**I(b). Additional General Information**
Which other government departments are involved in activities/initiatives for the conservation of migratory species in your country? (Please list.)

- Institute of Zoology
- Protected Areas related to State Committee for Nature Protection and Ministry of Agriculture and Water Management (Forestry Division)

If more than one government department is involved, describe the interaction/relationship between these government departments:

Experts from Institute of Zoology are invited by both state agencies for the conducting of expertise and survey within protected area system in RUz.

List the main non-governmental organizations actively involved in initiatives for the conservation of migratory species in your country, and describe their involvement:

- Uzbekistan Zoology Society.

Describe any involvement of the private sector in the conservation of migratory species in your country:

- None.

Note any interactions between these sectors in the conservation of migratory species in your country:

- None.
II. Appendix I species

1. BIRDS

1.1 General questions on Appendix I bird species

<p>| | | |</p>

1.2 Questions on specific Appendix I bird species

The following section contains a table for each Appendix I bird species for which your country is considered to be a Range State. Please complete each table as appropriate, providing information in summary form. Where appropriate, please cross-reference to information already provided in national reports that have been submitted under other conventions (e.g. Convention on Biological Diversity, Ramsar Convention, CITES). (Attach annexes as necessary.)

Species *Haliaeetus albicilla* – Common Name(s) White-tailed Eagle

<p>| | | |</p>
<table>
<thead>

3 Summarise information on population size, trends and distribution (if known): 1 breeding pair is known from Sudochie wetland (North of Uzbekistan, Karakalpakstan Autonomy) in 2000-2002, first confirmed breeding of WTSE in Uzbekistan. It is usual migratory and wintering species within plain wetlands of Uzbekistan, sometimes occurring in significant accumulations on the islands of large lakes – 20-30 birds in the roosting places together, often migrate and winter by families (2 adult birds + 1 young) which keep each other before spring. During winter and migration on the water-bodies with significant accumulations of waterfowls the high number of WTSE can gather – from 15-20 to 50-70 eagles at the same time. The expert assessment of wintering birds is more than 350-400 in Uzbekistan. (Expert assessment by E. Kreuzberg and Ye.Lanovenko)

4 Indicate (with an ‘X’) and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available.)

- Research
- Monitoring
- Species protection
- Species restoration
- Habitat protection
- Habitat restoration
- Other

5 If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

6 Describe any future activities that are planned for this species:

Species *Aquila heliaca* – Common Name(s) Imperial Eagle

1 Is your country a Range State for this species? ☒ Yes ☐ No

3 Summarise information on population size, trends and distribution (if known): There are few records about breeding of Imperial Eagle on the north of Kyzylkum desert in Uzbekistan, last years the birds are observed in Kuldjuktau mnts. – Kyzylkum desert – north of Bukhara province. Wintering pairs and single birds are observed in the southern regions of republic – on the border with Turkmenistan and Afghanistan. Usually only single birds are observed, sometimes pairs and families (Expert assessment by E. Kreuzberg and A.Filatov)
4. Indicate (with an ‘X’) and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available.)

☐ Research
☐ Monitoring
☐ Species protection
☐ Species restoration
☐ Habitat protection
☐ Habitat restoration
☐ Other

5. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

6. Describe any future activities that are planned for this species:

---

**Species Falco naumanni** – Common Name(s) Lesser Kestrel

1. Is your country a Range State for this species? ☒ Yes ☐ No

3. Summarise information on population size, trends and distribution (if known): At past there were known the breeding colonies on the south of republic from tens to hundred nests, now one of such places destroyed (habitats), other were not surveyed for long period of time. At present, this species nestings on the Uzbekistani part of the Plateo Ustiurt (about 5 pairs per 10 km (Ye.Lanovenko). Usually in Uzbekistan this species observed during migration – in April – beginning of May by spring and in September – beginning October by autumn – sometimes in significant flocks – on Djizak pass and in Kyzylkum desert.

