

CMS

2025 CMS National Report

Deadline for submission of the National Reports: : 30 September 2025

Reporting period: from May 2023 to February 2025

Parties are encouraged to respond to all questions and are also requested to provide comprehensive answers, when required.

National Report format is available through the CMS Family Online Reporting System (ORS), which has been successfully implemented and used by CMS, AEWA, IOSEA and Sharks MOU in collaboration with UNEP-WCMC.

Through Resolution 12.5 (Rev. COP14) and Decisions 14.27, 14.25 National Reports and 14.2 Samarkand Strategic Plan for Migratory Species, the Standing Committee and the Secretariat were tasked with developing a new format for National Reports that aligns with the SPMS. However, given that the indicators of the SPMS are not yet in place, and due to the time constraints caused by the exceptionally short intersessional period before COP15, there is insufficient time to substantially amend the National Report format to fully align it with the SPMS.

The Standing Committee therefore agreed to develop a new format for the reporting period after COP15, and to use the previous National Report format for the current reporting period, with only minor adjustments. These adjustments would include a limited number of additional questions on topics that COP14 specifically requested to be reported through National Reports.

Additionally, it was agreed not to attach the full list of species in Appendices I and II for verification by Parties, as this information was collected during previous reporting cycles but could not be fully assessed and reflected in the National Reports format due to a lack of resources. Instead, the Standing Committee agreed to collect information on Range States for species listed in the Annex to Resolution 14.19 during this reporting cycle, in accordance with Decision 14.234.

A proposal of the National Reports format was circulated by the Secretariat to the Standing Committee members on 13 December and it was agreed through communication procedure, in line with Rule 5 of the Rules of Procedure.

This online version of the format strictly follows the one adopted by Standing Committee through communication procedure. In addition, as was also the case for reporting prior to COP14, it incorporates pre-filled information, notably in Sections II and III, based on data available at the Secretariat from the previous reporting cycles.

Please note that guidance is available for a number of questions throughout the national report as both in-text guidance and as tool tips (displayed via the information 'i' icon).

For any question, please contact Mr. Aydin Bahramlouian, Public Information Officer, aydin.bahramlouian@un.org

NOTICE: Before clicking on the hyperlinks in this questionnaire, please keep pressing the **Ctrl button** on your keyboard to open the link in a new tab.

RESOURCES FOR THE CMS NATIONAL REPORT FROM OTHER RELEVANT INTERGOVERNMENTAL PROCESSES

Convention/Agreement/Process

Information source

Convention on Biological Diversity (CBD)

National Reports

Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES)

Annual trade reports, Annual illegal trade reports, Implementation reports

Convention on Wetlands of International Importance especially as Waterfowl Habitat

National Reports, Ramsar Information Sheets

Food and Agriculture Organization of the United Nations (FAO)

Country reports

United Nations Convention to Combat Desertification (UNCCD)

National Reports

United Nations Forum on Forests (UNFF)

National Reports

United Nations Framework Convention on Climate Change (UNFCCC)

National Communications, Biennial Reports, Update Reports

Various CMS Family Agreements and Memorandums of Understanding (MOUs)

National Reports

2030 Agenda for Sustainable Development and the Sustainable Development Goals

National Reports

Note: These reporting processes of other relevant intergovernmental frameworks are examples of information resources to be used when filling out this national report, which may assist in identification and strengthening of synergies among these processes. This list is **not** exhaustive. There are many other sources of information that may also be of relevance for migratory species, their habitats and migrations systems.

High-level summary of key messages

In your country, during the reporting period, what does this report reveal about:

Guidance:

This section invites you to summarise the most important positive aspects of CMS implementation in your country and the areas of greatest concern. Please limit this specifically to the current reporting period only.

Your answers should be based on the information contained in the body of the report: the intention is for this section to distil the technical information in the report into “high level” messages for decision-makers and wider audiences.

Please try also to be specific or provide specific examples where you can, e.g. “New wildlife legislation enacted in 2024 doubled penalties for poisoning wild birds” rather than “stronger laws”; “50% shortfall in match-funding for GEF project on gazelles” rather than just “lack of funding”.

The most successful aspects of implementation of the Convention? (List up to five items):

- >>> 1. Cross border collaboration, coordination and cooperation on operations and activity on Illegal Wildlife Trade
- 2. Organized Bird Watch Club in Liberia
- 3. Working along with relevant institution to identify bird species and wild animals
- 4. Identified habitat of migratory species in Liberia
- 5. Developed concept note about migratory species awareness raising in wetlands

The greatest difficulties in implementing the Convention? (List up to five items):

- >>> Funding
- Information dissemination
- Sustainable activities
- consensus
- Multi-sectorial Coordination

The main priorities for future implementation of the Convention? (List up to five items):

- >>> 1. Develop and implement a nationwide project on national and community base awareness for endanger species;
- 2. Form active club that promote awareness on the conservation and protection of wildlife in Liberia
- 3. Conduct awareness raising and environmental education campaign focused on migratory species and wild animals
- 3. Production of fliers and brochures; and
- 4. Develop five (5) years plan for the protection of migratory species in Liberia

I. Administrative Information

Name of the Party

>>> Liberia

Date of entry into force of the Convention in your country (DDMMYY)

