Current status

- **Transition into the implementation phase** – Preparatory and administrative work is largely completed, and activities across the work packages are gaining momentum.
- **Data analysis has started** – In particular, the first data collection and analysis activities are already underway.
- **Timeline currently being updated** – Most activities have already been revised based on the latest developments, while a few remaining updates are still being incorporated.
- **Next phase** – Increasing focus on technical implementation,workshops, data analysis, and collaboration across work packages.

Updated Timeline
