

Annexe A : Suggestions du GCT à l'attention des Signataires concernant les ajouts potentiels à la liste du Tableau 3 des sites d'importance internationale pour les oiseaux de proie migrants en Afrique et en Eurasie

Résumé : Entre la MOS3 et la MOS4, le GCT a compilé une liste de sites supplémentaires signalés comme abritant des effectifs d'importance internationale d'espèces de l'Annexe 1 dans l'ensemble de la zone géographique du MdE, mais ne figurant pas actuellement au Tableau 3, ainsi que de nouvelles populations remplissant les critères sur des sites déjà inscrits au Tableau 3. Pour de plus amples informations, voir le document sur la justification des sites soumis à la MOS4. Il convient de noter qu'il s'agit d'une analyse automatisée visant à produire des données pertinentes au sein de la zone du MdE à l'intention des Signataires, et qu'elle ne tient donc pas compte des processus historiques ou en cours propres à chaque pays en matière d'amélioration du Tableau 3. Ces données varient également selon l'année d'évaluation et nécessitent donc un examen par les Signataires. Les annexes sont ainsi proposées par le GCT comme contribution aux discussions nationales sur le Tableau 3.

Ordre des pays : Les sites sont classés par ordre alphabétique par région : Afrique, Asie, Asie centrale, Europe, Moyen-Orient, et au sein de chaque région, par ordre alphabétique de pays.

sites abritant certaines espèces sensibles ; veuillez toutefois contacter l'Unité de coordination du MdE Rapaces si vous avez besoin de cette information.

Pour de plus amples informations sur les sites répertoriés à l'annexe A, voir :

Plan d'action mondial pour l'Aigle des steppes <https://raptors.cms.int/steppe-eagle-global-action-plan>

Zones importantes pour la conservation des oiseaux et de la biodiversité (ZICO) voir <https://datazone.birdlife.org/search>. NB/ Certaines données relatives aux espèces sensibles sur certains sites peuvent ne pas être disponibles publiquement.

Zones clés pour la biodiversité (ZCB) voir <https://www.keybiodiversityareas.org/en/sites>. NB/ Certaines données relatives aux espèces sensibles sur certains sites peuvent ne pas être disponibles publiquement.

Pour les informations relatives aux ZICO/ZCB, les Signataires peuvent souhaiter consulter le Partenaire BirdLife International de leur pays concernant la mise à jour du Tableau 3 (<https://www.birdlife.org/regions-and-partners/>)

Europe	Portugal		Serra do Mendro (Vidigueira/Portel)			Aegypius monachus	Vautour moine	Breeding	Expert identified Internationally important site for Annex 1 spp not on Table 3	Expert		From Vulture Conservation Foundation: 11 à 13 couples reproducteurs en 2026 ; 17 nids trouvés. Zone utilisée régulièrement par de nombreux vautours moines et vautours fauves pour se percher. Colonie découverte en 2024, suivi de la reproduction effectué en 2025 et 2026. Type d'observation : suivi/inventaires de la reproduction - observation directe. 4 oiseaux juvéniles ont été équipés de balises GPS en 2025 et 2026. Des données de suivi montrent que la zone est utilisée par de nombreux vautours moines bagués dans d'autres colonies de reproduction au Portugal (au moins ~40 oiseaux bagués ont visité/séjourné dans la zone), ainsi que par des vautours fauves bagués dans différentes colonies en Espagne (~20 oiseaux bagués confirmés utiliser/se percher dans la zone). Aire de répartition : Reproduction