4. Indicate (with an ‘X’) and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available.)

☐ Research
☐ Monitoring
☐ Species protection
☐ Species restoration
☐ Habitat protection
☐ Habitat restoration
☐ Other

5. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

6. Describe any future activities that are planned for this species:

---

**Species Grus leucogeranus** – Common Name(s) Siberian Crane

1. Is your country a Range State for this species? ☒ Yes ☐ No

3. Summarise information on population size, trends and distribution (if known): There are known some new records on the observation of single Siberian Cranes in Uzbekistan – on Aydar Lake (by end of March 2003) and on the south of Bukhara region (near Zekry wetlands) in October 2003. (Compiled by Ye.Lanovenko)

<tr>
<td>3</td>
<td>Summarise information on population size, trends and distribution (if known):  Rare migratory and wintering species. This species was extremely rare recorded in past and only in the region of Aral Sea. Last decade the distribution within new wetlands on the south of Uzbekistan is observed – from Aydar, Karakir lakes to Amudarya valley near Termez. Usually recorded in the flocks from 15 to 30 – 40 individuals. On the inquest data – the most rare than Greylag, but last years can be observed regularly (expert assessment by E. Kreuzberg). In the Amudarya flood-land near Termez in January 2003 and 2005 we sow flack about 150 and 500 birds (Ye.Lanovenko).</td>
</tr>

</tr>
</tbody>
</table>

3 Summarise information on population size, trends and distribution (if known): One from the most rare from threatened species. In Surkhandrya region were recorded in 2003 one bird and in 2005 7 birds. In the eastern part of Aydarkul lake regularly observed migrating flock about 15-20 birds (expert assessment by Ye. Lanovenko).

4 Indicate (with an ‘X’) and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available.)

- Research
- Monitoring
- Species protection
- Species restoration
- Habitat protection
- Habitat restoration
- Other

5 If no activities have been carried out for this species in the reporting period, what has prevented such action being taken? Species rarity and casual character of observation.

6 Describe any future activities that are planned for this species:

---

**Species** *Marmaronetta angustirostris* – Common Name(s) Marbled Teal

1 Is your country a Range State for this species? ☒ Yes ☐ No

3 Summarise information on population size, trends and distribution (if known): This species was known as almost extinct in republic, before beginning of 1990th, when the breeding hatches were discovered on the small lakes near Bukhara ecocenter. Researches conducted in this time allowed to study the breeding biology and ecology in the conditions of Uzbekistan. In 1996 – 1997 there was conducted the species survey in Bukhara region, which shown the current distribution of Marbled teal in Bukhara region of Uzbekistan. Later there was conducted the species monitoring in the places where it was found, which shown that species status is unstable and depended from water-fluctuation in the secondary water-reservoirs of the desert zone. At the same time, there is a tendency of species adaptation to new conditions which should be studies (expert assessment by E. Kreuzberg). Sometimes few birds wintering in Southern Uzbekistan in Bukhara region. In 2004 we sow one flock about 100 birds on the bank of Dengizkul Lake (Ye.Lanovenko)

4 Indicate (with an ‘X’) and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available.)

If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

Describe any future activities that are planned for this species:

---

**Species Aythya nyroca – Common Name(s) Ferruginous Pochard, Ferruginous Duck**

1. Is your country a Range State for this species? [ ] Yes [ ] No

3. Summarise information on population size, trends and distribution (if known): Ferruginous Duck is not yet so threatened as some other species in Uzbekistan. It is quite usual during breeding and migration. During breeding it is found on the small secondary water-reservoirs in Uzbekistan and in the natural lakes where having the good breeding success. Migration in Uzbekistan is observed in September – beginning of October when flocks from 5-12 to 30-40 birds can be observed, during wintering last years mostly single birds and small flocks are observed (expert assessment by E. Kreuzberg).

4. Indicate (with an ‘X’) and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available.)

6. Describe any future activities that are planned for this species:

---

**Species Oxyura leucocephala – Common Name(s) White-headed Duck**

1. Is your country a Range State for this species? [ ] Yes [ ] No

3 Summarise information on population size, trends and distribution (if known): This species was almost unknown in Uzbekistan before autumn of 1999 when the large accumulations of WHD on the Sudochie lake (near Aral Sea) were observed during migration in October, and in this season (winter) the wintering accumulations were found on Dengizkul lake (south of Bukhara region on the boundary with Turkmenistan). The further observations has shown that the wintering zone of WHD has distributed in the secondary water-reservoirs of Bukhara region, but main accumulations (about 5 thousand) still are kept on Dengizkul lake during wintering. About 1200 birds and 35 breeds were counted in breeding season 2000 in the Sudochye Lake. At the same time there is observed the shift of breeding birds from North to South. The analysis of current situation will be made in the end of 2005 after execution of special project on WHD and preparation of its single species Action Plan (expert assessment by E. Kreuzberg and Ye.Lanovenko).