>>> December 01, 2004

Any territories which are excluded from the application of the Convention

>>> No

Report compiler

Name and title

>>> Hawa K. Walker

Full name of institution

>>> Environmental Protection Agency of Liberia

Telephone

>>> +231886547042 / +231770911182

Email

>>> hkortu01@yahoo.com, hwalker@epa.gov.lr

Designated CMS National Focal Point

Name and title of designated Focal Point

>>> Hawa Kortu Walker, Assistant Director, Conservation and National Focal Point Convention on Migratory Species (CMS)

Full name of institution

>>> Environmental Protection Agency of Liberia (EPA)

Mailing address

>>> P.O. Box 4024

302-A Bright's Building, Sekou Toure Avenue

Mamba Point

1000 Monrovia,10 Liberia

Telephone

>>> (+231) 886547042/ 770911182

Email

>>> hkortu01@yahoo.com, hwalker@epa.gov.lr

II. Accession/Ratification of CMS Agreements/MOUs

Please confirm the status of your country's participation in the following Agreements/MOUs, and indicate any updates or corrections required:

Yes, the lists are correct and up to date

Country participation in Agreements/MOUs:

Please select only one per line

	Range State, but not a Party/Signatory	Not applicable (= not a Range State)	Party/Signatory
Aquatic Warbler	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
ACAP	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
ACCOBAMS	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
AEWA	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Southern South American Grassland Birds	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Wadden Sea Seals	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
West African Elephants	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Western African Aquatic Mammals	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

III. Species on the Convention Appendices

III.1 Please confirm that the Excel file “Res. 14.19 species per Party” linked below correctly identifies the **Appendix II** species listed in Resolution 14.19 Guidance on the treatment of species included within aggregated families listed under Appendix II for which your country is a Range State.

The list of Resolution 14.19 species per Parties is available **here**.

Notice: Before clicking on the above hyperlink, please keep pressing the **Ctrl button** on your keyboard to open the link in a new tab.

GUIDANCE TIP:

During the last two reporting cycles, information has been collected on Appendix I and Appendix II species, and the information received still needs to be analyzed. Therefore, this reporting cycle only focuses on bird species identified under Resolution 14.19. This Resolution invites Parties to consider the list of Species in its Annex when preparing National Reports. This question aims at collecting information on Range States of species listed in the Annex to Resolution 14.19. Parties are therefore invited to review the Range State data which are available in the excel spreadsheet “Res. 14.19 species per Party”. Please confirm that the list is correct, or if amendments are needed, create a line for each species for which you wish to indicate different information from that shown in the Excel spreadsheet. Where possible, please also provide supporting evidence, such as a reference to a scientific paper. A more detailed spreadsheet with Data per countries and territories is available here as background information. The data used for these spreadsheets are based on the CMS standard references for non-passerine and passerine species, as determined by Resolution 12.27(Rev.COP14) Taxonomy and Nomenclature, using its online version HBW-BirdLife Version 9.0 (October 2024)..

No, amendments are needed for the following species:

You have attached the following documents to this answer.

[Section III Appendix II Liberia \(2\) Answered.pdf](#)

IV. Legal Prohibition of the Taking of Appendix I Species

IV.1. Is the taking of Appendix I species prohibited by national or territorial legislation in accordance with CMS Article III(5)?

Yes for some species

Please identify the legal statute(s) concerned

Please provide links and clearly identify the relevant statute(s) by providing the title, date, etc.

>>> Part V1, Section 80 of the Environmental Protection and Management Law of Liberia talked about the Protection of Wild Animals and Birds

IV.2 **Exceptions:** Where the taking of Appendix I species is prohibited by national legislation, have any exceptions been granted to the prohibition?

No

IV.3. Where the taking of all Appendix I species is **not** prohibited and the reasons for exceptions in Article III(5) do not apply, are steps being taken to update existing legislation or develop new legislation to prohibit the taking of all relevant species?

No

Please provide further information about the circumstances

>>> No new law beside the following: National Forest Reform Law of Liberia, 2016,

The Act Adopting National Wildlife Conservation and Protected Management Law of Liberia, 2016

IV.4. Are any vessels flagged to your country engaged in the intentional taking of Appendix I species outside of your country's national jurisdictional limits (consistent with the definition of "Range State" in Article I of the Convention)?

Unknown

V. Awareness

V.1. Please indicate the actions that have been taken by your country during the reporting period to increase people's awareness of the values of migratory species, their habitats and migration systems (note that answers given in section XVIII may also be relevant).
(select all that apply)

GUIDANCE TIP:

