

TEMPLATE FOR THE SUBMISSION OF NATIONAL REPORTS

GENERAL INFORMATION

Signatory/Range State: Which agency or institution has been primarily responsible for the preparation of this report? The Marine Science Station, PO Box 195, Aqaba-Jordan
List any other agencies, institutions, or NGOs that have provided input: Aqaba Marine Park Authority, Aqaba Special Economic Zone Authority (ASEZA) , Aqaba-Jordan
Memorandum in effect in Signatory State since (dd/mm/yyyy): Not yet
Date of report being submitted: (dd/mm/yyyy): 6 July 2010
Designated Focal Point (and full contact details): Dr. Salim Al-Moghrabi, The commissioner of Environment, Environment department, ASEZA, Aqaba 77110, Jordan Smoghrabi@aseza.jo

INSTRUCTIONS FOR COMPLETION:

The purpose of completing the national report is to provide information on your country's implementation of the Dugong MoU including, as far as possible, contributions of cooperating non-governmental partners. For each main objective and its associated sub-objectives, you are a required to rate an order of priority (High, Medium or Low) from a national as well as sub-regional perspective. This information will allow us to collate regional and global priorities for conservation and management actions. It will also give an indication of what has been done already (helping to avoid duplication of effort); what is generally not being done (gaps that need to be addressed); and what interventions or specific assistance may be required?

The reporting template is divided into these nine main objectives, and asks specific questions in relation to the activities that need to be carried out to fulfil those objectives.

To check the boxes, bring cursor to the middle of the check box and double click with left mouse button on the box field, select default value "checked" and "ok".

Text boxes can be expanded to accommodate longer answers or to explain and provide additional information, beyond what is requested. Details of future plans are especially encouraged. Wherever possible, please try to indicate the source of information used to answer a particular question, if a published reference is available. Remember that you are sharing information with other countries about your progress, so that it may be of benefit to them.

Implementation will be assessed in terms of the nine objectives of the Conservation and Management Plan (CMP). A process for self-assessment of effectiveness and completeness of actions undertaken – intended to stimulate reflection within a given Signatory State/Party on what more could or should be done in relation to a particular activity will be the basis for a workshop to be held in association with the First Official Signatory State Meeting on 4-6 October 2010 in Abu Dhabi.

Please submit the completed report to the UNEP/CMS Office – Abu Dhabi by email (CmsOffice.ae@cms.int) as a Word attachment. Feel free to attach additional material (published reports, maps, etc.) to this template and send them separately by e-mail or by post.

OBJECTIVE 1: REDUCE DIRECT AND INDIRECT CAUSES OF DUGONG MORTALITY

1.1 Threats facing dugong population

What has your country done to identify, assess and evaluate the threats to dugong populations? What kind of measures has your country developed to address these threats? Please check box when applicable and provide a specific description on the free text field* below.

- | P | C | PI | NA | P-Partial | C-Completed | PL-Planned | NA-Not Applicable | |

OBJECTIVE 2: IMPROVE UNDERSTANDING THROUGH RESEARCH AND MONITORING

2.1 Dugong populations and habitats

What has your country done so as to determine the distribution and abundance of dugong populations to provide a base for future conservation efforts and actions? Please check box when applicable and provide a specific description on the free text field* below.

P C PI NA P-Partial C-Completed PL-Planned NA-Not Applicable

Conducted baseline studies or gather secondary information on dugong populations using cost effective techniques where possible, including community-based monitoring

Other, please describe:

Continue monitoring the sea grass meadows along the coast in order to provide early warnings on the threats that might impact them. Hence, affect the foraging habitat for both turtles and dugongs.

** Free text field for a specific description on measures developed:*

Organize and best manage the utilization of coral reef and grass bed habitats specially at the declared protected areas along the coast. This includes sustainable monitoring of water quality and benthos. This is implemented by Marine science station being a technical arm of Aqaba Special Economic Zone as well as the coastal patrolling for fishers and tourist activities.

2.2 Dugong research

What has your country done to conduct research and monitoring into dugong? Please check box when applicable and provide a specific description on the free text field* below.

P C PI NA P-Partial C-Completed PL-Planned NA-Not Applicable

Initiated and/or continued long-term monitoring of priority dugong populations at appropriate spatial scales

Identified migratory routes through the use of techniques such as genetic studies and/or satellite tracking where appropriate

Carried out studies on dugong population dynamics and survival rates

Promoted the use of traditional ecological knowledge in research and management studies, where possible

- Involved local communities in research and monitoring programmes with training as required
- Reviewed periodically and evaluated research and monitoring activities
- Identified and included priority research and monitoring needs in regional and sub-regional action plans
- Conducted collaborative studies and monitoring of genetic identity, conservation status, migrations, and other biological and ecological aspects of dugongs

3.2 Protect dugong habitats

What has your country done to establish necessary measures in order to protect and conserve dugong habitats? Please check box when applicable and provide a specific description on the free text field* below.

- P C PI NA P-Partial C-Completed PL-Planned NA-Not Applicable
- Designated and managed protected/conservation areas, sanctuaries or temporary exclusion zones in areas of critical habitat, or took other measures (e.g. modification of fishing gear, banning destructive fishing practices, restrictions on vessel traffic) to remove threats to such areas and involving the local community as much as possible
- Considered protecting dugong habitats as part of ecosystem based management (e.g. networks of marine protected areas)
- Developed incentives for adequate protection of areas of critical habitat outside protected areas
- Assessed the environmental impact of marine and coastal development and other human activities on dugong populations and their habitats
- Monitored and promoted the protection of water quality from land-based and maritime pollution, including marine debris, which may adversely affect dugongs and their habitats
- Strengthened the application of existing bans on the use of poisonous chemicals and explosives in the exploitation of marine resources
- Other, please describe:

The national monitoring program include all aspects of marine environment, physical, chemical and biological (benthos, grass beds, corals and intertidal zones).

OBJECTIVE 6: ENHANCE NATIONAL, REGIONAL AND INTERNATIONAL COOPERATION

6.1 Combat illegal trade

What has your country done in order to collaborate with and assist Signatory and non-Signatory States to combat illegal international and domestic trade? What kind of measures have been developed to cooperate in enforcement activities relating to dugong products? Please check box when applicable and provide a specific description on the free text field* below.

P C PI NA P-Partial C-Completed PL-Planned NA-Not Applicable
 Encouraged Signatory States, that have not already done so, to become Parties to the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES)
 Reviewed at a national level, compliance with obligations under CITES relating to illegal international trade in dugong parts or products
 Facilitated better compliance with CITES through training of relevant authorities in cooperation with other Signatory States, the CITES Secretariat and other relevant organisations
 Identified routes of international illegal trade through monitoring, and sought cooperation to take action to prevent, deter and, where possible, eliminate it
 Exchanged and discussed information on compliance and illegal trade issues at regular intervals, such as through annual reporting to the MoU Secretariat and at meetings of the Signatory States
 Identified, prevented, deterred and, where possible, eliminated domestic illegal trade through monitoring, implementation of legislation, identification of gaps in enforcement capabilities in each country, and training of enforcement officers