4 Indicate (with an ‘X’) and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available.)

- Environmental Assessment

- Other

5 If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

6 Describe any future activities that are planned for this species:

---

**Species Pelecanus crispus** – Common Name(s) Dalmatian Pelican

1. Is your country a Range State for this species? ☒ Yes ☐ No

3 Summarise information on population size, trends and distribution (if known): Firstly species breeding habitats were destroyed in the result of Aral Sea decline, but at present the restoration of breeding colonies (not big yet) is observed on Sudochie wetland and other water-reservoir of lower Amu-Darya river. The stable wintering is observed on Tudakul water-reservoir last years, where the accumulations from 100 to several hundreds (until 600) are observed last years (assessment made by E. Kreuzberg and Ye.Lanovenko).

4 Indicate (with an ‘X’) and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available.)

**Species Pelecanus onocrotalus** – Common Name(s) White Pelican

1. Is your country a Range State for this species?  
   - Yes  
   - No

3. Summarise information on population size, trends and distribution (if known): Firstly species breeding habitats were destroyed in the result of Aral Sea decline, but at present the restoration of breeding colonies is observed on Sudochie wetland and other water-reservoir of lower Amu-Darya river. In the breeding season of 2001 we counted about 6-8 thousand of WP in the Sudochie wetland. Non breeding birds wide distributed on the wetlands of Uzbekistan in spring and summer time. In the warm winters the single birds stay on the southern water-reservoirs of Uzbekistan. During migration and breeding it is more numerous than Dalmatian Pelican (assessment made by E. Kreuzberg and Ye.Lanovenko).

4. Indicate (with an ‘X’) and briefly describe any activities that have been carried out in favour of this species in the reporting period.  (Please provide the title of the project and contact details, where available.)

### 3.1 General questions on Appendix I marine turtles

1. Identify the Ministry, agency/department, or organisation responsible for leading actions relating to Appendix I listed marine turtles:

2. Is the taking of all Appendix I marine turtles prohibited by the national implementing legislation cited in Table I(a) (General Information)?
   - Yes
   - No
   If other legislation is relevant, please provide details:

2a. If the taking of Appendix I marine turtles is prohibited by law, have any exceptions been granted to the prohibition?
   - Yes
   - No
   If Yes, please provide details (Include the date on which the exception was notified to the CMS Secretariat pursuant to CMS Article III(7)):

3. Identify any obstacles to migration that exist in relation to Appendix I marine turtles:

3a. What actions are being undertaken to overcome these obstacles?

3b. What assistance, if any, does your country require in order to overcome these obstacles?

4. What actions have been taken to prevent, reduce or control factors that are endangering or are likely to further endanger species of marine turtles, including strictly controlling the introduction of, or controlling or eliminating, already introduced exotic species (Article III(4)(c))?

4a. Describe any factors that may limit action being taken in this regard:

4b. What assistance, if any, does your country require to overcome these factors?

### 3.2 Questions on specific Appendix I marine turtles

If you have information indicating that your country should be considered a Range State for any marine turtle species that is listed in CMS Appendix I, please complete a table (provided below) for each species.

<th></th>
</tr>
</thead>
</table>
| 1 | Identify the Ministry, agency/department, or organisation responsible for leading actions relating to Appendix I listed terrestrial mammals (other than bats):  
Institute of Zoology of Uzbekistan Academy of Science. |
| 2 | Is the taking of all Appendix I terrestrial mammals (other than bats) prohibited by the national implementing legislation cited in Table I(a) (General Information)?  
If other legislation is relevant, please provide details: | Yes | No |
| 2a | If the taking of Appendix I terrestrial mammals (other than bats) is prohibited by law, have any exceptions been granted to the prohibition?  
If Yes, please provide details (Include the date on which the exception was notified to the CMS Secretariat pursuant to CMS Article III(7)): Limited hunting for special occasion (captivity, research) | Yes | No |
| 3 | Identify any obstacles to migration that exist in relation to Appendix I terrestrial mammals (other than bats):  
Poaching, human activity (livestock, agriculture), civil war (at past) |
| 3a | What actions are being undertaken to overcome these obstacles?  
Hunting prohibition and poaching control, establishment of protected areas, propaganda nature conservation |
| 3b | What assistance, if any, does your country require in order to overcome these obstacles?  
Development of alternative issue of income, improvement of the management of protected areas, development nature conservation educational programs (especially for local communities); improvement of transborder cooperation |
| 4 | What actions have been taken to prevent, reduce or control factors that are endangering or are likely to further endanger species of terrestrial mammal (other than bats), including strictly controlling the introduction of, or controlling or eliminating, already introduced exotic species (Article III(4)(c))? |
| 4a | Describe any factors which limit action being taken in this regard: |
| 4b | What assistance, if any, does your country require to overcome these factors? |

### 4.2 Questions on specific Appendix I terrestrial mammals (other than bats)

The following section contains a table for each Appendix I terrestrial mammal species (other than bats) for which your country is considered to be a Range State. Please complete each table as appropriate, providing information in summary form. Where appropriate, please cross-reference to information already provided in national reports that have been submitted under other conventions (e.g. Convention on Biological Diversity, Ramsar Convention, CITES). (Attach annexes as necessary.)

