports or at its offshore terminals.
3. States may adopt regulations empowering the relevant national authorities to prohibit landings and transshipments where it has been established that the catch has been taken in a manner which undermines the effectiveness of subregional, regional or global conservation and management measures on the high seas.
4. Nothing in this article affects the exercise by States of their sovereignty over ports in their territory in accordance with international law.

Part VII

Requirements of developing States

Article 24—Recognition of the special requirements of developing States

Article 25—Forms of cooperation with developing States

1. States shall cooperate, either directly or through subregional, regional or global organizations:
 - (a) to enhance the ability of developing States, in particular the least-developed among them and small island developing States, to conserve and manage straddling fish stocks and highly migratory fish stocks and to develop their own fisheries for such stocks;
 - (b) to assist developing States, in particular the least-developed among them and small island developing States, to enable them to participate in high seas fisheries for such stocks, including facilitating access to such fisheries subject to articles 5 and 11; and
 - (c) to facilitate the participation of developing States in subregional and regional fisheries management organizations and arrangements.

2. Cooperation with developing States for the purposes set out in this article shall include the provision of financial assistance, assistance relating to human resources development, technical assistance, transfer of technology, including through joint venture arrangements, and advisory and consultative services.

Article 42 does not preclude a State or entity, when signing, ratifying or acceding to this Agreement, from making declarations or statements, however phrased or named, with a view, *inter alia*, to the harmonization of its laws and regulations with the provisions of this Agreement, provided that such declarations or statements do not purport to exclude or to modify the legal effect of the provisions of this Agreement in their application to that State or entity.

Article 44—Relation to other agreements

1. This Agreement shall not alter the rights and obligations of States Parties which arise from other agreements compatible with this Agreement and which do not affect the enjoyment by other States Parties of their rights or the performance of their obligations under this Agreement.
2. Two or more States Parties may conclude agreements modifying or suspending the operation of provisions of this Agreement, applicable solely to the relations between them, provided that such agreements do not relate to a provision derogation from which is incompatible with the effective execution of the object and purpose of this Agreement, and provided further that such agreements shall not affect the application of the basic principles embodied herein, and that the provisions of such agreements do not affect the enjoyment by other States Parties of their rights or the performance of their obligations under this Agreement.
3. States Parties intending to conclude an agreement referred to in paragraph 2 shall notify the other States Parties through the depositary of this Agreement of their intention to conclude the agreement and of the modification or suspension for which it provides.

Article 45—Amendment

1. A State Party may, by written communication addressed to the Secretary-General of the United Nations, propose amendments to this Agreement and request the convening of a conference to consider such proposed amendments. The Secretary-General shall circulate such communication to all States Parties. If, within six months from the date of the circulation of the communication, not less than one half of the States Parties reply favourably to the request, the Secretary-General shall convene the conference.
2. The decision-making procedure applicable at the amendment conference convened pursuant to paragraph 1 shall be the same as that applicable at the United Nations Conference on Straddling Fish Stocks and Highly Migratory Fish Stocks, unless otherwise decided by the conference. The conference should make every effort to reach agreement on any amendments by way of consensus and there should be no voting on them until all efforts at consensus have been exhausted.
3. Once adopted, amendments to this Agreement shall be open for signature at United Nations Headquarters by States Parties for twelve months from the date of adoption, unless otherwise provided in the amendment itself.
4. Articles 38, 39, 47 and 50 apply to all amendments to this Agreement.

Article 46—Denunciation

1. A State Party may, by written notification addressed to the Secretary-General of the United Nations, denounce this Agreement and may indicate its reasons. Failure to indicate reasons shall not affect the validity of the denunciation. The denunciation shall take effect one year after the date of receipt of the notification, unless the notification specifies a later date.

2. The denunciation shall not in any way affect the duty of any State Party to fulfil any obligation embodied in this Agreement to which it would be subject under international law independently of this Agreement.

Article 47—Participation by international organizations

1. In cases where an international organization referred to in Annex IX, article 1, of the Convention does not have competence over all the matters governed by this Agreement, Annex IX to the Convention shall apply *mutatis mutandis* to participation by such international organization in this Agreement, except that the following provisions of that Annex shall not apply:
 - (a) article 2, first sentence; and

2. In cases where an international organization referred to in Annex IX, article 1, of the Convention has competence over all the matters governed by this Agreement, the following provisions shall apply to participation by such international organization in this Agreement:
 - (a) at the time of signature or accession, such international organization shall make a declaration stating:
 - (i) that it has competence over all the matters governed by this Agreement;
 - (ii) that, for this reason, its member States shall not become States Parties, except in respect of their territories for which the international organization has no responsibility; and
 - (iii) that it accepts the rights and obligations of States under this Agreement;
 - (b) participation of such an international organization shall in no case confer any rights under this Agreement on member States of the international organization;
 - (c) in the event of a conflict between the obligations of an international organization under this Agreement and its obligations under the agreement establishing the international organization or any acts relating to it, the obligations under this Agreement shall prevail.

