# Birds Protection Society Kingdom of Saudi Arabia

1<sup>st</sup> Meeting of the South-West Asia Illegal Taking of Migratory  
Birds Intergovernmental Task Force

20-21 May 2025, Riyadh, Saudi Arabia

# The Birds in Saudi Arabia

- The Kingdom's territory is considered one of the richest regions of the Arabian Peninsula in biodiversity,
- All species endemic to the Arabian Peninsula are found in the Kingdom of Saudi Arabia,
- Most regions of the Kingdom are suitable for bird watching in all months of the year,
- There is an increasing interest among citizens to support the conservation of birds and increasing number of birdwatchers and birds photographers in the Kingdom,

# Vision and mission of the BPS

## Vision

Community leadership in bird protection through sustainable programs and activities

## mission

Preserving birds and their habitats through excellence in developing community awareness programs, training, participation, and documentation of volunteer and scientific work to support bird protection efforts in the Kingdom

# Strategic objectives of the BPS

- 1 Qualification, training and development in the field of bird conservation
- 2 Community awareness of the importance of birds in our lives and the wrong and harmful practices to birds live
- 3 Participate and support volunteer work to support bird's conservation efforts
- 4 Contributing to the protection and preservation of birds from extinction
- 5 Promoting economic diversification by contributing to the development of sustainable eco-tourism related to birdwatching