#### Species *Uncia uncia* — Common Name(s) Snow Leopard

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Is your country a Range State for this species?</td>
</tr>
</tbody>
</table>
3. Summarise information on population size, trends and distribution (if known): Snow leopard occurs in Western Tien-Shan (Ugam, Pskem, Chatkal ridges) and Western Pamir Alai (Turkistan Zeravshan, Hissar ridges), totally about 10 thousand sq.km. It never was numerous, last decades the numbers have been decreasing. On the expert assessment from 30 to 50 animals can be observed in Uzbekistan in the various seasons of year. Working group on Snow Leopard was established in 1999 and continues to work in Uzbekistan (expert assessment by A. Esipov and E. Bykova).

4. Indicate (with an ‘X’) and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available.)

- [X] Research
- [X] Monitoring
- [X] Species protection
- [ ] Species restoration
- [X] Habitat protection
- [ ] Habitat restoration
- [X] Other: Education programmes

5. If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?

6. Describe any future activities that are planned for this species?

Clarifying of the level of poaching in the region, drivers for poaching behavior and looking for alternative sources of income and to catalyze the development of an effective wildlife management in snow leopard range.

If you have information indicating that your country should be considered a Range State for any other terrestrial mammal species (other than bats) that is listed in CMS Appendix I, but which is not included in the tables above, please complete a table (provided below) for each species.

AEWA was signed by Uzbekistan in 2003

2. QUESTIONS ON CMS AGREEMENTS

2.1 Questions on the development of new CMS Agreements relating to birds

1 In the current reporting period, has your country *initiated* the development of any CMS Agreements, including Memoranda of Understanding, to address the conservation needs of Appendix II bird species? ☒ Yes ☐ No
   If Yes, what is the current state of development? (Central Asian Flyway)

2 In the current reporting period, has your country *participated* in the development of any CMS Agreements, including Memoranda of Understanding, which address the conservation needs of Appendix II bird species? ☒ Yes ☐ No
   If Yes, please provide details: AEWA (Central Asian Flyway)

3 If your country has initiated or is participating in the development of an Agreement or Memorandum of Understanding, what assistance, if any, does your country require in order to initiate or participate in the instrument’s development?

4 Is the development of any CMS Agreement for birds, including Memoranda of Understanding, planned by your country in the foreseeable future? ☐ Yes ☒ No
   If Yes, please provide details: (Central Asian Flyway)

2.2 Questions on the development of new CMS Agreements relating to marine mammals

1 In the current reporting period, has your country *initiated* the development of any CMS Agreements, including Memoranda of Understanding, to address the conservation needs of Appendix II marine mammal species? ☐ Yes ☒ No
   If Yes, what is the current state of development?

2 In the current reporting period, has your country *participated* in the development of any CMS Agreements, including Memoranda of Understanding, which address the conservation needs of Appendix II marine mammal species? ☐ Yes ☒ No
   If Yes, please provide details:

3 If your country has initiated or is participating in the development of an Agreement or Memorandum of Understanding, what assistance, if any, does your country require in order to initiate or participate in the instrument’s development?

</table>

<table>
<thead>
<tr>
<th></th>
<th>Are migratory species and their habitats addressed by your country’s national biodiversity strategy or action plan?</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>☑ Yes □ No</td>
</tr>
</tbody>
</table>

If Yes, please indicate and briefly describe the extent to which it addresses the following issues:

- ☐ Conservation, sustainable use and/or restoration of migratory species
- ☐ Conservation, sustainable use and/or restoration of the habitats of migratory species, including protected areas
- ☐ Actions to prevent, reduce or control factors that are endangering or are likely to further endanger migratory species (e.g. alien invasive species or by-catch)
- ☐ Minimising or eliminating barriers or obstacles to migration
- ☐ Research and monitoring of migratory species
- ☐ Transboundary co-operation

<table>
<thead>
<tr>
<th></th>
<th>Does the conservation of migratory species currently feature in any other national or regional policies/plans (apart from CMS Agreements)</th>
</tr>
</thead>
<tbody>
<tr>
<td>3</td>
<td>☑ Yes □ No</td>
</tr>
</tbody>
</table>

If Yes, please provide details: At present time implement the regional project on development regional econet, which include the places of concentration of migrating species of birds.