Article 48—Annexes

1. The Annexes form an integral part of this Agreement and, unless expressly provided otherwise, a reference to this Agreement or to one of its Parts includes a reference to the Annexes relating thereto.
2. The Annexes may be revised from time to time by States Parties. Such revisions shall be based on scientific and technical considerations. Notwithstanding the provisions of article 45, if a revision to an Annex is adopted by consensus at a meeting of States Parties, it shall be incorporated in this Agreement and

shall take effect from the date of its adoption or from such other date as may be specified in the revision. If a revision to an Annex is not adopted by consensus at such a meeting, the amendment procedures set out in article 45 shall apply.

Annex I

Standard requirements for the collection and sharing of data

Article 1— General principles

1. The timely collection, compilation and analysis of data are fundamental to the effective conservation and management of straddling fish stocks and highly migratory fish stocks. To this end, data from fisheries for these stocks on the high seas and those in areas under national jurisdiction are required and should be collected and compiled in such a way as to enable statistically meaningful analysis for the purposes of fishery resource conservation and management. These data include catch and fishing effort statistics and other fishery-related information, such as vessel-related and other data for standardizing fishing effort. Data collected should also include information on non-target and associated or dependent species. All data should be verified to ensure accuracy. Confidentiality of nonaggregated data shall be maintained. The dissemination of such data shall be subject to the terms on which they have been provided.
2. Assistance, including training as well as financial and technical assistance, shall be provided to developing States in order to build capacity in the field of conservation and management of living marine resources. Assistance should focus on enhancing capacity to implement data collection and verification, observer programmes, data analysis and research projects supporting stock assessments. The fullest possible involvement of developing State scientists and managers in conservation and management of straddling fish stocks and highly migratory fish stocks should be promoted.

Article 2— Principles of data collection, compilation and exchange

The following general principles should be considered in defining the parameters for collection, compilation and exchange of data from fishing operations for straddling fish stocks and highly migratory fish stocks:

- (a) States should ensure that data are collected from vessels flying their flag on fishing activities according to the operational characteristics of each fishing method (e.g., each individual tow for trawl, each set for long-line and purse-seine, each school fished for pole-and-line and each day fished for troll) and in sufficient detail to facilitate effective stock assessment;
- (b) States should ensure that fishery data are verified through an appropriate system;
- (c) States should compile fishery-related and other supporting scientific data and provide them in an agreed format and in a timely manner to the relevant subregional or regional fisheries management organization or arrangement where one exists. Otherwise, States should cooperate to exchange data either directly or through such other cooperative mechanisms as may be agreed among them;
- (d) States should agree, within the framework of subregional or regional fisheries management organizations or arrangements, or otherwise, on the specification of data and the format in which they are to be provided, in accordance with this Annex and taking into account the nature of the stocks and the fisheries for those stocks in the region. Such organizations or arrangements should request non-members or non-participants to provide data concerning relevant fishing activities by vessels flying their flag;
- (e) such organizations or arrangements shall compile data and make them available in a timely manner and in an agreed format to all interested States under the terms and conditions established by the organization or arrangement; and
- (f) scientists of the flag State and from the relevant subregional or regional fisheries management organization or arrangement should analyse the data separately or jointly, as appropriate.

Article 3— Basic fishery data

1. States shall collect and make available to the relevant subregional or regional fisheries management organization or arrangement the following types of data in sufficient detail to facilitate effective stock assessment in accordance with agreed procedures:
 - (a) time series of catch and effort statistics by fishery and fleet;
 - (b) total catch in number, nominal weight, or both, by species (both target and non-target) as is appropriate to each fishery. [Nominal weight is defined by the Food and Agriculture Organization of the United Nations as the live-weight equivalent of the landings];

- (c) discard statistics, including estimates where necessary, reported as a number or nominal weight by species, as is appropriate to each fishery;
 - (d) effort statistics appropriate to each fishing method; and
 - (e) fishing location, date and time fished and other statistics on fishing operations as appropriate.
2. States shall also collect where appropriate and provide to the relevant subregional or regional fisheries management organization or arrangement information to support stock assessment, including:
- (a) composition of the catch according to length, weight and sex;
 - (b) other biological information supporting stock assessments, such as information on age, growth, recruitment, distribution and stock identity; and
 - (c) other relevant research, including surveys of abundance, biomass surveys, hydro-acoustic surveys, research on environmental factors affecting stock abundance, and oceanographic and ecological studies.

