

Notification 2025/025

7 October 2025

NOTIFICATION TO THE PARTIES

NEW CMS FAMILY CORPORATE WEBSITES LAUNCHED

The CMS Secretariat is pleased to announce the launch of the new CMS website, accessible at <https://www.cms.int>.

This redesigned platform is part of a broader plan of upgrading a total of twenty-five websites of the CMS Family, including those of the Agreements, MOUs, and Initiatives. The new websites offer a harmonized and modern interface, improved navigation, enhanced security, and full mobile responsiveness. Their design also adheres to modern web design standards.

The upgraded websites were developed following a comprehensive review of technological needs and user experiences. A survey of the focal points of all CMS Family instruments also served as a basis to ensure that the new websites can better serve Parties, Signatories, partners, and the public by providing improved access to information and resources.

The development and launch of the new websites also contribute to the implementation of Decision 14.16 on Communications and Information Management.

The Secretariat expresses its sincere appreciation to all colleagues and partners who contributed to the achievement of this major milestone.

For questions and additional information, please contact Mr. Aydin Bahramlouian, Public Information Officer at the CMS Secretariat aydin.bahramlouian@un.org.
