

Convención sobre la Conservación de las Especies Migratorias de Animales Silvestres

Secretaría administrada por el Programa de las Naciones Unidas para el Medio Ambiente

Duodécima reunión del Consejo Científico de la CMS

Glasgow, Escocia, Reino Unido, 31 de marzo a 3 de abril de 2004

CMS/ScC12/Doc.18

LISTA DE ESTADOS DEL AREA DE DISTRIBUCION DE LAS ESPECIES MIGRATORIAS DE ANIMALES SILVESTRES QUE FIGURAN EN LOS APENDICES DE LA CMS

1. Con arreglo al inciso f) del párrafo 4 del artículo IX de la Convención, la presente lista fue recopilada por la Secretaría sobre la base de información facilitada por las Partes y completada por otras fuentes. En ella figuran las especies añadidas a los Apéndices por la Conferencia de las Partes (Bonn: 1985, Ginebra: 1988, 1991, Nairobi: 1994, Ginebra: 1997, Ciudad de Cabo: 1999, Bonn: 2002).
2. La expresión "Estado del área de distribución" que se utiliza en el presente contexto tiene el significado establecido en el párrafo 1 del Artículo I de la Convención:

"...
f) "Area de distribución" significa el conjunto de superficies terrestres o acuáticas que una especie migratoria habita, frecuenta temporalmente, atraviesa o sobrevuela en un momento cualquiera a lo largo de su ruta habitual de migración;

...
h) "Estado del área de distribución" significa, para una determinada especie migratoria, todo Estado (y, dado el caso, toda otra Parte a que se hace referencia en el inciso k) de este párrafo), que ejerza jurisdicción sobre una parte cualquiera del área de distribución de dicha especie migratoria, o un Estado bajo cuyo pabellón naveguen buques que se ocupan de la captura de la especie migratoria en cuestión fuera de los límites de la jurisdicción nacional.

...
k) "Parte" significa un Estado o una organización regional de integración económica constituida por Estados soberanos que tenga competencia para negociar, concluir y aplicar acuerdos internacionales relativos a las materias comprendidas en la presente Convención, respecto de las cuales está en vigor."

3. La presente lista tiene los siguientes fines:
 - Asistir a las Partes en la determinación de si constituyen Estados del área de distribución en el sentido establecido anteriormente;
 - Asistir a la Conferencia de las Partes en la formulación de recomendaciones a las Partes para el mejoramiento del estado de conservación de las especies migratorias, y en el exámen de los avances que se estén realizando de conformidad con los Acuerdos; y
 - Suministrar la información básica necesaria para que el Consejo Científico estudie, coordine y recomiende a la Conferencia de las Partes medidas de conservación adecuadas para las especies enumeradas en los Apéndices I y II.
4. Con objeto de mantener una lista actualizada, en el párrafo 2 del artículo VI de la Convención se pide a las Partes que mantengan informada a la Secretaría sobre las especies migratorias enumeradas en los Apéndices I y II respecto de las cuales se consideren Estados del área de distribución, lo que incluirá suministro de información sobre los buques que navegan bajo su pabellón que se ocupan de la captura de esas especies migratorias fuera de los límites de la jurisdicción nacional y, en la medida de lo posible, información sobre sus proyectos futuros en relación con esa captura.

Por razones de economía, se ha impreso este documento en un tiraje limitado y no será distribuido en la reunión. Se ruega a los delegados traer sus copias a la reunión y a no solicitar copias adicionales

Notas

1. Los nombres de lugares que se indican en la lista corresponden a aquellos empleados tanto en el *United Nations Terminology Bulletin* No. 347/Rev.1 (Naciones Unidas, 1997), en su forma enmendada y el ISO 3166 Estándar Internacional (*International Organisation for Standardisation*, 1988) en su versión enmendada. Los nombres de varios países se han invertido para facilitar la referencia, como se indica a continuación: Congo, República Democrática del; Corea, República de; Corea, República Popular Democrática de; Macedonia, la ex República Yugoslava de; Moldova, República de y Tanzania, República Unida de. Contiene varios nombres abreviados de conformidad con lo que precede, tales como; Reino Unido de Gran Bretaña e Irlanda del Norte (Reino Unido); y Estados Unidos de América (Estados Unidos).
2. Las denominaciones empleadas en la presente lista y la forma en que aparecen presentados los datos no entrañan, de parte de la Secretaría, juicio alguno sobre la condición jurídica de los países, territorios o zonas citados o de sus autoridades, ni respecto de la delimitación de sus fronteras o límites.
3. Los nombres de los Estados del área de distribución siendo Partes en la Convención al 1 de febrero de 2004, aparecen presentados en mayúsculas, como por ejemplo ALBANIA. En caso que una Parte en la Convención haya formulado una reserva con relación a una determinada especie, el nombre de aquella Parte figura subrayado y en caracteres normales, como por ejemplo Noruega.
4. Cuando corresponde, los territorios dependientes, los departamentos de ultramar, las provincias y los estados figuran entre paréntesis a continuación del nombre del Estado en cuestión de conformidad con el modo siguiente. "REINO UNIDO (Montserrat)" significa que solo la isla de Montserrat y no el Reino Unido continental se considera como siendo parte del área de distribución de una especie en particular, en tanto que "REINO UNIDO (incl. Montserrat)" significa que el área de distribución incluirla el Reino Unido continental además de la isla. En caso que la Convención no se aplique a un territorio dependiente, departamento de ultramar etc. de una Parte, el nombre del país figura en caracteres normales, como por ejemplo "Dinamarca (Groenlandia)".
5. "(?)" después de un país listado significa "está sujeto a confirmación".
6. La indicación "(Ex)" a continuación del nombre de un país significa que el taxón está extinguido en ese país. Varias especies han desaparecido solo recientemente en esos países; si su población se recupera es posible que regresen a ciertas partes de su anterior área de distribución. Por esta razón, se ha incluido también a esos países en la lista.
7. La referencia a las "aguas internacionales" que aparece en la lista indica la migración de la especie dentro o por encima del mar o de los océanos fuera de los límites de la jurisdicción nacional, lo que recae dentro del ámbito sustantivo de la Convención, de conformidad con los incisos f) y h) del párrafo 1 del artículo I. El texto entre paréntesis indica las regiones específicas de esas aguas en las que se produce la migración.
8. La lista no diferencia entre categorías de utilización o presencia constante de un lugar por una especie determinada. Por lo tanto, a luz de la información disponible, muchos países definidos como Estados del área de distribución lo fueron a partir de observaciones de utilización ocasional de un hábitat por una especie, por ejemplo *Numenius tenuirostris*, y no de itinerarios de migración fijos.
9. Por lo que se refiere a las Aves enumeradas en el Apéndice II, se incluyeron en las listas actuales los Estados del área de distribución para especies individuales y taxones que incluyen un número reducido de especies. Los Estados del área de distribución relativas a taxones abarcando un gran número de especies se especificarán cuando se negocien Acuerdos sobre determinadas especies o grupos de especies.