Awareness raising may include actions, steps, programmes, initiatives and/or activities described in various CMS documents, such as Resolution, Res. **11.9 (Rev.COP13)** (World Migratory Bird Day), as well as a number of other resolutions and decisions which include specific provisions about awareness raising, including Resolutions Res. **13.6** (Insect Decline), Res. **14.18** (Avian Influenza), Res. **14.17** (Communities and livelihoods), Res. **14.16** (Ecological Connectivity), Res. **14.15** (Action Plan to address aquatic Wild Meat Harvests), Res. **14.14** (CMS Jaguar Initiative), Res. **14.13** (Initiative for Central Asian Flyway), Res. **14.12** (Single Species Action Plan for the Angelshark (*Squatina squatina*) in the Mediterranean Sea), Res. **14.10** (Single Species Action Plan for the Atlantic Humpback Dolphin (*Sousa teuszii*)), Res. **14.8** (Conservation and sustainable management of seagrass ecosystems), Res. **14.5** (Reducing the risk of vessel strikes for marine megafauna), Res. **14.1** (Samarkand Strategic Plan for migratory species 2024 - 2032), Res. **12.6 (Rev.COP14)** (Wildlife health and migratory species), Res. **12.11 (Rev.COP14)** (Flyways), Res. **12.17** (Conservation and Management of Whales and their Habitats in the South Atlantic Region), Res. **12.19 (Rev.COP14)** (Endorsement of the African Elephant Action Plan), Res. **12.20** (Management of Marine Debris), Res. **12.21 (Rev.COP14)** (Climate Change and Migratory Species), Res. **12.25** (Promoting Conservation of Critical Intertidal and Other Coastal Habitats for Migratory Species), Res. **11.16 (Rev.COP14)** (The Prevention of Illegal Killing, Taking and Trade of Migratory Birds), Res. **11.17 (Rev.COP14)** (Action Plan for Migratory Landbirds in the African-Eurasian Region), Res. **11.24 (Rev.COP13)** (Central Asian Mammal Initiative), Res. **11.31 (Rev.COP14)** (Illegal and unsustainable taking of wildlife), Res. **8.12 (Rev.COP12)** (Improving the Conservation Status of Raptors and Owls in the African-Eurasian Region), and Decision 14.194 (Ecological Connectivity), Decision 14.54 (Marine Wildlife Watching) and Decision 14.223 (Impacts of Plastic Pollution on Aquatic, Terrestrial and Avian Species).

- Campaigns on specific topics
- Teaching programmes in schools or colleges
- Press and media coverage
- Engagement of specific stakeholder groups

Impact of actions

V.2. Please provide details for the actions selected in the previous question and indicate any specific elements of CMS COP Resolutions which have been particularly taken forward by these actions.
>>> Organized a program in schools and massive awareness in community.

V.3. Overall, how successful have these awareness actions been in achieving their objectives?
Tick one box

GUIDANCE TIP:

If the impact of awareness actions has been assessed by (for example) project evaluation studies or follow-up audience attitude surveys during the reporting period, those provide a basis for answering this question. If the assessment has involved any type of quantitative measure of the impact, please specify. It is recognized that such assessment studies may not always be available, in which case it is acceptable to base your answer on an informed subjective judgement. Alternatively, if there is genuinely no basis for forming such a judgement, please select "Unknown".
Question V.4 gives you the opportunity to explain the basis on which you have answered question V.3.

- 4. Large positive impact

V.4. Please identify the main form(s) of evidence that has/have been used to make this assessment.
>>> Through Consultative meeting;
Bird Watch Club Network
Radio Talk show

VI. Mainstreaming Migratory Species in Other Sectors and Processes

VI.1. Does the conservation of migratory species currently feature in any national or local strategies and/or planning processes in your country relating to development, poverty reduction and/or livelihoods?

Yes

Please provide details:

GUIDANCE TIP:

Please describe how CMS objectives are incorporated in other sectoral strategies such as transport, construction, agriculture, tourism, education, spatial planning, Sustainable Development Goals and other strategies.

>>> Working with National Focal Point on the Convention on International Trade in Endangered Species (CITES) on Illegal Wildlife Trade within the Mano River Union Countries;

Working with MRU Countries on National level coordination on the conservation of migratory species of wild animals;

Working along with the Biodiversity Focal Point for the successful celebration of International Biodiversity Day (IBD);

VI.2. Does your country integrate the 'values of migratory species and their habitats' in any other national reporting processes?

E.g. Agenda 2030, reporting for International Whaling Commission, CBD, EU Nature Directives, etc.

GUIDANCE TIP:

Responses to this question should be focused on the reporting processes of the country rather than on plans and regulations within the country. This question intends to understand if the values of migratory species and habitats are featured in other national reporting that your country participates in, such as reporting to other biodiversity MEAs, the International Whaling Commission, European Commission etc.

Yes

Please provide details:

>>> The convention is being domesticated through the participation of other government sectors and local NGO whose activities are featured in other national reports.

VI.3. Provide some examples of significant involvements (if any) of non-governmental organizations and/or civil society in the conservation of migratory species in your country.

>>> Stakeholders Consultation

Radio Talk show

Awareness raising

WhatsApp group

VI.4. Provide some examples of significant involvements (if any) of the private sector in the conservation of migratory species in your country.

>>> Bird Watching Club

Community Base Enterprise

Stakeholders' consultation

Conservation Nature Clubs in schools

VI.5. Are legislation and regulations in your country concerning Environmental Impact Assessments (EIA) and Strategic Environmental Assessments (SEA) considering the possible impediments to migration, transboundary effects on migratory species, and of impacts on migratory patterns and migratory ranges?

GUIDANCE TIP:

Please refer to Resolution **7.2 (Rev.COP14)** (Impact Assessment and Migratory Species).

Yes

Please describe any hindrances and challenges to the application of EIA and SEAs with respect to migratory species, lessons learned, and needs for further capacity development.

>>> some challenges due to EIA and SEAs are as follow:

1. Company are not willing to come to compliance.

2. Poor collaboration amongst stakeholders

3. Poor information dissemination

4 inadequate awareness about the EIA and the SEAs process

VI.6. To what extent have biodiversity and migratory species considerations been specifically integrated into national energy and climate policy and legislation?

GUIDANCE TIP

Please refer to Resolutions **12.21 (Rev.COP14)** (Climate Change and Migratory Species), Res. **11.27 (Rev.COP13)** (Renewable Energy and Migratory Species), Res. **10.11 (Rev.COP13)** (Power Lines and Migratory Birds), and Decision **14.207** (Renewable Energy and Migratory Species) for more information.