Article 4— Vessel data and information

1. States should collect the following types of vessel-related data for standardizing fleet composition and vessel fishing power and for converting between different measures of effort in the analysis of catch and effort data:
- (a) vessel identification, flag and port of registry;
 - (b) vessel type;
 - (c) vessel specifications (e.g., material of construction, date built, registered length, gross registered tonnage, power of main engines, hold capacity and catch storage methods); and
 - (d) fishing gear description (e.g., types, gear specifications and quantity).
2. The flag State will collect the following information:
- (a) navigation and position fixing aids;
 - (b) communication equipment and international radio call sign; and
 - (c) crew size.

Article 5— Reporting

A State shall ensure that vessels flying its flag send to its national fisheries administration and, where agreed, to the relevant subregional or regional fisheries management organization or arrangement, logbook data on catch and effort, including data on fishing operations on the high seas, at sufficiently frequent intervals to meet national requirements and regional and international obligations. Such data shall be transmitted, where necessary, by radio, telex, facsimile or satellite transmission or by other means.

Article 6— Data verification

States or, as appropriate, subregional or regional fisheries management organizations or arrangements should establish mechanisms for verifying fishery data, such as:

- (a) position verification through vessel monitoring systems;
- (b) scientific observer programmes to monitor catch, effort, catch composition (target and non-target) and other details of fishing operations;
- (c) vessel trip, landing and transshipment reports; and
- (d) port sampling.

Article 7— Data exchange

1. Data collected by flag States must be shared with other flag States and relevant coastal States through appropriate subregional or regional fisheries management organizations or arrangements. Such organizations or arrangements shall compile data and make them available in a timely manner and in an agreed format to all interested States under the terms and conditions established by the organization or arrangement, while maintaining confidentiality of non-aggregated data, and should, to the extent feasible, develop database systems which provide efficient access to data.
2. At the global level, collection and dissemination of data should be effected through the Food and Agriculture Organization of the United Nations. Where a subregional or regional fisheries management organization or arrangement does not exist, that organization may also do the same at the subregional or regional level by arrangement with the States concerned.

Annex II

Guidelines for the application of precautionary reference points in conservation and management of straddling fish stocks and highly migratory fish stocks

1. A precautionary reference point is an estimated value derived through an agreed scientific procedure, which corresponds to the state of the resource and of the fishery, and which can be used as a guide for fisheries management.
2. Two types of precautionary reference points should be used: conservation, or limit, reference points and management, or target, reference points. Limit reference points set boundaries which are intended to constrain harvesting within safe biological limits within which the stocks can produce maximum sustainable yield. Target reference points are intended to meet management objectives.
3. Precautionary reference points should be stock-specific to account, inter alia, for the reproductive capacity, the resilience of each stock and the characteristics of fisheries exploiting the stock, as well as other sources of mortality and major sources of uncertainty.

4. Management strategies shall seek to maintain or restore populations of harvested stocks, and where necessary associated or dependent species, at levels consistent with previously agreed precautionary reference points. Such reference points shall be used to trigger pre-agreed conservation and management action. Management strategies shall include measures which can be implemented when precautionary reference points are approached.
5. Fishery management strategies shall ensure that the risk of exceeding limit reference points is very low. If a stock falls below a limit reference point or is at risk of falling below such a reference point, conservation and management action should be initiated to facilitate stock recovery. Fishery management strategies shall ensure that target reference points are not exceeded on average.
6. When information for determining reference points for a fishery is poor or absent, provisional reference points shall be set. Provisional reference points may be established by analogy to similar and better-known stocks. In such situations, the fishery shall be subject to enhanced monitoring so as to enable revision of provisional reference points as improved information becomes available.
7. The fishing mortality rate which generates maximum sustainable yield should be regarded as a minimum standard for limit reference points. For stocks which are not overfished, fishery management strategies shall ensure that fishing mortality does not exceed that which corresponds to maximum sustainable yield, and that the biomass does not fall below a predefined threshold. For overfished stocks, the biomass which would produce maximum sustainable yield can serve as a rebuilding target.

Schedule 1