<table>
<thead>
<tr>
<th>3a</th>
<th>Do these policies/plans cover the following areas (if Yes, please provide details):</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
<td>No</td>
</tr>
<tr>
<td>☐</td>
<td>☐ Exploitation of natural resources (e.g. fisheries, hunting, etc.)</td>
</tr>

</table>

| 1b | Identify the agency, department or organization responsible for leading on this action in your country: |

### VI. Policies on Satellite Telemetry
## VII. Membership

1. Have actions been taken by your country to encourage non-Parties to join CMS and its related Agreements?  
   - Yes  
   - No

If Yes, please provide details. (In particular, describe actions taken to recruit the non-Parties that have been identified by the Standing Committee as high priorities for recruitment.)

1a. Identify the agency, department or organization responsible for leading on this action in your country:

## VIII. Global and National Importance of CMS

1. Have actions been taken by your country to increase national, regional and/or global awareness of the relevance of CMS and its global importance in the context of biodiversity conservation?  
   - Yes  
   - No

If Yes, please provide details: Create “Crane Day” for different social groups (local peoples, local administrations, students, hunters)

2. Identify the agency, department or organization responsible for leading on this action in your country:  
   Uzbekistani Crane Working Group (Associative member of Eurasian Crane Working Group)

## IX. Mobilization of Resources

1. Has your country made financial resources available for conservation activities having direct benefits for migratory species in your country?  
   - Yes  
   - No

If Yes, please provide details (Indicate the migratory species that have benefited from these activities):

2. Has your country made voluntary contributions to the CMS Trust Fund to support requests from developing countries and countries with economies in transition?  
   - Yes  
   - No

If Yes, please provide details:

3. Has your country made other voluntary financial contributions to support conservation activities having direct benefits for migratory species in other countries (particularly developing countries)?  
   - Yes  
   - No

If Yes, please provide details (Indicate the migratory species that have benefited from these activities):

4. Has your country provided technical and/or scientific assistance to developing countries to facilitate initiatives for the benefit of migratory species?  
   - Yes  
   - No

If Yes, please provide details (Indicate the migratory species that have benefited from these activities):

5. Has your country received financial assistance/support from the CMS Trust Fund, via the CMS Secretariat, for national conservation activities having  
   - Yes  
   - No
direct benefits for migratory species in your country?
If Yes, please provide details (Indicate the migratory species that have benefited from these activities):

6. Has your country received financial assistance/support from sources other than the CMS Secretariat for conservation activities having direct benefit for migratory species in your country?
If Yes, please provide details (Indicate the migratory species that have benefited from these activities):

X. Implementation of COP Resolutions and Recommendations

Please summarize the measures undertaken by your country to implement the substantive, operational Resolutions and Recommendations adopted by the Conference of the Parties, where these have not been mentioned elsewhere in this report, giving particular emphasis to those identified below (as appropriate).

Resolutions

Resolution 6.2 – By-catch, and Recommendation 7.2 – Implementation of Resolution 6.2 on By-catch:

Resolution 6.3 – Southern Hemisphere Albatross Conservation:

Resolution 7.2 – Impact Assessment and Migratory Species:

Resolution 7.3 – Oil Pollution and Migratory Species:

Resolution 7.4 – Electrocution of Migratory Birds:

Resolution 7.5 – Wind Turbines and Migratory Species:

Resolution 7.9 – Cooperation with Other Bodies and Processes:

Resolution 7.15 – Future Action on the Antarctic Minke, Bryde’s and Pygmy Right Whales under the Convention on Migratory Species:

Recommendations

Recommendation 7.5 – Range State Agreement for Dugong (Dugong dugon) Conservation:

Recommendation 7.6 – Improving the Conservation Status of the Leatherback Turtle (Dermochelys coriacea):

Recommendation 7.7 – America Pacific Flyway Programme:

Other resolutions/recommendations:

There is a list of Governmental laws and guidelines on the protection of wild animals and their migration routes. Protected areas have been designated along migration routes. Agreements have been concluded between States (i.e. the newly independent states) for the protection of migratory species (Saiga).

Other remarks:
### Annex: Questions on specific Appendix II species

The tables below contain the list of all species listed in Appendix II. Boxes have been checked to indicate the species for which your country is considered to be a Range State. Please amend the boxes where appropriate. (If you wish to provide further information on any of these species, please attach as an annex.) Please also provide published distribution references where available.