>>> The Environment Protection Agency is working robustly in collaboration. With Ministry of Mines and Energy and relevant ministries, agencies and commissions on how to position power lines to mitigate the destruction of migratory birds along power lines.

Please provide any examples related to such policy and legislation.

>>> The Environmental Protection and Management Law of Liberia, 2003 and the National Forest and Reform Law of Liberia 2006

VII. Governance, Policy and Legislative Coherence

(SPMS Target 3: National, regional and international governance arrangements and agreements affecting migratory species and their migration systems have improved significantly, making relevant policy, legislative and implementation processes more coherent, accountable, transparent, participatory, equitable and inclusive.)

VII.1. Have any governance arrangements and agreements affecting migratory species and their migration systems in your country, or in which your country participates, resulted in improvements during the reporting period?

GUIDANCE TIP:

This question is intended to understand improvements in governance arrangements in your country, which may potentially include improvements in policy, legislation, governance processes, plans etc. Please also consider the guidance below in VII.2.

Yes

Please provide details:

>>> Forestry Reform Law of 2006 and the National Wildlife and Protected Area Management Law of 2016 and the Environmental Protection and Management Law of Liberia

To what extent have these improvements helped to make relevant policy, legislative and implementation processes more coherent, accountable, transparent, participatory, equitable and inclusive?

3. Good contribution

Please describe how this assessment was made

>>> Through the establishment of the species working group, which gives the opportunity to monitor migratory species in protected and proposed protected areas.

Wildlife crime task force helps to track whether migratory species habitats have been threatened which leads to prosecution of violators

VII.2. Has any committee or other arrangement for liaison between different government agencies/ministries, sectors or groups been established at a national and/or subnational level in your country that addresses CMS implementation issues?

GUIDANCE TIP:

There is no fixed model for what these arrangements may involve, and it is for each Contracting Party to decide what best suits its own circumstances. Examples could include a steering group that includes representatives of territorial administration authorities, a coordination committee that involves the lead government department (e.g. environment) working with other departments (e.g. agriculture, industry); a forum that brings together government and NGOs; a liaison group that links with business and private sector interests; a stakeholder forum involving representatives of indigenous and local communities; a coordination team that brings together the National Focal Points for each of the biodiversity-related MEAs to which the country is a Party (see also question VII.3); or any other appropriate mechanism.

These mechanisms may be specifically focused on migratory species issues, or they may address CMS implementation in conjunction with related processes such as NBSAP coordination, a National Ramsar Committee, etc.

The Manual for National Focal Points for CMS and its Instruments may be helpful in giving further context.

Yes

Please provide details:

>>> There are Environmental Protection and Management Law Part 6 Section 80, Chapter 9 Section 9.1 of the National Forestry and Reform Law of 2006 of Liberia, National fisheries Law of Liberia 2019 and the National fisheries and aquatic Act of 2017, that governed the protection of migratory species and wild animals

VII.3. Does collaboration between the focal points of CMS and other relevant global or regional Conventions take place in your country to develop the coordinated and synergistic approaches described in paragraphs 29, 30 and 32 of **Res. 11.10 (Rev.COP14)** (Synergies and partnerships) and in paragraph 7 of **Res. 14.3** (Engagement in CBD processes including the Global Biodiversity Framework) ?

GUIDANCE TIP:

Relevant Conventions may include other global agreements such as biodiversity-related Conventions and Agreements, UNFCCC, UNCCD, as well as regional agreements, including CMS Agreements. Such collaboration may also be relevant to aligning efforts related to the Kunming-Montreal Global Biodiversity Framework, the 2030 Agenda for Sustainable Development, the United Nations Decade on Ecosystem Restoration 2021-2030, and NBSAPs as described in **Dec. 14.6**(CMS Engagement in CBD Processes Including Global Biodiversity Framework) and **Res.8.18 (Rev.COP12)** (Integration of Migratory Species into NBSAPs and into On-going and Future Programmes of Work under CBD).

Guidance documents for integrating considerations relevant to Migratory Species in NBSAPs are available at CMS

website.

Yes

Please provide details:

>>> We work in collaboration with other relevant Conventions such as: Convention on International Trade of Endangered Species (CITES), United Nations Framework Convention on Climate Change (UNFCCC), United Nations Convention on Biological Diversity, United Nations Convention to Combat Desertification (UNCCD), Ramsar Convention, International Big Cats Alliance (IBCA), Consortium of Critically Endangered Atlantic Humpback Dolphin (CCAHD)

VII.4. Has your country or any jurisdictional subdivision within your country adopted legislation, policies, initiatives or action plans during the reporting period that promote community involvement in conservation of CMS-listed species?

Yes

Please identify the legislation, policies, initiatives, or action plans concerned:

>>> Environmental Protection and Management Law (2002), Republic of Liberia, National Biodiversity Strategy and Action Plan-2017 (NBSAP) , Wildlife and protected areas Law of 2018

VIII. Incentives

VIII.1. Has there been any elimination, phasing out or reforming of harmful incentives in your country during the reporting period resulting in benefits for migratory species?

No, because no such incentives have existed

VIII.2. Has there been development and/or application of positive incentives in your country during the reporting period, resulting in benefits for migratory species?

No, because there is no scope to do so

IX. Sustainable Production and Consumption

IX.1. During the reporting period, has your country implemented plans or taken other steps concerning sustainable production and consumption which are relevant for conservation of migratory species?

No

What is preventing progress?

