

**CONVENTION ON  
MIGRATORY  
SPECIES**

Distribution: General

UNEP/CMS/Resolution 8.18 (Rev.COP12)

Original: English

**INTEGRATION OF MIGRATORY SPECIES INTO NATIONAL BIODIVERSITY  
STRATEGIES AND ACTION PLANS AND INTO ON-GOING AND FUTURE  
PROGRAMMES OF WORK UNDER THE CONVENTION ON BIOLOGICAL DIVERSITY**

Adopted by the Conference of the Parties at its 12<sup>th</sup> Meeting (Manila, October 2017)

*Recalling* Resolution 7.9 (Bonn, 2002) which invited the Secretariat to collaborate with the Secretariat of the Convention on Biological Diversity (CBD) in generating guidance on integrating migratory species into national biodiversity strategies and action plans (NBSAPs) and into on-going and future programmes of work under the CBD,

*Recalling* the adoption by the CBD Conference of the Parties (COP) at its sixth meeting of the CBD Strategic Plan and *further recalling* that the CBD COP stated that the CBD Strategic Plan would be implemented through the CBD programmes of work, implementation of NBSAPs, and other national, regional and international activities,

*Also recalling* that the CBD COP at its seventh meeting decided to develop a framework to enhance the evaluation of achievements and progress in the implementation of the CBD Strategic Plan and that, as a part of this framework, it decided to establish goals and sub-targets to help assess progress towards the target and promote coherence among the programmes of work of the Convention,

*Noting* the adoption of the CMS Strategic Plan, whose purpose is to ensure a coherent and strategic approach to the implementation of the Convention at national, regional and global levels,

*Recognizing* that implementation of the strategic plans of both Conventions will require greater cooperation between the two conventions and that the integration of migratory species into NBSAPs and on-going and future programmes of work under the CBD represents the basis for such cooperation, and

*Recalling* also the need to develop a revised CBD-CMS Joint Work Programme,

*The Conference of the Parties to the  
Convention on the Conservation of Migratory Species of Wild Animals*

1. *Invites* CMS Parties to take the necessary steps at the national level to ensure that migratory species are integrated into NBSAPs, as well as into their other activities to implement the on-going and future programmes of work under the CBD;
2. *Invites* CMS Parties to make use of the indicative list of actions contained in Annex I, and the indicative list of categories of relevant information on migratory species in Annex II, of this resolution as a basis to promote such integration;
3. *Requests* CMS national focal points to cooperate fully with CBD national focal points, NBSAP managers and other national bodies responsible for CBD implementation with a view to ensuring coordination in the implementation of both conventions; and

4. *Further invites* the CMS Secretariat to continue to collaborate with the CBD Secretariat to ensure that on-going and future CBD programmes of work appropriately integrate migratory species at the global level when they are respectively reviewed or developed.

**Annex 1 to the Resolution 8.18****GUIDANCE FOR INTEGRATING MIGRATORY SPECIES INTO NATIONAL BIODIVERSITY STRATEGIES AND ACTION PLANS (NBSAPS) AND OTHER NATIONAL-LEVEL ACTIVITIES TO IMPLEMENT ON-GOING AND FUTURE CBD WORK PROGRAMMES**

To promote the integration of migratory species into NBSAPs, CMS focal points should, if they have not already done so:

- i) Identify the agency or multi-agency body responsible for NBSAP management, establish contact and arrange to participate fully in the national biodiversity planning process;
- ii) Familiarize themselves with the CBD provisions, existing NBSAP guidelines, CBD decisions relevant to the implementation of its Articles 6 to 20 (including the programmes of work, tools and guidance, and the framework for monitoring progress towards the 2010 target), the arrangements and procedures for developing implementing and reviewing the NBSAP, and the current status of the NBSAP;
- iii) Provide relevant NBSAP managers or bodies with information on those migratory species for which the country is a Range State, in particular those already listed on one or both CMS Appendices, those whose conservation status is unfavourable, those which require international agreements for their conservation and management or those that would significantly benefit from the international cooperation that could be achieved by an international agreement;
- iv) Provide information on participation in CMS Agreements and the national commitments deriving from these;
- v) Provide further information on migratory species relevant to the national implementation of CBD Articles 6 to 20, to be considered in the development of a NBSAP (An indicative list of categories of such information is contained in Annex II to this Resolution);
- vi) Provide, as an on-going activity, information on the further identification and monitoring of migratory species, measures taken to conserve such species and their habitats, and other information relevant to the implementation of CBD Articles 6 to 20, as such information becomes available through the implementation of measures undertaken within the framework of CMS and its Agreements, including its Strategic Plan 2006-2011;
- vii) Provide relevant CMS documentation and information, including: amendments to the Appendices, resolutions and recommendations, reports of meetings of CMS and Agreement bodies, details of new and future Agreements and details of outreach and communication activities;
- viii) Provide access to previous CMS national reports and invite the participation of NBSAP bodies and actors in the preparation of future CMS national reports;
- ix) Identify and contact the CBD focal points or other bodies responsible for implementing the different CBD programmes of work in the country with a view to jointly identifying where measures already taken or which could be taken under CMS could contribute to the development of national indicators, goals and sub-targets for, and/or to the further implementation of, the programme of work in question; and
- x) Identify those national measures undertaken in response to the CMS Strategic Plan 2006-2011 that also contribute to the goals and targets of the CBD Strategic Plan and the 2010 biodiversity target, and bring these to the attention of the CBD national focal point or other bodies responsible for implementation of the CBD.

## Annex 2 to the Resolution 8.18

### INDICATIVE LIST OF CATEGORIES OF INFORMATION ON MIGRATORY SPECIES TO BE CONSIDERED IN THE DEVELOPMENT OF A NBSAP<sup>1</sup>

- Available information including CMS Range State lists, on the presence within the country of migratory species listed in the CMS appendices, and their status and trends;
- Details of measures taken:
  - for the *in situ* conservation of migratory species, including for the conservation of habitats and the maintenance of viable populations; for habitat restoration and the recovery of threatened species; for controlling alien species that threaten migratory species; for the preservation and application of traditional knowledge relevant to the conservation and sustainable use of migratory species; to develop relevant legislation or regulatory provisions; or to regulate or manage processes or activities that represent a significant adverse effect on migratory species;
  - for the *ex situ* conservation of migratory species; and
  - for the sustainable use of migratory species;
- Details of:
  - Existing or potential economically and socially sound measures that aim to the conservation and sustainable use of migratory species;
  - Existing or necessary research and training measures, in particular co-operative programmes;
  - Public education and awareness activities that focus on migratory species;
  - Relevant impact assessment measures designed to avoid or minimize adverse impacts of proposed projects on migratory species, including those addressing potential threats from power transmission lines and wind farms;
  - Applications for access to genetic resources or associated traditional knowledge involving migratory species and accompanying benefit sharing arrangements according to international and domestic law;
  - Measures promoting access to and transfer of technology relevant to the conservation and sustainable use of migratory species or which make use of genetic resources derived from migratory species;
  - Measure taken to facilitate the exchange of information relevant to the conservation and sustainable use of migratory species and of relevant international technical and scientific cooperation;
  - Financial resources needed for the conservation and sustainable use of migratory species and of financial resources received for this purpose from the CBD financial mechanism and other bilateral, regional and multilateral channels.
