

**8th Meeting of the Sessional Committee of the
CMS Scientific Council (ScC-SC8)**

Bonn, Germany, 15 – 18 December 2025

UNEP/CMS/ScC-SC8/Outcome 2.1

**TERMS OF REFERENCE
FOR THE CMS SCIENTIFIC COUNCIL WORKING GROUP ON FLYWAYS**

(Adopted by the 8th Meeting of the Sessional Committee of the CMS Scientific Council)

1. Background and purpose

This Working Group is established in line with the mandate provided by Resolution 12.11 (Rev.COP14) *Flyways* to assist the Parties to the Convention on Migratory Species (CMS) and its associated instruments to ensure the exchange of best practices and the identification of global synergies and gaps across the different flyway-related initiatives, either developed within the framework of the CMS or outside.

The Ninth Meeting of the Conference of the Parties to CMS (COP9) adopted [Resolution 9.2](#)¹ which established an open-ended working group on global bird flyways within the framework of the Scientific Council. The Working Group's remit was to act as a think tank on flyways and frameworks, and was tasked with reviewing scientific and technical issues for conservation of migratory birds and their habitats (e.g. [UNEP/CMS/Conf.9.27 Future Flyways Policy](#)), and relevant international instruments, initiatives and processes, as the basis for future CMS policy on flyways and contributing to the work on the future shape of CMS. The revisions of the Flyways mandate at the following meetings of the COP² agreed upon the continuation of the Flyways Working Group (FWG). The FWG has supported the production of various milestone outputs including the global Programme of Work on Flyways 2014-2023, and 'A Review of Migratory Bird Flyways and Priorities for Management'³.

2. Role and Scope

The Working Group, consisting of experts identified in cooperation with the Secretariat, exists to advise the Scientific Council on issues linked to migratory bird flyway conservation and to perform the following activities:

1. Support the implementation of Resolution 12.11 (Rev.COP14) *Flyways* and related Decisions directed to the Scientific Council and develop guidance to aid Parties in identifying key priorities and major implementation gaps in their region.
2. Support the definition, implementation and monitoring of the Flyways Programme of Work.
3. Provide guidance and input to the conservation and management of flyways at global and flyway level during the inter-sessional period, as a basis for CMS policy on flyways.

¹ Repealed. Superseded by Resolution 12.11 (Rev.COP14).

² COP10 to COP14, endorsed through the relevant resolutions on *Flyways*, superseded by Resolution 12.11 (Rev.COP14).

³ CMS Technical Series No. 27

4. Provide a platform to discuss and review CMS-related scientific and technical issues on flyways and relevant migratory bird-related matters.
5. Review relevant scientific and technical issues, international initiatives and processes linked to flyways, migratory birds, their habitats and the threats to them.
6. Help to ensure the coordination between various CMS Working Groups and Task Forces (e.g., Illegal Killing of Birds, Landbirds, Energy) on flyway-related actions and priorities, and enhance synergies in their implementation.

The geographical scope of the Flyways Working Group is global. The Flyways Working Group remains in place until the Sessional Committee decides its work is complete or an alternative arrangement is made.

3. Membership

Membership should aim to cover all major flyway regions of the world and promote participation of persons knowledgeable in flyway issues and relevant flyway conservation frameworks. The number of members should be optimized to be able to work effectively.

1. Membership of the Working Group can include both members of the Scientific Council and observers; in line with the Rules of Procedure of the Scientific Council.
2. The Working Group will strive to maintain a balance of gender, regional representation and taxonomic categories of expertise.
3. The involvement of Working Group members is entirely on a voluntary basis.
4. Relevant independent experts, including representatives of non-CMS flyway initiatives, on migratory bird ecology and policy are encouraged to participate and assist with the implementation of the Programme of Work.
5. If needed, experts external to the Working Group and interested in contributing to the objectives of the Working Group may be invited to join meetings or to support specific tasks.

4. Governance

The Working Group will select a Chair and Vice-Chair from among its Sessional Committee members. The Working Group will operate by seeking consensus among its members. A Coordinator may be appointed to assist with implementing the Programme of Work subject to the availability of external resources.

5. Organisation of Work

1. A Flyways Working Group Programme of Work detailing specific activities will be developed for each intersessional period.
2. The Working Group will mainly operate electronically by communicating via email, virtual meetings and, subject to available external resources, making use of a dedicated workspace.
3. To address key conservation priorities, the Flyway Working Group may establish thematic sub-groups to deliver effective solutions for migratory bird conservation.
4. An annual meeting may be organized, subject to available external resources. In-person meetings may be held in the margins of Sessional Committee meetings and other meetings as appropriate.

5. The Chair of the Working Group will report on progress to the Sessional Committee.
6. The CMS Secretariat will endeavor to support and facilitate the coordination of the activities and the organization of meetings of the Working Group, as well as maintain the Flyway Working Group webpage on the CMS website.