>>> Based on current reform coming from our National Laws on Wildlife and Protected Area management Law and CITES

X. Threats and Pressures Affecting Migratory Species; Including Obstacles to Migration

Which of the following pressures on migratory species or their habitats are having an adverse impact in your country on migratory species included in the CMS Appendices?

Guidance: This question asks you to identify the important pressures that are reliably known to be having an actual adverse impact on CMS-listed migratory species at present. Please avoid including speculative information about pressures that may be of some potential concern but whose impacts have not yet been demonstrated.

Please note that, consistent with the terms of the Convention, “in your country” may in certain circumstances include areas outside national jurisdictional limits where the activities of any vessels flagged to your country are involved.

Intentional Taking

GUIDANCE TIP:

Please note that as per Article 1(i) of the Convention, “Taking” means taking, hunting, fishing, capturing, harassing, deliberate killing, or attempting to engage in such conduct.

	Species/species groups affected (please provide names and indicate whether Appendix I and/or Appendix II); and any other details	Overall relative severity of impact 1 = severe 2 = moderate 3 = low
Legal hunting		
Illegal hunting	Appendix II	1
Other harvesting and take		3
Illegal trade	Appendix II	2
Deliberate poisoning	Appendix II	3

What are the most significant advances that have been made since the previous report in addressing intentional taking?

>>> Continuous awareness around Protected and Proposed Protected Areas, field monitoring, enforcement and prosecution of would-be violators.

Unintentional Taking

	Overall relative severity of impact 1 = severe 2 = moderate 3 = low	Species/species groups affected (please provide names and indicate whether Appendix I and/or Appendix II); and any other details
Bycatch	1	Sea Turtle (appendix I), Dolphin (appendix II)
Catch in Abandoned, Lost or otherwise Discarded Fishing Gear (ALDFG)	3	Sea turtle, sharks, rays, dolphins (appendix I and II)
Other forms of unintentional taking		

What are the most significant advances that have been made since the previous report in addressing bycatch or catch in ALDFG?

GUIDANCE TIP:

Significant advances may include efforts, actions, steps, programmes, initiatives and/or activities described in CMS documentation, such as Resolutions **12.22**(Bycatch), Res. **12.20** (Management of Marine Debris), Res. **11.21** (Single Species Action Plan for the Loggerhead Turtle in the South Pacific Ocean), Res. **14.9** (Conservation Priorities for Cetaceans), and Res. **13.3** (Chondrichthyan species) and Dec. 14.31 b) and c). Parties are encouraged to report on the implementation of the recommendation included in Drynan and Baker 2023 “Technical mitigation techniques to reduce bycatch of sharks” provided in Annex 1 to UNEP/CMS/COP14/Doc.27.1.1/Rev.1.

>>> Advanced fishing nets, from monofilament net to Multifilament net, with increase in mesh size

What are the most significant negative trends since the previous report concerning bycatch?

GUIDANCE TIP:

Please provide information on any significant trend in bycatch of CMS-listed species, notably those listed on App. I. Related to the guidance given on the overarching part of Question X.1, this is a key example where you are encouraged to think about activities outside national jurisdictional limits of any vessels flagged to your country (in addition to any other circumstances in which bycatch is a noteworthy pressure on relevant species).

>>> Increase in the use of dynamite and monofilament net

Collisions and electrocution

	Species/species groups affected (please provide names and indicate whether Appendix I and/or Appendix II); and any other details	Overall relative severity of impact 1 = severe 2 = moderate 3 = low
Wind turbines	N/A	
Other collisions	N/A	
Electrocution	N/A	
Vessel strikes	N/A	

What are the most significant advances that have been made since the previous report in addressing collisions and electrocution?

>>> N/A

What are the most significant negative trends since the previous report concerning collisions and electrocution?

GUIDANCE TIP:

Significant advances may include efforts, actions, steps, programmes, initiatives and/or activities described in CMS documentation, such as Resolution **7.4** (Electrocution of Migratory Birds), **7.5 (Rev.COP12)**(Wind Turbines and Migratory Species, **10.11 (Rev. COP13)** (Power Lines and Migratory Birds), **11.17 (Rev.COP14)** (Action Plan for Migratory Landbirds in the African Eurasian Region), **11.27 (Rev.COP13)** (Renewable Energy and Migratory Species), **12.10 (Rev.COP14)** (Conservation of African Eurasian Vultures), Res. **14.5** (Reducing the risk of vessel strikes for marine megafauna), Res. **14.9** (Conservation Priorities for Cetaceans) and Decision 14.48.

>>> N/A

Other mortality

	Overall relative severity of impact 1 = severe 2 = moderate 3 = low	Species/species groups affected (please provide names and indicate whether Appendix I and/or Appendix II); and any other details
Disease, including highly pathogenic avian influenza (HPAI)	3	Dolphins, sea turtle, rays, intermediate egret (appendix II)
Unexplained stranding events	3	Whale (appendix I)
Accidental/indirect poisoning	3	Intermediate egret (appendix II)
Disease	3	Chimpanzee (appendix I)

Alien and/or invasive species

	Species/species groups affected (please provide names and indicate whether Appendix I and/or Appendix II); and any other details	Overall relative severity of impact 1 = severe 2 = moderate 3 = low

Alien and/or invasive species		
-------------------------------	--	--

Climate change

	Overall relative severity of impact 1 = severe 2 = moderate 3 = low	Species/species groups affected (please provide names and indicate whether Appendix I and/or Appendix II); and any other details
Climate change	2	

Levels of knowledge, awareness, legislation, management etc.

