

Explication des modifications apportées aux informations sur les sites à l'annexe B

Comme indiqué dans le rapport principal, le Tableau 3 du MdE Rapaces dans sa forme actuelle (telle que reflétée lors de la MOS3) a été constitué pour la première fois par le TAG à partir de données de 2014-2015, mais les informations sur les sites et les inventaires pertinents sont mises à jour en permanence ; les Signataires pourraient donc avoir besoin d'examiner et de mettre à jour périodiquement les informations concernant leur pays. Lors de la réalisation des tâches liées aux sites, le TAG n'a pas pu faire correspondre certaines informations relatives aux sites actuellement inscrits au Tableau 3 (selon la MOS3) avec les données actuelles ; le TAG met donc en évidence ces cas dans l'Annexe B, et il est demandé aux Signataires d'examiner et de mettre à jour leur partie du Tableau 3 si nécessaire. Les changements de codes de sites détectés par le TAG sont consignés dans l'Annexe B ; les Signataires pourront identifier d'autres mises à jour nécessaires.

Les sites sont classés par ordre alphabétique par région : Afrique, Asie, Asie centrale, Europe, Moyen-Orient, et au sein de chaque région, par ordre alphabétique de pays. Les sites qui ont été radiés sont marqués « DELISTED » dans la colonne « Code de site actuel », et les détails sont fournis. Lorsqu'un site a été scindé, le code d'origine apparaît plus d'une fois dans la colonne « Code de site du Tableau 3 (MOS3) », chaque site résultant recevant un nouveau code distinct dans la colonne « Code de site actuel ». Lorsque des sites ont été fusionnés, le code du nouveau site, plus vaste, figure dans la colonne « Code de site actuel », et le changement est expliqué dans la colonne « Détail du changement ». Lorsqu'une ZICO ou une ZCB a été radiée, elle n'apparaît plus dans le jeu de données actuel des ZICO/ZCB.

Les sites présentant les changements mentionnés ci-dessus peuvent être retrouvés à l'aide du « Code de site actuel » dans les bases de données ZICO (<https://datazone.birdlife.org/search>), ZCB (<https://www.keybiodiversityareas.org/en/sites>) ou ZPS (<https://www.eea.europa.eu/en/datahub/datahubitem-view/6fc8ad2d-195d-40f4-bdec-576e7d1268e4>) correspondantes. Les Signataires souhaiteront peut-être discuter des changements apportés à leur partie du Tableau 3 avec d'autres parties prenantes nationales, et les partenaires de BirdLife pourraient disposer d'informations complémentaires sur les ZICO/ZCB (<https://www.birdlife.org/regions-and-partners>).

Middle East	Iraq	8045	Haur Al Sa'adiyah	KBA	Site perdu	radié			Site has now been de listed; By 2005, most of the marsh area had been turned into agricultural fields, and the rest was dry and thus no longer qualifying as an IBA (nor is there as yet evidence that it meets KBA Criteria for non-bird fauna or IPA Criteria for plants). Some of these agricultural fields were still exploited as wheat farms at the time of the survey, but the majority of them were abandoned perhaps because of high soil salinity.
Middle East	Iraq	8053	Haur Al Rayan and Umm Osbah	KBA	Site perdu	radié			Site has now been de listed; Unfortunately, today this marsh is a dry agricultural area, which the local people do not want re-flooded and it no longer qualifies as an IBA nor is there yet evidence that it meets KBA (non-avian) or IPA criteria.