	Overall relative severity of impact 1 = severe 2 = moderate 3 = low	Species/species groups affected (please provide names and indicate whether Appendix I and/or Appendix II); and any other details
Inadequate transboundary management	2	
Inadequate legislation	2	
Lack of knowledge	2	
Inadequate enforcement of legislation	2	

Other (please specify)

	Overall relative severity of impact 1 = severe 2 = moderate 3 = low	Species/species groups affected (please provide names and indicate whether Appendix I and/or Appendix II); and any other details

During the reporting period, has your country adopted new legislation or other domestic measures in response to CMS Article III(4) (b) specifically addressing obstacles to migration?
 CMS Article III(4)(b) states ‘Parties that are Range States of a migratory species listed in Appendix I shall endeavor...to prevent, remove, compensate for or minimize, as appropriate, the adverse effects of activities or obstacles that seriously impede or prevent the migration of the species.’

GUIDANCE TIP:

This question is intended to specifically report on any new legislation or domestic measures **addressing obstacles to migration**. Relevant information would not include general conservation measures.

No

XI. Conservation Status of Migratory Species

XI.1. What (if any) major changes in the conservation status of migratory species included in the CMS Appendices (e.g. national Red List category changes) have been recorded in your country during the reporting period?

“Conservation status” of migratory species is defined in Article I(1)(b) of the Convention as “the sum of the influences acting on the migratory species that may affect its long-term distribution and abundance”; and four conditions for conservation status to be taken as “favourable” are set out in Article I(1)(c).

If more rows are required, please upload an Excel file detailing a longer list of species. GUIDANCE TIP:

The emphasis of this question is on “major changes” during the reporting period. Information is expected to be provided here only where particularly notable shifts in status have occurred, such as those that might be represented by a re-categorisation of national Red List threat status for a given species (or subspecies, where relevant). Please record if any CMS listed species has become extinct or extirpated from your country - or reintroduced/re-established/established - during the reporting period (or before if not previously reported to CMS).

Please note also that you are only being asked about the situation in your country. Information about global trends, and global Red List reclassifications etc, will be communicated to the CMS via other channels outside the national reporting process.

Terrestrial mammals (not including bats)

	Change in status (including time period concerned)	Comments	Source reference	Species/subspecies (indicate CMS Appendix where applicable)
				Appendix II

Aquatic mammals

	Change in status (including time period concerned)	Comments	Source reference	Species/subspecies (indicate CMS Appendix where applicable)
				Appendix I

Bats

	Change in status (including time period concerned)	Comments	Source reference	Species/subspecies (indicate CMS Appendix where applicable)
				Appendix I

Birds

	Change in status (including time period concerned)	Comments	Source reference	Species/subspecies (indicate CMS Appendix where applicable)

			EPML (2002)	Appendix II
--	--	--	-------------	-------------

Reptiles

	Change in status (including time period concerned)	Comments	Source reference	Species/subspecies (indicate CMS Appendix where applicable)
				Appendix I

Fish

	Change in status (including time period concerned)	Comments	Source reference	Species/subspecies (indicate CMS Appendix where applicable)
				Appendix II

Insects

	Change in status (including time period concerned)	Comments	Source reference	Species/subspecies (indicate CMS Appendix where applicable)
				Appendix 1

XII. Cooperating to Conserve Migration Systems

XII.1 During the reporting period, has your country initiated or participated in the development of any proposals for new CMS Agreements, including Memoranda of Understanding, to address the needs of Appendix II species?

E.g. Developments following the advice in Resolutions **12.8** and **13.7**.

Yes

Please provide details:

>>> Liberia has already developed a proposal to be sent to donors for funding.

XII.2. During the reporting period, have actions been taken by your country to encourage non-Parties to join CMS and its related Agreements?

No

XII.3. During the reporting period, has your country participated in the implementation of Concerted Actions under CMS (as detailed in Resolution **12.28 (Rev.COP14)**) to address the needs of relevant migratory species?

Yes

Please describe the results of these actions achieved so far:

GUIDANCE TIP:

If any progress report on implementation of Concerted Actions has been submitted to the COP and/or the Scientific Council in the period under consideration, Parties can refer to that report rather than restating the same information in replying to this question (please indicate the document number)

>>> None

XII.4. Have any other steps been taken which have contributed to enhancing cooperation on the conservation of migratory species in ways that fully reflect a migration systems approach?

E.g. steps implementing Resolutions **12.11 (Rev.COP14)** (Flyways) and Res. **12.17** (South Atlantic Whales), and Decisions 14.130 (Action Plan for Migratory Landbirds), 14.137 (Flyways), and 14.207 (Renewable Energy and Migratory Species).

No

XII.5. Has your country mobilized resources and/or taken steps to promote and address ecological connectivity and its functionality in relevant international processes?

E.g., Kunming-Montreal Global Biodiversity Framework, 2030 Agenda for Sustainable Development, United Nations Decade on Ecosystem Restoration 2021-2030, etc.

GUIDANCE TIP:

Please describe initiatives aimed at implementing Decision 14.194.

No

XIII. Area-Based Conservation Measures

XIII.1. Have critical habitats and sites for migratory species been identified (e.g. by an inventory) in your country?

GUIDANCE TIP:

The CMS does not have a formal definition of what constitutes a “critical” site or habitat for migratory species. It is left to report compilers to work with any interpretations which may be in existing use at national level, or to use informed expert judgement.

Helpful reflections on the issue can be found in the Resolution **Res. 14.16** (Ecological Connectivity) and in “**Strategic Review of Aspects of Ecological Networks relating to Migratory Species**” presented to COP11 and the “**Critical Site Network Tool**” developed under the auspices of AEWA and the Ramsar Convention. For sharks and rays please refer to <https://sharkrayareas.org>. For marine mammals, please refer to <https://www.marinemammalhabitat.org/imma-eatlas/>.

Partially - to a large extent

What are the main gaps and priorities to address, if any, in order to achieve full identification of relevant critical habitats and sites?

>>> Lack of technical, logistic and financial support

XIII.2. Has any assessment been made of the contribution made by the country’s protected areas network specifically to migratory species conservation?

In development

XIII.3. Has your country adopted any new legislation or other domestic measures in the reporting period in response to CMS Article III(4) (a) (“Parties that are Range States of a migratory species listed in Appendix I shall endeavor ... to conserve and, where feasible and appropriate, restore those habitats of the species which are of importance in removing the species from danger of extinction”)?

No

XIII.4. In respect of protected areas in your country that are important for migratory species, have any assessments of management effectiveness been undertaken in the reporting period?

In development

XIII.5. Beyond Protected Areas, are other effective area-based conservation measures implemented in your country in ways which benefit migratory species?

Yes

Please provide details:

>>> The New Wildlife Conservation Regulations have been promulgated under the Revised Forestry Laws of Liberia; the National Biodiversity Strategy and Action Plan (NBSAP) for Liberia and the Environmental Protection and Management Law (2002) have been adapted for implementation.

4a

XIV. Ecosystem Services

XIV.1. Has any assessment of ecosystem services associated with migratory species been undertaken in your country since the last reporting?

GUIDANCE TIP:

The phrase “associated with” migratory species allows you to report on any assessments that cover ecosystem services of systems, habitats or species assemblages that include migratory species. The question is therefore not expecting you to limit this to assessments focused solely on one or more migratory species.

For a broader biodiversity assessment to be relevant here, the migratory species involved must be making some identifiable contribution to the ecosystem services concerned.

Yes

Please provide details (including source references where applicable):

>>> Under the Economic of Ecosystem and Biodiversity pilot in Liberia, comprehensive study of the mangrove ecosystem was conducted and clearly indicating various scenarios including those related to migratory species between 2015-2017 by the Environmental Protection Agency of Liberia. Birdlife International, Society for the Conservation of Nature of Liberia and Conservation international have also done such studies.

XV. Safeguarding Genetic Diversity

XV.1. Are strategies of relevance to migratory species being developed or implemented to minimize genetic erosion of biodiversity in your country?

GUIDANCE TIP:

Strategies to be considered under this section do not necessarily have to specifically address migratory species but be of sufficient relevance in relation to the objective of safeguarding the genetic diversity of wild populations.

No

XVI. National Biodiversity Strategies and Action Plans

XVI.1. Does your country's National Biodiversity Strategy or Action Plan (NBSAP), or other relevant plans or strategies used in your country, explicitly address obligations under CMS, priorities for the conservation and management of migratory species, their habitats and migration systems, and ecological connectivity?

Yes

a. Please provide a link to or attachment of the strategy/action plan

You have attached the following documents to this answer.

[lr-nbsap-v2-en_\(4\).docx](#) - Liberia National Biodiversity and Action Plan, 2017-2025

b. Please identify the elements in the plan/strategy that are particularly relevant to migratory species, and highlight any specific references to the CMS/CMS instruments

GUIDANCE TIP:

Specify page numbers, section/paragraph numbers etc., where possible.

>>> The following National Targets are relevant to migratory species:

National Targets: 1.2,1.3,1.4,2.1,2.2,3.1,3.2,3.3

Page 14 & 15 of the National Biodiversity and Action Plan

c. Please add comments on the implementation of the strategy or action plan concerned.

>>> The Revised NBSAP of Liberia (consistent with the global Aichi Biodiversity and National Targets) was completed in 2017 and implementation period runs from 2017-25.

XVI.2. Please provide information on the progress of implementation of other relevant action plans (single species, species group, etc.), initiatives, task forces, and programmes of work in your country that have not been addressed in previous questions.

E.g. AEMLAP, Great Green Wall, Bonn Challenge, Action Plans for Birds, Action Plan for the Protection and Conservation of South Atlantic Whales, Energy Task Force, Programme of Work on Climate Change and Migratory Species, etc.

>>> We have Species working group of Liberia. and other plat form

Please describe the monitoring and efficacy of measures taken in regard to these relevant action plans, initiatives, task forces, and programmes of work and their integration into delivery against other relevant international agreements.

GUIDANCE TIP:

In answering this question, compilers can provide link to relevant reports under other agreements.

>>> Continuous awareness around Protected and Proposed Protected Areas, field monitoring, enforcement and prosecution of would-be violators.

XVII. Traditional Knowledge, Innovations and Practices of Indigenous and Local Communities

In the absence of a national definition of 'indigenous and local communities', please refer to the Convention on Biological Diversity document **Compilation of Views Received on Use of the Term "Indigenous Peoples and Local Communities"** for helpful guidance on these terms.

XVII.1. During the reporting period, have actions been taken in your country to foster consideration for the traditional knowledge, innovations and practices of indigenous and local communities that are relevant for the conservation and sustainable use of migratory species, their habitats and migration systems?

Yes

XVII.2. During the reporting period, have actions been taken in your country to promote and foster effective participation and involvement of indigenous and local communities in the conservation and sustainable use of migratory species, their habitats and migration systems?

Partly / in some areas

If 'yes' or 'partly/in some areas' to either of the preceding two questions, please select which actions have been taken:

(select all that apply)

- Research & documentation
- Engagement initiatives (e.g. as part of development projects)
- Inclusion in governance mechanisms (legislation, policies, etc.)
- Management strategies, programmes and action plans that integrate traditional & indigenous interests

Please provide details on the implementation of the actions concerned.

GUIDANCE TIP

Responses to these questions may involve actions, steps, programmes, initiatives and/or activities described in CMS documentation, such as Resolution **14.9** (Conservation Priorities for Cetaceans).

>>> Section 86 of the Environmental Protection and Management Law of Liberia focuses on issues associated with traditional knowledge associated with genetic resources. Liberia party to the Access and Benefit sharing Protocol(Nagoya and Biosafety Protocols) of the CBD.

XVII.3. How would you rank progress since the previous report in your country in the area of traditional knowledge innovations and practices of indigenous and local communities relevant for the conservation and sustainable use of migratory species?

2. Some progress but more work is needed

Please provide details on the progress made (where applicable).

>>> Some progress has been made but more work is needed.

XVIII. Knowledge, Data and Capacity-Building

XVIII.1 During the reporting period, which steps taken in your country have contributed to the achievement of the results defined in the area of knowledge, data and capacity building? (Answers given in Section V may be relevant)

(select all that apply)

- Education campaigns in schools
- Public awareness campaigns
- Capacity building
- Knowledge and data-sharing initiatives
- Capacity assessments/gap analyses
- Research by academia, research organizations and other relevant stakeholders
- Other (please specify):

>>> Establishment of environment clubs in communities and secondary schools

XVIII.2 Please describe the contribution these steps have made towards achieving the results defined in Target 15:

GUIDANCE TIP

Steps taken may include actions, programmes, initiatives and/or activities described in CMS documentation, such as Resolutions **14.9** (Conservation Priorities for Cetaceans), Res. **13.3** (Chondrichthyan Species), Res. **13.4** (African Carnivore initiative), Res. **13.5 (Rev.COP14)** (CMS international light pollution guidelines for migratory species), Res. **13.6** (Insect Decline), and Decisions 14.130/14.131 (AEMLAP), 14.134 (Preventing Poisoning of Migratory Birds), 14.148-14.151 (Conservation of African-Eurasian Vultures), Decisions 14.207-14.208 (Renewable Energy and Migratory Species), and 14.182 (Illegal and Unsustainable Taking of Wildlife).

Education campaigns in schools

>>> Environmental Protection and Management Law sections 100 and 1001 require mandated the Environmental Protection Agency of Liberia and her partners to undertake public awareness, education and communication of relevant environmental messages to all stakeholders including local communities. Biodiversity specific and MEAs communication strategies have been developed. These strategies have been implemented gradually.

Public awareness campaigns

>>> Worked with media institutions and communities about awareness campaigns.

Capacity building

>>> Continuous awareness around Protected and Proposed Protected Areas, field monitoring, enforcement and prosecution of would-be violators.

Knowledge and data-sharing initiatives

>>> Working along with Bird Watching Club for knowledge and data-sharing initiatives'
Working with the Environmental Knowledge Management System Platform

Capacity assessments/gap analyses

>>> Continuous awareness around Protected and Proposed Protected Areas, field monitoring, enforcement and prosecution of would-be violators.

Other

>>> Working with relevant institutions and INGOs on the conservation of migratory species

Research by academia, research organizations and other relevant stakeholders

>>> Continuous awareness around Protected and Proposed Protected Areas, field monitoring, enforcement and prosecution of would-be violators.

XVIII.3 What assistance (if any) does your country require in order to build sufficient capacity to implement its obligations under the CMS and relevant Resolutions of the COP?

(select all that apply)

- Funding support
- Technical assistance
- Education/training/mentoring
- Other skills development
- Provision of equipment or materials

- Exchange of information & know-how
- Research & innovation
- Mobilizing volunteer effort (e.g. citizen science)

XIX. Resource Mobilization

XIX.1 During the reporting period, has your country made financial or other resources available for conservation activities specifically benefiting migratory species?

GUIDANCE TIP:

The “resources” that are relevant here can be financial, human or technical. In addition to funding, “in-kind” forms of support such as staff time or administrative infrastructure could be relevant, as could the loan of equipment, provision of data processing facilities, technology transfer, training or mentoring schemes and other initiatives for capacity building.

Yes, made available for activities within the country

Please indicate whether the overall levels of resourcing concerned are the same or different from those in the previous reporting period:

The same

XIX.2. During the reporting period, has your country received financial or other resources for conservation activities specifically benefiting migratory species?

Yes

Please select the source(s) concerned (select all that apply):

The Global Environment Facility (GEF)

Other intergovernmental programme

Non-governmental organization(s)

Individual country governments/government agencies (please specify)

Please indicate whether the overall levels of resourcing concerned are the same or different from those in the previous reporting period:

The same

XIX.3. Which are the most important CMS implementation priorities requiring resources and support in your country during future reporting periods?

GUIDANCE TIP:

Please consider answers provided in HLS.3 when answering this question where appropriate, as they may be of relevance.

>>> 1. Proposal on CMS

2. Conservation or protection of specific species mentioned in Appendix I and Appendix II

3. Logistics for monitoring
